CONTENTS.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 *and* 1892.

THE Council met at the Council Chamber on Saturday, the 11th November, 1893.

Present:

The HON'BLE SIR ANTONY PATRICK MACDONNELL, K.C.S.I., Offg. Lieutenant-Governor of Bengal, *President.*

The HON'BLE T. T. ALLEN.

The HON'BLE H. J. S. COTTON, C.S.I.

The HON'BLE SIR JOHN LAMBERT, K.C.I.E.

The HON'BLE GONESH CHUNDER CHUNDER.

The HON'BLE D. R. LYALL, C.S.I.

The HON'BLE J. A. BOURDILLON.

The HON'BLE MAULVI ABDUL JUBBAR, KHAN BAHADUR.

The HON'BLE F. R. S. COLLIER.

The HON'BLE MAULVI SYED FAZL IMAM, KHAN BAHADUR.

The HON'BLE MAHARAJA RAVANESHWAR PROSAD SINGH BAHADUR OF GIDHOUR.

The HON'BLE SURENDRANATH BANERJEE.

The HON'BLE MAULVI SERAJUL ISLAM, KHAN BAHADUR.

The HON'BLE P. PLAYFAIR.

The HON'BLE J. G. WOMACK.

THE LIEUTENANT-GOVERNOR'S TOUR CHARGES.

WITH reference to the question No. 1(c), asked on the 22nd July, 1893, by the HON'BLE W. C. BONNERJEE, regarding the cost per annum of making Darjeeling the summer head-quarters of the Bengal Government, the HON'BLE MR. BOURDILLON replied as follows :—

"I have now, in fulfilment of my promise of the 22nd July last, to reply that the annual cost since 1888-89 of making Darjeeling the summer head-quarters of the Bengal Government has been as follows :—

	Rs.
1888-89	30,158
1889-90	29,768
1890-91	29,780
1891-92	37,152
1892-93	37,792 "

RECOMMENDATIONS OF THE PUBLIC SERVICE COMMISSION.

The HON'BLE BABU SURENDRANATH BANERJEE asked—

Will the Government state what further effect has been given to the recommendations of the Public Service Commission beyond what was stated by the HON'BLE MR. COTTON in his reply, given at the meeting of the Council held on the 22nd July last, (1) in connection with the appointment of natives of India to offices hitherto reserved for the Covenanted Civil Service; (2) in connection with the wider employment of natives of India in the higher grades of the Police Service?

The HON'BLE MR. COTTON replied :—

"Both questions referred to are under the consideration of Government."

NUMBER OF CERTAIN CLASSES OF PUBLIC SERVANTS.

The HON'BLE BABU SURENDRANATH BANERJEE asked—

Will the Government lay on the table a statement containing the following heads of information in regard to the following classes of public servants employed in the various offices in connection with the branches of administration under its control:—(1) the number of Natives of India in each office, (2) the number of Eurasians in each office, (3) the number of Europeans in each office; drawing monthly salaries as given below :—(a) from rupees two hundred to rupees four hundred, (b) from rupees four hundred to rupees eight hundred, (c) from rupees eight hundred to rupees one thousand, (d) from rupees one thousand to rupees fifteen hundred, (e) from rupees fifteen hundred to rupees two thousand, (g) from rupees two thousand to rupees three thousand, (h) from rupees three thousand to rupees four thousand?

The HON'BLE MR. COTTON replied :—

"The names of gazetted officers, European, Eurasian and pure Natives of India employed under the Government of Bengal, with the salary each officer receives, are given in the Bengal Quarterly Civil List, which is available to the public. To furnish similar information in regard to non-gazetted officers as well as the information contained in the Civil List in the form stated in the question would involve protracted enquiry and the entertainment of an extra establishment, the labour and cost of which the Government is not prepared to incur. But if the Hon'ble Member will restrict his enquiry to the Civil Service of India, the Provincial Civil Service and the Subordinate Civil Service in Bengal, so far as the number of Europeans, Eurasians and Natives of India is concerned, the information can be procured without much difficulty, and will be supplied."

The HON'BLE BABU SURENDRANATH BANERJEE said:—"I will be glad to have the information which is available."

HIS HONOUR THE PRESIDENT said:—"The information will be furnished."

HINDU RELIGIOUS ESTABLISHMENTS.

The HON'BLE BABU SURENDRANATH BANERJEE asked—

To ask Government whether it is not the case that Act XX of 1863 has proved a failure, and that the Trustees of Hindus Religious Establishments have brought about the extinction of some, and are grossly mismanaging the proceeds of others, and whether there is not great waste of temple funds which are controlled by Mohants all over the Province?

The HON'BLE MR. COTTON replied:—

"There is no recent official information before the Lieutenant-Governor which would justify his expressing an opinion on either portion of this question."

INCREMENTS TO OFFICERS OF THE EDUCATIONAL SERVICE.

The HON'BLE BABU SURENDRANATH BANERJEE asked—

Whether a circular was issued a few months ago by the Director of Public Instruction to the officers of the Education Department, stopping the increments to which they were entitled; (*b*) whether on the protest of some officers of the superior graded service the above circular was withdrawn as regards all such officers of that service, allowing them the increments to which they were entitled; (*c*) whether the same circular was kept in force as regards officers of the Subordinate Service, thus depriving them of the increments to which they were entitled, on the ground that a new scheme had been submitted to the Government of India, remodelling the Subordinate Graded Service of the Education Department; (*d*) whether the scheme regulating the salaries of both branches of the Bengal Educational Service, Superior and Subordinate, received the sanction of the Secretary of State, and whether such sanction has been withdrawn in respect of either of these branches of the service?

The HON'BLE MR. COTTON replied:—

"Some misapprehension appears to exist on the part of the Hon'ble Member in regard to this question, which makes it impossible for me to give categorical replies. The facts are, however, as follows:—The Government in sanctioning promotions from time to time in the Subordinate Educational Service has passed orders to the effect that 'the arrangements sanctioned were subject to the introduction of changes in the Subordinate Educational Service and conveyed no claims to progressive salaries.' These orders were by an oversight made applicable in certain cases to officers of the Superior Educational Service, but the mistake was at once corrected as soon as it was brought to notice unofficially by the Director of Public Instruction. On the 18th February last the following instructions were issued in reply to a letter from the Director, asking for an authoritative interpretation of the Government orders on the subject:—

'The orders were intended to convey that, when an officer is promoted to a higher grade in the Subordinate Educational Service, he enters it on the understanding that the system of increments is probably coming to an end, and that no increment will be given till this is decided: this ruling was necessary in order to prevent complications arising when the Educational Service is re-organised. It does not apply to the Superior Educational Service, as to which no such proposals for abolishing progressive salaries have been made by this Government.

'It should therefore be understood that promotions from a lower to a higher grade of the Subordinate Educational Service, either acting or permanent, will carry with them no title to progressive pay in the higher grade, but those

who now hold acting appointments, and who have already drawn increments in the grades in which they are so acting, will continue to draw any increments which they may be entitled in those grades.'

This answer is given in reply to sub-heads (*a*), (*b*) and (*c*) of the Hon'ble Member's question.

The reply to sub-head (*d*) is that the scheme for re-organising the Educational Service in Bengal, which affects both branches of the Department as at present constituted, has not yet been sanctioned by the Secretary of State."

SEPARATION OF JUDICIAL AND EXECUTIVE FUNCTIONS.

The HON'BLE BABU SURENDRANATH BANERJEE asked—

Whether the attention of the Government has been called to the note published by Mr. R. C. Dutt of the Bengal Civil Service on the separation of judicial and executive functions in the administration of criminal justice, and whether the Government proposes to take any, if so, what, action in connection with the matter?

The HON'BLE MR. COTTON replied:—

"The attention of Government has been drawn to Mr. R. C. Dutt's note by a communication on the subject from the Secretary to the Indian Association, but the Lieutenant-Governor is not in a position at present to make any statement regarding it."

RELIEF MEASURES IN EASTERN BENGAL.

The HON'BLE BABU SURENDRANATH BANERJEE asked—

Will the Government state what advances under the Agricultural Loans Act have been made in the following districts:—Barisal, Faridpur, Noakhali and Tippera, and what measures of relief have been adopted in the aforesaid districts (1) by the Government, (2) by the District Boards, and, lastly, by the local zamindars?

The HON'BLE MR. COTTON replied:—

"There is no distress in the Dacca or Chittagong Divisions which calls for special measures on the part of Government, nor is there such distress anywhere except in a concentrated area, and among a limited number of people in the Bhil tracts of the Faridpur and Backergunge districts. The following sums for advances under the Agriculturists' Loans Act have been allotted to the districts enumerated in the Hon'ble Member's question—

	Rs.
Backergunge	12,500
Faridpur	23,000
Noakhali ... ... }	11,100
Tippera ... ... }	

Public works have been started under the District Boards in accordance with the procedure prescribed for such circumstances, but as yet few labourers have appeared on them. Relief centres have also been opened in the areas referred to. The sum of Rs. 10,000 has been placed at the disposal of the Commissioner of Dacca for expenditure on charitable relief to be granted in aid of district funds and public subscriptions should these prove insufficient. It has been reported to Government that some, not all, of the principal zamindars have been assisting their tenantry with liberality. The Officiating Lieutenant-Governor is satisfied that the measures taken amply meet the necessities of the case."

ANTI-KINE-KILLING AGITATION.

The HON'BLE BABU SURENDRANATH BANERJEE asked—

Whether the Government will organise conciliation committees on the model of those recently established in the North-Western Provinces in such districts

where there have been cow-killing riots or where such disturbances are apprehended, and whether Government will state what measures it proposes to take for the securing of order and the establishment of harmony between the communities in conflict with each other in the aforesaid districts?

The HON'BLE MR. COTTON replied:—

"So long ago as the 8th September last a circular was issued to local officers, requesting them to consider whether in villages where the Gaurakhshini movement had attained any considerable development, and animosity between Hindu and Muhammadans was likely to arise or had arisen, it would not be possible to constitute punchayats or conciliation committees of the leading members of the Hindu and Muhammadan communities for the purpose of promoting mutual forbearance and peaceful relations. The Officiating Lieutenant-Governor regrets, however, to say that, owing to the embittered state of local feeling, his efforts in this direction have been attended with scant success. His Honour's views on the maintenance of order and the establishment of harmony between the communities in conflict with one another have already been published, and he has nothing to add to them at present. The district officers have been instructed to enforce the law with energy against the instigators and promoters of any disturbance."

BENGAL MUNICIPAL ACT, 1884, AMENDMENT BILL.

The HON'BLE MR. COTTON moved that the Hon'ble Mr. Bourdillon be appointed in the place of the HON'BLE MR. RISLEY to the Select Committee on the Bill to amend the Bengal Municipal Act, III of 1884.

The Motion was put and agreed to.

The Council adjourned *sine die*.

GORDON LEITH,

Assistant Secretary to the Govt. of Bengal,
Legislative Department.

CALCUTTA;
The 14th November, 1893.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE ADMINISTRATION OF WARDS AND ATTACHED ESTATES FOR THE YEAR 1892-93.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 13th November, 1893.

RESOLUTION No. 4614.

READ—

The Report of the Board of Revenue on Wards and Attached Estates in the Lower Provinces for the year 1892-93.

Preliminary.

The Report, which was due on the 31st August, reached Government on the 13th September, or one week later than in the preceding year. The report of the Commissioner of Chota Nagpur to the Board was again late by 21 days; that of the Commissioner of Dacca was not received by the Board till six weeks after the date on which it was due, while the statement showing the working of the Certificate Department for Dacca was not furnished by the Commissioner till the 28th August.

Certain suggestions made by Government in connection with the Report for 1891-92 for the improvement of the tables embodied in the Report and its appendices have been duly carried out in the present Report.

The number of Wards' estates under charge of the Court of Wards was 74 and of Attached estates 66, against 75 and 69 respectively in 1891-92; there was thus a decrease of one in the former and of three in the latter.

Revenue and rents due to Government and superior landlords.

2. The total demand for revenue and cesses due to Government was Rs. 49,43,634, of which Rs. 22,447 represent arrears, and Rs. 49,21,187 the current demand. The payments amounted to Rs. 21,812 to the arrear, and Rs. 48,74,022 of the current demand, being a total of Rs. 48,95,834. The percentage of current payments on current demand was 99·0 against 99·6 in the year 1891-92. There was a large increase in the balance, which amounted to Rs. 47,800 against Rs. 12,828 in the preceding year. The Basudebpur estate in Midnapore, and the Satkhira estate in Khulna, are responsible for Rs. 27,791 and Rs. 19,000 respectively, or altogether Rs. 46,791 of the total balance. Both these estates are heavily involved, but the balance due by the Satkhira estate was fully paid in after the close of the year.

3. The demands of rent and cesses due to superior landlords were—arrear Rs. 91,348, current Rs. 4,40,762, total Rs. 5,32,110. The payments amounted to Rs. 4,50,090, and Rs. 1,994 were remitted, leaving a balance at the end of the year of Rs. 80,026, which compares unfavourably with the balance for the previous year, amounting to only Rs. 44,711. So far as these balances are due to the superior landlords' refusal or neglect to accept payment owing to disputes among co-sharers they cast no reflection on the management of the estates.

Rent and cesses due to the estates.

4. The following statement shows the demands and collections of rent and cesses due to the estates for the five years ending with the year of report:—

Year.	Demand.			Collections.			Percentage of—		Remission.	Balances.
	Arrear.	Current.	Total.	Arrear.	Current.	Total.	Current collection on current demand.	Total collections on current demand.		
1	2	3	4	5	6	7	8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.				
1892-93	62,03,663	92,99,637	1,55,03,300	29,04,156	61,96,739	91,00,895	66·6	97·8	3,05,695	60,96,710
1891-92	77,67,017	91,53,100	1,69,20,117	30,69,365	60,69,371	91,38,736	66·3	99·8	12,12,179	65,69,202
1890-91	79,81,132	98,29,588	1,78,11,020	......	......	96,29,082	......	98	7,37,403	74,24,635
1889-90	1,08,46,289	1,00,15,159	2,08,61,448	......	......	1,02,24,591	......	102	24,59,188	81,84,669
1888-89	1,12,89,022	1,03,44,535	2,16,33,577	......	......	97,20,340	......	94	10,70,426	1,08,42,802

The percentage of current collections on current demand was 66·6 against 66·3 in the year before. Government, in its Resolution on the Report for 1891-92, observed that the latter figure was very low and compared unfavourably with

the standard attained in Government estates managed direct in which, in 1891-92, over 90 per cent. of the current demand was collected. This percentage has been attained only in 1892-93, in four estates under the Court of Wards three of which have been under the management of the Court for a long series of years, while in the remaining estate the rents are mostly payable by farmers. The Board observe:—

The case of private estates is somewhat different from that of Government estates; when an estate comes under the charge of the Court of Wards, it is almost invariably found that the rent-roll is encumbered with large arrear balances. One of the first duties of the manager appointed by the Court is to scrutinize the balances. Those which are barred by limitation are easily swept off. But many of the old balances have been kept alive by instalment bonds executed in favour of the former proprietors. Other instalments are due on decrees of Court. A large sum consists of items depending on disputed accounts. Each of these involves minute enquiry and explanation. In fact the task of adjusting the accounts involves much time and labour. Generally speaking, the affairs of a property of considerable importance cannot be looked into, cleared up, and the new arrangements brought into thorough order for two or three years after management is undertaken by the Court, even when the late proprietor has left the estate in comparatively good order, and in most cases far more time than this is required to bring order out of the confusion which is almost invariably found to prevail. The state of transition from the management of the proprietor to that of the Court of Wards in itself gives a check to collections and causes a portion of the current demand, due after the assumption of the charge of an estate, to fall into arrear.

The Officiating Lieutenant-Governor, while agreeing generally with the above remarks, still thinks that much may be done in the direction of reducing arrear balances by careful scrutiny of them, by striking off such balances as are not recoverable by law, and balances which, though recoverable by law, the raiyats are never likely to be able to pay.

In order to prevent managers trying to secure a fanciful percentage approximating to the standard fixed by Government, the Board has issued instructions to the effect that, when a tenant makes a payment without specification of the demand for which the payment is made, it should, in the ordinary course, be credited to the arrear and not to the current demand. These instructions are approved by the Lieutenant-Governor. The total collections, current and arrear, during the year did not equal the current demand.

Rupees 54,77,772 of the total balance (Rs. 60,96,710) shown in column 11 of the above statement for the year 1892-93 accrued after the estates were taken over by the Court. Rupees 46,28,643 of the balances are reported to be good and in process of recovery.

Debts due by estates.

5. The outstanding balance of debts due at the end of the year 1891-92 was Rs. 37,05,508. At the commencement of the year of report it was reduced to Rs. 31,67,981 by the release of certain estates. At the close of the year the balance stood at Rs. 32,77,619, the increase being chiefly in the Presidency and Patna Divisions, in consequence of the Court having assumed charge of the Satkhira estate in the former and of the Paigambarpur estate in the latter Division. The debts due by the Basudebpur estate in Midnapore, and the Chandrakûmár estate in Shahabad, have increased owing to interest on debts and costs. The Lieutenant-Governor approves the Board's conclusion that, in order to extricate the former estate from its desperate financial condition, the greater part of it should be sold. There was a marked decrease of nearly 1¼ lakhs in Burdwan, due chiefly to the repayment by the Burdwan Raj of a loan taken from the Bank of Bengal.

Management charges.

6. The percentage of the total cost of management proper, calculated on the current rent and cess demand, was the same as in the preceding year, viz. 7·8.

Act X of 1892, which came into force on the 25th October 1892, authorized the levy of (1) a general management rate not exceeding 5 per cent. on the gross income calculated to cover the cost of Government establishments, in so far as they may be employed in the supervision or management of such estates, and (2) a charge for special audit of accounts and legal advice. The charges levied under executive orders, prior to the passing of Act X of 1892, consisted of (a) a general management rate levied for the purpose of meeting the costs for establishments, contingencies, &c., in

the Collectors', Commissioners' and Board's offices; (*b*) a treasury rate for defraying a proportionate share of treasury establishments; and (*c*) an audit rate and fees for legal advice. Government has tentatively sanctioned the proposals of the Board in regard to the new rates to be levied under Act X of 1892. There will henceforth be a consolidated general management rate which has been provisionally fixed on the basis of the proceeds of the old management and treasury rates, with the addition of a new charge for superior supervision, which latter consists of a small fraction of the salary of one member of the Board of Revenue, of the Senior Secretary to the Board of Revenue, of Commissioners and District Officers. The rate will for the present be 2½ per cent. on gross income for estates with a gross income of 5 lakhs of rupees or less, ½ per cent. for the Burdwan estate, and 1½ per cent. for the Tikari and Dighapattia estates. The professional audit rate levied under executive orders was 1½ annas per cent. for the Burdwan estate, 4¼ annas per cent. for the Tikari and Dighapattia estates, and 6 annas per cent. for all other estates with a rent and cess roll of Rs. 50,000 and upwards. The audit charge fixed under Act X of 1892 is one anna per cent. on gross income for the Burdwan estate, 4 annas per cent. for Tikari and Dighapattia, and 6 annas per cent. for other estates with an annual rent and cess demand of not less than Rs. 50,000 per annum. No change has been made in the fees charged for legal advice. As Act X of 1892 came into force during the second-half of the year 1892-93, in order to avoid complication in accounts, the old rates will be levied for the whole year, and the surplus which has accumulated for several years past to the credit of the general management rate will be set-off against the Government claim to the new rate for the second-half of the year. The new rates will come into force from the commencement of 1893-94.

Improvements.

7. The following statement shows the total amount spent on schools, dispensaries, maintenance of buildings, works of improvement, surveys and settlements during the last five years.

YEAR.	Subscriptions and donations to schools.	Subscriptions and donations to dispensaries.	Maintenance in efficient condition of estates, building, and other immoveable property.	Improvement of land and property for benefit of ward.	Surveys and settlements.	Total.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1892-93	64,059	36,524	2,16,870	1,57,782	97,104	5,72,339
1891-92	61,155	37,598	1,91,307	92,564	2,67,345	6,50,359
1890-91	59,241	32,255	2,13,178	58,404	1,20,523	4,83,601
1889-90	69,301	38,732	2,24,439	66,930	2,24,168	6,23,570
1888-89	58,707	38,110	1,24,698	58,167	1,38,101	4,17,783

There was an increase of Rs. 64,918 as compared with the preceding year in the expenditure on reproductive improvements. Of this amount, Rs. 42,131 represents the increase in the Patna Division alone, due to the transfer to this head, in accordance with the instructions of Government, of charges for gilandazi or village irrigation channels, which are of a recurring nature. The percentage of outlay on reproductive works to investments during the year was 56·1, or, eliminating the increase due to transfer of gilandazi charges, 41 as against 17 only in the preceding year—a result which may be regarded as satisfactory. The Lieutenant-Governor observes with pleasure that the Board have drawn the attention of the local officers to the Government orders insisting on the policy of a liberal expenditure on improvements of a reproductive character in solvent estates, and is glad to observe that, except in the Presidency, Chittagong, Dacca and Orissa Divisions, there has been some improvement in this respect during the year under report. Sir Antony MacDonnell entirely agrees with the remarks made in the Resolution on last year's report under this head.

The decrease in the expenditure on surveys and settlements is chiefly due to the completion of operations in some of the Burdwan Raj khas mahals and in various other large estates. In pursuance of the policy laid down by

Government that the Court of Wards should prepare a correct rent-roll and record of rights under the Bengal Tenancy Act, where none has been already prepared, a survey and record of rights in the Tikari Wards' Estates in Gaya has recently been ordered. Surveys and settlements on a large scale, under the supervision of the Director of Land Records, were in progress in the following estates:—Burdwan Raj, Talipabad, Dakhin Shahbazpur, Sarail Pargana (Kasimbazar estate), Kanika; while operations on a smaller scale were either conducted, or about to be undertaken, in 12 other estates.

Certificates

8. The following statement shows the working of the certificate procedure in Wards' and Attached estates during the five years ending with 1892-93:—

Year	Number pending from last year	Number filed during the year	Total	Disposed of during the year	Pending more than 6 months	Pending less than 6 months	Total	Amount of demand covered by the certificates	Total annual rent and cess of estates	Percentage of column 9 to column 10
1	2	3	4	5	6	7	8	9	10	11
								Rs	Rs	
1892-93	13 210	8 648	21 858	11 765	9 053	1 040	10 093	8,58,414	92,99 637	9·2
1891-92	13 704	13 .99	27 003	17 148	8 107	1 748	9 8 5	4,75,668	91,53,100	5·1
1890-91	21 167	10 975	32 142	18 418	12 103	1 611	13 704	4,60 970	96,29 588	4·6
1889-90	23 018	[illegible]	8 416	17,628	18 546	2 241	20 787	6 32,903	1 00,15,150	6·3
1888-89	10,170	24 922	35 008	12,080	21 371	1,647	23 018	8,63,017	1,03,44,555	8 3

A revised form prescribed by Government for showing the working of the certificate procedure has been made use of for the first time. The Officiating Lieutenant-Governor approves the Board's proposal to add an additional column after column 17, Appendix III, with the heading "Total amount covered by certificates struck off during the year." In this form every estate in respect of which 100 certificates or more were issued is shown separately, other estates being grouped together under the districts to which they appertain.

As might have been expected, the orders of Government restricting the certificate procedure to estates having an authoritative rent-roll, reduced the total number of certificates from 13,299 in 1891-92 to 8,648 in 1892-93. It is to be regretted, however, that the disposals show a larger proportion of decrease, being 11,765 against 17,148 during the preceding year. The discrepancy between the figures in column 8 of the statement in paragraph 26 of the report for the year 1891-92, showing the number of cases pending at the close of that year, and the grand total in column 3 of Appendix III of the report for 1892 93, should have been explained. Government has approved the Board's proposal to create a separate permanent Certificate Department in each district, to replace the existing heterogeneous establishments, and has authorized the Board to submit definite proposals.

9. Part II of the Board's Report is devoted to estates with a rent-roll of Rs. 50,000 and upwards. The revenue and cess demand due by the Burdwan Raj Estate, amounting to Rs. 34,51,037, was fully satisfied; the collections amounted to Rs. 45,11,892 or 99·7 per cent. of the current demand for rent and cesses, thus increasing instead of reducing the amount of arrears. This result is attributed to the collections in the Kujang estate being 65·8 per cent. only of the current demand, in consequence of the distress caused among the tenants by the cyclone of November 1891 and the subsequent high floods of July 1892. In the Sujamutha portion of the Raj estates, which has recently been settled under the Tenancy Act, it is observed with satisfaction that the collections were better than in any of the other parts, being 129·6 per cent. on the current demand as against 99·7 in the Raj estates as a whole, and as against 91·1 in Sujamutha itself during the previous year. As the greater portion of the rental is realised from patni tenures, the management charges amounted to 3·4 per cent. only of the current rent and cess demand. The construction of a Raj office building at an estimated cost of Rs. 1,14,170 was undertaken during the year. A satisfactory reduction was made in the charges paid to mukhtears employed by the estate, as expenses of identifying defendants, debtors, &c., in pending cases. The Commissioner has directed that such identification should in future be made by local zamindars and village agents.

Larger estates—Burdwan

Tikari Estate.

10. The whole of the demands due to Government and superior landlords by the Tikari Estate, amounting to Rs. 2,55,949 and Rs. 46,525 respectively, was paid. The collections amounted to Rs. 7,41,769, out of a current demand for rent and cesses of Rs. 7,44,714, and an arrear demand of Rs. 6,49,120. The Board agree with the Commissioner in thinking that the collections cannot be called satisfactory, as the arrears have rather increased than diminished in spite of the fact that the outturn of crops was a very fair average one. The Lieutenant-Governor concurs in this view. If the arrears increase instead of being reduced in a fair average year, there can be little prospect of their being ever realized in full, and the Officiating Lieutenant-Governor is glad to notice that measures are being taken to strike off such of them as are bad and irrecoverable. Owing to the reorganization of the managing staff, the management charges rose from 12 per cent. to 13·4 per cent. on the current demand. Rupees 13,826 were spent on improvement other than gilandazi works, and Rs. 50,099 were invested in the purchase of landed property.

Dighapattia Estate.

11. In the Dighapattia estate the entire demand due to Government and superior landlords by the eldest as well as the younger ward's estates was paid, with the exception of Rs. 62, payable in small sums to some of the landlords on account of the eldest ward's estate. The collections in the latter were satisfactory, being 102·4 per cent. of the current demand, amounting to Rs. 4,93,356, against 98·8 per cent. in the previous year; but in the younger ward's estates the collections fell from 109 per cent. in 1891-92 to 98 per cent. only on the current demand in 1892-93. This is mainly due to the general failure of crops throughout the Hooghly division of the estate. In the elder ward's estate the cost of management has slightly increased being now over 15 per cent. of the current demand, a rate which the Lieutenant-Governor condemned as excessive in last year's Resolution. The Board's report shows laxity on the part of the management in realizing debts due to the younger ward's estate, and the Manager should be called upon for an explanation. The outlay on works of improvement by the eldest ward's estate amounted to Rs. 22,865 against Rs. 10,052 in the preceding year. These works consisted of the excavation of tanks, the construction of pucca ghats, re-excavation of khals, digging of wells, construction and repairs of roads, raising of low lands, construction of sluice gates, and some agricultural improvements. The estate also paid Rs. 8,284 out of a total sum of Rs. 12,552 to be paid by it for the construction of a new building for the Dighapattia school.

Kasimbazar.

12. The settlement of pargana Sarail, appertaining to the Kasimbazar estate in Murshidabad, was completed in October 1892. The collections were 93 per cent. on the current demand against 123 per cent. in the previous year, the falling off being attributed mainly to scarcity in pargana Sarail. It is unsatisfactory to find that the cost of management which was already high increased from 16·9 per cent. to 17·1 per cent. An Assistant Engineer on Rs. 150 a month has been appointed tentatively for two years for supervising works of improvement in the several districts in which the estate is situated, and Rs. 30,781 as against Rs. 11,341 in the previous year were spent on works of this class which mostly consisted in the excavation and re-excavation of tanks. The District Engineer has been appointed also tentatively on a monthly remuneration of Rs. 100 to supervise the construction and repairs of buildings of the estate in the Murshidabad district. The financial position of the estate is satisfactory and reflects credit on the manager.

Deo.

13. The balance of debt due by the Deo Estate stood at Rs. 7,28,667, including Rs. 2,83,591 due to Government, and Rs. 2,72,000 due to Babu Kameswar Prasad under an usufructuary mortgage deed, the terms of which are highly objectionable. Government has, since the close of the year, sanctioned a loan of Rs. 2,72,000 to enable the estate to rid itself of this debt.

Sankarpur and Maldwar.

14. The Sankarpur and Maldwar estates were lately settled under the Bengal Tenancy Act. In the preceding year the collections in the former amounted to 85 per cent. on the current demand, but during the year 1892-93 they rose to over 100 per

cent. In the Maldwar estate the collections in 1891-92 were only 63 per cent. of the current demand, but in the year under report they improved to over 110 per cent., inclusive of a sum collected within the year, but not remitted to the treasury within the year. These estates, as remarked by the Board, show a great improvement in collections as compared with the previous year.

Estates taken in charge and released.

15. Altogether eight new estates were taken charge of during the year. This number included the Chanchra estate in Jessore, the management of which was undertaken by the Court of Wards under direction of the District Judge of Jessore under section 95 (a) of the Bengal Tenancy Act VIII of 1885. The estate is jointly owned by two shareholders who were of age, and the four minor sons of a third, the latter having died before the Court of Wards intervened. Each of the shareholders had separate liabilities to a considerable amount, but one of them was hopelessly involved. The only way of saving the share of the latter was by raising a loan on the entire estate, but to this the other shareholders objected. The Court of Wards, under the circumstances, withdrew from the management, upon which the District Judge appointed a common manager under section 95 of the Act. Five estates were released, of which the most considerable was the Narhan estate in Darbhanga, with a rent-roll at the time of assumption of charge by the Court of Wards of Rs. 1,44,880, and debts which, including zar-i-peshgi leases to the extent of Rs. 1,12,296, amounted to Rs. 5,31,056. The gross total amount of debts due by the estate during the 15 years it was under the Court of Wards' management was Rs. 10,15,668, the whole of which was satisfied, leaving a surplus at the date of discharge of Rs. 1,52,186. The rent-roll, when the estate was released, was Rs. 1,83,352 or Rs. 38,472 more than the initial rental. The remaining four estates were petty ones. In one case only was the original rental reduced at the date of discharge, the reduction being attributed to sales of portions of it for liquidation of debts. In all other cases there was a substantial increase in the rental and an accumulated surplus at the date of discharge.

Encumbered estates in Chota Nagpur

16. The number of estates managed during the year under the Chota Nagpur Encumbered estates Act (VI of 1876) was 55, being 4 less than in the preceding year. The demand, collections and balances for 1892-93 are shown in the following statement:—

District	Arrear demand	Current demand	Collections	Percentage of collections on current demand	Remissions.	Balances	Advance collections on account of the ensuing year
1	2	3	4	5	6	7	8
	Rs	Rs	Rs		Rs	Rs	Rs
Hazaribagh ...	52,580	95 212	88,384	92 8	17,302	42 106	6,331
Lohardaga	69 911	92,240	94 3[illegible]1	102 2	10,335	57,025	20
Palamau	3 026	15 160	13,124	87 8		4 862	.
Singhbhum	1,51 396	84,811	79,112	93 2	1,313	1,55 782	42
Manbhum ..	24 494	93,236	88,499	91 9	1 039	28,192	24
Total	3,01 437	3,80,659	3,63,610	95 2	30,489	2,87,967	6,417

17. The following statement shows the progress made in the liquidation of debts in these Estates:—

District	Due at the commencement of the year	Ascertained and incurred during the year.	Total	Payments	Reductions by compromise	Balance due at the close of the year
1	2	3	4	5	6	7
	Rs.	Rs	Rs	Rs.	Rs	Rs
Hazaribagh .	6,81 613	23,344	7 04 957	53,123	2	6,51,832
Lohardaga ...	2,49,375	8,832	2 58 207	33,212	. .	2 21,995
Palamau . .	98 041	35,111	1,33,152	11,498	96	1,21,558
Singhbhum .	2,02,526	6 896	2 09 422	31,857	...	1 77,565
Manbhum	2 20,965	14,688	2,35,653	17,596		2 18,057
Total .	14,52,520	88,871	15,41,391	1,47,286	98	13,94,007

Want of funds due to various causes appears to have prevented the due execution of the approved scheme of liquidation in many estates. From the Commissioner's remarks quoted by the Board, there appears to be an inherent tendency in the landlords of Chota Nagpur to run into debt, and many of them contract debts even while their estates are under Government management, the result sometimes being that a proprietor whose estate has been released, freed from the original encumbrances finds himself almost immediately under the necessity of again applying for the protection of the Act. The Commissioner thinks that the operation of the Act is of doubtful utility to the community at large.

18. The Officiating Lieutenant-Governor congratulates the Board of Revenue on the very efficient manner in which they discharge their duties as a Court of Wards, and on the good results which they obtain with almost unbroken uniformity. The names of those officers whom the Board have singled out for favourable mention will be reported to the Appointment Department as usual.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE BURDWAN DIVISION FOR THE YEAR 1892-93.

GENERAL DEPARTMENT.—MISCELLANEOUS No. 2560.

Calcutta, the 14th November 1893.

RESOLUTION.

READ—

The Annual General Administration Report of the Burdwan Division for the year 1892-93.

Read also—

The Annual General Administration Report of the Burdwan Division for the year 1891-92, and the Resolution recorded thereon.

The Burdwan Division had the advantage of being in charge of one officer, Mr. Power, throughout the year. There were changes of officers in charge of all the districts of the division with the exception of the district of Burdwan. It is the desire of Government to avoid constant changes in divisional and district appointments, but circumstances from time to time render transfers of charge unavoidable.

Tours.

2. The Commissioner and the District Officers, with the exception of Mr. Grant, of Birbhum, who has retired from the service, and the Sub-divisional Officers were on tour in their respective jurisdictions for the period prescribed in Government Resolution No. 398T.G., dated 17th October 1891. All district offices and all treasuries, with the exception of that at Hooghly, which was under inspection by the Collector at the time of his visit, and all the sub-divisional offices were inspected by Mr. Power. All the Collectors, except one, also inspected their own offices and treasuries, and their respective sub-divisional offices and treasuries during the year. These inspections did not bring to light any serious irregularities; the offices were all found in fairly good order.

Weather and crop, health and condition of the people, and sanitation.

3. Last year the weather was most unfavourable; the rainfall was not so much remarkable for its scantiness as for its uneven distribution, resulting in the partial failure of crops in some parts of the division. The mischief was greatest in the north and centre of Bankura, in the south of Midnapore, centre of Hooghly and parts of Howrah, and it was least in Birbhum, where the outturn was 16 annas. Irrigation from canals saved much of the winter paddy on lands near them. These partial failures of crops have not told much upon the general health of the people, as indicated by the mortuary returns of the division, the death-rate being less than in the previous year in all the districts except Burdwan, where the climate has been exceptionally bad of late, but they checked to a certain extent the general advance of prosperity in most of the districts, and caused some distress in particular localities. Test relief works were opened in the affected tracts, but they failed to attract any considerable number of labourers. Temporary migration and private employment, stimulated by advances under the Land Improvement Acts, provided sufficiently for those in real need. Mr. Grierson, Collector of Howrah, gives the following glowing description of the condition of the people in his district:—

"Never, he says, in my whole Indian experience have I seen so well-to-do a class of people as that which forms the population of the district. I remarked on this in my last report. Then I had just come from the poorest district in the province to one of the richest, and the contrast was striking.

"My tours have emphasised this experience. I have not served in Eastern Bengal, but I know Central and Northern Bengal and Bihar pretty well, and in none of them have I seen the prosperity which forces itself upon the attention in Howrah.

"The reasons are equally obvious: a fertile alluvial soil and close proximity of a great city, which provides not only a ready market with high prices for the products of cultivation, but also employment at good wages for the landless members of the community. It literally reminds me of the fabled state of prosperity celebrated by Indian poets in the reign of King

Dilipa, when even the 'name of theft' was forgotten. Petty offences against property are few, and those which do occur are, as a rule, committed by impecunious foreigners who come from distant parts of the country to annex a share of those worldly goods which have been provided in such abundance. The people of the district are honest, for they have no temptation to steal. In one of the larger towns of the district I found that the people prided themselves on leaving things lying about in the streets and their shops open and unguarded."

But even in this Arcadia, "where men are so good or so cold as not to be tempted by • gold," some vanities and weaknesses assert themselves. Mr. Grierson writes that:—

"Schools are plentiful and popular, English knowledge is eagerly sought after, women never work in the fields, dresses are clean, made of good cloth, and are invariably accompanied by that symbol of respectability (what a top hat is to an Englishman)—the umbrella. Finally, material comforts are appreciated. The English '*chota hazri*' is firmly established in the meanest village. A morning ride shows each family squatted round a low table drinking tea, well seasoned with plenty of sugar. So also the 'doctor' is everywhere present. Each large village has its two rival medical halls—one allopathic and another homœopathic—with perhaps a third, whose proprietor with noble electicism practices both branches of the healing art, and gives his patient a choice of treatments. Doctors may mean disease, but they certainly do mean the presence of a body of patients sufficiently well off to support the practitioners."

In the Division generally, public health was satisfactory. Fever was less virulent in all districts, and small-pox occurred to a less extent than in the previous year in Midnapore, Burdwan, and in part of Bankura among the Sonthals who refused to accept vaccination. Cholera, attributed to defective water-supply and to pilgrims returning from gatherings, prevailed more or less in all the districts. Sanitation, it is reported, was not properly attended to either by the District Boards or the Municipalities. The negligence of some of the Municipalities in regard to sanitary precautions, especially that of Ghatal, is said to be extremely culpable.

The wage of a common agricultural labourer varied from three annas per day in Bankura to five annas in Howrah, and was generally about four annas.

Manufacture, trade, and commerce.

4. Owing to successive bad harvests during the last two years, the export of rice and paddy fell off in the districts of Burdwan, Bankura and Midnapore. There was also a decrease in the export of rice from Birbhum, but it had to a certain extent been counterbalanced by a larger export of paddy from the district. In Bankura the outturn of cocoons greatly fell off owing to the crippled means of the people brought about by successive failures of crops. But it was not so in Birbhum, where the trade in this article was brisk. Indigo industry is declining both in Burdwan and Bankura. In Midnapore the outturn was exceptionally good. Paper Mills at both Bally and Raniganj are fast supplanting the native industry in the Division. Owing to the rise in the price of European piece-goods in consequence of the fall in exchange, the manufacture of cotton cloth in the Division has increased. But the stimulus is only a temporary one, and the days of this industry are numbered.

Administrative changes.

5. Several administrative changes of greater or less importance were introduced during the year. The provisions of the Steam Boilers and Prime Movers Act were introduced in the town of Burdwan. The Barakar Iron Works, the Raniganj Paper Mills and the Pottery Works were brought under the operation of the Indian Factories Act. A uniform thanawari rate of chaukidars' pay was introduced into villages where Act VI (B.C.) of 1870 was in force. The charge of Provincial civil works was transferred to the District Board. Vaccination work was transferred to the Civil Surgeon. The collection of the zamindari dâk cess was transferred to the Collector. The provisions of Act XI of 1892 (Prevention of Cruelty to Animals) were extended to the town of Contai in Midnapore and to all Municipalities in the district of Hooghly.

Civil Justice.

6. The following table shows the work of the civil courts during the year:—

District.	Sub-division or chauki.	Description of Court.	Number of officers.	Number of original cases disposed of. Ordinary.	Small Cause Court.	Details of cases in columns 5A and 5B. Money.	Rent.	Title.	Number of witnesses examined.	Ratio of witnesses detained over two days, per cent. of witnesses examined.	Ratio of cases pending at end of year, per cent. of cases disposed of.

		*Total for 1891-92	51½	59,172	18,201	32,836	36,629	7,968	†235,917	15	22

* This total includes the figures of Judges and Sub-Judges.
† These figures show the number of witnesses who attended.

There has been an increase in ordinary, rent, and title suits. The increase in money and rent-suits may be attributed to bad harvests during the past two years, which prevented the poorer classes from meeting their obligations. The number of witnesses detained over two days was very large, being 21 per cent. of the total number examined, while in the Uluberia and Jehanabad Munsifs' Courts it was as high as 48 and 44 per cent., respectively.

Crime, Police, and Criminal Justice.

7. Cognizable crime also increased, the number of cases being 17,917 in 1891, while in the last year it rose to 20,567. Every district shows an increase, the chief reasons assigned being bad harvests and the disorganised state of the rural police. In Midnapore the Magistrate and District Superintendent of Police were satisfied that crime was being suppressed by the Police, and their exertions to prevent suppression resulted in an increase of recorded cases. In Hooghly nuisance cases swelled the list, but if they be excluded, there was a slight decrease.

There was a slight decrease in the figures for non-cognizable cases. They were 20,148 in the last year against 20,351 in the previous year. Last year there was a decided improvement as to the number of remands in criminal cases. The percentage of cases adjourned more than six times fell from 3·4 to 1·4, while over 52 per cent. of them were disposed of at the first hearing. There was also decrease in bad livelihood cases.

Notwithstanding the supposed suppression of reports on unpromising cases in Midnapore, it is stated that the police force in the Division generally conducted itself fairly well. With the paucity of officers and increase in the number of dacoity and gang robbery cases, great difficulty was experienced in complying with the Inspector-General's Circular No. 6 of February 1892, which directed that the investigation of such cases should be invariably supervised on the spot by sub-district police officer. The Commissioner has the following remarks on the chaukidars:—

"All the Magistrates are of opinion that Act VI chaukidars now give satisfaction and are regularly paid.

"With reference to chakran chaukidars, Mr. Williams considers their abolition necessary for efficient police administration. The continued prevalence of high prices is leading to the extinction of "darmashahara"*chaukidars and to the gradual substitution of Act VI men. Mr. Windsor, the present Officiating Magistrate of Burdwan, writes that 'the chakran chaukidar is, as a rule, hand-and-glove with the dacoits and burglars. He is generally badly off, and is becoming more so year by year. His predecessors and he himself have sold, leased and mortgaged the service lands and diminished the income thereof.' Attempts are being made to improve their condition by not filling up appointments where there are more chaukidars in a village than the ratio of 1 to 60 houses would warrant, and dividing the lands thus vacated among those remaining.

* i.e., salaried.

"The Magistrate of Bankura writes that the Regulation chaukidars in the south got a mere pittance of 8 annas or a rupee a month, and now in a time of scarcity they can hardly collect even that; the people there are said to be too poor to pay adequate salaries.

"The Magistrate of Birbhum is taking steps for the gradual introduction of Act VI, but he complains of being 'harassed by constant enquiries about chakran lands,' as he has no record of the boundaries of such lands held by each chaukidar.

"There are over 5,000 Regulation and chakran chaukidars in Midnapore; their reorganization is desirable.

"Mr Duke, Magistrate of Hooghly, writes:—'Police work is now so exacting that a chaukidar who has his chakran lands to cultivate has not time to do the zamindar's mal work. Hence most chaukidars are under the thumb of the zamindar, who has no trouble, when occasion arises, in proving that the chaukidar does not perform his mal duties. Consequently, whenever there is any difference of opinion between the police and the zamindar, and the chaukidar obeys the police, the zamindar can, and I am sorry to say constantly does, revenge himself on the chaukidar by suing him for the non-performance of mal duties.

'I have left no stone unturned to support the chaukidars. but Government is no party to these suits, and, so far as I have gone, I have only been strengthened in the conviction that the sooner we can extricate ourselves from the system of two masters, the better. I therefore make it a settled policy on all possible occasions to introduce Act VI (B.C.) of 1870.'

"In contrast with the above condemnatory remarks against chakran chaukidars, it is only fair to quote what Mr. Grierson says of their work in Howrah:—'Wherever I have gone on tour, the chakran chaukidars were certainly the best. They were the best set up, the best at work, the most obedient, and the most regular in attendance at parades. They are well-to-do men, and their holdings are so valuable that they cannot afford the luxury of disobedience with dismissal as its result.

'Whatever the chakran chaukdidar's duties to the zamindar may be, I do not know; but I do know that, as a question of practical police administration, I as Magistrate get all that I want out of them.'

"It would appear that the service tenures are larger and zamindars less exacting in Howrah than in Hooghly: the chaukidars themselves are far more intelligent in the former district; in the latter they belong mainly to the semi aboriginal classes, some of whom are described as little better than savages. From the number of appeals against dismissals by chakran chaukidars (there were 28 to me last year), it is evident that their tenures are valuable and coveted."

Of 361 persons committed for trial in Sessions Courts, 217, or nearly 60 per cent., were convicted against 232 commitments and 94 convictions, *i.e.*, 40 per cent. in 1891. The result was good in Bankura and Howrah, but not so in Burdwan.

The following statement shows the work of the criminal courts in the Division by districts:—

District.	Subdivision.	Class of officers.	Number of officers.	Cases disposed of.	Persons disposed of.	Ratio per cent. of persons convicted to disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.	Ratio per cent. of decisions confirmed on appeal to total appealed.	Number of A cases disposed of.	Number remanded six times and more.	Average number disposed of by each officer.	Average number of witnesses examined in each case.	Ratio per cent. of column 12 to column 11.

* These figures show the number of witnesses who attended.

N.B.—A fraction indicates that an officer was employed for a fractional part of the year.

Taking Stipendiary Magistrates first, 49 officers disposed of 16,511 cases, the number of cases disposed by each being on an average 337. The largest amount of work was done in the Midnapore district (specially at the Sadar and Contai subdivision), and in Howrah, Burdwan, and Serampore. The average number of witnesses examined in each case was 3·1. The number of police cases disposed of was 4,413, of which 135, or 3·06 per cent., were remanded six times or more.

The number of cases disposed of by 49¾ Honorary Magistrates was 11,509, against 10,900 in 1891 by 36 officers. District Magistrates generally commend the w rk of the Benches.

8. From the statement given below it appears that the attendance of the Honorary Magistrates was on the whole fairly good, though there is still much room for further improvement. Mr. Power, agreeing in this with the Commissioner of Patna, recommends that Honorary Magistrates should be appointed in future only for a term of years, so that habitual absentees need not be re-appointed and Honorary Magistrates may be saved from the disgrace of removal, and District Magistrates from the unpleasant duty of severely criticising assistance voluntarily given:—

District.	Number of Honorary Magistrate.	Number of times asked to attend.	Number of times actually attended.	Number of Absences— With leave or notice.	Number of Absences— Without leave or notice.	Number of Absences— Total.

In Birbhum, Hooghly, and Howrah the balance at the end of the year was less than at the beginning.

Registration.

11. The registrations of the year under review exceeded those of 1891-92 by 25,825. The following table gives the figures for each district :—

District.	Class of Registration Office.	Number of offices	Number of documents registered.	Average per office.
1	2	3	4	5
Burdwan	Special	1	4,228	4,228
	Rural	12	29,901	2,492
Bankura	*Ex-officio* sub	1	2,631	2,631
	Rural ..	8	19,623	2,453
Birbhum	Special	1	2,885	2,885
	Rural	4	12,886	3,221
Hooghly	Special	1	2,386	2,386
	Rural .	9	24,562	2,729
Howrah	Special	1	6,875	6,875
	Rural	4	11,523	2,881
Midnapore	Special	1	4,615	4,615
	Rural	16	56,632	3,539
Grand total for 1892-93	Special ...	6	23,620	3,937
	Rural	53	155,127	4,432
Grand total for 1891-92	Special	6	20,586	3,431
	Rural	50	132,336	2,647

There was an increase in the number of documents registered from 152,922 in 1891-92 to 178,747 in the year under review, which the Officiating Lieutenant-Governor agrees in thinking to be due to the normal growth in popularity of the Registration Department.

During the year a new sub-registry office was opened at Chanditalla in the district of Hooghly.

Land Revenue.

12. The demand, collection and balance of land revenue, road cess, and zamindari dâk cess in each district are shown in the following table :—

DISTRICT.	Class of demand.	Class of estates.	Number of estates.	DEMAND.		COLLECTIONS OF 1892-93.		BALANCE ON 1ST APRIL 1893.		REMARKS.

		GRAND TOTAL OF DIVISION.	..	97,65,795	6,95,330	88,66,075	4,47,790	5,32,557	1,93,317	Total remission Rs. 33,784.
		GRAND TOTAL FOR 1891-92.	...	92,10,144	8,50,360	87,56,506	4,76,176	4,45,741	3,63,910	

Though there was an improvement in the collections as compared with those of the previous year, still the realisations did not generally reach the prescribed standard, except in Birbhum. Out of a total demand of Rs. 1,00,61,125 on account of land revenue, road cess, and zamindari dák cess, current and arrear, Rs. 93,13,863 were collected and Rs. 33,734 remitted, the balance being Rs. 7,15,874 against Rs. 8,15,651 in 1891-92.

In permanently-settled estates the percentage of total Land Revenue collections on total demand reached the prescribed standard of 99 per cent. in Birbhum and Midnapore; and in Burdwan, Bankura, and Hooghly with Howrah it was above 98 per cent.

In temporarily-settled estates the collections were far below the standard except in Birbhum where, however, the revenue from this class of estates is trifling.

In the case of Khas Mahals the realisations were also very bad.

Certificates.

13. The work of the Certificate Department is shown in the following statement:—

DISTRICT	Department.	Number pending at beginning of year.	Number issued during year.	Total for disposal.	Amount of certificates.	Number disposed of during year.	Amount realised.	Number pending at close of year.

* The Commissioner of Burdwan has included the statement of certificate of Howrah.
† (Sic).
‡ The grand total for 1891-92 includes the figures of Howrah

The number of certificates pending from 1891-92 was 29,581 ; 32,156 were filed and 33,122 disposed of during the year, leaving 28,615 at the close of the year. The number instituted during the year decreased by more than 22 per cent., chiefly under head "Road and Public Works Cesses" in Burdwan and Hooghly. Certificates for water-rates in Midnapore also show a continued decrease. Owing to failure in the past to keep the records corrected up to date in the Majnamutha estates, recourse to the certificate procedure for realisation of rents has become impracticable, and arrangements have been made to sue in the Civil Courts instead.

Settlements.

14. There were no important settlements of Government estates in any of the districts of the Division. Settlements of the Pataspur temporarily-settled estate under the Bengal Tenancy Act and of the Burdwan Raj Khas Mahals were in progress during the year. The settlement of Sujamutha, except village Madakhali, was completed, and the Settlement Officer has submitted his final report to the Commissioner.

15. There are four drainage schemes in the Division, all—in the district of Hooghly, viz., Dankuni, Howrah, Rajapur and Amta. The original cost of the first project has been collected; its future maintenance charges, which have been capitalised, are under collection. Work in connection with the second and third projects has been completed, but collections have not yet commenced; the last is in the hands of the Public Works Department.

Drainage.

16. Out of Rs. 60,000 allotted to the Division for loans under the Land Improvement and Agricultural Loans Acts, only Rs. 29,[illegible]10 were actually spent during the year. The reason assigned for failure to utilise the sanctioned amount was that the grant lapsed before the necessary enquiries could be completed. The Commissioner suggests either that these grants be made on a biennial or triennial estimate, or that they should lapse, not in the middle of the busiest season when enquiries are in full swing and exigency of demand greatest, but at the end of August, when work is over and the *bhadoi* crop coming in. The Commissioner's suggestion will be submitted for consideration to the Board of Revenue.

Loans.

17. There were 11 estates in the Division under the Court of Wards against 10 in the previous year. The percentage of total collections on total demands (*i.e.*, current demand and arrears) in the Burdwan Raj estates amounted to nearly 70 per cent., whilst the collections in the estates situated in the district of Midnapore were very low, varying from 21 to 61 per cent. The collections in the Burdwan Raj estates amounted to 99·7 per cent. on the current demand—a result which is satisfactory, considering the shortness of the harvests. The outstanding arrears in wards' estates in this Division are very heavy. It is bad policy to maintain on the books arrears which cannot be paid. The arrear accounts of estates should now be examined in detail, and all sums which are irrecoverable by legal process, or beyond the capacity of the raiyats to pay, should be remitted. The true policy to pursue in land management is to adjust the demand within the law, to the circumstances of each holding, and then to insist on punctual payment.

Wards Estates.

18. The most important excise statistics are included in the following statement:—

Excise.

	Special	42	774	[illegible]	552	1	[illegible]	[illegible]	[illegible]	42 9			
	GRAND TOTAL	10,883	3,00,400	[illegible]	1,3[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]			[illegible]
	GRAND TOTAL FOR 1891-92	10,622	2,53,8[illegible]7	[illegible]	1,70,[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible] 8 11			4[illegible]

There has been a marked increase both in the number of schools and pupils as compared with the previous year. The total number of schools rose from 10,622 to 10,883, and the pupils from 253,8?7 to 300,400. The number of girls' schools increased from 287 to 370, and the number of pupils attending them from 7,662 to 8,024; besides 9,261 girls attended boys' schools. The increase was contributed to by all districts except Bankura and Howrah.

The number of Muhammadan pupils attending the different classes of schools in the division rose from 29,664 to ?0,883; the number of pupils in Bankura and Howrah decreased.

The percentage of boys at school on the total number of a school-going age is 51·6, so that more than half the entire number of boys of a school-going age are at school. The Officiating Lieutenant Governor thinks that these figures are satisfactory and creditable to the local educational and district officers.

Dispensaries and Hospitals.

20. The following table gives statistics relating to dispensaries:—

District.	Number of dispensaries.	Income from—					Daily average patients—		Ratio per cent. of outdoor patients to total population.
		Government.	District Board.	Municipality.	Subscriptions.	Total.	In-patients.	Out-patients.	
1	2	3	4	5	6	7	8	9	10
		Rs.	Rs.	Rs.	Rs.	Rs.			
Burdwan	7	1,223	1,363	6,701	18,467	27,773	67·9	362·7	4·4
Bankura	4	531	1,000	2,108	680	4,319	12·42	121·57	1·5
Birbhum	2	52	1,287	921	751	3,011	5·28	95·12	1·4
Hooghly	9	2,072	......	5,037	16,151	23,260	68·8	265·71	3·7
Howrah	3	4,026	......	4,015	10,431	19,372	81·61	143·76	3·2
Midnapore	13	1,337	873	8,060	6,801	17,980	29·74	505·99	2·5
Total ...	38	10,140	4,543	27,751	53,281	95,715	265·83	1,404·89	2·8

The ratio of the outdoor patients to the total population of the districts is very low in Bankura and Birbhum. The two Burdwan Raj dispensaries at Burdwan and Kalna and the Municipal dispensary at Burdwan are specially well spoken of. A female hospital has been established at Bankura.

Local Self-Government Institutions.

21. District Boards on the whole worked satisfactorily and attendance was fairly good, but there was lack of keen interest in the administration on the part of the members in respect of which Mr. Duke, of Hooghly, writes as follows:—

"It would be unjust and ungrateful to complain of the apathy in the members, for I found them on all occasions most willing to assist me and anxious that business should be efficiently conducted; but at the same time I think there is an underlying sense that there is very little for the members to do. The Board in fact is so poor, its wants are so much beyond its income, that there is never anything new or popular to be done, and I think that after a certain experience of this damping fact, members come to feel that, where the income has obviously to be spent on only the most necessary and peremptory requirements, there is very little room for discussion, and most things may be left in the hands of the executive."

As members of Local Boards receive no travelling allowance, those who live at a distance do not attend regularly, but such duties as are delegated to these bodies are said to be performed with fair success. Mr. Grierson, as Chairman of the Howrah Municipality, acknowledges the sympathy and support he has received from the municipal members during the year. Since its close some difference of opinion in regard to sanitary improvements has arisen, but His Honour hopes that as both parties have the interest of the town at heart, these difficulties may be overcome in a reasonable spirit. Mr. Grierson raises a larger question by his recommendation that Howrah should be amalgamated with Calcutta to ensure the advantage of skilled supervision, for which it cannot now afford to pay. Burdwan, Raniganj, Kalna, Bankura, Vishnupur, and Suri were fairly well managed. In Midnapore the town itself was neglected. Ghatal was bad as regards drainage and drinking-water. Tamluk was improving. Hooghly was managed with general success. Bansberia was so mismanaged that an official Chairman had to be appointed. Serampore, as in the previous year, suffered from having had an absentee Chairman. The administration of Utterpara was good, but party spirit ran high, necessitating the resignation of an efficient Chairman. The spirit of faction also prevailed at Bally.

Public feeling.

22. On the state of public feeling, the Commissioner makes the following remarks:—

"The amendment of the Chaukidari Act, the Municipal Act Amendment Bill, and the Jury Notification agitated the minds of such members of the public as are imbued more or less with Western ideas; of the first we no longer hear anything; withdrawal of some contestable clauses of the second and entire withdrawal of the last pacified all who took any interest in the subject. Genuine public feeling can scarcely be said to exist; even in Hooghly, supposed to be one of the most advanced districts in Bengal, it is not a flourishing plant."

Social and political institutions, and conduct of zamindars.

23. There is nothing of special comment under this head. In Burdwan the relations of zamindars and raiyats were generally satisfactory. In Hooghly and Howrah some zamindars endeavoured to raise by illegal means the rents of land benefited by the Rajapur drainage scheme. In Midnapore proprietors with one notable exception treated their tenants where crops failed with consideration.

24. The Lieutenant-Governor thanks Mr. Power for his administration of the Division, and notices with satisfaction the praise bestowed by him upon Messrs. Williams, Dutt and Grierson, among the Collectors, and on Babu Pran Kumar Das, Munshi Nundjee and Babu Jaga Bandhu Bhatacharjee, among Deputy Collectors. The report on the qualifications of officers will be communicated to the Appointment Department, intimation being given to the officers concerned in cases where seriously unfavourable remarks have been made.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Government of Bengal.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE DACCA DIVISION FOR THE YEAR 1892-93.

GENERAL DEPARTMENT.—MISCELLANEOUS No. 2588.

Calcutta, the 14th November 1893.

RESOLUTION.

READ—

The Annual General Administration Report of the Dacca Division for the year 1892-93.

1. The report is submitted by Mr. Luttman-Johnson, who took charge of the Division as Commissioner in November last, a month and ten days after the date on which it was due. The office of Commissioner of Dacca was held by the late Mr. C. F. Worsley from the 1st April to the 21st May 1892, by Mr. T. L. Jenkins from the 22nd May to the 21st June, by Mr. H. G. Cooke from the 22nd June to the 1st November, and by Mr. Luttman-Johnson for the remainder of the year.

Tours and inspections.

2. Of the officers who successively acted as Commissioner, Mr. Worsley spent 22 days, Mr Cooke 35 days, and Mr. Luttman-Johnson 80 days on tour. All the district and subdivisional offices and treasuries except Tangail were inspected by Mr. Luttman-Johnson, who remarks that he found very great room for reform in several directions and departments.

The Collectors of Faridpur and Backergunge were on tour for more than the periods prescribed for their respective districts. In Dacca and Mymensingh the tours fell short of the prescribed periods, the explanations furnished being that in the former district Mr. Jenkins was disabled by fever towards the close of the year, while in the latter Mr. Palit, who was in charge for nearly two months during the best part of the boating season, only spent nine days on tour—an insufficient proportion. The use of boats permits of tours in this Division being spread over a greater portion of the year—an advantage to which most officers are fully alive. Mr. Savage in Backergunge spent some days of every month and Mr. Jenkins in Dacca some days of eleven months on tour with very useful results. The tours of sub-divisional officers were all of the prescribed length.

Weather and crops, and material condition of the people.

3. The rainfall of the year, taking the Division as a whole, was in excess of the average of the previous five years by 1·36 inches, and was fairly well distributed, in Dacca the amount received was 2·44 inches below the average. The aus crop suffered in some districts from the too sudden rise of the water, and the boro from unusual floods, but the outturn of aman rice, the most important food-crop of the Division, was fully up to the average. Prices, however, ruled high—a fact which the Commissioner attributes to the increase of the area under jute and the consequent contraction of the food-stocks. The only classes adversely affected are those with small fixed incomes and wage-earners. The agricultural population continue to be prosperous, and artizans, except weavers, command high prices for their work and are well off. The daily wage of a common cooly is reported to be 4 annas a day in Backergunge, 5 annas in Dacca, while in Mymensingh it is said to vary from 2½ to 8 annas per day.

Public health

4. The total number of deaths registered was 251,839, against 234,157 in 1891-92, the ratio of deaths registered per mille of the population ranged from 12·38 in Mymensingh to 43·6 in Backergunge, the variations being caused for the most part by the different degrees of success attained in the registration of mortality. Mr. Savage is to be congratulated on the results in Backergunge, which indicate that considerable attention has been paid to this subject, while in Mymensingh the figures are not only worthless in themselves, but they are even worse than in the preceding year. The Commissioner is personally of opinion that the year was not unhealthy, the annual inundation having been in his opinion sufficient to cleanse the tanks and wells and replenish the water-supply, on which the health of the people chiefly depends. Fever is said to account for two-thirds of the deaths in the Division. Small-pox raged virulently in the Dacca town and district, causing 1,650 deaths.

It may be mentioned here that there is much room for improvement in the registration of births and deaths in municipal areas—a duty which was transferred to the police by the orders of December 1891, and which appears to be much neglected, especially in Mymensingh.

Trade and commerce.

5. The only novel feature in the trade and commerce of the year is that common earthenware plates and dishes from Holland are now largely sold in this Division. The Commissioner writes :—

"The trade of the port of Narayanganj has not recovered the decline of 1891-92; indeed, there has again been a small decrease – about one per cent. Though there was an increased export of jute, there was a decrease in value. Less salt was imported, prices of this article at Chittagong ruling high. Jute business at Goalundo largely increased, while in oil-seeds business was very slack there."

There was less rice exported from Backergunge than in the previous year owing, the Commissioner thinks, to the action of the raiyats in holding their stocks either with a view to obtaining higher prices or from fear of scarcity. A large business was as usual done in betelnuts and cocoanuts, the former being said to pay one-third of the rent.

Administrative changes.

6. Among administrative changes, the Commissioner mentions the following :—

"The Collector of Mymensingh has made a small but very radical change in the distribution of work among the officers attached to the Sadar station. He found that each officer did a little of everything. He found especially that where criminal judicial was combined with revenue and miscellaneous work, the former was apt to crowd out the latter. Accordingly he has set apart certain officers to do the criminal judicial work, and has confined them to this and the executive work inseparably connected therewith—police, chaukidars, arms, ammunitions. I shall watch the result of this experiment with great interest. The Collector of Dacca is making similar arrangements."

The Officiating Lieutenant-Governor desires the Commissioner to submit a special further report on the results of this experiment.

Civil justice.

7. The following statement shows the civil work of the Division during the year:—

District.	Subdivision or chauki.	Description of Court.	Number of officers.	Number of original cases disposed of. Ordinary.	Small Cause Court.	Details of cases in columns 5A and 5B. Money.	Rent.	Title.	Number of witnesses examined.	Ratio of witnesses detained over two days per cent. of witnesses examined.	Ratio of cases pending at end of year per cent. of cases disposed of.

* Shows the number of witnesses who attended.

The number of civil suits disposed of increased from 113,654 to 131,413, or 15·6 per cent. As compared with the beginning of the year, the number of suits pending has decreased by 8,430, or 29·3 per cent. The remarkable difference in point of material prosperity and in that resort to litigation which

seems to attend prosperity, which exists between the Dacca and Patna Divisions, is illustrated by the fact that, with a population only somewhat more than half that of Patna, the Dacca Division shows six-times the number of money suits and two-and-a-half times the number of rent suits instituted in Patna. The Commissioner makes the following remarks:—

"There has been a large increase in the number of suits disposed of, 15·6 per cent., mostly in the money and moveables class, but largely also in the rent suits class; still there was only one suit to 74 of the population. Faridpur is the most litigious district, with 61 persons to a suit. There is no corresponding increase in our income from court-fee stamps, so the increase is probably in suits of small value.

In the money and moveables class there is large increase in Dacca, Faridpur, and Mymensingh, some 20 per cent, while in Backergunge there is small decrease.

The Collector of Mymensingh explains that the increase in his district is due to the scarcity which prevailed during a portion of the year, and which rendered it impossible for debtors to meet their liabilities In rent suits, on the other hand, though there is increase in all districts, it is largest in Backergunge, due, the Collector thinks, to the prosperity of the people; no doubt rent-receivers take advantage of a good year to press their claims. The increase in rent suits in Mymensingh is stated to have occurred chiefly in the Tangail sub-division, and is attributed to the inundation of 1889-90 In title suits there is little change on the whole."

The ratio of witnesses detained over two days per cent. of the witnesses examined is very high at some munsifis, especially Iswarganj, Kishorganj, Goalundo and Narayanganj. The ratio of appeals confirmed to the total number disposed of ranges from 51·4 in Backergunge to 61·8 in Faridpur.

8. Both cognizable and non-cognizable crime increased during the year, the total number of cases of both kinds being 36,630 in 1892, against 35,269 in 1891 and 31,036 in 1890. The increase in cognizable crime occurred chiefly in the number of burglaries and thefts committed in Dacca and Mymensingh, while there was a large decrease in the number of these offences in Faridpur and Backergunge. The latter, being exporting districts, benefited by the high prices which with the prevailing scarcity developed criminal propensities elsewhere.

Crime.

It is probable, however, that other causes were also at work to bring about these results, for, as the Commissioner remarks, the increase in crime was not so great in the Kishorganj and Netrokona sub-divisions of Mymensingh, which suffered most from scarcity, as in the rest of the district: good police administration rendering successful the measures taken to control and supervise the criminal population and the degree to which petty offences are reported are factors which have an important influence on criminal statistics.

The Commissioner gives some interesting figures showing that the districts of his division compare favourably in point of turbulence with Sylhet in Assam. Taking cases of unlawful assembly and rioting together, after Sylhet comes Dacca, then Faridpur, Mymensingh and Backergunge in the order named. The number of cases, however, in which loss of life occurred is greatest in Backergunge, and it must also be borne in mind that preventive measures under section 107, Criminal Procedure Code, are far more largely resorted to in that district than elsewhere.

9. The weakness of the regular police in this Division has been recognized, and improvements are contemplated when funds become available. Some interesting remarks are made by the Commissioner and the District Officers regarding the conduct and *morale* of the force. The Commissioner writes thus from a somewhat novel standpoint:—

Police

"The police are not and can never be a popular body Here, in India, they are perhaps more unpopular than they are in other countries A very distinguished native officer recently remarked to me that the police would never improve so long as people continued to offer them bribes. I am inclined to agree with him that the faults of the police are the faults of the people, and that only as the people rise to a higher level of public morality will the character of the police improve. From this point of view the lavish abuse of the police which disfigures the native press is encouraging, as showing that the people are becoming more alive to their (own) faults in connection with the police."

The following extract contains Mr. Savage's remarks on the police of Backergunge. He writes that—

"In his district, excluding the police employed on guard and other duties, only 409 persons are employed on regular police duties, or one to 5,266 of the population,

as compared with one to 3,503 in the Province of Bengal, and whatever may be said (and much may be said truthfully) against our police, it must always be borne in mind that this small force has to cope, and has with a fair measure of success coped, with crime in a district notorious for the turbulent character of its inhabitants. When we consider the numerical weakness of the force, the bad pay, the hard work, and the manifold temptations which a district (in which every thief and lathial is rich enough to command the services of a trained pleader) can throw in the way of officers and men alike, the wonder is, not that the police fail to do their duty in many instances, but that duty is to them a word with any meaning. Nevertheless, we have officers and men who are zealous in the discharge of their duties, and if they be still outnumbered by the lazy, incompetent and dishonest, as I am afraid it must be admitted they are, their number will, it is to be hoped, increase year by year with increase of pay to the men greater care in the recruiting of officers."

Rural Police.

10. There appears to be great disparity between the efficiency of the rural police in different districts. Dacca is still backward in this respect. In Faridpur and Mymensingh matters are improving, but much still remains to be done before these districts are on a level with Backergunge. The following account is taken from the Commissioner's report:—

"Mr. Savage, Magistrate of Backergunge, writes that the chaukidars in his district are now well paid and are a very useful body of men. He states that, as a rule, the chaukidar is a man of influence in his village, and can, if he will, keep his mahalla in order. His post is regarded as a very desirable one, and it is his interest to keep it by doing his duty. From the reward fund now started, the Magistrate hopes to be able to give better rewards and so increase the incentive to good work. I think Backergunge is unique in chaukidari as in some other matters. So desirable is the post of chaukidar in this district, that chaukidars, when dismissed, generally appeal to me. They often come to all the way to Dacca to plead their own cause.

I attended a parade at Pirojpur in this district a short time ago, and was astonished at the smartness and intelligence of the men. They bring their uniforms in neat bags, and put them on clean for parade. Each had a neat *chunga* containing his sanad of appointment, his registers of vital statistics, his acquittance roll, and also a copy of questions he had to answer at parade.

It is stated that in this district the chaukidars have now greatly improved in rendering assistance to station officers, and have in numerous instances averted riots which would otherwise have occurred had they not given prior intimation to the police."

It is worthy of note that under a scheme drawn out by Mr. Savage all the chaukidars in his district have been paid in full for the Bengali year 1299, while in every other district there are considerable arrears

Criminal Justice.

11. The following statement shows the criminal work of the Division by districts :—

Stipendiary Magistrates.

District.	Subdivision.	Class of officers.	Number of officers.	Cases disposed of.	Persons disposed of.	Ratio per cent. of persons convicted to disposed of.	Number of witnesses examined. * One died
† Shows number of witnesses who attended

Forty-one Stipendiary Magistrates disposed of 18,027 cases, being an average of 440 cases to each officer against 413 in 1891. The Sub-divisional Officer of Pirojpur in Backergunge disposed of 1,095 cases, with an average of four witnesses to each case. At Patuakhali 879 cases and at Narayanganj 700 cases were disposed of by an officer with an average at both places of three witnesses to each case. At Netrokona and Jamalpur the average number of witnesses in each case was as high as six. The percentage of witnesses detained over two days to the number examined was greatest at Kishorganj (16 per cent.) and Narayanganj (11 per cent.) The ratio of A cases remanded six times and more to the number disposed of was over 10 per cent. at Tangail, Jamalpur Backergunge (Sadar) and Patuakhali. The Lieutenant-Governor is glad to acknowledge that there has been an improvement in the promptitude with which witnesses were examined and in the ratio of convictions confirmed on appeal.

The number of cases disposed of by Honorary Magistrates rose from 4,269 in 1891 to 4,606 in 1892, which was 20·3 per cent. of the total number of cases disposed of, and there can be no doubt that Honorary Magistrates render valuable assistance to the regular staff. Backergunge is still backward in making use of this agency for the trial of cases.

The Honorary Magistrates at Kishorganj, Netrokona, Pirojpur. and Madaripur detained over 10 per cent. of their witnesses for more than two days. The results on appeal are not satisfactory in view of the simple nature of the cases which Honorary Magistrates have to try. The figures are worst for Tangail, Mymensing (Sadar) and Naraingan].

12. The following table shows the attendance of Honorary Magistrates during 1892:—

Return of Attendance of Honorary Magistrates for the calendar year 1892.

District.	Number of Honorary Magistrates.	Number of times asked to attend	Number of times actually attended.	Number of times absent— With leave or notice.	Number of times absent— Without leave or notice.	Number of times absent— Total.
1	2	3	4	5	6	7
Dacca ...	115	2,318	2,145	123	50	173
Faridpur	56	1,923	1,256	117	550	667
Backergunge ...	31	407	327	79	1	80
Mymensingh ...	72	1,998	1,277	157	564	721
Total for the Division.	274	6,646	5,005	476	1,165	1,641

The number of absences without leave or notice is largest in Mymensingh and Faridpur and least in Backergunge, where the number of Honorary Magistrates is small. The Commissioner writes regarding the system as follows:—

"The whole system requires reorganisation. In the first place we cannot expect Honorary Magistrates to work unless we provide them with proper cutcherries and attendants. I have found Honorary Magistrates, who should be first served, relegated to all sorts of makeshift abodes. Then the roster system of attendance seems to me highly inconvenient. An Honorary Magistrate should sit certain days in the week or month, and should give notice a week beforehand when he is unable to attend. There should be an understudy ready to take the place of any Magistrate prevented from attending by sudden illness or other accident. It is a fact that in this Division few Benches sit more than once a week. A daily Bench, such as has been organised at many stations, is unknown. I hope soon to have daily Benches at head-quarters of districts and sub-divisions. The instructions contained in Circular No. 2843J., dated 30th May 1893, will greatly improve the organisation of Benches."

13. The statement below shows the work of the Sessions Courts district by district:—

District.	Particulars of cases. Number committed during the year.	Number disposed of.	Number in which conviction was obtained.	Number in which sentence modified or reversed by High Court.	Number of cases acquitted by Sessions Judge.	Percentage of cases resulting in conviction to total cases disposed of.
1	2	3	4	5	6	7
Dacca ...	59	61	38	5	22	63·3
Faridpur ...	24	32	19	......	9	59·3
Backergunge ...	78	79	49	12	30	62·0
Mymensingh ...	107	105	74	5	30	70·4
Total for the Division.	268	277	180	22	91	64·9

14. The following table shows the impositions, realizations, and collections of fines during the year:—

DISTRICT.	Balance outstanding at the commencement of the year.	Amount imposed during the year.	Amount collected during the year.	Balance outstanding at the end of year.
1	2	3	4	5
	Rs.	Rs	Rs.	Rs.
Dacca ...	10,197	27,691	24,929	10,766
Faridpur ...	10,001	29,002	25,503	10,139
Backergunge ..	5,487	25,701	19,728	8,203
Mymensingh ...	13,692	57,306	44,820	18,183
Total ...	39,377	1,39,700	1,14,980	47,291

It is noticed that the outstanding balances were larger at the close than at the beginning of the year in all districts.

Registration.

15. The number of documents registered during the year was as follows:—

DISTRICT.	Class of Registration office.	Number of offices	Number of documents registered.	Average per office.
1	2	3	4	5
Dacca	Special ...	1	5,377	5,377
	Rural	10	26,828	2,683
Faridpur	Special ..	2	7,467	3,738
	Rural ..	9	33,727	3,747
Backergunge	Special ..	1	5,740	5,740
	Rural ..	15	63,344	4,223
Mymensingh ...	Special ..	1	4,327	4,327
	Rural	13	39,928	3,071
Total for 1892-93 ...	Special ...	5	22,911	4,582
	Rural	47	163,827	3,486
Total for 1891-92 ...	Special ...	4	20,610	5,152
	Rural ...	44	153,409	3,487

There was an increase in the number of registrations which as in other divisions being due to the increasing popularity of the Department is normal and requires no special explanation. Backergunge heads the list with 69,084 documents registered, and Dacca is last with 32,205 registrations. The Commissioner says:—

"Though the increase in business is not so great as in the previous year, it is still highly satisfactory. The increase is distributed over all the districts. While an increase of Rs. 19,635 in receipts in 1891-92 entailed an increase of only Rs. 5,937 in expenditure, this year an increase of Rs. 5,733 in expenditure has only brought in Rs. 8,045 improved income. So, while we made a local profit of Rs. 1,20,119 in 1891-92, this year we have only made Rs. 1,22,431. In Dacca and Mymensingh increased income only about covers increased expenditure; in Backergunge there is a small decrease in receipts, while expenditure increased by Rs. 516; only in Faridpur is there really much improvement in profits, Rs. 3,268. This has not been satisfactorily explained. It is thought that there has been improvement in copying fees and in fees charged for delay in taking back documents"

16. The following statement shows the demands, collections, remissions, and balances of land revenue and cesses, district by district, the three classes of estates distinguished against land revenue being (I) Permanently-settled estates, (II) Temporarily-settled estates, (III) Estates held direct by Government:—

Land Revenue and Cesses.

		Grand total for 1891-92	......	43,91,991	4,52,555	41,01,742	3,75,038	2,52,154	86,955	

The total collections of land revenue amounted to Rs. 35,14,217 against Rs. 34,95,801 in the previous year, 95·7 per cent. of the total demand having been collected against a percentage of 94·4 in 1891-92. The collections in estates of class II were poor, except in Backergunge, where over 94 per cent. of the true recoverable demand was collected in all estates of this class. Owing to the assessment of new estates and new accretions in Backergunge, the revenue from estates held under direct management increased from Rs. 4,95,768 to Rs. 5,23,830, and the cost of management fell from 7·5 per cent. of the current demand to 5·5. The collections in estates leased to farmers were particularly bad in Dacca and Faridpur, and the Officiating Lieutenant-Governor considers the explanations offered of these unsatisfactory results altogether inadequate.

In regard to cesses, the percentage of collections on gross demand varies from 84·3 in Faridpur to 96·9 in Dacca. There has been improvement since the previous year in nearly all districts, but there is room for further improvement in Faridpur.

Certificate Procedure.

17. The statement below exhibits the certificate work of the year:—

District.	Department.	Number pending at beginning of year.	Number issued during year.	Total for disposal.	Amount of certificates.	Number disposed of during year.	Amount realized.	Number pending at close of year.
1	2	3	4	5	6	7	8	9
					Rs.		Rs.	
Dacca	All departments	1,469*	2,781	4,270	71,000	3,422	45,199	[illegible]
	Total for 1891-92 ...	661	3,049†	3,710	54,482	2,200	37,597	1,510
Faridpur	All departments	1,198*	1,421	2,619	82,821	2,157	64,128	462
	Total for 1891-92 ...	1,166	2,469†	3,635	1,19,206	2,425	76,759	1,210
Backergunge	All departments	890*	2,883	3,773	1,79,827	3,051	1,42,664	722
	Total for 1891-92 ...	1,120	2,791†	3,911	2,23,888	3,012	1,66,533	899
Mymensingh	All departments	1,348*	2,147	3,495	1,03,178	1,937	47,459	1,558
	Total for 1891-92 ...	1,236	2,648†	3,884	1,38,235	2,536	76,718	1,348
	Total ...	4,925*	9,232	14,157	4,35,826	10,567	2,99,485	3,590
	TOTAL FOR 1891-92 ...	4,183	10,957†	15,140	5,35,811	10,173	3,57,907	4,967

* These figures exclude the number of certificates received from other districts.
† These figures show the number of certificates filed during the year.

There were 14,157 of which 10,567 were disposed of, leaving 3,590 pending at the close of the year. The cases disposed of exceeded the number instituted in all the districts of the Division, except Mymensingh, where the number pending at the close of the year was very large, owing, it is said, to the fact that 1,347 cases were instituted in the last quarter of the year as compared with 817 institutions in the corresponding quarter of the preceding year.

Partition.

18. The total number of partition cases for disposal was 555, including 463 which were pending at the close of the preceding year. Of these 114 were disposed of, thus reducing the number of cases pending at the end of the year to 441. In Dacca the oldest pending case dates from January 1881, in Mymensingh from August 1883, and in Backergunge from January 1884. It is desirable that some explanation should be offered in the column of remarks to account for these long delays. The same remark applies to the statement of Land Acquisition cases.

Excise.

19. The main features of the working of the Excise Department are exhibited in the statement below—

District.	Country spirits.				Ganja and Bhang.				Opium.			
	Number of shops.	License fees.	Gross gallons.	Total receipts.	Number of shops.	License fees.	Gross maunds.	Total receipts.	Number of shops.	License fees.	Gross maunds.	Total receipts.
1	2	3	4	5	6	7	8	9	10	11	12	13
		Rs.		Rs.		Rs.		Rs.		Rs.		Rs.
Dacca ...	64	40,358	15,462	91,931	80	88,141	278	1,46,403	34	5,811	22	24,648
Faridpur ..	43	6,110	6,197	23,343	62	26,861	74	44,082	20	3,196	7	9,626
Backergunge ..	39	13,694	6,860	34,146	74	29,061	68	45,931	45	12,112	20	34,962

Revenue from all sources.		Rate per head of population.
	Rs.	Rs. A. P.
Dacca	2,71,349	0 1 9
Faridpur	82,924	0 0 8
Backergunge	1,20,666	0 0 10
Mymensingh	3,35,501	0 1 6
Total ...	8,10,440	0 1 3
Total for 1891-92 ...	8,18,086	0 1 3

The consumption of country spirits has increased in Faridpur and diminished in other districts, while Dacca only shows a slightly increased consumption of ganja. Mr. Savage introduced in Backergunge a system of issuing ganja to licensees only in proportion to the amount of license fees paid by them, which, while it considerably reduced the quantity of ganja sold, has brought retail selling prices to one and the same level, prevented unhealthy competition, and checked illicit sales.

The excise revenue amounted to Rs. 8,10,440 against Rs. 8,18,086 in 1891-92, the incidence of revenue being 1 anna 3 pie per head of the population.

Income Tax.

20. The average incidence of the income-tax in this division is Re. 1 to 35 persons. The incidence varies from Re. 1 to 28 persons in Dacca, to Re. 1 to 48 persons in Faridpur, where the Commissioner seems to think that the tax could be made more productive without resorting to harsh assessments.

Communications.

21. The Officiating Lieutenant-Governor observes with pleasure the development of steamer communications in this division. Some of the services now maintained receive subsidies from the different District Boards, but it is hoped that they will soon be in a position to dispense with such assistance. If the companies which run these steamers are soundly managed, they should do remunerative business and confer much benefit on the people of Eastern Bengal, where the great waterways are the natural avenues of wealth.

The Commissioner's remarks about projected railways will be considered in the Public Works Department, and those on the subject of towing-paths in the Municipal Department. The Lieutenant-Governor agrees with the Commissioner in thinking that the proper maintenance of towing-paths is a matter of much importance to the people in districts like Backergunge, where traffic is principally carried on through rivers.

Education.

22. The following table gives the main educational statistics for each district in the division exclusive of private institutions for indigenous instruction:—

District.	Class of schools.	Number of schools.	Number of pupils on rolls.	Cost. Provincial.	District Board.	Municipality.	Fees.	Other.	Total.	Cost per head of pupils.	Population.	Number of boys of school-going age.	Percentage of boys at school to boys of school-going age according to Director of Public Instruction's report.

	GRAND TOTAL FOR 1891-92.	7,876	2 08,309	67,384	1,14,395	6,887	4,47,776	1,66,514	8,03,256	3·8			

NOTE. In the above statement the cost of buildings, furniture, inspection, scholarships and miscellaneous charges amounting to Rs. 1,13,745 is not included.

It will be observed that about 29·6 per cent. of the boys of school-going age were actually at school, the highest ratio being in Backergunge (42·2 per cent.) and the lowest in Mymensingh (17 per cent.) As remarked last year there is very great room for improvement in the latter district. At the close of the year there were 7,874 schools with 206,133 pupils against 7,876 schools with 208,309 pupils in 1891-92. The District Boards spend considerable sums on education, and the greater part of their contribution goes to the support of primary schools. The Dacca Municipality, though its total expenditure during the year amounted to Rs. 1,86,487, contributed nothing towards primary education, and other municipalities but little. It is to be hoped that recent orders issued by Government will effect a reform in this respect.

The average cost of primary education per pupil is largest in Backergunge and least in Dacca and Faridpur.

There were 19,803 girls at school as compared with 17,961 in the previous year, and 14,507 in 1890-91. These figures indicate that female education is gaining ground.

The number of Muhammadan pupils (boys and girls) on the other hand declined from 131,530 in 1891-92 to 117,599 in 1892-93, the decrease being attributed to the high price of articles of food. The success of Muhammadan pupils in the different departmental examinations was indifferent compared with other sections of the community. While Muhammadans form 60 per cent. of the total population and 48·6 per cent. of the total number of pupils, of the successful candidates, at the lower primary scholarship examination only 23·5 per cent were Muhammadans, and the percentage in examinations of a higher order is much less.

Dispensaries.

23. The following table gives the statistics relating to dispensaries:—

DISTRICT.	Number of dispensaries.	INCOME FROM— Government.	District Board.	Municipality.	Subscriptions.	Total.	DAILY AVERAGE PATIENTS— In-patients.	Out-patients.	Ratio per cent. of outdoor patients to total population.
1	2	3	4	5	6	7	8	9	10
		Rs.	Rs.	Rs.	Rs.	Rs			
Dacca	10	936	112	10,471	16,025	27,544	125	293	2·3
Faridpur	6	151	906	2,798	[illegible]	7,1[illegible]7	16	132	1·4
Backergunge	5	182	1,062	1,947	2,4[illegible]9	5,6[illegible]0	23	126	1·1
Mymensingh	5	812	1,557	4,590	17,608	24,567	49	420	1·9
Grand Total	36	2,081	3,637	19,806	[illegible]	64,888	213	971	1·7
GRAND TOTAL FOR 1891-92.	33	883	3,230	16,267	37,315	57,695	51	233	1·6

There are 36 Dispensaries in the Division with an average daily attendance of 971 out-patients, being 1·7 per cent. of the total population as compared with 1·6 per cent. in the year preceding. Of these 36 institutions, 13 are supported by District Boards and Municipalities, and the rest (23) by private individuals and subscriptions. The Commissioner says:—

"I am inclined to attribute our backwardness in the matter of public charitable dispensaries, partly to the fact that we are more liberally provided with private practitioners of different systems of medicine than many other parts of India."

The Officiating Lieutenant-Governor observes with pleasure the success which has attended the liberal expenditure of Srimati Bindu Bashini Chaudhurani and Srimati Jannabi Chaudhurani on the Tangail and Santosh dispensaries respectively.

Local Self-Government Institutions.

24. The Commissioner makes the following remarks regarding the District and Local Boards:—

"Most of the members of the Dacca Board continued to take considerable interest in the questions which came before them for consideration. The Faridpur Board worked satisfactorily and smoothly. The Local Boards have no funds of their own, and are rarely allowed for expenditure more than a small percentage of the amount they contribute to the District Funds. Under these circumstances, that in Dacca members take some interest in the transaction of business is very satisfactory, while the statement that in Faridpur they are a failure can hardly cause surprise. In Backergunge the members of both District and Local Boards have taken great interest in their work, and steady progress has been

the result in sanitation, communications, and education. The Mymensingh District Board is far the most helpful body Mr. Earle has ever presided over. The members take the keenest interest in the Board's affairs. The Local Boards in this district carried out their vicarious duties satisfactorily."

There are now 17 municipalities, ranging from the large and important town of Dacca with a population of 82,321, to rural areas, which in some cases hardly fulfil the conditions of section 10 of the Act. The character of the work done appears to have been fairly satisfactory. The Commissioner advocates the introduction of some form of rural municipal government.

Political.

25. Of political institutions and the press there is little to be said. The Commissioner remarks:—

"I look to the press of this country as the great social and economic reformatory agent of the future. At present it is merely in its infancy, and spends much of its time in discussing political questions of very secondary importance."

Conduct of the zamindars.

26. The conduct of zamindars in their relation to Government has been satisfactory.

In Dacca Nawab Sir Abdul Gani, Bahadur, K.C.S.I., Nawab Ahsanulla Bahadur, C.I.E., Raja Rajendro Narain Roy Bahadur of Bhowal, and Raja Sri Nath Roy of Bhagyakul, have well maintained their reputation as law-abiding zamindars. Maharaja Sir Jotindra Mohan Tagore and Babu Kali Kissen Tagore in Faridpur, Raja Sir Surendra Mohan Tagore and Babu Kali Kissen Tagore in Backergunge, are reported to manage their estates well. In Mymensingh Babu Jogendra Kishore Ray Chaudhri, the Sherpur landholders especially Babu Radha Balab Chaudry, the Tangail zamindars, Muhamed Ali Khan of Koratia, Maharaja of Durgapur, and Babu Jogat Kishore Acharjee of Muktagacha are favourably mentioned. Babu Upendra Chandra Sen of Basanda in Barisal gave a liberal donation of Rs. 2,800 for the erection of an infectious disease's ward in connection with the Barisal hospital. The Lieutenant-Governor notices with regret that Srimati Bindu Bashini Chaudhurani and Srimati Jahnavi Chaudhurani should be hostile to one another, for both are public-spirited, especially Srimati Bindu Bashini, who has founded the best hospital in the district.

Relations of landlords and tenants.

As regards the relations subsisting between landlords and their tenants, the Commissioner makes the following observations:—

"The relations between the landlords and their tenants in this Division were on the whole not unsatisfactory. In Dacca a few cases of misunderstanding between these two classes are reported to have occurred in the sub-divisions of Naraingunj and Munshiganj. Faridpur, as reported last year, suffers from the evil effects of non-resident landlords, and the Collector mentions two typical cases as instances in point—one in which the naib of a zamindar's cutcherry at Binodepur, in the Madaripur sub-division of that district, was brutally murdered by some of his tenants, and the other, in which a peon of the Munsif's Court at Bhanga, in the Sadar sub-division, was murdered in cold blood by the adherents of certain zamindars, who thereupon charged a refractory raiyat with the murder in order to get him out of the way. In Backergunge, of the combinations noticed in paragraph 164 of the last year's printed report, that at Beghadi still exists in a modified form. There was a riot during the year in which a tenant belonging to the combination was killed. The Collector thinks that the combination will probably continue till the estate comes under the Court of Wards. The other combination at Charadi has, through the judicious action of a local pleader who was put in charge of the zamindari affairs, been broken up, and the tenants are now paying their rents at the former rates. But though the combinations reported last year have subsided, others are about to spring up. The Collector states that at the first fruits of good crops and high prices, some of the zamindars are making demands for extraordinary subscriptions which, it is to be feared, will prove the forerunners of new and serious disputes. It may be hoped, however, that the experience of the past will have taught the zamindars that the tenants in combination are ordinarily stronger than the landlords, however much the latter may have right on their side, and that, in recent years at least, the landlords have never succeeded in breaking down such combinations by force. Roughly speaking, the Collector remarks, the relations are strained over one-fourth of the district, and that over the remaining three-fourths there is peace which will continue as long as the landlords are content with their present income."

"In Mymensingh the general relation between landlord and tenant is reported to be one of sullen discontent, but no exceptional manifestation of bad feeling came to light during the year. The never-ending disputes between Bindu Bashini Chaudhurani and her rival Jahnavi Chaudhurani in the sub-division of Tangail, which for years past have unsettled that sub-division, continue to exist, but have not given rise to very serious disturbance during

the year under report. There was also a series disputes between Rahatannessa Khanam and her son Abdul Rahaman, which caused straine relations between the raiyats of the estate and the lady in question. The Magistrate is now gaged in trying to settle this unfortunate quarrel amicably."

Conclusion.

27. The Officiating Lieutenant-Governor desires to thank Mr. Luttman-Johnson for full report and careful administration of the ivision. Among District Officers Messrs. Savage and Earle and among Subvisional Officers Mr. Basanta Kumar Mullick and Babu Raj Mohun Chakravartve been specially commended.

The confidential remarks of the Corsioner on the characters of officers will be forwarded to the Appointment Dtment as usual.

By order of the Lieuter Governor of Bengal,

M. FINUCANE,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE GENERAL ADMINISTRATION REPORT OF THE CHOTA NAGPUR DIVISION FOR 1892-93.

GENERAL DEPARTMENT—MISCELLANEOUS—No. 2582.

Calcutta, the 14th November 1893.

RESOLUTION.

READ—

The Annual General Administration Report of the Chota Nagpur Division for 1892-93.

The report is submitted by Mr. Grimley, who held charge of the Division as Commissioner from the 1st April to the 30th May 1892, and from the 26th October to the end of the year. During Mr. Grimley's absence on leave, Mr. Wace officiated as Commissioner.

The Division was twice visited by the Lieutenant-Governor (Sir Charles Elliott) during the year—first in J and then again in November. Sir Charles Elliott inspected all the district offices and treasuries, and examined and discussed many important questions including the proposal to extend the Bengal Tenancy Act VIII of 1885 to the Division, the Bill to regulate the enhancement of rents and the commutation of predial services, the state of the tauzi, the re-settlement of Palamau, the status of the jagirdars tenures of that district, forest conservancy, the arrangements for the disposal of civil suits, and the large question of free emigration.

Tours.

The Commissioner's tour, of which he gives a full and interesting description, included the Political States of Kharsowan, Seraikela, Sirguja, Udaipur, Jashpur and Gangpur, which were visited by Mr. Grimley during the cold weather. All the district offices were inspected either by Mr. Grimley or Mr. Wace with results which are reported as being on the whole satisfactory, but the sub-divisions, of which there are only two, Giridih and Gobindpur, were not visited. Mr. Grimley explains that, owing to the great distances which have to be traversed, it is difficult to combine a complete tour of the districts with a tour through the Political States.

The tours of District and Subdivisional Officers were in all cases of the prescribed length and appear to have been well arranged and well distributed throughout the year. Colonel Garbett in Hazaribagh, and Mr. Bright in Palamau, are specially mentioned by the Commissioner for their excellent work on tour. The rules regarding inspections of offices were also observed with commendable punctuality.

Weather and crops.

2. The Commissioner gives a summary of the atmospheric conditions of the year and the outturn of the various harvests. He remarks that the year was characterised by intense heat in April and May, and unusual cold in November, December and January. The rainfall was sufficient in quantity, but not always seasonable or evenly distributed. On the whole conditions were favourable, and taking the good with the bad, the average results were probably little, if anything, below the normal, except in the Manbhum district, certain localities in which suffered from a partial failure of the crops. The outturn of bhadoi ranged from 12 annas in Manbhum to 19·5 annas, nearly a bumper crop, in Hazaribagh. The winter rice crop, which at one time promised well, was adversely affected by the insufficient rainfall in October and November, and the average for the division is estimated at about 13 annas. Owing to deficient moisture in November and December, which was followed by heavy and untimely rain in March, the rabi crops were the worst of the year, the outturn ranging from 8 annas in Manbhum to 14 annas in Hazaribagh. Fears were at one time entertained in respect of the important mahua crop, which forms one of the chief articles of food of the poorer classes for two or three months of the year, but in spite of the heavy rain of March, a fair outturn was eventually obtained.

Public health.

3. The Commissioner writes that the year was decidedly less healthy than either of the two preceding it. Cholera and small-pox were more prevalent throughout the division, and the former assumed an epidemic form in Lohardaga and Manbhum,

causing 3,379 deaths in the former and 2,952 deaths in the latter district, against 1,939 and 1,111 respectively in the previous year. In Hazaribagh the number of deaths from cholera was 2,296 against 1,180 in 1891-92, and some villages in the Hussainabad and Chainpur thanas in Palamau were also attacked with considerable severity. Mortality was also largely caused by bowel-complaints, probably of a choleraic order.

Districts.	Population according to census of 1891.	Total number of deaths reported in—			Ratio per mille in—		
		1890-91.	1891-92.	For the year 1892.	1890-91.	1891-92.	For the year 1892.

Palamau	596,770	14,174	21,968	23,292			39·03
Singhbhum	545,488	8,786	9,905	10,554	12·0	14·7	19·34
Manbhum	1,193,328	24,204	26,135	30,078	20·3	21·9	25·20

Material condition of the people, prices of food and labour, and emigration.

4. In this Division, which supplies labour largely to other parts of Bengal and to Assam, it may be stated with almost mathematical accuracy that the number of emigrants from each district varies inversely with the material prosperity of the people in any particular year, while at the same time the standard of comfort has a tendency to rise, because labourers and cultivators grow less easily satisfied with what they can earn in their own homes, and more ready to emigrate to better their condition. In other words, the Division is so far progressive. Applying these general observations to the circumstances of the past year, it may be inferred that, in all districts except Manbhum, the year was one of advancing prosperity. Prices of food-grains generally ruled higher, but while people depending on occupations other than cultivation on fixed incomes suffered, the cultivators, especially in Lohardaga, made large profits by selling the surplus of their harvests for export to meet scarcity elsewhere. In Manbhum where, as already stated, there was a partial failure of the crops, there was no surplus to sell, and possibly some scarcity Accordingly Hazaribagh, and to a greater degree Lohardaga, show a diminution in the stream of emigration; while in Manbhum, so far as the returns can be relied on, the number of emigrants increased from 2,787 persons in 1890-91 and 7,892 in 1891-92 to 12,296 in 1892-93, the pressure of scarcity being in this way so far relieved that the road works which were undertaken in some parganas, where the harvests were worst, attracted but few labourers. As regards Singhbhum and Palamau, it is difficult to estimate the amount of emigration, but probably it is small, and in the former district at least there are not wanting indications that the people are for the most part well off. Mr. Renny, the District Officer, who is an undoubted authority, writes as follows:—

"Speaking generally, the agricultural classes have stored up a full year's food-supply in their houses, and with this they will never part, no matter how high the prices offered are; while the labouring classes have plenty of work, and the price of even unskilled labour ranges high"

Again, speaking of prices, the Commissioner says—

"In Singhbhum, as stated in the last year's report, owing to the opening of the Bengal-Nagpur Railway and mining and other industries, there has been a general rise in the wages of every class of labourer except gharamis. In some cases the increase has been at the rate of 50 per cent., and in others the rate is 100 per cent. It is said that the Kols of Singhbhum are a most independent lot. They are chiefly of the agricultural class, and as their material condition is generally good, they hold out for a certain rate of wages, and will not accept a pice less. They are, however, excellent workers, and European contractors would often be too glad to pay them 10 pice or 3 annas per diem, for they are sure to get from them a full equivalent of the amount paid."

Palamau is more backward than the rest of the division, there being little export trade from it; prices ruled lower, though owing to deficient communication they varied considerably in different localities in the district. The condition of the people was on the whole satisfactory.

This seems to take awayt for the effect of the quetitions immediately preceding.

5. Complaints continue to be made of abuses in connection with free emigration. Colonel Evans Gordon, the Deputy Commissioner of Lohardaga, and Mr. Bedford vigorously condemn the system as being a source of cruelty, oppression and wrong. The Lieutenant-Governor hopes that the most important means at present available for the prevention of abuses, namely, the inspection of coolie depôts, will be systematically practised. In Palamau the inspection of a depôt by Mr. Babonau led to the discovery of what is said to be a typical case of kidnapping. The following account of the case is taken from the Commissioner's report—

Abuses in emigration.

"One serious case of kidnapping occurred in Palamau in December last, in which two arkatis carried off a whole family from the village at the order, they say, of the malik of the village, who told them to take the family to the depôts and realize a debt due to the malik. On the road the husband managed to effect his escape, and the two arkatis proceeded to Daltonganj with the wife and several little children. They were safely landed in a depôt, and nothing would probably have been heard of the case, had not Mr. Babonau, when inspecting the depôt shortly after their arrival, seen signs of recent occupation, though the depôt-holder denied that there had been any coolies for some days. A search was then made, with the result that the women and children were found confined in a room in a neighbouring house. Both the accused were convicted of wrongful confinement."

6. The number of tea gardens fell from 29 to 28, the area under tea from 3,646 to 3,511 acres, and the total quantity manufactured from 535,512 to 373,957fb, the average yield per acre being 112fb against 157fb in the preceding year. The Commissioner says:—

Manufactures and Mines.

"The prospects of the tea industry in the Division are not favourable, the climate is too dry, the rainfall too uncertain, and the soil not sufficiently rich. Labour is also an annually increasing difficulty, owing to emigration, and wages have risen since the opening of the gardens, and of a tendency to rise each successive year, while the tea produced is not a very high quality. Mr. Middleton, an experienced tea planter of Lohardaga, writes—'Chota Nagpur can never compete with the other tea districts of India and Ceylon, and its cultivation will eventually have to be abandoned.'"

The manufacture of lac increased in Lohardaga, but this improvement was more than counterbalanced by the falling off in Manbhum, where the conditions of the year were unfavourable to this industry. Considerable quantities of lac are said to be grown in the Division, and especially in Palamau, for export to Gaya and other districts, where it is manufactured into shell-lac. Catechu is manufactured on a small scale in Hazaribagh and Palamau, and soapstone bowls and plates are made in Singhbhum and parts of Lohardaga. A silk filature started at Palamau has proved a failure; but large quantities of cocoons are exported chiefly to Murshidabad for manufacture into tusser silk, the value of the cocoons exported from Singhbhum alone being estimated at Rs. 5,59,240

The coal mines in the Giridih and Gobindpur sub-divisions continue to be successfully worked, while as regards the mica mines, the Commissioner says:—

"Up to the end of the last year, altogether 189 Government mines, covering 90·30 acres, have been settled. The annual revenue demand of these mines amounted to Rs. 9,616-9, out of which Rs. 9,319-9 were realized during the year. The balance Rs. 297 is being realized under the certificate procedure. The total output of all mica mines worked in Hazaribagh was 2,236 maunds against 1,789 maunds in the previous year. The demand for mica is said to be principally from the United States, but is said to be now affected by the McKinlay Tariff Bill, under which a duty of 35 per cent. is levied upon all foreign mica."

The Baraganda copper mines have been purchased by Messrs. Bird and Company, but work has not yet been resumed. A mine at Rakka belonging to the Rajdoha Mining Company, Limited, is likely to prove profitable as two valuable beds of copper are reported to have been discovered. Gold operations have not proved more successful this year than last, and no silver or tin has so far been found by prospectors.

7. The Commissioner remarks that the chief feature in the trade of the past year was the large increase of exports from all districts of the division, but this is hardly borne out by the table of statistics showing the exports by rail from Manbhum in 1892-93 as compared with those of 1891-92. In Lohardaga statistics were collected between the 1st September 1892 and 31st March 1893 of the traffic on the road between Ranchi and Lohardaga, and the results indicate that there has been an immense expansion of the volume of trade passing over this route. In

Trade.

Singhbhum the timber trade was carried on during the year on the extensive scale which was noticed in last year's Resolution. It is stated that the trade of Palamau is much hampered by want of good roads, but measures are being taken for the improvement of the communication between this district and the neighbouring district of Gaya.

Civil Justice.

8. The following table exhibits the work of the Civil Courts during the year:—

DISTRICT.	Sub-division or chauki.	Description of Court.	Number of officers.	Number of original cases disposed of. Ordinary.	Small Cause Court.	Details of cases in columns 5A and 5B. Money.	Title.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.	Ratio per cent. of cases pending at end of year to total disposed of.
1	2	3	4	5A	5B	6	7	8	9	10

N.B.—This statement does not include the figures for rent cases disposed of by the Deputy Collectors, &c., acting as Munsifs.
* The total for 1891-92 includes the figures for Sub-Judges.
† Shows the number of witnesses who attended.

Over 20 per cent. of the witnesses were detained over two days in the Munsifis of Giridih and Raghunathpur, and over 10 per cent. in those of Ranchi, Lohardaga, Daltonganj, and Gobindpur.

During the year the appointment of a Subordinate Judge for the district of Manbhum was sanctioned with the addition of a munsif, who is to work for eight months of the year at Purulia, and for the remaining four months at Chaibassa.

The following table shows similar statistics in regard to rent suits

DISTRICT.	Place where sits.	Number of officers.	Number of rent cases disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total examined.	Ratio per cent. of cases pending at end of year to total disposed of.
1	2	3	4	5	6	7
Hazaribagh ...	Sadar	4½	558	1,040	Nil	5
	Giridih	2	318	442	8	5
	Chatra	1	141	188	9	16
Lohardaga	Ranchi	5½	1,617	Witnesses not given.		11
	Lohardaga	1	370			11
Palamau ...	Sadar	1½	75	246	16	21
Singhbhum ...	Sadar	3	91	59	Nil	68
Manbhum ...	Sadar	5½	1,513	3,087	No register kept of witnesses detained.	13
	Raghunathpur	1	472	470		10
	Barabazar	1	751	454		6
	Gobindpur	1	234	287		9
	Total ..	27½	6,105	...	.. ..	11

Witness attendance registers do not appear to have been maintained in Lohardaga and Manbhum. The omission should be explained. At Daltonganj 16 per cent. of the witnesses in these suits were detained over two days. The ratio of cases pending at the close of the year to the total number disposed of is very large in the case of Singhbhum, where it is observed that three officers disposed of only 91 cases with 59 witnesses.

Crime.

9. There was an increase of 132 in the number of cognizable cases reported during the year, and a decrease of 118 in the number of non-cognizable cases, the total

number of cases of both descriptions being 11,098 in 1892 as compared with 11,084 in 1891.

Police.

10. The following remarks which are taken from the Commissioner's report will show that there is still much room for improvement in the conduct and management of the police force:—

"As a body, I cannot speak in terms of praise of the regular police force of this Division in the conduct of investigations. There are a few good officers who may be relied upon to put forth their whole strength and intelligence in the discharge of their duties; but as for the rest, they rarely manage to exhibit the possession of qualities of striking ability in important enquiries, requiring promptness, skill and delicacy in execution. In cases of murder, when the delinquent fails to confess his guilt, a clue is very seldom obtained, and the enquiry is prolonged without any tangible result, the police being incapable of overcoming the combination of village cliques formed to throw a protecting mantle over the offender. In house-breaking and dacoity their detective ability is at a low stand-point, and the jungly state of the road is invariably put forward, and accepted, as the excuse for failure to detect highway robberies. The responsibility of this state of things must in a certain degree rest with the District Superintendent, who, it is to be feared, does not take sufficient advantage of the numerous opportunities he has of educating his officers up to their duties and of infusing into them a spirit of activity, zeal and enthusiasm for their work. A judicious system of approval and commendation will do much more to train up an efficient body of men than a plan of fault-finding and punishment of petty irregularities. In fact, what is wanted is a stronger bond of sympathy between the police and those placed in authority over them. When an officer visits a police-station, something more is required than answering the series of inspection questions, and looking to the equipment of the men and the state of the buildings. A District Superintendent should spend several days at a station for the purpose of discussing with the officers concerned the details of pending enquiries, pointing out how the investigation should proceed, and mistakes committed in previous investigations. He should further make himself thoroughly acquainted with the rank-and-file of the force, for there is no greater inducement to exertion than for a man to know that he has a personality of his own which is recognized by his superior; and under this encouragement he is more likely to work with energy than if he is treated as a mere machine, to be moved about at the will and pleasure of his master."

Auxiliary Police.

11. The chaukidars, who in this division are partly under Act V (B.C.) of 1887, and partly under an old Regulation of 1817, appear from the reports received to have worked fairly well, except in Palamau. The conduct of the ghatwali police force, another adjunct to the regular police, was generally satisfactory, especially in Singhbhum, where there was not a single case of dacoity or highway robbery along the routes guarded by them. The ghatwals of Manbhum are, however, not as useful a body of men as they might be, and the Commissioner adds that there are many complex questions connected with them, and that their abolition and effacement under a system of commutation seems to be on many grounds desirable.

Criminal Justice.

12. The following table exhibits the work of the stipendiary Magistrates during the year:—

District.	Subdivision.	Class of officers.	Number of officers.	Cases disposed of.	Persons disposed of.	Ratio per cent. of persons convicted to disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.	Ratio per cent. of cases confirmed in appeal to total appealed.	Number of A cases disposed of. * Shows the number of witnesses who attended.

The number of cases disposed of was less than in the previous year, being 6,045 against 6,406. The percentage of persons convicted remained the same, 54, and the number of witnesses detained for more than two days exceeded 10 per cent. of the number examined in only one district, Palamau. The number of A cases remanded six times and more was largest proportionately in the Sadar Courts of Lohardaga, but even there the ratio was not more than 8 per cent. of the total number of A cases disposed of. The Officiating Lieutenant-Governor is glad to notice the marked improvement in this respect.

13. The following table shows the work of the Honorary Magistrates:—

District.	Sub-division.	Class of officers.	Number of officers.	Cases disposed of.	Persons disposed of.	Ratio per cent. of persons convicted to disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.	Ratio per cent. of decisions confirmed in appeal to total appealed.	Number of A cases disposed of.	Number remanded six times and more.	Average of cases disposed of per officer.	Average of witnesses examined per case disposed of.	Ratio per cent. of column 12 to column 11.

		Total	17¾	1,754	2,286	57	3,821	5	65	30	4	99	2	13
		Total of 1891-92	19	1,876	2,265	58	3,811	3 1	81	147	12	208	2	8

One thousand seven hundred and fifty-four cases were disposed of by 18 Honorary Magistrates or Benches, giving an average of 99 cases for each Magistrate or Bench. The ratio per cent. of persons convicted was 57 as compared with 58 in the previous year, and the number of witnesses detained for more than two days was satisfactorily small. The Benches at Hazaribagh and Giridih examined 899 witnesses without a single case of such detention. The Ranchi Magistrates disposed of 11 A cases, of which 4 were remanded six times or more, but no delays of this kind are reported elsewhere, and the Officiating Lieutenant-Governor has to express his satisfaction with the generally useful character of the work done.

14. The following table shows the attendance of the Honorary Magistrates:—

District	Number of Honorary Magistrates.	Number of times asked to attend.	Number of times actually attended.	Number of times absent*		
				With leave or notice.	Without leave or notice.	Total.
1	2	3	4	5	6	7
Hazaribagh ...	30	877	713	95	69	164
Lohardaga ...	10	258	196	48	14	62
Palamau ..	5	225	215†	6	8	14
Singhbhum ...	4	220	179	9	32	41
Manbhum ...	41	719	511‡	24	193	217

* Does not include absence made up by attendance out of turn.
† Excess attendance 4 days.
‡ Excess attendance 9 days.

The attendance appears to have been worst in Manbhum.

15. The following table shows the results in Sessions cases :—

District.	Number of cases committed but pending at commencement of the year.	Number committed during the year.	Total number for disposal.	Number disposed of.	Number in which conviction obtained.	Number of cases in which sentence was modified or reversed by High Court.	Number of cases acquitted by Sessions Judge.	Number of cases otherwise disposed of.	Percentage of cases resulting in conviction to total cases disposed of.
1	2	3	4	5	6	7	8	9	10
Hazaribagh	2	7	9	7	4	2	3	...	57
Lohardaga	5	21	26	15	8	1	7		53
Palamau	...	10	10	7	5	2	2	..	71
Singhbhum	1	6	7	7	5	.	2	...	71
Manbhum	4	18	22	19	15	2	4		79
Total .	12	62	74	55	37	7	18	..	67

The percentage of cases resulting in conviction to the total number of cases disposed of was 67 for the Division. The percentage was over 70 in Palamau, Singhbhum and Manbhum, but in Lohardaga and Hazaribagh the figures are 53 and 57 per cent., respectively. It is evident that officers in these districts have not been sufficiently careful in making committals.

16. The fine register for the year shows that the amount of outstanding fines exceeded the balance at the beginning of the year in the districts of Singhbhum and Manbhum, while elsewhere the outstanding balance was reduced.

District.	Balance outstanding at commencement of the year.	Amount imposed during the year.	Total demand.	Amount collected during the year.	Amount remitted or written off during the year.	Total collected and remitted.	Balance outstanding at the end of the year.

	Rural ...	4	9,099	2,274
Total ...	Special ...	5	11,936	2,387
	Rural ...	7	13,505	1,929

The increase in the number of documents registered is mainly contributed by Manbhum. The Commissioner says:—

"The principal reason of the very remarkable increase in Manbhum seems to be the high price of food-grains. Owing to the deficiency of the last year's crops in the district, almost all classes had to purchase rice or paddy crops, and in order to procure money for the purpose, the middle and the poorer classes were obliged either to sell, or to mortgage, or to lease out in perpetuity their small holdings."

The increase in Palamau is attributed to the large number of marriages celebrated during a year which was regarded as specially auspicious for this purpose, and the consequent expenditure often met by loans on the security of zarpeshgi leases.

The decrease in Singhbhum is said to be due to the fact that owing to the uncertainty of agricultural prospects, no loans were advanced on the security of land, while the failure of former enterprises discouraged the grant of mining leases.

18. The following table shows the demand, collection, remission and balances of land revenue and cesses:—

District.	Class of demand.	Class of estates.	Number of estates.	Demand. Current.	Demand. Arrear.	Collections of 1892-93. Current.	Collections of 1892-93. Arrear.	Balance on 1st April 1893. Current	Balance on 1st April 1893. Arrear.	Remarks.

	Road cess	Estates	75	84,055	29,855	49,531**	29,843	34,211*	3	* Remitted Rs 9. ** Exclusive of Rs. 13 paid in advance.
	Zamindari dák	Estates	26	6,502		6,502	.. ..	...	.....	
		District Total	...	1,72,975	29,855	1,38,751	29,843	34,211	3	
		GRAND TOTAL FOR 1892-93.	.... ..	7,37,120	50,510	6,78,094	48,997	60,758	568	Total remission Rs. 1,755.
		GRAND TOTAL FOR 1891-92.	. .	6,85,722	55,051	6,37,588	54,169	48,122	860	

As regards land revenue the collections were as usual good, amounting to 98·05 of the gross demand, current and arrear. In Hazaribagh they were 99·93 per cent., and in Manbhum 100 per cent. of the gross demand. The total amount realized was Rs. 3,83,144 as against Rs. 3,81,562 in the previous year.

As regards road cess, the figures are not so satisfactory, as the outstanding balances show in some districts a considerable increase. The outstanding balance was largest in Manbhum, where it was Rs. 34,223 as compared with Rs. 29,855 in the preceding year, and the Officiating Lieutenant-Governor hopes that it will be found possible to obtain better results in future.

19. The working of the certificate departments of the various districts is shown below :—

District.	Department.	Number pending at beginning of year.	Number issued during year.	Total for disposal.	Amount of certificates.	Number disposed of during year.	Amount realized.	Number pending at close of year.
1	2	3	4	5	6	7	8	9
					Rs.		Rs.	
Hazaribagh	All departments	216	468	684	32,802	502	17,213	182
Lohardaga	All departments	191	64	255	24,810	207	18,486	48
Palamau	All departments	112	673	785	22,602	588	10,374	107
Singhbhum	All departments	267	27	294	3,389	155	12,384	139
Manbhum	All departments	175	794	969	70,911	678	45,505	201
	GRAND TOTAL .	961	2,026	2,987	1,54,514	2,130	1,07,962	857

The number of certificates pending at the close of the year was less than the number pending at the beginning, except in Palamau and Manbhum where the disposals did not keep pace with the number issued during the year.

20. There were six Wards' estates and 54 Encumbered estates under management during the year. The collections, which owing partly to poor harvests were not as good as in the previous year, amounted in Wards' estates to Rs. 1,24,311, or Rs. 8,041 less than the current demand, and in Encumbered estates to Rs. 4,94,368 out of a current demand of Rs. 5,73,011, and a gross demand of Rs. 8,53,490. The progress made in paying off debts due by Encumbered estates is shown in the following table :—

Wards' and Encumbered Estates.

District.	Demands (rent and cesses).			Total collections (rent and cesses).	Remissions.	Balance.	Percentage of total collections on total demand.	Expenditure of year.
	Arrear.	Current.	Total.					Payment of debts.
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.		Rs.

Manbhum	24,437	93,236	1,17,673	88,523	1,039	28,135	75·2	17,[illegible]96

21. The Commissioner remarks with satisfaction, which the Officiating Lieutenant-Governor shares, that while there has been a very small increase in the number of licenses the revenue has increased by about one-eleventh of the previous year's revenue,

Excise.

amounting to Rs. 8,39,285, in 1892-93, as compared with Rs. 7,65,646 in 1891-92. A table is appended from which it will be seen that the bulk of the revenue is derived from country spirits.

District.	Country spirits.				Ganja and bhang.				Opium.			
	Number of shops.	License fees.	Gross gallons.	Total receipts.	Number of shops.	License fees.	Gross maunds.	Total receipts.	Number of shops.	License fees.	Gross maunds.	Total receipts.

Manbhum	1,49,923	0 1 11
	8,39,285	

22. The Officiating Lieutenant-Governor is glad to notice that considerable attention is paid in this Division to arboriculture. The following account is taken from the Commissioner's report:—

Arboriculture.

"In Hazaribagh 1,266 new trees, mostly poinceana, sissoo and Algerian date, were planted, and 3,716 old trees were maintained, at a total cost of Rs. 702. The nursery garden in the Road Cess office compound in this district contained 2,060 plants, viz. 1,000 sissoo, 100 mango, 300 poinceana-regia, 350 eucalyptus, 30 jaman, 200 kunar, 60 karanj, and 20 nim. In Lohardaga 748 seedlings, principally of karanj, mango, jaman, tamarind and mahua, were newly planted to fill up gaps caused by the drought in April and May 1892, and over 9,000 plants along 63 miles of roads were maintained and 6,210 new gabions were supplied for the protection of the plants. Arrangements were also made to sow seeds and rear seedlings in pots in the nursery garden in the Road Cess compound in this district, and 300 holes were dug and filled up with manure for planting trees during the ensuing season on the sides of one-and-a-half miles of road on Mr. Worsley's plan. The total expenditure on account of arboriculture in this district amounted to Rs. 1,399. In Palamau the existing roadside trees were maintained, and 300 seedlings were transplanted from the nursery at Daltonganj to the three main roads which branch out from that place at a total cost of Rs. 80. In Singhbhum nothing was done in this matter during the year. The planting of avenues along roadsides proved a failure in this district, owing to the dryness of the climate and the stony nature of the country over which the roads run, and the Committee, with their limited funds, could not afford to pay for the construction of wells along roadsides. The Deputy Commissioner says that an attempt will be made during the current year to plant trees on the system recommended by Mr. Worsley. In Manbhum Rs. 193 only were spent in entertaining establishment for watering and looking after the trees already planted, and Rs. 100 in renewing and repairing gabions. The trees planted on the sides of roads in this district are bor, peepul, jack (kantal), jaman, kusum, mahua, nim, and mango."

23. The educational results of the year continue to be encouraging. Taking public and private institutions together, there was a net increase of 95 schools and 2,394 pupils. Forty-six out 55 candidates passed the Entrance examination, though the results of the upper and lower primary scholarship examinations were not so good. The number of girls' schools declined from 124 to 116, the total number of girls attending these and boys' schools being 5,544 as compared with 5,465 in the preceding year.

Education.

The following table exhibits certain statistics regarding education in schools under public management :—

District.	Class of schools.	Number of schools.	Number of pupils on rolls.	Cost. Provincial.	District Board.	Municipality.	Fees.	Other.	Total.	Cost per head of pupils.	Population of district.	Number of boys of school-going age.	Percentage of boys at school to boys of school-going age according to the Director of Public Instruction's Report.

(a) Excluding Rs. 112 for building and library.
(b) Excluding Rs. 56 for building.

The number of primary schools increased in every district, except Manbhum. The increase was greatest in Palamau which is striving to place itself on an educational equality with the rest of the division. Taking the division as a whole, the ratio of boys at school to the total number of a school-going age is a little higher than in Patna, which is the worst in all Bengal in this respect. The Municipalities do little to support education and contribute more to middle than to primary education. Under recent orders, however, it is hoped that Municipalities will in future make provision for the education of half the boys of school-going age within their limits. It has again to be noticed that the cost of educating a pupil in the middle schools in Lohardaga appears to be excessive, and this year it is even higher than last. A similar observation may be made in respect to the cost of primary education in Manbhum, which amounted to Rs. 3 per pupil.

Mr. Grimley was more than once struck while on tour with the large assortment of books which appear to be necessary in middle and primary schools. In the first class of one school 14 different books were in use, the cost of which amounted to Rs. 8 or Rs. 9, or about three times as much as the yearly fees paid

by each boy. The Director of Public Instruction will be requested to consider this point.

Dispensaries.

24. The following table gives details in regard to the dispensaries in the division, the number of which was increased by the opening of a dispensary at Giridih:—

DISTRICT.	Number of dispensaries.	INCOME FROM—					DAILY AVERAGE PATIENTS.		Ratio per cent. of out-door patients to total population.
		Government.	District Board.	Municipality.	Subscriptions.	Total.	In-patients.	Out-patients.	
1	2	3	4	5	6	7	8	9	10
		Rs.	Rs.	Rs.	Rs.	Rs.			
Hazaribagh ...	4	115	......	1,844	1,880	3,839	8·87	186·01	·9
Lohardaga ...	2	356	......	1,968	705	3,029	7·97	55·98	·6
Palamau ...	1	217	..	90	940	1,247	4·35	30·27	·5
Singhbhum ...	1	225	......	325	398	948	91·3	10·71	·3
Manbhum ...	8	459	......	2,880	3,800	7,139	26·37	141·56	1·7

Manbhum continues to be the only district which is at all well provided in this respect. The table does not include private dispensaries, such as those of the Dublin University Mission and Pachamba Scotch Mission which are open to the public. Speaking of the Lohardaga dispensary, the Commissioner says:—

"The usefulness of this institution is much hindered by the fact that the room which ought to be set apart for indoor patients is occupied as an office by the Municipal Commissioners. Here, as elsewhere, the subscriptions are sadly in arrears, and even the contribution of the municipality towards the medical officer's salary is not paid with proper regularity."

The Lieutenant-Governor trusts that immediate measures will be taken to remedy the state of things disclosed.

Liberal subscriptions in aid of the Dufferin Fund were received during the year and since its close from the following gentlemen—

	Rs.
Maharaja of Chota Nagpur	2,000
Kumar Jagat Mohan Nath Sahi	1,750
Raja Nam Narain Singh of Ramgar	5,000
Babu Sarup Narain Singh of Padma	1,500
Tekait Todal Narain Singh of Gawan	2,000
Babu Rameshar Nath Singh of Kunda	1,000

These sums will be utilised to provide zanana hospitals at Hazaribagh and Ranchi.

Local Self-Government Institutions.

25. In this Division, where Act III (B.C.) of 1885 is not in force, self-governing institutions are represented by the Municipalities and the District, Road and Education Committees. The municipalities are few and far between, and though the Commissioner's remarks are somewhat colourless, the Municipal Commissioners appear for the most part to display as much interest in their work as similar bodies elsewhere. At Ranchi, for instance, some attention was paid to water-supply and conservancy, and at Lohardaga to sanitation, while at Chaibassa the roads and wells were well maintained, collections were closely supervised, and outstanding arrears were largely cleared off. There is, moreover, a pleasant absence of the internal disputes and jealousies which sometimes occur in other places claiming to be more advanced in the art of self-government. On the Road and Education Committees the greater part of the work is done by the official members.

State of public feeling.

26. The Commissioner says—

"The only political institution of this Division is the Congress Committee at Hazaribagh with branch committees at Giridih, Ranchi and Purulia. Only one meeting, to elect delegates for the 8th Indian National Congress, was held at Hazaribagh. Ten persons were elected, but only three attended the Congress. The branch commitees have displayed no signs of activity, except the one at Purulia, which collected a few rupees for the general purposes of the movement."

As regards the agrarian problem in Lohardaga, the Commissioner writes:—

"In Lohardaga the state of feeling between landlords and tenants continues to be unsatisfactory, especially where there are Christian raiyats. 'The conversion to Christianity,' remarks the Deputy Commissioner, Colonel Gordon, 'seems to have brought about a complete change in the minds of these people, and they now seek for total emancipation from the *bet begari* system. The zamindars, finding resistance difficult, their authority and influence on the wane, and support in courts is expensive and uncertain, are giving way, and nothing but suits for commutation can now save them from altogether losing these old feudal dues from their tenants.' Notwithstanding the existence of this feeling of antagonism, there has been no open manifestation of it such as occurred a few years ago, and the attitude of both parties may be described as one of quiescent expectancy regarding the action of Government. They seem to understand that legislative action of some kind is impending, but are not particularly curious to learn the nature of it; and when the principal zamindars were invited to a conference to discuss the proposed measure, the invitation met with little response, and those who did attend were not able to throw much light on the subject."

Conduct of zamindars.

27. The Maharaja of Chota Nagpur and his brother Kumar Jagat Mohan Nath Sahai Deo are mentioned for their loyalty to Government, and the latter is an active and useful Honorary Magistrate. In Hazaribagh, Raja Ram Narain Singh of Ramgar is loyal and well-intentioned, while Tekait Todal Narain Singh of Gawan whose title of Tekait was recently conferred on him by the Viceroy, and Babus Saroda Narain Singh and Poresh Nath Singh of Serampur and Palganj are specially selected for favourable mention. In Palamau Thakurai Bhagabat Doyal Singh of Chainpur received the title of Rai Bahadur in recognition for the service which he has rendered the State in the past.

28. The Officiating Lieutenant-Governor thanks Mr. Grimley for his full and interesting report and for his efficient administration of the Division. The remarks which he makes towards the close of his report regarding the necessity for the establishment of a sub-division in the south-west of the large Lohardaga district will be considered in the Judicial Department. His observations on the character of officers serving under him will be communicated to the Appointment Department as usual.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE COMMITTEE FOR THE MANAGEMENT OF THE CALCUTTA ZOOLOGICAL GARDENS FOR THE YEAR 1892-93.

REVENUE DEPARTMENT—MISCELLANEOUS No. 4539.

Calcutta, the 1st November 1893.

RESOLUTION.

READ—

The Report of the Honorary Committee for the management of the Zoological Gardens, Calcutta, for the year 1892-93.

The actual receipts of the Garden, excluding the opening balance of Rs. 4,298 and the sum of Rs. 100 realized at the end of March 1893 and credited into the Treasury on the 1st April 1893, amounted to Rs. 42,144 against Rs. 43,211 in the previous year; and the expenditure decreased from Rs. 46,548 in 1891-92 to Rs. 41,202 during the year under report, the decrease being chiefly due to a considerable reduction in the outlay on original construction. With the surplus of Rs. 942, the balance at credit of the Garden increased from Rs. 4,298 to Rs. 5,240.

2. The number of visitors who were admitted to the Garden on payment of entrance fees was 139,183 against 116,382 in the previous year. This is the highest number admitted in any year except 1883-84, the year of the Calcutta International Exhibition.

The following statement shows the number admitted each year since 1878-79:—

Comparative statement of visitors from 1878-79 *to* 1892-93.

Year.			Visitors.	Year.			Visitors.
1878-79	...	...	111,291	1885-86	...	...	108,944
1879-80	...	...	130,826	1886-87	...	...	96,099
1880-81	...	...	98,760	1887-88	...	...	108,041
1881-82	...	...	120,749	1888-89	...	...	111,573
1882-83	...	...	126,080	1889-90	...	...	109,569
1883-84	...	...	188,532	1890-91	...	...	136,410
1884-85	...	...	120,813	1891-92	...	...	116,382
				1892-93	...	...	139,183

The chief causes of this large increase in the number of visitors to the Garden are—(1) the growing popularity of the institution, and (2) the opening of a direct carriage route from the Garden to Kalighat, rendering it more easily accessible to the large number of pilgrims who daily resort to that shrine.

3. Altogether 367 additions were made to the collection, including 97 mammals, 149 birds, and 121 reptiles. The following are mentioned by the Committee as being among the more interesting animals acquired:—(1) A pair of Patagonian Cavies (*Dolichotis patagonica, Shaw*) obtained by exchange from Mr. Carl Hagenbeck of Hamburg; (2) a Brazilian Tapir (*Tapirus americanus, Gmel*) from South America, and a Baird's Tapir (*Tapirus bairdi, Gill*) from Central America, acquired by exchange; (3) the two little weavers, acquired by purchase on account of their superior beauty and rarity in Indian markets; (4) a fine collection of birds consisting of Flamingos, Saras and Kulung Cranes, and other species, obtained from Rajputana.

4. The Lieutenant-Governor is glad to learn that the popularity of the Zoological Garden with the students and teachers of the various schools and colleges of Calcutta continued undiminished. With regard to the position which the Garden takes in the education of the people, the Committee write as follows:—"Applications from heads of institutions for free admission of students were frequently received and granted. It is also a satisfactory indication of the educating influence of the Garden that authors of elementary books and primers in the vernacular seek to stimulate the faculty of observation of their juvenile readers by illustrations and anecdotes of animals exhibited here."

5. The Lieutenant-Governor notices with pleasure that the laboratory for the purpose of conducting experiments with, and testing the various alleged remedies for snake-bite which are from time to time brought to notice, and for other physiological and biological investigations, for which Babu Joy Gobind Law, a wealthy citizen of Calcutta, gave a liberal donation, already acknowledged by Government, is now nearly complete. It is expected that experiments will be undertaken in the ensuing cold season.

6. The thanks of the Lieutenant-Governor are due to the members of the Committee for their efficient management of the Garden.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Honorary Secretary to the Committee for information, and that it be published in the *Gazette*.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Govt. of Bengal.

IMPERIAL INSTITUTE IN LONDON.

THE following papers are published for general information.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

REVENUE DEPT.,
The 9th November 1893.

Circular No. $\frac{59}{73}$.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Museums and Exhibitions),—under date Simla, the 3rd October 1893.

RESOLUTION.

READ the following papers :—

1. Despatch from Her Majesty's Secretary of State for India, No. 9 dated 20th January 1887, and enclosures.
2. Despatch to Her Majesty's Secretary of State for India, No. 8, dated 1st November 1887.
3. Despatch from Her Majesty's Secretary of State for India, No. 25, dated 29th March 1888.
4. Despatch from Her Majesty's Secretary of State for India, No. 60, dated 10th July 1890, and enclosures.
5. Despatch from Her Majesty's Secretary of State for India, No. 13, dated 26th February 1891, and enclosures.
6. Despatch to Her Majesty's Secretary of State for India, No. 52, dated 30th June 1891.
7. Circular to Local Governments and Administrations, No. $\frac{7}{21}$, dated 17th July 1891.
8. Despatch from Her Majesty's Secretary of State for India, No. 63, dated 17th September 1891.
9. Circular to Local Governments and Administrations, No. $\frac{25}{21}$, dated 24th October 1891.
10. Despatch to Her Majesty's Secretary of State for India, No. 10, dated 10th February 1892.
11. Despatch from Her Majesty's Secretary of State for India, No. 24, dated 14th April 1892.
12. Circular to Local Governments and Administrations, No. 25, dated 24th June 1892.
13. Circular to Local Governments and Administrations, No. $\frac{30}{15}$, dated 16th July 1892.

Many enquiries having been received by the Government of India on the subject, the following explanation of the constitution and objects of the Imperial Institute is published for general information.

2. In December 1886 an organising Committee appointed by His Royal Highness the Prince of Wales, with Lord Herschell as President, submitted their report, copies of which were received by the Government of India and circulated to Local Governments and Administrations in February 1887.

3. Lord Herschell's Committee recommended that the Institute should comprise two sections—one for the United Kingdom, the other for the Colonies and India. They explained in the 9th and following paragraphs of their report that—

"(9) the object of the Colonial and Indian Section will be to illustrate the great commercial and industrial resources of the Colonies and India, and to spread a knowledge of their progress and social condition.

"(10) to this end provision should be made for—

(1) the display in an adequate manner of the best natural and manufactured products of the Colonies and India, and, in connection with this, the circulation of typical collections throughout the United Kingdom ;

(2) a hall for the discussion of Colonial and Indian subjects, and for receptions connected with the Colonies and India ;

(3) the formation of Colonial and Indian libraries, and establishing in connection therewith reading, news, and intelligence rooms ;

(4) the incorporation in some form into the proposed Institute of the Royal Colonial Institute and Royal Asiatic Society if, as is hoped, it be possible to bring about such a union ;

(5) the collection and diffusion of the fullest information in regard to the industrial and material condition of the Colonies, so as to enable intending emigrants to acquire all requisite knowledge. Such information might be advantageously supplemented by simple and practical instruction. An emigration office of this character should be in correspondence with the provincial towns, either through the free libraries or by other means, so that information may be readily accessible to the people. These objects would be greatly facilitated if, as may be hoped, the Government should consent to the transfer to the buildings of the Institute of the recently formed Emigration Department, which would, by a close connection with the Institute, largely increase its usefulness.

"11. Facilities might be afforded for the exhibition of works of Colonial and Indian Art.

"12. It is also considered desirable that means should be provided, not for a general exhibition, but for occasional special exhibitions of Colonial and Indian produce and manufactures. At one time a particular Colony or portion of the Empire may desire to show its progress; at another time a general comparison of particular industries may be useful. Whilst the permanent galleries would exhibit the usual commercial or industrial products of the several Colonies and India, the occasional exhibitions would stimulate and enlist the sympathies of Colonial and Indian producers, and keep up an active co-operation with the industrial classes of this country."

4. The Colonial and Indian section has since the date of the Committee's report been subdivided into sections for each Colony, and there is now a distinct section for India, which, for the purposes of this Resolution, will be referred to as "the Indian section."

The scope of the Indian section has been enlarged by the introduction of arrangements for the teaching of Oriental languages thus described in the Year Book of the Institute for 1892:—

"In 1887 it was suggested that a School of Modern Oriental Studies should be established as a branch of the Institute in imitation of the very efficient establishments of this kind which are carried on with Government resources in France, Germany, and Austria. The promulgation of this proposal led to negotiation with the authorities of University College and King's College, London, which resulted in their co-operation with the Institute in the establishment of the School. A Special Committee having been appointed to organise a system of work, it was arranged that classes for instruction in the Oriental languages required by students qualifying for examinations for the Indian Civil Service should be held at University College, while Modern Oriental languages, other than the Indian languages, should be taught at King's College, and that the Imperial Institute should undertake the general administrative and financial work. The School was officially opened in January 1890, when an inaugural address was delivered by Professor Max Müller at the Royal Institution in the presence of His Royal Highness the Prince of Wales. The daughters of the late Colonel W. J. Ouseley (Bengal Army) have established and endowed in his memory three scholarships in Arabic and Persian in connection with the School, each one of the value of not less than £50 per annum."

Since 1887 subscriptions to the amount of £101,550 have been raised in this country, and constitute more than one quarter of the total subscriptions received from all sources by the Managing Committee in London. The entire sum contributed has been utilized partly for the constitution of a permanent endowment fund, which amounted in 1892 to £ 141,520, and partly for the construction of the building.

The Institute, of which the foundation stone was laid by the Queen on the 4th of July 1887, was formally opened by Her Majesty on the 10th May 1893.

5. It was originally intended that a Committee of the Indian section should be formed in India with the Viceroy as President, and in 1887 the names of members were forwarded to the Secretary of State. This scheme was, however, superseded by the constitution framed in 1890, in pursuance of the charter granted to the Institute in May 1888, under which the Institute is controlled by a governing body or general Council of not less than 120 members or governors, of whom 15 are appointed to represent India. The Indian Governors may be selected in such manner as the Governor General in Council for the time being may direct.

6. The following rules have been prescribed for the appointment of the Indian representatives:—

Three are to be appointed annually by the Governor-General in Council; six by the Provinces, including Native States, in rotation; four by the Chambers

of Commerce in rotation, and two by Native institutions: provided that no representative can be appointed who will not be resident in England during his term of office.

The term of office commences and ends on the 23rd of July, but a fresh nomination may be made at any intervening date in the event of office being vacated by the return of a member to India or for any other reason.

The Native States and Associations to be represented each year will be selected by the Government of India after ascertaining what eligible candidates are resident in England, and after correspondence with the rulers of the Native States and with the Native institutions concerned.

Provinces and Chambers of Commerce, in the order below prescribed for the next three years, will forward to the Secretary in the Department of Revenue and Agriculture the names of proposed representatives on or before the 1st of June. In each case three names may be submitted in the order in which it is desired that the offer of a governorship for the ensuing year may be made to the nominees. If no one of the nominees accept, the Government of India will select a representative. If no communication is received before the 1st of June from any Province or Chamber of Commerce entitled to a nomination, either the offer will be made to any existing representative, or a representative will be selected by the Government of India.

The following is the rotation prescribed for the next three years:—

	1893-94.	1894-95.	1895-96.
Provincial representatives.	Madras.	Burma.	Bengal.
	Punjab.	Central Provinces.	Bombay.
	Bengal.	Assam.	North-Western Provinces and Oudh.
	Bombay.	Madras.	Burma,
	North-Western Provinces and Oudh.	Punjab.	Central Provinces.
	A Native State.	A Native State.	A Native State.
Representatives of Chambers of Commerce.	Calcutta.	Northern India.	Karachi.
	Bombay.	Calcutta.	Northern India.
	Madras.	Bombay.	Calcutta.
	Rangoon.	Madras.	Bombay.

7. The Members of the Indian Section of the governing body in 1892-93 were:—

On behalf of the Government of India—

W. T. Thiselton Dyer, Esq., C.I.E., C.M.G., F.R.S.

General James T. Walker, R.E., C.B., LL.D. (late Surveyor-General of India).

George Watt, Esq., M.B., C.I.E. (Reporter on Economic Products to the Government of India).

On behalf of Provinces and Native States—

Madras—David F. Carmichael, Esq. (late Madras Civil Service).

Bengal—Philip Nolan, Esq. (Secretary to the Government of Bengal).

North-Western Provinces and Oudh—W. S. Halsey, Esq. (late Bengal Civil Service).

Punjab—Baden H. Baden-Powell, Esq., C.I.E. (late Bengal Civil Service).

Native States (Jeypur)—Surgeon-Lieutenant-Colonel T. H. Hendley, C.I.E. (Residency Surgeon, Jeypur).

On behalf of Indian Chambers of Commerce—

Bombay—Sir Frank Forbes Adam, C.I.E. (of Messrs. Graham & Co., Manchester).

Rangoon—James Annan Bryce, Esq. (of Messrs Wallace Brothers).

Madras—George G. Arbuthnot, Esq.

Calcutta—Sir Alexander Wilson, Kt. (of Messrs. Matheson & Co., London).

On behalf of Indian Institutions—

Poona Sarvajanik Sabha—Dadabhai Naoroji, Esq., M.P.

Bengal British Indian Association—Sir William Wilson Hunter, K.C.S.I., C.I.E.

8. Fellows of the Imperial Institute are elected under rules, of which a copy is appended to this Resolution, and which explain the conditions and privileges attached to Fellowship. Application for election as Fellow, or for any information that may be required regarding the Institute, should be made to the Secretary, Imperial Institute, South Kensington.

9. The Government of India have decided that the most effective way in which the Imperial Institute can be made to serve the interests of India is to utilise it both for the purpose of attracting attention to the various economic

products of India, especially those which are little known, and for obtaining through the agency of the governing body the trial or analysis by experts of products more or less new to commerce. The objects held in view will be more fully gathered from the following explanation embodied in the preface to the series of Commercial Hand-books which are provided to the Institute by the Department of Economic Products:—

"The Government of India have arranged to provide to the Imperial Institute for the illustration of the Economic Products of India—

(A) a descriptive catalogue or dictionary;
(B) an index collection of all products;
(C) a commercial collection of special products;
(D) a hand-book descriptive of C.

A. The descriptive catalogue has been completed, and is termed the "Dictionary of the Economic Products of India." The compilation has occupied eight years, and has been made under the editorship of Dr. G. Watt, C.I.E., Reporter on Economic Products to the Government of India. It has been confined to the collection of facts and statistics available up to the date of the publication of the work.

To each product there is assigned in the dictionary a separate number, which will be permanently maintained for purposes of reference.

B. The index collection will, when completed, comprise small samples of every economic product of India, which will bear the same numbers as those assigned to the products in the dictionary.

C. The commercial collections are on a larger scale. The number of products of which a collection is provided each year will be limited to about 20.

Each collection will comprise as complete a set of specimens of the product in its raw and manufactured state as is necessary for the fulfilment of the objects with which the commercial collections and hand-books are provided.

D. The hand-books will supply, in a separate pamphlet for each product, the information contained in the dictionary, amplified by supplementary facts and statistics, and illustrated by maps, diagrams, photographs, etc.

The objects of the commercial collections and hand-books which accompany them are—

(1) To secure, while each collection is being made for the Institute, a thorough and special investigation in India through which fresh information regarding the product concerned, not contained in the dictionary, may be obtained.
(2) To illustrate the dictionary in a manner more complete than can be effected by the index collection.
(3) In the case of products which are not generally known—
  (a) to bring them to the notice of those interested;
  (b) to indicate the extent to which and conditions under which they are procurable;
  (c) to ascertain their commercial value;
  (d) to secure, through the governing body of the Institute and commercial experts whom they may consult, such special trial or analysis of them as can be more effectually made in England than in India."

The initial cost of the collections has been met from a special grant of Rs. 10,000. An annual grant of £600 is provided for the maintenance and completion of the existing collections, and a further grant of £400 again is allowed for the salary of the official Curator. Rupees 4,000 are also contributed annually by Local Governments towards the collection of products for the Institute. The Indian Section is under the general superintendence of Sir F. Abel, Secretary to the Institute, and the collections are under the charge of Mr. J. R. Royle, C.I.E., of the India Office, who has been appointed official Curator of the Indian Courts.

10. The index collection has reached an advanced stage.

Commercial collections have, under the direction of Mr. E. Thurston, Officiating Reporter on Economic Products, been already provided for the representation of the following products:—

1. Padauk timber.
2. Ipecacuanha.
3. Podophyllum emodi.
4. Sida fibre.
5. Jute.
6. Al (Morinda) dye.
7. Resin and turpentine from Indian pines.
8. Iron, southern districts of Madras.
9. Coal.
10. Adhatoda vasica.
11. Linseed.
12. Fibres for brush making.
13. Cutch.
14. Kút (Ooplate).
15. Turpeth (Indian jalap).
16. Kaméla dye.
17. Garjan and in oils.
18. Jalap.
19. Mica.
20. Castor oil.
21. Gingelly or sesame oil.

Collections of the following are in progress—

22. "East Indian walnut timber" (Albizzia Lebbek.)
23. Silk.
24 Ground-nut.
25. Barley.
26. India-rubber.
27. Rose wood (Dalbergia latifolia).
28. Soapstone (Steatite).
29. Chaulmugra oil.
30. Salep.

Hand-books, issued under the editorship of Mr. Thurston, have accompanied the twenty-one commercial collections already sent to England, and hand-books descriptive of the collections in progress are in course of preparation. These may be purchased for a nominal price either at the Imperial Institute, at the office of the Reporter on Economic Products in Calcutta, or from the Superintendent of Government Printing, Calcutta.

11. Galleries have been provided in the Institute building, in which the index collections are arranged in such a way as to be easily studied by interested visitors, and there are also working rooms for detailed examination of the commercial collections by those connected with the trades to which they appertain.

12. Special arrangements have, since the opening of the Institute, been set on foot, under the direction of Sir Frederick Abel, with the object of facilitating the trial and analysis of commercial products by experts either at the Institute itself, where rooms and laboratories have been provided for the purpose, or in local manufactories, chemical works, and other appropriate places. Dr. Theodore Cooke, C.I.E., late Principal of the College of Science, Poona, has recently been appointed as Technical Sub-Director of the Institute and to supervise arrangements for securing the investigation of new products from India and the Colonies.

13. All correspondence in India connected with the collections supplied to the Institute is conducted by the Reporter on Economic Products, to whose office at the Indian Museum, Calcutta, all enquiries or letters on the subject should be addressed.

14. The names of Governors appointed for the Indian Section for the year 1893-94 will be published shortly in the Gazette of the Government of India.

ORDER.—Ordered, that the above be published for general information in the Supplement to the *Gazette of India*, and that copies be forwarded to the several Local Governments and Administrations for information and publication in the Local Gazette, and to the Chambers of Commerce noted on the margin.

APPENDIX.

ELECTION, SUBSCRIPTIONS, AND PRIVILEGES OF FELLOWS OF THE IMPERIAL INSTITUTE.

1.—AS TO PRIVILEGES OF FELLOWS.

EVERY Fellow elected in the manner provided by the Regulations approved under the Charter of Incorporation shall, during the continuance of his Fellowship, be entitled to attach to his name the distinctive designation "F. I. Inst."

Every Fellow upon his election shall receive a diploma or other emblem of his Fellowship.

Fellows shall be entitled to the Annual Report of the Institute and to publications issued from time to time by the Institute, subject to such arrangements as may be made by the Executive Council as to the delivery or transmission of the same.

Fellows shall have access to the Commercial and Industrial Collections on two days in the week when they are *not* open to the public, and shall on any one of those days have the privilege of introducing two visitors to the Collections.

A special Refreshment Department, including Smoking Room, will be provided for the use of Fellows, to which they will be entitled on any day to introduce two visitors.

The accommodation provided for the use of Fellows will include a Post Office and *Poste Restante*, Telegraph, Telephone, and Messenger Departments, Cloak Room and Parcels Office, and a private Lavatory.

Fellows will have the free use of the Library, the News Room and Reference Department connected therewith, the Map Room, Reading Rooms, Writing Room, and Conference Rooms, and shall be entitled to introduce one visitor on any day to these rooms. The Conference Rooms will include Special Rooms for the Australasian, the North American, and the African Colonies, for India, and for the Crown Colonies. Facilities will be afforded to Fellows at moderate charges for holding business Conferences at the Institute, involving the exclusive occupation of a room for specified periods, with or without clerical assistance.

Fellows will be entitled to admission to special conferences, addresses, discussions, or lectures under regulations to be determined upon by the Council, and will have the privilege of introducing visitors in conformity with those regulations.

The Commercial Intelligence or Information Department will be open to Fellows between the hours of 10 A.M. and 1 P.M. and 2 P.M. and 4 P.M. on Mondays to Fridays inclusive, and between 10 A.M. and noon on Saturdays.

Facilities will be afforded to Fellows to inspect or to specially examine, or to be supplied with, samples of materials and products included in the Collections, under regulations and conditions to be determined by the Council, and, if necessary, upon payment of such fees as will compensate the Institute for any loss or special outlay connected with such inspection, for which special localities and appliances will be provided.

II.—AS TO PROPOSAL AND ELECTION OF FELLOWS.

(Abstract of Regulations.)

A candidate for admission as an Ordinary Fellow must be proposed and seconded by two Fellows from personal knowledge; such proposal, which shall specify the rank, profession or occupation, and place of abode of the Candidate, must in addition be signed by two Fellows at least.

The certificate of proposal thus filled up, as soon as it has been delivered to the Secretary, shall be exhibited in a conspicuous place in one or other of the public rooms of the Institute for at least one week previous to the date of election.

Candidates proposed as Fellows shall from time to time be submitted for election at a meeting of the Executive Council in accordance with the prescribed regulations.

III.—AS TO SUBSCRIPTIONS TO BE PAID BY FELLOWS.

(Abstract of Regulations.)

The annual subscription to the Institute shall, subject to the provisions contained in the Regulations next following, be *Two Pounds*. From and after such date, as may be appointed by the Executive Council, an Entrance Fee may be imposed.

Any Fellow who intends to be absent from the United Kingdom during the whole time for which the annual subscription is payable shall, on his giving due notice in writing to the Secretary of such intention, pay an annual subscription of *One Pound* only during the continuance of such absence. If such Fellow returns to the United Kingdom, he may, on communicating the fact in writing to the Secretary, and on paying such sum as may be required to make up his subscription for the current year to the full amount of *Two Pounds*, be re-admitted to all the privileges of the Institute.

Any fellow who at the time of his election is resident out of the United Kingdom shall pay an annual subscription of *One Pound* only during the continuance of such residence. If such Fellow comes to the United Kingdom, he may, on communicating the fact in writing to the Secretary, avail himself, for a period not exceeding three months from the date of his arrival, of all the privileges of the Institute. If he resides within the United Kingdom beyond that period, he will be required to make up his subscription for the current year to the full amount of *Two Pounds*.

A newly-elected Fellow shall not be entitled to exercise any of the privileges of a Fellow until he has paid his first year's subscription, or entrance fee and first year's subscription, as the case may be, or as compounded as hereinafter provided.

All subscriptions, after the subscription due at election, shall be payable on the 1st January in each year.

When a candidate becomes a Fellow late in the year, the Executive Council may remit the whole or such part as they may think just of his subscription for the current year.

Any Fellow may compound for his subscription and become a Life Fellow, either as his entrance by the payment of *Twenty Pounds*, or after the payment of five or more annual subscriptions by the payment of *Fifteen Pounds*.

Note—In conformity with clause 37 of the Constitution approved by Royal Warrant, the Executive Council may from time to time repeal, alter, or add to these Rules respecting the subscriptions and privileges of Fellows.

MAINTENANCE OF THE RECORD OF RIGHTS IN BIHAR.

The 10*th November* 1893.—The following papers are published for general information.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

No. $\frac{2619}{174}$, dated Simla, the 21st October 1893.

From—The Secy. to the Govt. of India, Revenue and Agricultural Dept.,
To—The Secretary to the Government of Bengal, Revenue Dept.

WITH reference to the telegraphic communication between the Government of India and Sir A. MacDonnell, ending with my telegram No. 2574, dated 18th instant, regarding the publication of His Honour's second Minute on the Bihar Survey and of the draft Bill and Rules which accompanied it, I am instructed to communicate the following remarks and explanations.

2. In the first place I am to convey to His Honour the thanks of His Excellency the Governor-General in Council for having drawn up so able and masterly a review of the situation and at the same time so convincing an exposition of the administrative necessity of maintaining, on behalf of the raiyats of Bihar, an accurate record-of-rights.

3. In view of the standing orders forbidding the publication of papers referring to memorials addressed to Her Majesty's Secretary of State in anticipation of final orders except for exigent reasons, His Excellency in Council had some hesitation in acceding to His Honour's request that the Minute should appear in the Local Gazette. In the precedent case quoted in Sir A. MacDonnell's telegram of the 17th instant, the permission of the Secretary of State had been previously obtained. In consideration, however, *firstly* of the fact that the memorial itself was practically a mere repetition of objections already publicly brought forward and discussed in connection with the Muzaffarpur Conference, and *secondly* of the importance of placing before the public at the earliest possible date a clear exposition of the issues involved with the object of checking misdirected agitation, His Excellency in Council has consented, as intimated in my telegrams of 16th and 18th instant, to the publication of the entire Minute together with the draft Bill and Rules.

4. To the general principles of the draft Bill the Government of India are able to give a provisional assent, but they must make the reservation as explained in my telegram of the 18th, that the details shall still be regarded as open to discussion. The exact method in which the cost of the initial survey and record-of-rights should be recovered, and which is dealt with in the 12th section of the Bill, is specially a question which His Excellency in Council would desire to bring under careful and independent consideration. To the policy of meeting the cost of maintaining the map and record-of-rights by a cess the Government of India have already agreed, but I am to suggest that the estimate of the actual expenditure which will be involved is not yet sufficiently precise to justify a definite conclusion that a cess of one quarter of an anna in the rupee of annual value will suffice to cover the entire cost. It would in these circumstances seem desirable to append a note to section 7 of the Bill to the effect that "so far as enquiries have gone, it is anticipated that this rate need not be exceeded," with a view of making it quite clear that the Government is not absolutely restricted to this rate.

5. The Government of India feel themselves at some disadvantage in dealing with the draft rules. Although the policy of maintaining an accurate record of rights is one which they have in recent years urged strongly upon all Local Governments and Administrations, they have not at their command the advice of any officials who have had personal experience in the working of the system; nor, even if it were otherwise, would they feel justified in offering any conclusive criticism upon a subject which required for its proper handling, not

only experience of the limits within which an accurate record and map can be successfully maintained in practice, but also an intimate knowledge of local conditions. His Excellency in Council is aware that the rules have been drafted after the most careful consideration by those officials in Bengal who are best acquainted with the circumstances of Bihar, but he considers that, in launching a system which will largely affect the financial interests and the local prejudices of the land-holding and agricultural community, no pains should be spared to take advantage of the experience which has been gained in other provinces before finally deciding upon the methods to be adopted. His Excellency is the more inclined to advise this course in view of his belief that the practices gradually developed in various Provinces are already tending to become inconveniently divergent, and that in some directions mistakes have been made which require early correction. In view of the importance of checking *in limine* any tendency to erroneous practice or to unnecessary expenditure in connection with the maintenance of the map and record of rights in all Provinces, His Excellency the Governor-General in Council desires to take the present opportunity to have this important subject examined by the light of the best experience that can be brought to bear upon it, and has come to the conclusion that a general conference should, after such communication with Local Governments and Administrations as may be necessary, be convened for this purpose. He appreciates the fact that there must be material difference between any system adopted in Bihar and that which prevails in Provinces where the patwari establishments are utilized, but is convinced nevertheless that there are many details of method in connection with which uniformity of practice may be usefully established and that the discussion of these matters by experts will lead to useful results, not only in connection with the Bihar programme, but also in respect to the improvement of system in other Provinces. He desires, however, before addressing other Local Governments, that His Honour's concurrence in this proposal should be invited. The Provinces which would be invited to send representatives would probably be the North-Western Provinces and Oudh, the Punjab and the Central Provinces.

6. The proposition put forward in the 70th paragraph of Sir A. MacDonnell's Minute meets with the full concurrence of the Government of India. The map and record of rights must be maintained up to date, and the Government cannot be fettered by any restrictions which will preclude the accomplishment of this object. The utmost that can be promised is that the maintenance of the record shall be effected at the minimum cost and with the least amount of inspection compatible with the end in view. The Government of India are not prepared to pronounce an opinion how far the rules as now drafted will secure the minimum of expenditure and inspection which may be possible, but they apprehend that this is the very question upon which the discussions by a conference of experts will lead to a satisfactory conclusion. In any case, His Excellency in Council is, as at present advised, disposed to agree with His Honour that no longer period than three years should be permitted to pass without revising the record.

No. 1365T.—R., dated Darjeeling, the 28th October 1893.

From—M. Finucane, Esq., Offg. Secy. to the Govt. of Bengal, Revenue Dept.,

To—The Secretary to the Government of India, Revenue and Agricultural Dept.

I am directed to acknowledge the receipt of your letter No. $\frac{2619}{174}$, dated the 21st October 1893, and to convey to the Government of India the Officiating Lieutenant-Governor's thanks for the reception accorded to the proposals in connexion with the Bihar Cadastral Survey made in my letter No. 1130T.R., dated the 21st September last, and its enclosures.

2. His Honour cordially accepts the proposal made in the 5th paragraph of your letter under reply that a general Conference of expert officers should be convened to consider the question of the best and most economical way of maintaining the record of rights in Bihar and generally in other provinces where such records are maintained. Sir Antony MacDonnell would beg leave to suggest that the Zamindari and Indigo-planters' Associations, who are interested in the question, might be invited to depute representatives to attend the Conference and help it with their criticisms and advice.

No. $\frac{2714}{174}$, dated Simla, the 3rd November 1893.

From—The Secretary to the Government of India, Revenue and Agricultural Dept.,
To—The Secretary to the Government of Bengal, Revenue Department.

I AM directed to acknowledge the receipt of your letter No. 1365T.—R., dated the 28th October 1893, in which you convey Sir Antony MacDonnell's assent to the proposal made in paragraph 3 of my letter No. $\frac{2619}{174}$, of the 21st October 1893, that a general Conference of expert officers should be convened to consider the question of the best and most economical way of maintaining the record of rights in Bihar. It will be convenient that the Conference should be held at Calcutta at as early a date as may be compatible with the convenience of the Local Governments who will be invited to depute delegates.

2. There will be no objection to the Zamindari and Indigo-planters' Associations being invited to depute representatives to the formal meetings of the Conference, but it will be desirable that preliminary or informal meetings should first be held for the purpose of framing issues for discussion.

WORKS OF PUBLIC UTILITY CONSTRUCTED DURING THE YEAR 1892 FROM PRIVATE CONTRIBUTIONS.

No. 6357M.P.I.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Mis. Pub. Improvements.

Dated Calcutta, the 14th November 1893.

RESOLUTION.

READ—

Statement of works of public utility constructed by private individuals in the several districts of Bengal during the year 1892, and the corresponding statement for 1891, with the Resolution thereon.

Remarks.—The cost of this particular class of works during 1892 stands at Rs. 4,41,407-1-9, of which the following is a distribution:—

	Number of works.	Cost. Rs.	A.	P.
Public buildings	9	13,391	12	3
Roads	6	5,400	0	0
Bridges	6	9,800	0	0
Embankments or bunds	4	1,286	8	0
Ghâts	6	28,300	0	0
Tanks	467	3,14,163	12	0
Wells	89	24,963	5	6
Irrigation channels	3	1,118	10	0
Petty works costing below Rs. 200 each ...		42,983	2	0
Total	590	4,41,407	1	9

2. These operations are as usual divided into three classes, thus—

I.—Petty works under Rs. 200 each.

II.—Works costing Rs. 200 to Rs. 500 each.

III.—Works whose cost exceeds Rs. 500 each.

and the works carried out in 1892 under these three classes as compared with the two previous years, are detailed in the following statement which shows that the operations of 1892 exceed those of 1891 by Rs. 1,76,922-1-6 and those of 1890 by Rs. 1,05,263-1-9:—

CLASS OF WORK.	1892. Rs.	A.	P.	1891. Rs.	A.	P.	1890. Rs.	A.	P.
I.—Cost of petty works under Rs. 200 each	42,983	2	0	35,448	0	0	34,729	0	0
II.—Total expenditure of works costing from Rs. 200 to Rs. 500 each ...	1,24,584	3	6	60,072	0	3	61,822	0	0
III.—Total expenditure of works whose cost exceeds Rs. 500 each ...	2,73,839	12	3	1,68,965	0	0	2,39,593	0	0

3. The works comprising classes II and III are further distributed thus by districts:—

District.	No. of works.	Total cost. Rs.	A.	P.
Burdwan	16	6,900	0	0
Bankura	2	3,656	0	0
Birbhum	12	7,650	0	0

4. Of the above the following may be specially noticed:—

Public buildings.—Under this head the contributions amount to Rs 13,391-12-3, of which Rs. 6,675 represents the amount given for a hospital building at Giridih by several residents in the Hazaribagh district, the principal donors being Babu Sarada Narain Singh, who contributed Rs. 2,000, Babu Torul Narain Singh, Rs. 1,500, Babu Paresh Nath Singh, Rs. 500, and the Dhunwar Court of Ward's Estate Rs. 500; Raja Sir Soorendra Mohan Tagore, K.C.S.I., contributed Rs. 2,500 for a Zenana Hospital in the Bankura town, which was constructed at a total cost of about Rs. 4,000; Mr. Smith, Agent, Garulia Jute Mills, gave Rs. 1,200 for a school at Garulia in the Barasat subdivision; Suraj Mohini Dasi Rs. 900 for a charitable dispensary in the Navadwip town, Nadia district; Fazel Haque Rs. 500 for a mosque at Jangirpur, in the Nadia district; Babu Shama Charan Banerjee Rs. 500 for a school at Borda Normal Bazar, thana Ghatal, in the Midnapore district.

Roads.—The contributions under this head, which stand at Rs. 5,400, represent the gifts of the following gentlemen :—

(1) Rupees 2,000 from Bariz Mamood, for a road from Dugdugi to Bhawaniganj, in the Rangpur district.

(2) Rupees 1,300 from the Maharajah of Kuch Bihar, for a road from Patgram to Bhutan.

(3) Rupees 1,100 from Gagan Ghosh, for a road from Gobarchapa to Mithapur, Bogra district.

(4) Rupees 400 from Babu Biswambhar Sasmal, for metalling a portion of the kutcha road at Atilagori, Midnapore district.

(5) Rupees 200 from Tagar Mamood Kaji, for a road from Sangalsi to Darwani, in the Rangpur district.

(6) Rupees 200 from Babu Khargidar Ahir, for a road at Bairwa, Champaran district.

(7) Rupees 200 from Braja Mohun Harichandan Roy, for a kutcha road at Sadanandpur in the Balasore district.

Bridges.—A sum of Rs. 9,800 was contributed. Junavi Chaudhurani gave Rs. 4,000 for a bridge over the Gaziabari khal in the Mymensingh district; the Maharaja of Kuch Bihar Rs. 3,000 for reconstructing the bridge over the Dhabalsooty river, and for manufacturing bricks for bridges, &c., in Patgram, Jalpaiguri district; Mr. M. H. Mackenzie gave Rs. 1,000 for a bridge at Deoria in the Muzaffarpur district; Babu Ram Charitra Lal Rs. 1,000 for a bridge at Sadharutti in the Muzaffarpur district; Maulvi Sajad Ali Jolaha Rs. 500 for a bridge at Saidpur.

Embankments or bunds.—Rupees 1,286-8 were contributed under this head the largest being Rs. 486-8 given by Mr. E. Solano for an embankment at Kinjar-Mirjapur, in the Gaya district, and Rs. 400 given by Bachai Gope for an embankment 400 feet long at Satghoria in the Monghyr district.

Ghâts.—The contributions towards ghâts amount to Rs. 28,300, which is made up as follows:—

			Rs.
(1)	From	Babu Kedar Nath Mukerjee } For masonry ghâts on the {	7,000
(2)	„	Tarini Charan Chandal ... } river bank at Bally ... {	6,000
(3)	„	Sreemati Monmohini Dasi of Naihati for a masonry ghât on the river bank at Naihati	9,000
(4)	„	Babu Bidhu Bhusan Banerjee for a ghât on the river bank at Badhrakhali, in the Hooghly district ...	3,000
(5)	„	Pundit Rakhal Das Nayaratna of Naihati for a masonry ghât on the river bank at Bhatpara, in the Barasat subdivision	2,500
(6)	„	Mr. Smith, Agent, Garulia Jute Mills, for a masonry ghât on the river bank at Garulia, in the Barasat subdivision	800

Tanks.—The total contributions for tanks amount to the large sum of Rs. 3,14,163-12-0 of which the following may be classed as the more important, viz.:—Babu Harhungi Misser, Champaran district, Rs. 5,000; the wife of Chamroo Koniar, Muzaffarpur district, Rs. 5,000; Kanu Sheik, Hooghly district, Rs. 4,000; Raja Baikuntha Nath De Bahadur, Balasore district, Rs. 3,764; Babu Shama Charan Banerjee, Midnapore district, Rs. 3,300; Babu Bhuban Mohan Kundu, Nadia district, Rs. 2,500; Babu Ram Nath Pramanik, Rajshahi district, Rs. 2,000; Ashan Akandoo, Rajshahi district, Rs. 2,000; Ramdhan Mandal, Rangpur district, Rs. 2,000; Krishna Kanta Sarkar, Rangpur district, Rs 2,000; Mussamut Girji Koomar, Darbhanga district, Rs. 2,000; Babu Jaldhar Thakur, Darbhanga district, Rs. 2,035; Babu Anroop Ojha, Champaran district, Rs. 2,000; Babu Lachmi Prasad, Monghyr district, Rs. 2,000; Pooran Singh, Bhagalpur district, Rs. 2,000; Dasruth Bhagat, Bhagalpur district, Rs. 2,000; Rajib Lochan Mandal, Sonthal Parganas district, Rs. 2,915; Jannemenjoy Nand, Cuttack district, Rs. 2,000.

Wells.—The contributions for wells, which stand at Rs. 24,963-5-6, are made up mostly of small amounts.

Irrigation channels.—Rupees 1,118-10 were contributed, of which Rs. 600 were given by the villagers in the Tippera district, and Rs. 518-10 by Mr. E. Solano, Gaya district.

RESOLUTION.—There has been a very marked improvement during 1892 as compared with the two previous years in the contributions from private sources in aid of works of public utility, which is most gratifying, and to those who have displayed their liberality and public spirit in this matter His Honour the Lieutenant-Governor tenders his acknowledgments, and in doing so His Honour desires to express a hope that the good example set by them will be followed by others who can afford to contribute towards works of usefulness for the benefit of the poorer classes.

Formal letters of acknowledgment from Government will be forwarded to those who have constructed works costing over Rs. 500. The rest will receive the usual acknowledgment from the Commissioner or the Magistrate of the Division.

ORDER.—Ordered that a copy of this Resolution, and of the statement, be forwarded to the Board of Revenue, Lower Provinces, and to all Commissioners of Divisions; to the Commissioner of Chota Nagpur, and to all Superintending Engineers of Public Works Circles in Bengal, for information.

Ordered also that a copy of this Resolution, and of the statement, be forwarded to the Revenue and Judicial Departments of this Government for information.

Ordered also that this Resolution and the statement be published in the Supplement to the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

F. J. JOHNSTONE,

Secretary to the Government of Bengal.

Statement of works of public utility constructed by private individuals during the year 1892.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF OCTOBER 1893.

THE weather during October has been unusually disturbed. Two moderate or feeble barometric depressions have been formed. The first advanced over the South-East Bengal, and the second over the west of the Bay and the Madras Presidency. A severe barometric depression or cyclonic storm also formed to the west of the Bay and advanced through the Central Provinces into Oudh. A very small but severe cyclone also formed in the south-east of the Bay and advanced up the Bay first in a north-westerly and finally in a north-easterly or east north-easterly direction, striking the land to the south of Barisal and pasing over Noakhali. Lastly, a small cyclonic storm formed in the centre of the Bay and advanced north-eastwards into Burma. Hence with these five storms weather in Bengal has been unusually disturbed, and rainfall has been much heavier than usual, the falls being in excess in all districts, and the excess being large in North Bihar, East Bengal, and Chota Nagpur.

During the first week of the month fine settled weather prevailed generally over the Bay and over Bengal, except over parts of the eastern districts when weather was showery. The rainfall over the eastern districts was caused by the formation of a very shallow barometric depression in Burma, which advanced northwards over the east of the Bay into Lower Bengal, where it filled up on the 4th or 5th. The rainfall continued in the south-eastern districts of Bengal for several days, and then gradually extended westwards to the western districts, and on the 7th the falls were fairly general in South-West Bengal. From the morning of the 8th, however, an area of comparatively low pressure was developed in the west of the Bay off the Madras coast, which continued to develop slowly from the 9th to the 12th, and which advanced partly over the south of the Peninsula on the 13th, causing the commencement of the Madras rains. In connection with this low pressure area winds became easterly over Bengal, and with the moist winds which were blowing over the province, numerous rain showers continued to be reported in all districts except Bihar throughout the second week of the month. The depression continued to exist over the Madras Presidency on the 14th and 15th, but on the 16th a fresh barometric depression of considerable intensity was formed off the east coast of the Peninsula with a centre probably to the east of Masulipatam and Coconada. This was decidedly more influential than the former one, and it at first commenced to advance in a north-westerly and afterwards in a northerly direction, the centre being near Raipur on the 17th and on the 18th close to Lucknow. From the 17th to the 18th it had therefore advanced over about 400 miles, or at the rate of 17 miles an hour. On the 19th the storm had passed into the Himalayas, and was probably close to Ranikhet, but it was evidently breaking up, and on the 20th it had ceased to exist. It as usual brought up with it a heavy wave of monsoon winds, and this spread over the whole of North-Eastern India, and gave moderately heavy rain to Bengal, the falls from the 16th to the 21st being particularly heavy. Indeed, many of the stations in North Bihar reported from 5 to 10 inches of rain on the 19th, while in the Darjeeling Hills the average fall was from 3 to 4 inches.

Before this last storm had finally broken up and long before its effects had ceased, another storm was in process of formation. Its history probably dates from the 17th or 18th, and it dispersed about the 23rd, so that its life was short. The following is a description of the storm taken principally from the Bengal Weekly Meteorological Report:—

On the 17th and 18th conditions in the south-east of the Bay again became unsettled, but there was no definite disturbance till the 19th, when stormy weather developed rather rapidly to the west of Diamond Island. A depression of no great extent but of much greater depth than the provious storm and of very considerable intensity near the centre moved rather rapidly into the centre of the northern half of the Bay on the 19th to the 20th. Though a diffused low prossure area was then shown by the observations taken at the coast stations, there was no sign of stormy weather except at Diamond Island up till the 20th, and the depth of the depression and the character of the resulting storm could not be estimated.

On the 21st it had moved north north-westwards or north-westwards, and was near the centre of the northern half of the Bay. It was then giving few indications of its existence at the meteorological stations, and none of its intensity or direction of motion. After moving in a north-westorly direction it appears to have changed gradually towards the north-east, and on the morning of Sunday, the 22nd, rushed with great rapidity towards the mouth of the Megna, the centre of the disturbance probably passing close to Noakhali. At 8 A.M. on the 22nd pressure fell more than a quarter of an inch at Chittagong, Noakhali, and Barisal, the wind blowing with moderate strength from east at the first station and from north-east at the other two. The centre was then probably to the south of the line joining Chittagong and Barisal and equally distant from them; but as its rate of motion appears to have been unusually high, it must have passed over Noakhali some time during the next two hours. At 11 o'clock pressure was rising at Chittagong, and the storm-wave which accompanied the depression was then reported to be passing up the river there. From Noakhali no information has been received regarding the passage of the disturbance. That hurricane winds blew over the north-east of the Bay and in East Bengal to some distance

from the coast is shown by the fact that the Mutlah light-ship broke loose from her anchorage, and much damage was done to the shipping between Naraingauj and Chittagong. Wind velocity rose to 25 miles at Chittagong on Sunday; but as the storm was of small extent and soon reached the hilly ground to the east of Tippera, it was very shortlived after passing inland. Pressure rose rapidly, and the rough weather quickly moderated. So far very little appears to be known regarding the storm-wave which washed over part of the islands at the mouth of the Megna. There is, however, sufficient to show that it must have devastated the parts near the coast, causing great destruction to property and probably loss of human life.

General heavy rain fell in East Bengal on the 22nd and 23rd, and light scattered showers in other parts of Lower Bengal and Orissa, but except near the centre of the depression weather continued fine, and the only change was in the light cloud disappearing after the rapid rise of pressure mentioned above. From the 22nd onwards till the 28th fine clear weather with northerly winds prevailed over the province. In the south of the Bay, however, an apparently immediate result of the recovery of pressure in the north-east of the Bay was the beginning of another storm which caused cyclonic winds at the Burma stations. Judging from reports received from the shipping, it must have commenced near the centre of the Bay, because squally weather was experienced about longitude 88° and latitude 16° on the 24th. Its course from its formation very probably was to the north-east, and it struck the coast of Burma, moving in this direction between the 28th and 29th at no great distance to the north of Diamond Island. Pressure changes were small everywhere, but a regular cyclonic circulation of winds prevailed over the whole Bay area. Wind velocity steadily increased at Diamond Island, till on the 27th an average of 50 miles was reported for the 24 hours preceding 8 A.M. on that date. It soon after crossed the coast, and as in the case of the previous storm diminished much in intensity on encountering the hilly ground near the coast. The stormy weather which accompanied its advance soon passed away.

As this disturbaunce did not approach the north coast of the Bay, its influence in Bengal was very slight, being shown only in the increase of cloud in the southern districts, and in a few light showers. The northerly winds increased somewhat in strength, but soon fell off as the pressure distribution became normal. During the latter portion of the month therefore weather was usually fine over almost the whole of Bengal.

Pressure.—For the first week the average pressure was below the normal, the defect varying from 0·05 inch in Orissa and Chota Nagpur to nearly 0·1 inch in the east of the province. In the second week the defect was a little smaller and ranged from 0·04 inch in the east of the province to 0·06 inch in the western districts. In the third week pressure was in defect in Orissa and Chota Nagpur due to the effect of the depression passing to the west of these divisions, but elsewhere it had become in excess by small amounts, and in the last week of the month pressure was in excess over the whole province, the excess ranging from very small amounts only in South-East Bengal to about 0·05 inch and 0·06 inch in parts of Bihar.

Hence the variations from the normal for the whole month have been small, and at only a few stations equal as much as 0·02 inch. At practically all stations the average pressure for the month has been below the normal, the usual defect averaging about 0·01 inch.

Temperature was in excess during the first week by less than half a degree, but in the second week the excess had increased to 1·2°. In the third week owing to the heavy rain which had commenced temperature became below the normal in almost all districts, but the defect was only about a third of a degree, but in the last week the defects had increased considerably, and temperature was about half a degree low in North Bihar and North Bengal, between half degree and one degree in defect in South Bihar, South-West and East Bengal, and in defect by 1·3° in Orissa, and by more than 2° in Chota Nagpur.

The mean temperature for the month has only varied from the normal by a few tenths of a degree at the majority of stations, and in almost all cases slight excess amounts have been registered. Slight defects on the other hand have been registered at the extreme eastern stations, and at some in Central Bengal and Chota Nagpur and at Darbhanga and Patna. In almost all cases, however, the variation of the average mean temperature for the month from the normal has been less than 1°.

In the case of the day or maximum temperatures they have been lower than usual by about a degree, but on the other hand the night or minimum temperatures have been in excess by a larger amount, frequently equalling about 2°, so that the mean daily temperature has also been above the normal.

Rainfall.—The falls over the province have averaged from about four to seven inches, having been smallest in South Bihar and Chota Nagpur and largest in East Bengal and Orissa. In North Bihar, which has received more than five-and-a-half inches, there has been an excess fall of more than two inches, and in East Bengal with a fall of more than seven inches, there has been an excess of 1·7 inches. In Chota Nagpur with an average fall of 4·37 inches, the excess has equalled 1·10 inches, but in the other meteorological divisions the excess amounts have been comparatively small, but all divisions show a distinct excess above the ordinary fall for October.

The number of rainy days has also been in decidedly large excess of the normal in all the seven meteorological divisions.

The following table gives a comparison between the actual monthly and total rainfall and the normal rainfall of the province up to the end of October in the same form as has

been employed in the previous monthly abstracts of the present year. The figures represent the ratio of the rainfall of each month of the present year to the normal rainfall expressed as a percentage. The table thus gives a condensed summary of the rainfall data of the year for each meteorological division. The first ten columns give the percentage amount of rainfall received in each month, and the last column the percentage rainfall of the whole period from the 1st of January to the end of October :—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	Actual rainfall of first ten months of 1893 expressed as a percentage of the normal fall for the period.
Orissa	422	309	238	89	607	99	67	84	186	102	148
South-West Bengal ...	120	464	160	115	225	183	94	64	123	108	130
North Bengal ...	104	377	145	213	96	100	166	90	100	105	116
East Bengal ...	80	291	123	149	207	134	103	100	85	131	124
North Bihar ...	170	357	134	208	84	100	151	85	143	158	125
South Bihar ...	115	602	188	255	171	156	122	74	132	122	125
Chota Nagpur ...	155	585	226	151	212	185	121	72	170	147	141

It will be seen the excess amounts for October range from 2 per cent. in Orissa and 5 per cent. in North Bengal to 47 per cent. in Chota Nagpur and 58 per cent. in North Bihar, and, taking all the seven meteorological divisions to have an equal value in the calculation, the rainfall in October for the whole province has been 25 per cent. larger than usual.

It will also be seen from the above table that the falls for the whole of the year up to the end of October have been in excess in all divisions by amounts ranging from 16 per cent. in North Bengal to 41 per cent. in Chota Nagpur and 48 per cent. in Orissa. Again, considering all the divisions of equal value, the rainfall for the year over the whole of the province has been 30 per cent. in excess of the normal fall.

The following table gives full data for the comparison of the actual and normal rainfal of the month of October in all districts of the province. The figures are obtained in the manner explained in previous monthly summaries. The first column gives the average district rainfall as determined from the rainfall observations of the past 15 years. The second column gives the actual district rainfall as determined from the actual weighted rainfall of the month at the reporting stations in the district. The third column expresses the ratio of the actual district rainfall to the normal as a percentage, and the fourth the same information in a slightly different form :—

Percentage Table for October 1893.

Division.	District.	Normal district rainfall for October.	Actual district rainfall for October 1893.	Percentage of actual to normal rainfall.	Percentage excess (+), defect (—).

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the month of October 1893 :—

Meteorological Divisions.	Temperature: Highest observed during month.	Temperature: Lowest observed during month.	Temperature: Averages for month: Of highest of each day.	Temperature: Averages for month: Of lowest of each day.	Temperature: Averages for month: Of mean for each day.	Temperature: Average mean of month above or below normal mean of month.	Rainfall: Of month: Average.	Rainfall: Of month: Normal average.	Rainfall: Of month: Variation.	Rainfall: Rainy days: Average number in month.	Rainfall: Rainy days: Normal average number in month.	Rainfall: Rainy days: Variation.	Rainfall: Since 16th Oct. 1893: Average.	Rainfall: Since 16th Oct. 1893: Normal average.

* Means for six days. | † Means for five days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01
rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, *i.e.* from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day in one of

for the week ending Saturday, the 11th of November 1893.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Of week. Normal mean.	Of week. Average number of rainy days.	Of week. Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 16th October 1893. Mean for district.	Since 16th October 1893. Normal mean.	Since 16th October 1893. Variation.	District.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 14th November* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 11TH OF NOVEMBER 1893.

AT the close of the previous week fine settled weather obtained over the whole of Bengal, while in the south of the Bay conditions were decidedly disturbed. The disturbance over this area had been becoming more pronounced, and it also probably extended over a large area, for on the last day of the week cloud proportion was increasing in Orissa and Lower Bengal. On the 5th, or the first day of the week under review, a brisk fall of pressure occurred in the south-west of the Bay, and a very distinct barometric depression was formed, the centre of which was lying off the South Madras Coast. Conditions having thus become more seriously disturbed over the Bay, weather in Bengal also became a little more unsettled, and the sky clouded over rapidly at the southern stations. From the 5th to the 6th the small storm advanced in a westerly or north-westerly direction and struck the Madras coast a little to the south of Madras shortly before 8 A.M. on the 6th. The barometric depression at the centre was considerable, and the storm, though small, was accompanied by a severe gale of wind, very high sea and heavy rain, and at 8 A.M the wind velocity registered at Madras equalled no less than 68 miles an hour. The small storm apparently broke up as a separate storm on striking the coast, but the disturbed conditions due to its disintegration steadily and rather rapidly spread northwards. A moderate wave of humid monsoon winds advanced along the west coast of the Bay and gave heavily clouded skies with rain at first in Orissa and over the southern parts of Bengal from the 6th to the 8th and 9th, and then as the moist winds again advanced northwards over the province, rainfall extended to Chota Nagpur and Bihar, the rain being reported over the last district, principally on the 9th instant. As the wave of humid winds advanced up the west coast of the Bay, it did not penetrate to any great extent over either East or North Bengal, which districts therefore received very little rain. This advance of humid winds was only temporary and was soon overcome by the superior force of the winds from Upper India, and at the close of the week it was again being driven back towards the Bay by the dry north-westerly and northerly current from Northern India Thus on the 11th, or the last day of the week, the rainfall over the province had ceased. Skies had also become cloudless in Bihar and North Bengal, while light cloud prevailed over the remainder of the Province except in Orissa, where the sky was still heavily clouded, and hence north-east monsoon conditions were again rapidly setting in over the Province.

Conditions in Bengal therefore during a large part of the week have been very abnormal, and for the greater part of the time the sky was heavily clouded, the air was unusually damp, the day temperatures were comparatively low and the night temperatures high, and rain was received in most districts on one or two days.

Pressure at the commencement of the week was largely in excess of the normal, the excess usually ranging from 0 1 inch to 0 13 inch. On the 5th a further slight increase of pressure took place, which was continued on the 6th in the southern districts, though a fall began over the northern half of the Province. From the 7th to the 9th inclusive pressure fell tolerably steadily in connection with the advance of the disturbed conditions over Bengal, but on the 9th pressure was still in excess by amounts ranging from about 0 02 inch in the eastern districts to nearly a tenth of an inch in the west of Bihar On the 10th and 11th pressure was rising, and hence the mean pressure for the week has been in excess of the normal in all districts, the usual excess equalling about 0·07 inch to 0 11 inch, the excess being largest over parts of Bihar. In Assam the mean excess has equalled 0 08 inch.

Temperature.—For the week slight excess mean temperatures have been registered in East and North Bengal and in Bihar, while slight defects have been registered in Orissa, South-West Bengal and Chota Nagpur. In no case, however, does the variation from the normal equal as much as a degree. For the whole Province the average mean temperature has been almost absolutely normal In Assam the average mean temperature for the week has been 0 7° below the normal.

Rainfall.—The falls during the week have been small The average amounts in Orissa and in North and South Bihar have only equalled from 0 1 inch to 0 15 inch, those in South-West and East Bengal and Chota Nagpur have been a little more than a twentieth of an inch, while in North Bengal rainfall has been almost absent. In all divisions except Bihar the falls have been below the normal, but in this division a slight excess has been registered.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 11th of November 1893:—

Meteorological Divisions.	Temperature. Highest observed during week.	Lowest observed during week.	Average for week. Of highest of each day.	Of lowest of each day.	Of mean for each day.	Average mean of week above or below normal mean of week.	Rainfall. Of week. Average.	Normal average.	Variation.	Rainy days. Average number in week.	Normal average number in week.	Variation.	Since 1st of month. Average.	Normal average.	Since 16th Oct. 1893. Average.	Normal average.

The total fall from 1st January to 11th November 1893 ...	85·23
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·09

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast ; g, gloomy ; d, drizzling rain ; △, dew.

RESOLUTION ON THE REPORT ON PUBLIC INSTRUCTION, BENGAL, FOR THE YEAR 1892-93.

GENERAL DEPARTMENT—EDUCATION—No. 2659.

Calcutta, the 21st November 1893.

RESOLUTION.

READ—

The Report on Public Instruction in Bengal for the year 1892-93.

Read also the Resolution of Government on the Report for the year 1891-92.

Preliminary.

THE Report on Public Instruction in Bengal for the year 1892-93 is submitted by Dr. C. A. Martin, who received charge on the 27th December 1892 on the retirement of Mr. C. H. Tawney, C.I.E., Officiating Director of Public Instruction. Under the standing orders of Government the present year's Report should be one of a general and summary character, but the Director explains that owing to a call for special information made by Government in the Resolution on last year's Report, he has been obliged in some respects to depart from the standing orders.

Number under instruction.

2. There has been an increase in the numbers of pupils under instruction, *viz.*, from 1,392,371 to 1,400,067 in public institutions, and a decrease from 139,594 to 134,989 in private or indigenous institutions. On the whole, the number of pupils has

increased from 1,531,965 to 1,535,056. At the same time the aggregate number of public institutions has decreased from 53,956 to 53,131, and private or indigenous institutions from 13,868 to 13,473. Among the schools classed as "Public Institutions" which adopt departmental standards, the number supported or aided by public funds has decreased from 43,972 to 41,697, and the number of unaided schools has risen from 9,984 to 11,434. The number of pupils receiving University and secondary education has increased from 202,510 to 207,192, while the number in primary schools, upper and lower taken together, has slightly fallen, viz., from 1,123,560 to 1,123,225, the upper primary having gained almost as many pupils as the lower primary have lost. The figures for lower primary schools for five years are given below:—

Year.				Schools.	Pupils.
1888-89	...	...	...	44,854	982,126
1889-90	...	...	...	44,146	960,914
1890-91	...	...	...	43,998	942,244
1891-92	...	...	...	44 920	987,948
1892-93	...	...	...	43,829	983,271

The population of Bengal, excluding Kuch Bihar, Hill Tippera, and the Tributary States of Chota Nagpur, of which the schools are not included in the Educational returns, is 73,043,697, of whom 36,412,749 are males and 36,630,948 females. This gives, at the conventional rate of 15 per cent., 5,461,912 male children and 5,494,642 female children of a school-going age. Of the scholars on the Educational returns 1,431,528 are boys and 103,528 girls. Hence of all boys of a school-going age, 26·2, and of all girls of a school-going age, 1·9 per cent. are at school. The percentages in the previous year were 26·2 and 1·7, respectively. While it thus appears that one boy in every four throughout these Provinces is receiving instruction of some kind in schools, public or private, the table given in paragraph 12 of the Director's report shows great differences in the degrees of educational progress attained in the various districts and divisions. According to the figures given in that table, Hooghly shows 63·8 of the boys of a school-going age as actually at school against 42·6 in the 24-Parganas; Balasore shows 48·2 per cent. as against 27·8 per cent. in Puri, while Cuttack shows 33·8 per cent. of its boys at school in 1892-93 against 43·3 in the preceding year. Patna gives 31·9 per cent. against half that ratio (15·8) in the neighbouring district of Gaya and 11·1 in Shahabad. Assuming the correctness of the figures, the great disparity in educational progress between the different districts and divisions might be accounted for by differences in material comfort or in the habits of the people, or in the varying degrees of interest in the subject and of energy displayed by the local educational and district officers. The point is one which may with advantage be considered in future Reports. When the cause is ascertained the remedy can be applied.

The following statement taken from the Commissioners' divisional Reports shows the percentage of boys at school to the total number of boys of school-going age in each division of the Lower Provinces:—

Division.			Percentage of boys at school to total number of boys of school-going age.
Burdwan	...	...	... 51·6
Chittagong	...	...	... 45·2
Orissa	...	...	... 35·9
Presidency	...	...	... 30·1
Dacca	...	...	... 29·6
Chota Nagpur	...	...	... 16·7
Patna	...	...	... 15·2
Rajshahi	...	...	... 14·5
Bhagalpur	...	...	... 13

Financial results.

3. The net Government expenditure for the year was less than the sanctioned estimates by Rs. 2,791. In the years 1890-91 and 1891-92 there was an excess of expenditure over receipts to the extent of Rs. 55,115 and Rs. 33,679, respectively. The total expenditure on education in Bengal, including all disbursements from public and private sources, such as the fees and contributions paid to the University and in all public schools and colleges, amounted to

Rs. 96,45,408, as compared with Rs. 93,52,000 in the preceding year, an increase of Rs. 2,93,408. The expenditure from Provincial revenues decreased from Rs. 24,96,000 to Rs. 23,87,906, or by Rs. 1,08,094. Expenditure from all public sources, including District and Municipal Funds, decreased from Rs. 36,29,000 to Rs. 34,66,457, or by Rs. 1,62,543, while expenditure from private sources rose from Rs. 57,23.000 to Rs. 61,79,000, or by more than four-and-a-half lakhs. This is a satisfactory feature in the year's retrospect. Collegiate education cost less by Rs. 11,265, secondary education cost more by Rs. 1,19,810, primary education by Rs. 35,853, and female education by Rs. 1,10,086, of which the share from private sources came to Rs. 1,06,000. Under primary education District Funds contributed Rs. 45,000 less, which, however, was due to the fact that uncashed cheques, though issued, were not included in the accounts of the year. Under female education they contributed Rs. 2,000 more than in the preceding year. Municipal funds contributed under the two heads Rs. 8,000 more than in the preceding year. The expenditure by Municipalities on secondary is still more than 50 per cent. in excess of that on primary education, which means that children who cannot pay for education are refused it in order that those children who can pay may receive it gratuitously. This is not as it should be, and the authorities should see to it that the remedy is applied on all suitable occasions.

Controlling agencies.

4. Mr. Tawney, as Officiating Director of Public Instruction, made a tour extending over 17 days in the month of August 1892, during which he visited the districts of Patna, Muzaffarpur, Bhagalpur, Monghyr and Hooghly, and inspected colleges and schools, and held conferences with District Officers. Dr. Martin made a tour of 40 days during the months of January, February and March 1893, and visited the Sibpur, Hooghly and Midnapore Colleges, as well as the Reformatory school at Hazaribagh and training schools. The time spent on inspections by the inspecting staff of the Province, throughout the year, is exhibited in the following statement and compared with last year:—

	1891-92.		1892-93.

Deputy Inspectors	44	169	44	161
Sub-Inspectors	193	208	198	219

Rai Radhika Prasana Mookerjea Bahadoor spent 152 days on tour and visited 251 schools, Babu Dinanath Sen, Officiating Inspector of Schools, Eastern Circle, spent 158 days and visited 194 schools, Mr. Bellett, Inspector of Schools, Rajshahi Circle, 176 days and visited 193 schools, and Mr. Stack 64 days out of 182 days during which he was in charge of the Bihar Circle. These officers did specially good work in their circles. Babu Beni Madhav De did not spend the prescribed period on tour; he inspected only 115 schools, and did not distribute his tours judiciously. Maulvi Abdul Karim should be called upon to explain his neglect to visit the important Musalman district of Chittagong. Babu Brajendra Kumar Guha's excuse for falling so much short of the prescribed touring period is inadequate and unsatisfactory. The periods spent on tour by the Deputy Inspectors have fallen short of the prescribed limit—150 days—in two instances only. It is gratifying to find that the work of all the Deputy Inspectors, so far as touring is concerned, has been satisfactory. The Sub-Inspectors have *on an average* exceeded the prescribed number of days (200) to be spent on tour in all the Divisions. Dr. Martin explains the reasons of their shortcomings in the case of officers who have not been on tour for the

full period prescribed. The Lieutenant-Governor approves the action taken by the Director in reducing, from class VI on Rs. 100 to class VII on Rs. 75 for one year, Babu Brajaballab Maitra, Sub-Inspector of Burdwan, who had been severely censured year after year, without any real effect, for want of activity. Other Sub-Inspectors who have fallen short of the standard work without sufficient excuse, such as Babu Sarada Prasad Ghose and Babu Anada Prasad Chatterji of Malda, Babu Hara Mohan Ray and Babu Bal Krishna Das of Gaya, should be warned and severely censured. On the other hand, the good work done by the Sub-Inspectors as a body, and especially by Babus Sures Chandra Sarkar and Siva Sankar Lal, is noticed with satisfaction. Last year 921 chief gurus and inspecting pandits paid 280,916 visits to schools: average 305. This year 750 of them paid 248,008 visits: average 331. Chief gurus have their own patshallas to look after, and cannot therefore devote much time to the inspection of those in their neighbourhood. The Officiating Lieutenant-Governor agrees with Dr. Martin that this system should be wholly discontinued, and inspecting pandits should be substituted for chief gurus.

5. *District Boards.*—The Officiating Lieutenant-Governor is glad to notice that the District Boards generally took an important share in the work of education, in the preparation of educational estimates, conducting of lower primary examinations, in discussing and deciding on suggestions from the Circle Inspector and the Director, in framing rules for expansion of primary education and in other ways, and that where formerly much friction and mismanagement were reported there is now co-operation and efficiency. In the Presidency Circle the District Boards have worked in harmony with the Education Department and given due consideration to the opinions of the officers of the Department as coming from experts. The District Boards in the Burdwan Division have made a considerable advance in knowledge and experience and in capacity for work. The appointment of the Deputy Inspectors as *ex-officio* members of the District Boards has given general satisfaction, and, owing to their being also on the Educational Sub-Committees, friction has nearly entirely ceased. The District Boards of Burdwan, Bankura, Hooghly and Howrah, as well as those of Gaya, Shahabad, Saran and Champaran, were late in sending in their annual reports. The Chairmen of the Boards in question will again be reminded through the Commissioners of their responsibilities for such matters of routine business. In the Rajshahi Division the relations between the Boards and the Department have been cordial: from the Dacca and Patna Divisions no case of friction is reported. There was no friction worth noticing in the Chittagong Division. The District Boards of Bhagalpur and Chittagong took special measures to encourage education of a secular kind among the Mussalman community. From Orissa a complaint comes that some of the Local Boards of Cuttack, instead of remitting money invariably through the post-office, make payments sometimes in cash, and "much being left to the Local Board's office, delays in payment are the consequence." This practice should be put a stop to.

University education.

6. The number of colleges stands at 34, the same as last year, divided into Government 11, Municipal 1, Aided 7, and Unaided 15. The students on the lists are returned as 5,443 instead of 5,225 as last year—a variation of no significance. The Aided colleges have, taken together, gained 70 students. The Government colleges show a decrease of 133 students. The Midnapore College had 39 instead of 46 youths under instruction. The Unaided institutions have attracted 288 more than last year. The variations in the number of successful candidates at the University examinations during the last five years are shown in the following statement:—

	1889.	1890.	1891.	1892.	1893.
Entrance	1,153	2,156	1,710	1,643	2,915
Percentage of success ...	24	50	43	40	67
First Arts	629	996	693	1,011	830
Percentage of success ...	27	36	36	44	37
Bachelors of Arts ...	366	339	231	280	301
Percentage of success ...	34	40	29	24	25
Bachelors of Law ...	187	254	128	48	148
Percentage of success ...	52	70	63	27	47
Masters of Arts ...	62	57	46	54	...
Percentage of success ...	50	45	36	46	...

7. A comparison of the tables shows that out of 3,766 youths reading on the 31st December 1892 for the F. A. Examination, so many as 2,218 attended the examination: the proportion was lowest in aided colleges. The percentage of successful candidates decreased from 44 to 37. In Government colleges the percentage was 44, in aided colleges 36, and in unaided colleges 36. The most successful unaided mafassal college was the Jagannath College, Dacca, which sent up 172 candidates, of whom 61 passed. Among the candidates for the B. A. degree, the percentage of success increased from 24 to 25. Comparing the groups of colleges, the ratio of success appears to be as follows:—

		A Course.	B Course.	Total percentage.
Government	...	29	54	34
Aided	...	19	45	23
Unaided	...	18	28	20
Total	...	21	42	25

Of the 118 candidates for Mastership of Arts 54 passed as compared with 46 out of 128 last year.

The suggestion made by Government in paragraph 7 of the Resolution on last year's Education Report, that the University authorities should make efforts to secure uniformity of standard by continuity in the examining body, was referred to the Syndicate by the Director of Public Instruction. That body have replied that they are very sensible of the importance of attaining and of preserving uniformity in the standard of examination, but they think that the present system secures this as far as is practically possible, while at the same time it enables the Syndicate to exercise a control in the matter which it is desirable they should retain.

8. The total expenditure upon collegiate education has decreased from Rs. 7,07,104 to Rs. 6,95,839, or by Rs. 11,265; the expenditure from Provincial revenues has fallen from Rs. 2,92,686 to Rs. 2,79,570; and the receipts from endowments and other sources from Rs. 1,38,835 to Rs 1,36,159. The charge on Provincial revenues is nearly 40 per cent. of the total expenditure and amounts to more than the Provincial Government outlay on primary education. During the year the cost of each student to Government has decreased in Government Colleges from Rs. 147-13 to Rs. 145-11. The cost per annum of collegiate instruction generally has decreased from Rs. 126-11-6 to Rs. 124-0-11 per head. The cost of the whole number of collegiate students for the past five years may be exhibited as follows:—

	1889.	1890.	1891.	1892.	1893.
	Rs.	Rs.	Rs.	Rs.	Rs.
Average cost of each student in a college in Bengal	124	138	129	127	124
The Government share thereof ...	50	55	52	52	50

The B or Science Course.

9. The number of candidates who took up the A or Literature Course has risen this year from 967 to 987, while that of the students of the B or Science Course increased from 182 to 220. The increase in the former case has been two per cent.; in the latter about 21; thus showing the growing popularity of the B Course. On the other hand the percentage of success is 21 in the A Course and 42 in the B Course.

Secondary Education.

10. The main statistics relating to secondary schools for the last five years are contained in the following statement:—

Year.		Number of schools.	Number of pupils.	Public funds.	Private funds.	Total.
				Rs.	Rs.	Rs.
1888-89	...	2,313	200,124	6,01,539	19,34,506	26,36,045
1889-90	...	2,366	201,452	6,08,294	20,11,672	26,19,966
1890-91	...	2,393	199,105	6,11,046	20,62,859	26,73,905
1891-92	...	2,285	194,178	5,94,846	20,87,904	26,82,750
1892-93	...	2,326	198,270	5,90,493	20,92,642	26,83,135

Secondary schools of all classes taken together have advanced from 2,285 in 1891-92 to 2,326 in 1892-93, or by 1·8 per cent., and their pupils from 194,178 to 198,270, or by 2·1 per cent. There has been a decrease of one school in High English Schools, but a gain of 1,158 pupils. Middle English schools have increased by 25 and their pupils by 887, while Middle Vernacular schools have increased by 17 and their pupils by 2,047. In the preceding year the expenditure on 2,285 schools was Rs. 26,82,750, of which Rs. 5,94,846 were contributed from public funds, and Rs. 20,87,904 were raised from private sources. This year Rs. 5,90,493 were raised from public funds, or a decrease of Rs. 4,353, and Rs. 20,92,642 from private funds, or an increase of Rs. 4,738. The increase in the number of schools without a corresponding increase in the expenditure from public funds is no doubt a subject of congratulation, and the Lieutenant-Governor hopes that the economy exercised in the distribution of grants-in-aid by the Education Department, as well as the District Boards, has had an entirely wholesome effect. At the University Entrance Examination, 2,915 boys passed out of 4,365 candidates against 1,626 boys out of 4,046 candidates in 1892. The number of candidates increased from 4,046 to 4,365, or by 8 per cent. only; the number passed has risen from 1,626 to 2,915, or by 80 per cent. The percentage of successful candidates from schools was 25 in 1889, rose to 50 in the next year, fell off to 40 in the two following years, and has now reached to 67. Judging from general results, and from the fact that many schools known to be inefficient obtained a fair measure of success, Dr. Martin has reason for thinking that the last examination was a particularly easy one, and this is said to be the general belief everywhere. The relative position of the different classes of schools remains the same as before, institutions under public management standing at the top, with 81 per cent. of their candidates passed, the Aided schools next with 66 per cent., and the Unaided schools last, with 59 per cent.

Middle class schools.

11. The results of the Middle English and Middle Vernacular Scholarship examinations are better than those of the preceding year. The percentage of success has risen from 52 to 63. The Lieutenant-Governor is glad to observe that the result of the Middle Vernacular Scholarship examination is more satisfactory than that of the preceding year, the percentage of success having increased from 50 to 57. His Honour sees much reason in the Director's views expressed in the last part of paragraph 59 of the Report that the vernacular schools of the Dacca Division are being stifled owing to the scholarships being awarded in that division on the aggregate marks obtained, so that students even with a smattering of English get a great advantage over the vernacular candidates, and will be prepared to consider the question when proposals are submitted in a definite form.

Drawing.

12. In accordance with the orders contained in paragraph 11 of the Resolution on the Education Report for the year 1891-92, the Director of Public Instruction has inserted in paragraph 60 of his Report a table showing the progress made in drawing in those Entrance schools in which drawing-masters have been appointed. Out of 13 pupils from nine schools who took up drawing, only two passed, both of whom came from the Hare School, while one candidate passed from the Bogra zilla school which is not provided with a drawing-master. The results are disappointing. The Lieutenant-Governor, however, accepts the Director's view that the giving of due importance to the subject by taking the marks gained in it into account in the award of junior scholarships will in time give it a value which will force it into notice.

Physical training.

13. Almost every high school under the department is supplied with a gymnastic teacher, one teacher sometimes working in a group of schools, two or three months at a time in each school of the group. Many high English schools under private management have followed the example of the zilla schools according to their resources. The middle and primary schools mostly satisfy themselves with indigenous games which, though not costly in their apparatus, are none the less useful in promoting muscular development. The Boards of Nadia and Midnapore are making commendable efforts to introduce physical training in middle and primary schools, and other Boards might follow their example

with advantage. It is noticed with satisfaction that Mr. Growse at Faridpur, Mr. Greer at Tippera, Mr. Oldham, the Commissioner of Chittagong, and the Commissioner and Deputy Commissioners of Chota Nagpur organised inter-school cricket and football matches which they encouraged by their presence, and the Lieutenant-Governor agrees that kindly sympathy like this will do much to popularise games among the pupils. The Society for the higher training of young men, for which a grant of Rs. 100 a month was sanctioned during the year, has given prominence to the question of physical training but nothing practical has yet been done.

Discipline and moral training.

14. The Lieutenant-Governor observes with pleasure that the Director reports there has been a perceptible change for the better in the *morale* of school-boys, and that serious breaches of discipline and offences against morality were in most divisions very rare (paragraph 61), but His Honour at the same time notices that some very disgraceful cases of breach of discipline and of disrespect towards teachers and other constituted authorities occurred in Noakhali and Backergunge. Many high English schools possess debating clubs, in which students meet for self-improvement, under the presidency of one or other of the teachers. If properly controlled such clubs serve an useful purpose.

Boarding-houses.

15. The importance of boarding-houses as a powerful factor in promoting school discipline has not been lost sight of. Most Government institutions have attached boarding-houses, in which the pupils live under the charge of one or more of the resident teachers. Schools under private management follow the example of Government schools, whenever their means allow and the exigencies of the localities require such establishments.

Primary education.

16. The fluctuations in the number of the boys receiving primary education during the last five years are shown in the following statement:—

	Upper Primary.		Lower Primary.	
	Schools.	Pupils.	Schools.	Pupils.
1888-89	3,077	115,485	44,854	982,126
1889-90	3,337	124,568	44,145	960,865
1890-91	3,537	128,537	43,997	942,211
1891-92	3,661	135,371	44,918	987,948
1892-93	3,697	139,726	43,828	983,204

There was a steady advance in the numbers of upper primary schools and pupils, while there was a loss of 1,090 lower primary schools and of 4744 pupils. The fluctuations in the numerical statistics of lower primary schools originated, as explained by Dr. Martin, from different causes, viz., the state of the public health, the price of food-grains, floods or drought—in fact all the agricultural circumstances of the year; but, allowing for these considerations, it is still unsatisfactory to find that there has been little or no progress in primary education during the past five years. In a country in which only one boy in every four of a school-going age is learning to read and write and the other three are absolutely illiterate, the statistics of primary education ought not to show merely a few more one year and a few less the next, but they should show increases in all years. The Officiating Lieutenant-Governor agrees in the opinion that the loss in primary education during the year points to a decline in efficiency and activity of the inspecting staff, and thinks that, if more money were spent throughout the Province in this branch of education as pointed out in the Resolution on last year's Report, the result would be increased numbers at school. Sir Antony MacDonnell entirely concurs in the remarks made in paragraphs 10 and 15 of the Resolution on last year's Report on this subject.

The expenditure incurred from the primary allotment by the Department and by District Boards on account of schools for native boys and girls, and of

the subsidiary inspecting agency, is compared for the last two years in the following table:—

	From Provincial revenues.		From District funds.		Total.	
	1891-92.	1892-93.	1891-92.	1892-93.	1891-92.	1892-93.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Stipendiary schools	97,766	1,06,741	1,77,910	1,64,003	2,75,676	2,70,744
Non-stipendiary schools ...	34,075	30,474	2,91,170	2,62,557	3,23,245	2,93,031
Schools abolished before the close of the year	3,807	2,857	7,569	8,900	11,376	11,757
Chief gurus and inspecting pandits	12,263	14,187	78,474	78,265	90,737	92,452
Examination charges ...	1,036	1,147	12,203	11,680	13,239	12,827
Scholarships and prizes ...	7,376	9,652	26,068	27,762	33,444	37,414
Grants for buildings and furniture	7,006	7,006	1,011	1,787	8,017	9,331
Other payments	8,333	8,715	23,361	21,609	31,694	30,324
Total ...	1,69,662	1,81,317	6,17,766	5,76,563	7,87,428	7,57,880
Allotment	1,78,798	1,87,372	6,23,300	6,22,351	8,02,098	8,09,723
Savings	9,136	6,055	5,534	45,788	14,670	51,843

The expenditure from Provincial revenues upon stipendiary schools has increased from Rs. 97,766 to Rs. 1,06,741, while that upon non-stipendiary schools has diminished from Rs. 32,075 to Rs. 30,474. The total district fund expenditure was Rs. 5,76,563 against Rs. 6,17,766, and the savings out of the allotted grants amounted to Rs. 45,788 against Rs. 5,534 for the preceding year. Regarding this large saving the Director explains that the figures of expenditure for the year 1892-93 do not include *uncashed cheques*, and these in many districts came to large amounts.

The direct expenditure on primary schools, including the charges for those abolished during the year, was Rs. 5,75,532, or 76 per cent. of the total against Rs. 6,10,297, or 78·5 per cent. in the preceding year. This means that comparatively larger sums were expended during the year under report on such indirect heads as chief gurus, scholarships, prizes, buildings, furniture, &c.

The number of stipendiary schools aided from the primary fund has remained much the same as in the previous year, viz., 6,252 against 6,244, while that of non-stipendiary schools has declined from 34,490 to 31,890, owing partly, as stated above, to the introduction of a minimum allowance for rewards.

The municipal contribution to primary schools for boys and girls was raised from Rs. 24,984 o Rs.32,916. This is satisfactory as indicating that Municipalities are becoming more alive to the importance of providing for the education of the poor. Dr. Martin says that there is a diversity of practice with regard to the administration of these grants; in some Municipalities they are made over to the department for expenditure; in others they are distributed by the Commissioners themselves without ctonsulting the Department. The Lieutenant-Governor concurs with the Direcor of Public Instruction in thinking that the former practice should be enforced: for unlessthis is done, much of the money will be frittered away, or left unspent.

The views of Government as to the financial responsibility of Municipalities in regard to primary education were defined during the year. The principle adopted was that Municipalities should provide for the primary education of at least half the boys of a school-going age within their areas. It was calculated that this would cost them on an average about 3·2 per cent. of their ordinary income, and it was decided that those municipalities which were unable to set aside so large a proportion of their funds during the current year should receive assistance from Government. In future it is hoped that all municipalities will make arrangements to comply with the wishes of Government in this respect. The result of this policy when carried out will be a considerable increase in the funds set apart for primary schools, and a corresponding increase in the number of schools and of pupils attending them. The Chairmen of municipalities have been recommended to take measures for opening the required number of schools from the 1st April 1894.

When due provision has been made for the required number of primary schools, but not before, any further sum which a municipality is desirous of expending on secondary education can be so devoted.

17. The following table exhibits by divisions the apportionment of the primary allotments between upper and lower primary schools, and the direct expenditure upon them:—

Primary schools.

DIVISIONS.	Allotment.	EXPENDITURE.		NUMBER OF SCHOOLS.		NUMBER OF PUPILS.		COST PER SCHOOL.		COST PER PUPIL.	
		Upper.	Lower.	Upper.	Lower.	Upper.	Lower.	Upper.	Lower.	Upper.	Lower.
1	2	3	4	5	6	7	8	9	10	11	12
	Rs.	Rs.	Rs.					Rs.	Rs.	Rs.	Rs.
Presidency ...	85,574	19,929	58,714	410	3,882	16,071	109,789	48·6	15·1	19·8	5·3
Calcutta	9,172	877	6,908	13	182	717	8,505	67	37·9	19·5	12·9
Burdwan	1,16,086	31,105	60,157	725	7,960	26,785	200,101	42·8	7·56	18·57	4·61
Rajshahi	77,673	21,921	44,703	421	2,223	14,687	55,457	52	28·1	24·5	12·8
Dacca	86,351	23,822	44,390	590	4,063	20,730	96,249	40·2	10·9	18·3	7·3
Chittagong ..	70,915	17,681	30,470	423	4,627	17,169	101,328	41·7	6·6	16·4	4·8
Patna	95,216	16,441	48,475	177	4,982	8,816	108,687	92·9	9·7	29·8	7·1
Bhagalpur	66,144	13,478	33,994	187	1,874	8,011	43,064	72	18·1	26·9	12·6
Chota Nagpur ...	61,818	7,238	44,240	94	1,623	4,240	45,616	76·2	27·2	27·3	15·5
Orissa	49,948	11,756	25,238	244	3,302	6,083	73,139	48·1	7·6	28·1	7·5
Orissa Tributary Mahals.	2,800	60	1,569	1	134	18	1,672	60	12·5	58·3	16
Total .	7,21,647	1,61,308	3,98,864	3,285	34,852	123,927	823,907	50	11·4	21·2	7·7

The ratio of expenditure on the two classes of institutions, upper and lower primary, varies from district to district, the rule being that as the payment-by-result system is more largely introduced in the districts of a division, the cost of upper primaries increases proportionately.

In paragraph 74 of his Report the Director has given a table showing the number of pupils in each district in the different stages of primary instruction, and comparing their relative positions with reference to the progress made in this respect.

The table has been recast in conformity with the wishes of Government as expressed in paragraph 17 of the Resolution on the last Annual Report. There are now two standards of comparison—one based on the stages of progress attained, and the other on the number of pupils in the different stages of primary instruction put together. The former may be called the merit-mark system, determined as before by assigning five marks to each pupil in the upper primary or the highest stage, three marks for each pupil in the lower primary stage, and one mark for each pupil who reads printed books. These marks roughly represent the years a pupil of average intelligence takes to reach the different stages. The second test compares the progress of the different districts by ascertaining the ratio of the number of pupils in the primary stages to the total population of school-going age. To this second test allusion has been made in a few remarks entered at the foot of the statement, but no attempt is made to explain the extraordinary difference between the percentages between different districts of the same division and between different divisions. Why is it that 47 per cent. of the boys of a school-going age are undergoing primary education in the Burdwan Division and only 24 per cent. in Dacca, and why again is it that 26 per cent. of the boys of the Patna district are at primary schools and only 7·8 per cent. of them in Shahabad?

18. The standard of the results of the Upper Primary Scholarship examination for boys, *i.e.*, candidates from upper primary schools, including private students as given in the table in paragraph 80 of the report, shows the result more favourable than in the preceding year. Out of 2,460 schools which sent up pupils to this examination, 1,694, or 68·8 per cent., were successful, against 1,493 out of 2,381, or 62·7 per cent., in the year before. The results of the corresponding Lower Primary Scholarship examination show that the number of competing schools increased from 10,001 to 10,597, but that of successful schools declined from 7,244 to 6,923, or from 72·4 to 65·3. The percentage has gone down in almost all the Divisions, and the cause of this decline should be more carefully looked into by the Inspectors and their subordinates.

Primary scholarships.

Mr. Stack, Inspector of Schools, Bihar Circle, writes:—

"Another very important consideration arises here connected with the variation of the maximum limit of rewards that can be earned by gurus in different districts. In Patna, Muzaffarpur, and some others this has been fixed at Rs. 40, whereas elsewhere in the Division it exceeds that limit. It has been found that there are gurus within the area restricted to the forty-rupee maximum who could earn this maximum fully, or very nearly by successful results obtained at *situ and examinations by the A and B standards* only, and who therefore are averse to the additional trouble and expense involved in attending distant examinations at lower primary centres, where no further reward is to be gained. Hence this circumstance

operates adversely in some cases to the attainment of a high standard of results, and the question of the maximum is worthy, therefore, of further consideration by District Boards, who might in consultation arrive at a suitable scale of maximum reward, which would constitute an *inter-Board maximum for the Division.*"

The Lieutenant-Governor thinks this proposal may be adopted—at all events as a provisional arrangement, especially as measures are being taken to hold the lower primary examinations in the districts of each division with the same set of questions.

Dr. Martin writes—

"It would seem that in some districts non-stipendiary upper primary schools are not admitted to the reward examination beyond the standards A and B, the two lowest in a primary school. This does not seem equitable, and it sets a premium on poor work by holding out no encouragement for anything higher. Thus in the 24-Parganas, upper primary schools have declined, owing, as the Deputy Inspector says, to the wholesale withdrawal of fixed stipends from them, and to the rule that they must not earn rewards by any standards higher than A and B. There are four well-defined stages of progress in a fully organised primary school, viz., the A and the B standards, the lower primary scholarship standard, and the upper primary standard; and it is highly desirable that each standard should have an adequate value set upon it. If payment is made for the two lowest stages only, few gurus will attempt to raise their schools to a higher level, when the chief incentive for higher work is gone."

The Lieutenant-Governor agrees with the Director that in the case of upper primaries the question of fixing a maximum should be restricted to the A and B standards only, and that every guru of a non-stipendiary upper primary school, who passes pupils by the higher standards, should be rewarded with additional grants. The adoption of this principle will, His Honour trusts, have the effect of raising the tone of these pathsalas.

Special Instruction.

19. Under the head of Special Instruction are included training schools for teachers and all institutions for professional, technical and industrial education. The number of training schools for masters, mistresses and gurus advanced from 205 to 267 and their pupils from 1,943 to 2,382, and it is satisfactory to notice that this advance was chiefly in the Patna, Bhagalpur, and Dacca Divisions, in which primary education is very backward. The expenditure from Provincial revenues increased from Rs. 83,198 to Rs. 84,597, or by Rs. 1,399, while the total expenditure decreased from Rs. 1,16,703 to Rs. 1,13,380. The expenditure from Provincial revenues in the Government training schools for masters increased from Rs. 67,485 to Rs. 70,591. This is to a great extent due to the employment of drawing-masters and the opening, for the first time during the year, of drawing classes with the necessary apparatus in these institutions.

The results of the Vernacular Mastership examination for pupils of first and second grade training schools and for private candidates show 444 as having successfully passed out of 621 candidates, but are somewhat less favourable than last year: only 110 men have been granted first grade certificates after the three years' course and may be regarded as having cost Rs. 65,211 or Rs. 593 each. From the figures supplied, it appears that in 1,012 middle vernacular schools for boys and girls there were only 895 head-masters (this results from one man having under the Circle system to look after two or three schools in some instances) and 1,872 other teachers. It is satisfactory to observe that of the former no less than 700 were holders of Vernacular Mastership Examination Certificates, and no less than 1,330 of the latter might be regarded as having certificates of competency, while the rest were remnants of the old class teachers or local men employed on low pay. Of 3,550 head-gurus in upper primary schools, 2,629 may be regarded as having ample qualifications, and of 1,298 junior gurus, 602, together with a proportion of 569 others, may also be held to be competent. The Lieutenant-Governor agrees with the Director that there is no difficulty in finding locally all the teachers who are needed for schools of this class.

In paragraph 19 of the Resolution on the report for the year 1891-92, directions were given to "have the whole system of these (training) schools carefully reviewed by the Inspectors." After quoting the opinions expressed by Mr. Prothero, Inspector of Schools, Rajshahi Circle, Babu Dinanath Sen, Officiating Inspector of Schools, Eastern Circle, and Rai Radhika Prasanna Mookerjea, Bahadur, Inspector of Schools, Presidency Circle, Dr. Martin observes:—

"I think the training schools in Calcutta and Dacca might be converted into *training colleges* somewhat upon the lines suggested by Babu Dina Nath Sen, and I believe this could be done without increasing expenditure. The school at Hooghly, in spite of its apparent popularity, might be gradually reduced from its present status, and in a few years it might be abandoned

altogether, its teaching staff being absorbed into the establishments of zilla schools. The schools at Rangpur, Patna, Ranchi, and Cuttack might remain somewhat as they are for some years to come. In these outlying places there is still a need of schools of the kind for the training of teachers who may be employed either as head pandits of middle class schools or as inspecting pandits to help to supervise the work done in the upper and lower primary schools. As regards the school at Chittagong a difficulty arises. On the one hand it might be regarded as a necessity from its being situated in such an outlying district; on the other the Assistant Inspector of Chittagong in referring to its loss of numbers (from 67 to 51) remarks: This is due not to the unpopularity of 'the school, but to its unusual success at the final examinations during the last two years, when it turned out more pandits than the Division had need of. The supply having exceeded the demand, there was a dead-lock in appointments producing a discouraging effect.' The opinion of the Commissioner of the Division is summed up in the following words:—'A training school in this Division, except in the Hill Tracts, is now an anachronism.'"

An expression of Sir Alfred Croft's opinion in the matter will be awaited.

The scheme of attaching guru classes to certain middle schools in each district is said to have worked with varying success in the different circles and divisions. Altogether 1,171 gurus are reported to have received some kind of education in middle class schools at a cost of Rs. 6,473. Of these, only 91 were subsequently able to pass any departmental examinations, so that for each pass obtained (a Middle Vernacular pass being the highest) about Rs. 70 were paid by Government. Dr. Martin does not approve this system. He considers that the question is one upon which the special opinion of each experienced inspecting officer of the Department should be obtained. The Lieutenant-Governor would be glad to be furnished with a special report on the subject.

20. The "Other schools of special instruction," including all institutions and departments teaching Law, Medicine, Engineering, the Calcutta School of Art, industrial schools and other schools of a special character, are shown in the following statement:—

	Number of institutions.	Number of pupils on the rolls on the 31st March 1893.	Average monthly roll, &c.	EXPENDITURE. From public funds. From Provincial Revenues.	From District Funds.	From Municipal Funds.	From private funds. From fees and fines.	From other sources.	Total.	Average annual cost of educating each pupil. Cost to Public Funds.	Total cost.

The following table exhibits the fluctuations in the numbers of the students reading for the chief professions:—

YEAR.	Law.	Medicine.	Engineering.	Arts and Industry.	Other special schools.	Total.
1	2	3	4	5	6	7
1888-89	935	999	518	651	172	3,275
1889-90	912	1,016	652	795	611	3,986
1890-91	1,025	1,184	703	753	550	4,215
1891-92	663	1,290	661	853	559	3,926
1892-93	488	1,545	764	915	447	4,159

The decrease in the number of Law students continues. One reason is the recent changes in the regulations for the B.L. and Pleadership examinations, and another is that students have begun to see that the native Bar is already crowded. The increase in the number of medical pupils is attributable to the opening of a new school in the Dacca Division. One of the Homœopathic schools in Calcutta, which was returned last year, has not been returned this year. The total expenditure of the Medical College was Rs. 1,91,366 against Rs. 2,05,206 in the preceding year, of which Rs. 16,758 against Rs. 12,140 were raised from fees, and the rest paid by Government. The Officiating Lieutenant-Governor notes with much satisfaction the increase in the number of students of the "Engineering" and "Arts and Industry" classes which Sir Antony MacDonnell like Sir Charles Elliott desires heartily to encourage. So great is the demand for trained apprentices in the Sibpur College now-a-days, that it is sometimes unavoidable to issue certificates before the complete course has been gone through. The Principal writes—

"As a consequence of my inability to supply fully qualified men for vacant appointments, I have been compelled to recommend partially trained men * * * As many as 39 partial certificates have been issued (during the year under report) to apprentices who accepted employment before the completion of their full course. This shows that the demand for the class of labour is greater than our present supply, and I hope that the attainments of the partially trained men will be found to be up to the standard of the appointments they have been recommended for."

The number of students admitted to the Engineer class was 41 against 28, and that to the apprentice class was 66 against 33. The total admission during the year was 107 against 61 in the preceding year. At the B.E. and L.E. Examinations held in July 1892, 14 candidates competed, of whom 6 or 43 per cent. passed, against 5 in the preceding year. The number of candidates in the F.E Examination was 14, of whom 11 or 79 per cent. were successful against 4 in the year efore.

The proposal to establish an artizan class is under consideration, but no arrangements can be made unless more accommodation is provided in the College. The European students of the College are encouraged to join the Volunteer corps. The College corps was amalgamated during the year with that of the East Indian Railway and formed into an Engineer Company. A class for photography has recently been opened. The total expenditure of the College, exclusive of the workshop, was Rs. 62,742, of which Rs. 10,592 were raised from fees and the rest paid by Government. Of the 43 pupils in the Cuttack Survey School on the 31st March 1893, 23 only were natives of Orissa. The decrease in the number of Uriya students is attributed to the lack of efficient practical training, for want of which even passed students, it is said, are found to be almost useless when they are first taken into Government service, so that, in times when there is a normal demand (for passed students), difficulty is experienced in obtaining employment. The Lieutenant-Governor does not accept this explanation. The difficulties in connection with practical training are no greater in Cuttack than in the Dacca Survey School, where the number of pupils rose from 268 to 318, and where the demand for passed students exceeds the supply. In Orissa, which was recently brought under survey, there ought to be no want of demand for surveyors. The Officiating Lieutenant-Governor thinks that the Directors of Survey and of Land Records might with advantage visit this and other survey schools and offer such suggestions as may be necessary to increase their efficiency. The School of Art, in which the artistic and decorative industries

of Bengal are concentrated, more than maintained its position by attracting 198 pupils against 181 in the preceding year. The school was removed to the new premises in Chowringhee during the year. Seven students of the school were employed during the year as teachers of drawing, and three as draftsmen, in the Indian and Geological Museums. Arrangements were also made with the Office of the Survey of India for a number of specially trained students to be admitted annually as probationers in the drawing office, the pay commencing at Rs. 20 and rising to Rs 120 a month. The total expenditure on the institution was Rs. 29,922, of which the Government share was Rs. 25,171 against Rs. 27,352 in the previous year. The Government School at Ranchi made some progress in blacksmith's and carpenter's work during the year. The total expenditure amounted to Rs 3,276, of which Rs. 1,882 (against Rs. 1,555 in the preceding year) were paid by Government.

The Bihar Industrial School was opened during the year. The total capital of this school is Rs. 2,50,411, of which Rs. 2,39,900 is invested in Government securities and Rs. 10,511 deposited in the Bank of Bengal. The monthly establishment charges amount to Rs. 182, and the total cost came to Rs. 16,011, the chief portion of which was devoted to the erection of a building. The institution had 32 pupils on the rolls, divided into two departments—the apprentice with 20 pupils and the artizan with 12. Twenty-five of the pupils received stipends varying from Rs. 7 to Rs. 3 a month. The course of instruction includes arithmetic, algebra, Euclid, drawing and carpentry. The management is vested in a Committee with the Commissioner of the Patna Division as President. A new industrial school was opened during the year at Pabna, the Comilla artizan school was brought on to the books of the department, and a new technical school was opened at Noakhali.

The Lieutenant-Governor has read with pleasure Dr. Martin's conclusion that District Boards and other local Educational authorities are becoming alive to the importance of technical education, and that year after year not only has there been an advance in the number of such schools, but a steady endeavour to place the existing ones on a better footing. Sir Antony MacDonnell hopes that this is only the beginning of a great movement. Higher education has now taken such firm root in Bengal that it has ceased to require from Government the same fostering care as formerly. The educational authorities should now pay special attention to the preparation of the youth of the country for new industrial and scientific pursuits and to the fostering of primary education among the poorer classes.

21. At the beginning of the official year, Mr. Slater, Principal of the Sibpur College, was authorised to visit the outlying industrial schools in order to introduce some uniformity of system into their course of instruction, so as to prepare them gradually for affiliation. Mr. Slater inspected the following institutions:—

(1) Bihar Industrial School (2 visits).
(2) Calcutta ditto ditto.
(3) Giridhi ditto.
(4) Ranchi ditto.
(5) Patna Survey School (2 visits).
(6) Dacca ditto.
(7) Rangpur Technical School.
(8) Mymensingh Technical School.
(9) Hazaribagh Reformatory.

He sums up his conclusions as follows:—

"In the present state of their finances they (these mufassal schools) can never rise above the standard of what I may call primary industrial schools, if they have to purchase machinery at market prices. Their funds are sufficient to enable them to employ a fairly competent head-master (generally an ex-apprentice of this College), and equip a carpenter's and blacksmith's shop. As feeders to a Central Technical College, such schools are invaluable from an industrial point of view; as separate institutions, with no further means of training their more advanced students, they must fail. The experiment has been tried unsuccessfully before, and I am convinced the recently established schools will meet with the same fate unless they are affiliated to an institution that can give a more advanced and complete training. This problem, therefore, of the training of students on a technical basis is a pressing one, if the present movement is to be successful. All my advice to the management of these schools has been based on the understanding that Government desired to place the Sibpur College on such a

footing as to enable it to receive and complete the training of these students from the primary schools. The only other suggestion I could have offered was that the movement should be suppressed as it was certain to fail. The schools I have visited have most readily accepted the suggestion as the only one on which their schools could progress, and I am now hampered with the prospect of these schools asking us to admit their students, and our being obliged to refuse on the ground of inadequate accommodation. My proposal for the proper encouragement of technical education in Bengal is a very simple one, and, if carried out on the lines I advocate, has the additional advantage of being cheap All I ask for is (I) the affiliation to the Sibpur College of such primary industrial schools as desire this affiliation; (II) the necessary equipment and accommodation in the College to enable me to receive these students. At present the accommodation both in the College and workshops is inadequate for our present requirements, and sufficient accommodation could not be provided under a cost of about three lakhs of rupees. This cost is prohibitive in the present financial position of Government, so I propose to utilise the existing workshops solely for instructive purposes. Their area is sufficient for every purpose I require, and their only cost to the State would be their adaptation to their new requirements. * * * If the shops are given over for educational purposes, a new era in technical education will open out in Bengal."

If it lay with Sir Antony MacDonnell to decide whether the Sibpur Workshops should remain under the control of the Public Works Department or be transferred to the Educational Department, he would have no hesitation in deciding in favour of the transfer. Under the Public Works Department the Workshops serve no substantial purpose, while they compete with private enterprise. Under the Educational Department they would form a necessary and most valuable adjunct to a broad scheme of technical instruction for the Province.

The Lieutenant-Governor is glad to notice that some of the District Boards have created scholarships for the encouragement of industrial studies.

Female education.

22. The progress of female education, in its main statistical aspects, is exhibited in the following table:—

Class of Schools.	Number of schools.	Number of pupils on the rolls on the 31st March 1893.	Average number on the rolls monthly.	Average daily attendance.	Expenditure. From public funds. Provincial Revenue.	District Funds.	Municipal Funds.	From private funds. Fees.	Other sources.	Total.
1	2	3	4	5	6	7	8	9	10	11
					Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Managed by Government.	2	240	218	182	21,326	......	120	2,807	311	24,564
Do. by District or Municipal Boards.	6	256	248	166	364	......	1,431	16	35	1,846
Aided by Government or by District or Municipal Boards.	2,440	49,707	45,615	34,689	74,270	29,226	8,971	24,720	1,70,665	3,07,852
Unaided	373	6,370	5,818	4,601	.....	......	......	3,188	14,285	17,473
Total ...	2,821	56,579	51,699	39,638	95,960	29,226	10,522	30,731	1,85,296	3,51,735
						1,35,708		2,16,027		
1888-89	2,302	47,888				1,21,106		1,88,915		
1889-90	2,153	45,690				1,20,171		2,06,788		
1890-91	2,238	50,143				1,26,520		2,24,567		
1891-92	2,706	54,199				1,31,093		2,23,976		

There was a material advance in female education. The number of girls' schools increased from 2,706 to 2,821, and their pupils from 54,199 to 56,579. The number of girls in boys' schools also increased from 32,749 to 34,200. The net gain of schools was therefore 115, and of pupils 3,831. The only Government schools are the school department of the Bethune College and the Eden Female School in Dacca. It is satisfactory to see that, though the number of girls increased, the total expenditure decreased by Rs. 3,334. The cost of the schools under all the different heads except "Other sources" shows an increase which is in keeping with the increase in the number of schools and of pupils. The *Bethune School* passed two girls at the last Entrance examination, but the number of girls sent up has not been mentioned; the Dacca Female School sent up two, of whom one passed. Mrs. Wheeler, the Inspectress of Schools, furnished examination returns of 5,537 pupils; the number of schools examined by her was 104, of which 46 are in Calcutta. In Calcutta there were 150 primary girls' schools with 5,872 pupils against 162 schools with

5516 pupils in the preceding year. Arrangements have recently been made and rules framed under which the grants to schools in and near Calcutta will be revised, so as to bring them to some extent into proportion with the actual work done. The special standards for girls' scholarships that were originally decided for Calcutta and its neighbourhood could not be largely extended to the mufassal for want of funds. It is a matter for congratulation to read that, in the last examination under these standards, out of 276 examinees, 236 passed against 175 out of 292 in the preceding year.

Education of Europeans.

23. Though the total number of schools remained unchanged, there was an increase of 346 scholars attending European schools in Bengal during the year, and, with the exception of a slight falling off in 1886, the number has steadily increased since 1883, as the following figures will show:—

YEAR.	1883.	1884.	1885.	1886.	1887.	1888.	1889.	1890.	1891.	1892.	1893.
Number of schools	5,578	5,955	6,389	6,098	6,391	6,541	6,682	6,710	6,829	7,098	7,444

The Government Boarding School at Kurseong had 86 students instead of 90; the Government expenditure has been reduced by Rs. 1,900. The average cost per scholar (Rs. 152) was less than that of the preceding year, (Rs. 180). The 27 schools under Roman Catholic management afforded education to 3,968, and the 14 Church of England schools to 1,750 children, out of 7,444 above mentioned, the remainder belonging to other denominations. The total cost of European education was Rs. 10,84,680, of which Government paid Rs. 1,70,798. Government sanctioned during the year Mr. Bamford's proposals, (1) that all the aided schools in Bengal should receive grants dependent upon the average attendance of scholars instead of upon examination results, and (2) that frequent supervision by the Inspector should supersede the annual examination. These changes will give the Inspector freedom to employ the best methods for investigating the character of the teacher's work, and enable him to spend a much greater portion of his time actually in the schools, thus affording him increased opportunity for giving help and supervision where it is needed. The number of candidates from European schools for the University Entrance examination increased from 106 to 154, and the number of successful candidates from 52 to 126. The percentage of successful candidates rose from 49·1 to 81·8. The number of schools upon the special list of those in receipt of fixed annual grants is the same (five) as in previous year. All these schools were examined during the year on the collective system (*i.e.*, the classes as a whole were tested instead of each individual scholar), and were all found to be doing good work.

Muhammadan education.

24. The total number of Muhammadan pupils decreased from 448,847 to 447,485, or by 1,362, and the percentage from 29·2 to 29·1. In public institutions the Muhammadan pupils increased by 4,430. A large increase, viz. by 3,094 Muhammadan pupils, took place in the upper primary schools. The private institutions sustained a loss of 5,792 Muhammadan pupils. In advanced private schools there was a loss of 1,793 Muhammadan pupils, while in the elementary schools there was a gain of 2,753. In other schools not coming up to departmental standards, there was a loss of 56 pupils. The actual expenditure of the Mohsin Fund exceeded the estimates which amounted to Rs. 66,654 by Rs. 777. The number of Muhammadan candidates successful at the University examination for the last five years is shown as follows:—

	1889.	1890.	1891.	1892.	1893.
Entrance	54	125	110	85	172
First Arts	21	57	16	47	35
Bachelors of Arts	18	21	12	14	24
Masters of Arts	1	3	2	2	

The number of passes gained by Muhammadan candidates was greater in 1892-93 than in the preceding year at all the examinations except the First Examination in Arts. The percentages also of Muhammadans among successful candidates advanced except in the case of the First Arts Examination. The Lieutenant-Governor considers that, though these results show some

slight improvement, they are disappointing when the proportion which the Muhammadan element bears to the total population is considered. The ratio per cent. of Muhammadan boys at schools, of all kinds to the total number of Muhammadan boys of a school-going age is 25, against 29 per cent. in the case of Hindus. Of boys receiving secondary education, 81 per cent. are Hindus and only 14 per cent. Muhammadans, while of students receiving collegiate education, 90 per cent. are Hindus and only 5 per cent. Muhammadans.

In the general results of the central examination of the Madrassas 169 out of 313 passed this year, as compared with 224 out of 270 last year. The total number of candidates increased by 43, but the total number of passes diminished by 55. Three of the seven Madrassas are maintained from Provincial revenues; the rest from the Mohsin Fund. The 1,722 pupils at the seven Madrassas cost Government Rs. 25,231, and the total expenditure on their account was Rs. 59,933. Physical training is receiving attention both in the Calcutta and the Nawab of Murshidabad's Madrassas. On the subject of the comparative backwardness of Muhammadans in education, especially of the higher kind, the Director remarks:—

"One of the most depressing influences which have had the effect of discouraging the advance of education among the Muhammadan community arises from the fact that so little has hitherto been done towards giving employment to Musalman gentlemen in the Department of Public Instruction This is a matter which I have recently brought to the notice of Government in a separate report, so I need not do more than allude to it here. Another matter upon which I wish to make a passing remark is the constitution of the District Boards, upon which in the majority of cases Muhammadans are not represented in such proportions as their numbers would seem to demand. This is a difficulty for which seemingly a remedy might easily be found. The Muhammadan Assistant Inspector for Patna and Bhagalpur Divisions, pointing to the fact that some of the Boards in Bihar 'have no Muhammadan members at all, and some perhaps only one or two,' goes on to say:—'The result has been just what could be anticipated with such imperfect and one-sided representation, so that even in some cases the presence of a European Magistrate-Chairman with all his powers and endeavours cannot do anything to help the cause of Muhammadans and check the growing tendency to retard it.'"

This matter will be separately considered.

Education of aborigines and indigenous education.

25. The aboriginal population of Bengal includes the Sonthals and Kols, Dhangars, Uraons, Pathaliks, Paharis, Indo-Tibetans, Indo-Chinese, Indo-Burmese, besides the tribes on the Assam, Chittagong and Tippera frontiers. The number of pupils of these aboriginal races under tuition increased from 29,657 to 31,712 or by 2,055 The Christians advanced by 964 and the non-Christians by 1,091. The divisions in which the aborigines chiefly live are Burdwan, Bhagalpur and Chota Nagpur. In the first of these there were 3,426, in Bhagalpur 6,231, and in Chota Nagpur 17,579, of whom 4,424 are christians and 22,812 are non-Christians. The five missions in Chota Nagpur maintained 136 schools as compared with 146 in 1891-92, and the pupils attending them decreased from 4,194 to 3,920 or by 274. The total expenditure on these schools increased from Rs. 33,933 to Rs. 42,063, while the Government expenditure decreased from Rs. 9,435 to Rs. 9,282. The aboriginal pupils gained 133 more passes at the Entrance and other examinations than in the previous year.

Indigenous education.

26. The figures for the last five years under this head are as follows:—

	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.
Schools ...	11,709	13,867	13,387	13,868	13,473
Pupils ...	117,284	139,603	132,057	139,594	134,989

The total number of institutions decreased by 395 and the pupils attending them by 4,605. The largest decrease was in the Chittagong Hill Tracts, and is attributed by Mr. Oldham to the fact that foreigners are imported to supervise education. The suggestion of the Commissioner that he should be given the powers of Director in this district should be separately submitted.

The advanced schools for teaching Arabic or Persian decreased by 77 and their pupils by 1,933, while the Sanskrit tols increased by 102, but their pupils diminished by 202. Certain rules were published by Government during the year for the award of Government stipends in the indigenous tols of Bengal, Bihar and Orissa, and nine Associations have been empowered to conduct the examination, the same sets of question papers being supplied to each by the Principal of the

Sanskrit College. Under the orders of Government Mahamahopadhyaya Mahesa Chandra Nyayaratna, C.I.E., visited Sanskrit tols in the Cuttack, Puri and Balasore districts. His visit to Orissa proved a success and evoked much enthusiasm in the cause of Sanskrit teaching in that province. Under his auspices three Associations have been established for the promotion of the study of Sanskrit.

The Central Text-Book Committee.

27. The duty of selecting school-books has, since the year 1875, been entrusted to the Central Text-Book Committee, which now consists of 17 members, with Babu Bhudeb Mukherji, C.I.E., as President, and the Inspector of Schools, Presidency Circle, as *ex-officio* member and Secretary. The Committee received for examination during the year 301 books on different subjects: of these 157 were approved for various purposes, 142 were rejected, and the consideration of two books had to be postponed. Besides the Central Text-Book Committee sitting at Calcutta, there are Branch Committees for Bihar and Orissa. A list of text-books and another of prize books in Hindi and Urdu were approved by the Bihar Text-Book Committee and published for the first time. The Orissa Committee consists of 16 members, of whom only four belong to the Education Department, but it does not appear that its members did any very useful work during the year.

Conclusion.

28. The Officiating Lieutenant-Governor desires to thank Dr. C. A. Martin for his efficient administration while in charge of the Department, and cordially agrees in the high eulogium already bestowed by Government on Mr. Tawney for his conspicious services in the cause of education in Bengal.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT FOR THE PRESIDENCY DIVISION FOR 1892-93.

GENERAL DEPARTMENT.—MISCELLANEOUS No. 2658.

Calcutta, the 21st November 1893.

RESOLUTION.

READ—

The Annual General Administration Report for the Presidency Division for 1892-93.

Read also—

The Annual General Administration Report for the Presidency Division for 1891-92, and Government Resolution thereon.

Except for the last few weeks of the year, Mr. Beames was in charge of the Division. The report is submitted by Mr. Westmacott, who assumed charge on the 4th March 1893.

Tours.

2. The Commissioner's tour was far short of the prescribed length, and covered only 68 days, to which Mr. Beames contributed 48 and Mr. Westmacott, during the short time he was in charge 20 days. The tour of the Collector of Murshidabad fell short by 13 days; Mr. Kennedy explains that his tour was curtailed by stormy weather in February, and by the necessity for remaining at head-quarters during March to complete the half-yearly inspections; but the Lieutenant-Governor agrees with the Commissioner that his explanation is not sufficient: all other district officers found it possible to comply with the orders. All Sub-divisional Officers completed the full period of tour, except the Sub-divisional Officer of Magura, where Mr. Lees was on tour for only 22 days between the 1st April and the 12th December; he then made over charge to Babu Bepin Behari Mookerjee, who was on tour only for 53 days during the remainder of the year. The inspections of the district offices and treasuries, which were punctually made, disclosed no serious irregularities in any district except Nadia, where defects were noticed in the arrangement of the records, and in the dilatory disposal of applications respecting spoiled stamps in the Certificate Department. In the same district the registers of loans under the Land Improvement and Agriculturists' Loan Acts were found to be in great disorder, and in consequence a muharrir, who it appears had dishonest reasons for not keeping proper accounts, has been dismissed. The Lieutenant-Governor will be glad to be informed of the name of the Deputy Collector in charge who failed to exercise efficient supervision. The district officers inspected all the sub-divisional offices and treasuries in their respective districts twice during the year in accordance with existing orders.

Weather and crops.

3. The rainfall of the year was greater than that of the previous year in all districts except Nadia, where it was approximately the same. The largest fall, 93·44 inches, was recorded at Canning Town in the 24-Parganas, and the smallest, 34·31 inches, at Akhriganj in Murshidabad. The uneven character of the rainfall affected the outturn of the harvests, which varied considerably not only in different districts, but in different parts of the same district. There were good aus crops in Nadia and Jessore, and a bumper aman crop in the *bagri* tracts of Murshidabad, while in the Jangipur sub-division the crop failed. The *aman* or winter rice was generally below the average, and in parts of Jessore and Khulna it was much below the average. The rabi crops were damaged by excessive rain.

Public Health.

4. The following figures show the total reported mortality in each district for the last three years:—

District.	1892.	1891.	1890.	Deaths per mille.		
				1892.	1891.	1890.
24-Parganas ...	48,058	45,785	36,900	25·40	24·19	22·05
Nadia ...	58,686	71,582	32,676	35·69	43·53	19·73
Jessore ...	79,707	76,820	59,531	42·19	40·67	30·69
Murshidabad ...	40,678	40,599	26,438	32·51	32·45	21·55
Khulna ...	37,286	30,713	33,509	31·66	26·07	31·02
Total ...	264,415	265,499	189,054	33·66	33·80	24·9

These statistics, defective as they are, would seem to indicate that public health was on the whole better than in the previous year. The mortality from malarial fever and cholera still seems to be great, and will probably continue so as long as the water-supply, sanitation, and the drainage of the country are not improved. Some steps have been taken towards improving the water-supply in the districts of the 24-Parganas, Jessore, and Khulna.

Material condition of the people.

5. In regard to the material condition of the people, the following remarks are taken from the Commissioner's report:—

"There was no improvement in the condition of the people during the year. It would seem rather to have somewhat deteriorated. The high prices of food-grains which prevailed during the last three years pressed hardly on the landless classes and all persons with small fixed incomes. The agricultural classes did not feel the pinch so much, inasmuch as they had the benefit of better prices for such crops as they harvested. The case was, however, different with the labouring classes, who had no increase in their wages. The condition of the poorer middle classes (*bhodra lok*) was also bad. Their incomes being limited, they found difficulty in maintaining their social position. According to the custom of the country, they spend more than they can afford on marriages and other social ceremonies, and to meet these charges they generally have recourse to the money-lender, with the inevitable result that they ultimately lose such rent-free lands as they may possess. This is evident from the large increase in the number of sales of immovable property, mortgage deeds and bonds for money registered during the year."

The following extract relating to Murshidabad is also of interest:—

"In Murshidabad the condition of the people is said to have been generally good, owing in great measure to the trade in silk. The large number of silk filatures causes a steady demand for labour, and both landless labourers and cultivators make large profits by rearing silkworms. Mr. Kennedy thinks that what distinctly injures the lower classes in some parts of the district is the amount given in charity by rich zamindars, which must materially injure the spring of industry by reducing the need of work. There are in this district always a lot of beggars from other disticts, especially Muhammadans."

In the Diamond Harbour sub-division of the 24-Parganas, there was some distress during the rainy season, and relief was given by the District Board and also by private individuals and charitable institutions. Loans under the Agriculturists Loan's Act were granted to a number of raiyats in this sub-division, and in a few villages in thana Kumarkhali in Nadia, to enable them to tide over any temporary difficulties which they may have experienced.

Emigration.

6. There is no emigration properly so called from any of the districts of this division. There is a large annual influx of labourers from Jessore and Nadia to the Sundarbans and neighbouring districts during the harvest season, but owing to the poor harvests many this year were unable to obtain employment.

Prices.

7. The price of rice, which is the staple food in all the districts of the Division, was higher in the 24-Parganas and Jessore, but lower in Murshidabad, Khulna, and Nadia than in 1891-92. A steady rise is taking place in the price of food-grains in Jessore and Khulna, which the Commissioner attributes to the action of railways and Commerce in bringing about uniformity of prices and to the continued fall in the value of the rupee. As regards the wages of labour, both superior and common, they were almost the same as in the past two years. The Commissioner adds that wages are in a manner fixed by custom in different districts and localities, and the fluctuations in the prices of food-grains have so far had little effect upon them.

Manufactures and Mines.

8. The chief manufactures of this Division are—cotton twist and yarn, gunny-bags, cloth-paper, ice, shell-lac and lac-dye, indigo, silk, sugar, and molasses. The manufacture of cotton twist, gunny-bags, cloth-paper, ice, shell-lac, and lac-dye is confined to the district of the 24-Parganas, in which 49 mills, presses, and factories were at work at the end of the year, against 46 in the previous year. Besides the mills and factories, there are several jute screws, soorkee, and flour mills, and castor-oil presses in the suburbs of Calcutta, and 16 oil mills at Swarupganj in Nadia, but no statistics of their outturn have been furnished. The year was a favourable one for jute and cotton mills.

Indigo is manufactured in the districts of Nadia, Jessore, and Murshidabad. The season was unfavourable, and in all districts the outturn was less than in the preceding year. In Nadia the outturn was only one-third of what it was the year before, and in Jessore nine factories were closed. Though prices were considerably higher, the total value of the indigo produced in the three

districts was only Rs. 12,90,527 in 1892-93, against Rs. 21,69,000 in 1891-92, in which year the value of the produce in Nadia alone was Rs. 12,67,980 against Rs. 5,44.790 in 1892-93. The season was nearly, but not quite, as bad as that of 1890-91.

Silk is manufactured in the districts of the 24-Parganas and Murshidabad; and while the former showed a decrease in the value of the outturn as compared with the previous year, in the latter the outturn showed a satisfactory increase both in the amount and value. There was a considerable increase in the number of silk cloths manufactured at Mirzapur in Jangipur.

Sugar is manufactured on an important scale in Jessore and Khulna, and molasses in Nadia, Murshidabad and Khulna. These industries give promise of expansion.

Trade and Commerce.

9. The volume of trade on the eleven main road routes of the 24-Parganas, the trade of Nadia, and that of the Nadia rivers, appear to have declined. The trade of Jessore is said to be on the increase. The Bengal Central Railway aided by the steamer service has greatly facilitated communication with Calcutta, where the products of the district find a good market. There was a marked increase in the export traffic of Murshidabad, due to a large increase in the exports of rice and of gram and pulses in consequence of high prices elsewhere. In Khulna both the export and import traffic showed improvement.

Civil Justice.

10. The following table shows the work of the Civil Courts during the year:—

District.	Subdivision or chauki.	Description of Court.	Number of officers.	Number of original cases disposed of. — Ordinary.	Number of original cases disposed of. — Small Cause Court.	Details of cases in columns 5A and 5B. — Money.	Details of cases in columns 5A and 5B. — Rent.	Details of cases in columns 5A and 5B. — Title.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days per cent. of witnesses examined.	Ratio per cent. of cases pending at end of year per cent. of cases disposed of.

		* Total for 1891-92	61¼	66,587	38,474	50,673	47,917	6,316	273,940†	12	11

* Includes the figures for Judges and Sub-Judges.

† Shows the number of witnesses who attended.

The number of civil suits disposed of by the Munsifs increased from 81,756 in 1891 to 105,350 in 1892. The proportion of witnesses detained over two days to the total number examined was greatest in Bagerhat in the Khulna district, where the ratio was 29 per cent. The ratio exceeded 20 per cent. in Satkhira, Jangipur, and Backergunge. The proportion of cases pending at the end of the year to the number of cases disposed of was highest in Sealdah.

The Commissioner remarks that suits for money or moveables and rent suits increased in all the districts, the increase being attributed to decrease in the general prosperity of the people occasioned by the partial failure of crops, and consequent difficulty in recovering debts and realizing rents.

Crime, Police, and Criminal Justice.

11. The number of cognizable offences reported in this Division during the year was 15,859 as compared with 15,099 during the previous year, showing an increase of 760 cases. The number of non-cognizable cases was 16,847 against 16,574 in the year before, showing an increase of 273 cases. All districts except Nadia and Khulna contributed to the increase in the number of cognizable cases which was chiefly made up of offences against property, with the addition in the 24-Parganas of offences under the Act for the Prevention of Cruelty to Animals. The increase in offences against property is ascribed mainly to the high prices of food and the pressure felt by the labouring classes. The following extract is taken from the Commissioner's report:—

"The Magistrate of Jessore reports that as regards his district, the past year was conspicuous for an epidemic of crimes against property in the form of burglaries and dacoities. The district abounds in professional and systematic thieves, who form gangs under known leaders. They belong to various castes and classes, such as Kayasths, Mochees, Bediyas, and Mussalmans. It is stated that the outbreak of crime was most marked in the Sadar subdivision, and to a less degree in the Bangaon subdivision, where there had been a succession of poor harvests, and where the criminal classes are numerous. Special detective officers were deputed to take the dacoity cases in hand, and a fair degree of success is said to have been obtained in bringing the offenders to justice. It is observed that detection is rendered more difficult by the existence of receivers of stolen property, who are to be found in the more respectable classes of society, such as Kayasths, and whom it is very difficult to catch. Systematic efforts were made to check the recurrence of burglaries by binding down bad characters under section 110 of the Criminal Procedure Code and holding the enquiries on the spot. The villagers, it is stated, came forward with alacrity to give their evidence, and the result was that burglaries almost ceased in some of the worst localities. Dacoities could also be stopped at once, if the villagers could only be induced to pursue the robbers with a hue-and-cry, rousing every village through which they pass to take up the pursuit."

Non-cognizable cases increased in all districts except Jessore and Murshidabad.

Police.

12. The conduct of the police in this Division is said to have been on the whole satisfactory. Mr. Brajendra Nath De, however, the Magistrate of Khulna, observes:—

"The conduct of the police was on the whole fair; but I cannot speak favourably of the intelligence or ability of the officers. Only 1 of the 3 Inspectors is a man with detective ability. The Sub-Inspectors are as a class not men of ability, and only a few of them can be thoroughly depended upon. There are only 1 or 2 out of the whole body of 21 that can be promoted to the rank of Inspector. The men who have risen from the rank of head-constable can only rarely be thoroughly depended upon, and many of them appear to be thoroughly worked out and effete before they rise to be Sub-Inspectors. Two outsiders were tried during the year—one a B.A., and the other a man who came from the Inspector-General's office and Mr. Ballard's office with good testimonials, but they have not by any means turned out to be successes. It is scarcely necessary after what I have said about Sub-Inspectors that I should say anything about head-constables. As a class they are apathetic and stupid."

The Commissioner considers that on the whole chaukidars worked well in all districts except Khulna, where they are said to be indolent and apathetic. Many chaukidars are still very poorly paid and in consequence have to work as day-labourers. Their wages however, are paid more punctually than before, except in Nadia, where the state of things in this respect is described as very bad, and an indication, the Commissioner remarks, of the want of a strong and vigorous Magistrate in that district.

Criminal Justice.

13. The following statement shows the work of the criminal courts in the Division by districts:—

Stipendiary.

District.	Subdivision.	Class of officers.	Number of officers.	Cases disposed of.	Persons disposed of.	Ratio per cent. of persons convicted to disposed of.	Number of witnesses examined. The average number of cases disposed of by each stipendiary officer was 405, and this number was considerably exceeded in the Sealdah Court of the 24-Parganas, the figures for which must, however, include a large number of petty offences, the number of cases being almost twice as great as the number of witnesses examined. Criminal work appears to be lightest at Barrackpore and at the sadar station of the Murshidabad district. The number of witnesses detained over two days exceeded 10 per cent. of the total number examined at Magura, while at Barasat the ratio was as high as 22 per cent. There was considerable improvement in the promptitude with which A cases were disposed of, the percentage of such cases remanded six times and more being slightly above 1 for the whole division. At Magura, however, the percentage was 15, and at the sadar station of Murshidabad 11, the Commissioner's observation that remands are sometimes granted too readily and for trivial causes being probably applicable to the Magistrates at these places. The number of witnesses to each case was highest in Jessore and Khulna. The figures showing the proportion of cases confirmed on appeal to the total appealed are very low in the 24-Parganas. At several centres 100 per cent. of the decisions appealed against were confirmed, while at others, and especially in the 24-Parganas, the percentages are extremely low. Of 108 cases appealed against, the Magistrates' decisions were confirmed in only 12 in one instance, in only one out of 30 in another instance, and in 7 out of 67 in a third. The figures showing number of decisions confirmed appear to have been compiled on a somewhat different principle to that adopted elsewhere, and do not include appeals rejected after hearing.

Honorary Magistrates disposed of 8,417 cases during the year as compared with 7,115 in the year before. At several centres, where a considerable amount of work was done, no witnesses were detained over two days, but at Lalbag and Kandi in Murshidabad over 30 per cent. of the witnesses examined were so detained, at Chuadanga the percentage was 27, and at Satkhira, Murshidabad (sadar), Bagerhat and 24-Parganas (sadar) it was over 10.

Attendance of Honorary Magistrates.

14. The following table shows the attendance of Honorary Magistrates:—

District.	Number of Honorary Magistrates.	Number of times asked to attend.	Number of times actually attended.	Number of times absent		
				With leave or notice.	Without leave or notice.	Total.

Total. ...	449	8,288	5,462	995	1,835	2,830

* Four days, excess attendance.

The Commissioner makes the following remarks:—

"The great difficulty in giving more extended powers and more important cases to Benches of Honorary Magistrates is the irregularity in attendance, and consequent difficulty in getting the same Bench together a second time to try an adjourned case. It is for this reason, and not from any want of capacity, that the Benches seldom get beyond the trial of petty cases which can be disposed of at one sitting."

Sessions.

15. The following table shows the result of sessions trials :—

DISTRICT.	Number of cases pending at commencement of the year.	Number continued during the year.	Total for disposal.	Number disposed of.	Number in which convictions obtained.	Number in which sentence modified &c.	Number acquitted by Sessions Judges.

Total for 1891-92 ...	Special	5	21,116	4,223
	Rural	61	180,397	2,957

The increase in the number of registrations which occurred chiefly under the heads of sales, mortgages, and bonds is common to all the districts, and is attributed partly to the fact that circumstances compelled many among the lower classes of people to sell or mortgage their petty holdings, and partly, it is said, to the increasing popularity of the registration system.

Land revenue.

18. The demand, collection, and balance of Land Revenue, Road cess, and Zamindari Dâk cess in each district are shown in the following table, the three classes of estates against Land Revenue being—

I.—Permanently-settled estates.
II.—Temporarily-settled estates.
III.—Estates held direct by Government.

District.	Class of demand.	Class of estates.	Number of estates.	Demand. Current.	Demand. Arrear.	Collections of 1892-93. Current.	Collections of 1892-93. Arrear.	Balance on 1st April 1893. Current.	Balance on 1st April 1893. Arrear.	Remarks.

* Excluding an advance collection of Rs. 5,736.

In regard to Land Revenue, the percentage of collections to demand, both arrear and current, in estates of classes I and II was nearly the same as in the previous year, that is to say, collections in permanently-settled estates were good, while those in temporarily settled estates did not reach the prescribed standard. In the case of estates held direct by Government, the Commissioner describes the results as decidedly bad, and the Lieutenant-Governor agrees with him, the percentage of total collections on total demand being only 78·4. The collections in this class were worst in the districts of the 24-Parganas, Khulna, and Murshidabad, and though the results may be partly due in the 24-Parganas to special causes connected with the Government estates of Port Canning, and in the other two districts to the impoverished condition of the raiyats, the Lieutenant-Governor entirely agrees with the Commissioner that there is great

room for improvement in the management of this class of estates, an improvement which could be effected if the Deputy Collectors nominally in charge did not leave so much to their subordinates, and if Collectors and the Commissioner in their tours were careful to examine the khas tahsil offices and to scrutinise the accounts.

In the case of cesses the collection of current demands shows some improvement, while the collection of arrears has fallen off. The revaluations of Nadia and Murshidabad were completed during the year, the increase in Nadia being Rs. 5,27,164 in the amount of valuation, and Rs. 32,157 in the annual cess demand, and in Murshidabad Rs. 2,63,785 in the amount of valuation and Rs. 16,980 in the annual demand.

Certificates.

19. The following statement shows the number of certificates issued during the year, and how they were disposed of.

* Shows the number of certificates filed during year.

The number of cases pending at the close of the year was smaller than the number pending at its beginning in all districts except Khulna, where it rose from 1,554 to 1,745. The results were especially good in Jessore, where 8,137 cases were disposed of during the year, the number of pending cases being reduced from 6,338 to 1,624.

Land acquisition.

20. The following table indicates that the files of land acquisition cases were reduced in the 24-Parganas, Nadia and Murshidabad, while the number of cases pending in Jessore and Khulna increased. The number of pending cases is still large in the 24-Parganas.

DISTRICT.	Number of cases pending at commencement of year.	Number of cases instituted.	Total number of cases for disposal.	Number of cases disposed of.	Balance pending at end of year.	Date of oldest pending cases.	REMARKS.
1	2	3	4	5	6	7	8

Total ..	117	47	164	57	100		

21. Of the estates under the management of the Court of Wards during the year, the most important are those of the minor Barada Prosad Chaudhuri of Bhawanipur in the 24-Parganas, and of the minor Ashutosh Nath Roy of Kasimbazar in Murshidabad. The management of the former estate has undergone great improvement in the hands of the present Manager, and is now on a satisfactory footing. Though the outstanding balance is still heavy, there was some improvement in collections, which amounted to Rs. 1,72,876 out of a total demand of Rs. 4,46,268, the balance after deducting remissions being Rs. 2,19,283. Rs. 18,400 were sanctioned for works of improvement, such as clearing jungle, construction of roads, excavation and re-excavation of tanks and reclamation of land in the Sundarbans tracts, about 700.

Wards Estates.

The Kasimbazar estate is the most important in the Division. The collections were not satisfactory, amounting to Rs. 3,22,239 out of a total demand of Rs. 5,97,184. The Manager of the estate attributes the short collections mainly to scarcity in pargana Sarail. The Survey and Settlement under Chapter X of the Tenancy Act of that pargana were completed and resulted in an increase of Rs. 57,000 in the previous rental. The estate contributed during the year Rs. 6,150 towards the maintenance of schools and patshalas, and Rs. 5,866 to charitable dispensaries, and spent Rs. 30,341 for works of improvement and Rs. 306 on agricultural improvements and experiments.

Excise.

22. The more important excise statistics are included in the following table:—

DISTRICT.	COUNTRY SPIRITS.				GANJA AND BHANG.				OPIUM.			
	Number of shops.	License fees.	Gross gallons.	Total receipts.	Number of shops.	License fees.	Gross maunds.	Total receipts.	Number of shops.	License fees.	Gross maunds.	Total receipts.

Murshidabad	1,50,561	Murshidabad	0 2 0
Khulna	75,773	Khulna	0 1 0
Total ...	8,58,361	Total ...	0 1 11
Total for 1891-92	8,41,436	Total for 1891-92	0 1 6

The consumption of exciseable articles is largest in the 24-Parganas; but all the districts contributed to the increase of revenue except Murshidabad, where consumption diminished owing to the high retail price of country spirits which has had the effect of making the poorer people take to tari or pachwai.

Education.

23. The following table gives statistics of schools under public management:—

District.	Class of schools.	Number of schools.	Number of pupils on rolls.	Cost. Provincial.	District Board.	Municipality.	Fees.	Other.	Total.	Cost per head of pupils.	Population.	Number of boys of school-going age.	Percentage of boys on rolls to boys of school-going age according to Director of Public Instruction's Report.

	Grand total for 1891-92	5,675	1,80,636	1,18,248	1,14,713	12,632	4,28,076	2,04,691	8,78,660	4 13 9			28·6

The number of schools under public management increased from 5,075 to 5,781, and the number of pupils from 180,636 to 191,123. The increase occurred chiefly in the number of middle English, lower primary, and female schools, the proportion of boys at school to boys of school-going age was greatest in the 24-Parganas (42·6) and Khulna (38·5) and least in Nadia (21·9). In municipalities the tendency to spend too large a proportion on secondary education is even more noticeable, but this subject has been so fully dealt with in recent orders that no further remarks are required here.

The Muhammadans, who form 49·37 per cent. of the total population, contributed only 28·5 per cent. of the total number of pupils, though the year showed improvement in this respect.

The total number of girls at school increased from 11,284 to 13,120, an indication that female education is making progress in this Division.

The number of Sanskrit tols in the Division increased from 59 with 558 pupils in the previous year to 72 with 749 pupils in the year under review. It

is stated by the Commissioner that the increase, which is chiefly in Nadia, is apparently due not so much to a desire among the Hindus for the revival of their ancient literature as to the encouragement held out by Government in the shape of stipends to the pandits.

Dispensaries.

24. The following table gives statistics concerning the dispensaries in the Division:—

District.	Number of dispensaries.	Income from—					Daily average patient—		Ratio per cent. of outdoor patients to total population.
		Government.	District Board.	Municipality.	Subscription.	Total.	In-patients.	Out-patients.	
1	2	3	4	5	6	7	8	9	10
		Rs.	Rs.	Rs.	Rs.	Rs.			
24-Parganas	20	2,042	770	10,962	29,160	42,934	79·03	685·72	4·4
Nadia	8	600	200	7,376	85	8,331	16·00	210·35	1·6
Jessore	6	500	2,190	2,834	837	6,361	6 98	130·21	0·98
Murshidabad	7	78	......	6,323	10,762	17,163	52·77	340·38	3·8
Khulna	5	1,810	385	1,756	1,392	5,343	4·6	125·30	1·4

The total number of dispensaries during the year increased from 43 to 46. The ratio of the outdoor patients to the total population appears to be very low in Jessore, Khulna, and Nadia.

Local self-government.

25. The third general election of members of the District and Local Boards was held during the year. The District Officers, with the exception of the Magistrate-Collector of Murshidabad, report more or less favourably regarding the interest evinced by the members of District Boards in their work. In Murshidabad the members are reported to be apathetic. The Commissioner states that he has formed no definite conclusions in regard to the efficiency of District Boards as administrating bodies; while his impressions are unfavourable, he suspends judgment until he has seen more of their work.

As regards Municipalities the Commissioner writes:—

"Party-feeling still exists in most of the municipalities in this Division, which, coupled with improper favouritism and fear of unpopularity, plays a large part in all municipal arrangements. None of the municipalities in the district of Nadia are free from party factions, and Krishnagar may be said to have been convulsed thereby during the year under report. The same state of affairs obtains in Maheshpur in the district of Jessore, and in Satkhira in Khulna, which comes to light in connection with the management of their affairs."

Bad management appears to have reached a climax in Santipur, the state of which is described as scandalous and discreditable to the district administration, an officer of Government having been in charge as Chairman. The Lieutenant-Governor notices with pleasure the good work which is being done by Babu Umesh Chandra Ghose, the present Chairman of the Jessore Municipality, who is said to devote much of his time to his voluntary duties. The Khulna Municipality sustained a great loss in the death of the late Chairman, Dr. K. D. Ghose, who is reported to have shown both energy and judgment in his conduct of affairs.

Political institutions and public feeling.

26. There are not in any of the districts of this Division, regularly organized public associations, social or political, in which members are enrolled under definite rules and required to pay subscriptions. The Commissioner writes:—

"Public feeling has been, as usual, confined to a small minority, consisting of the educated class and chiefly of pleaders. The masses of the people do not concern themselves with the discussion of Government measures. What is called public feeling as regards the districts on matters of general interest, usually follows the lead of Calcutta. The only subjects which evoked strong excitement among the vociferous classes were the Chaukidari Amendment Bill, the Bengal Municipal Bill, and the Jury Notification. The Land Acquisition Amendment Bill was also criticised unfavourably. Among minor measures, the efforts made by promoters of the Association for the Higher Training of Young Men were not looked upon with favour. The rules regarding the appointment of Sub-Inspectors of Police by competitive examination met with general approbation, as being likely to lead to the appointment of a better class of men in the Police. The transfer of a portion of the Barrackpore and Dum-Dum sub-divisions, lying outside cantonments, to Barasat, evoked some local feeling."

Conduct of zamindars.

27. Of the zamindars of the Division, the Nawab Bahadur of Murshidabad, and the Maharani Surnomoyee of Kasimbazar, distinguished themselves as usual by their munificence. Among others Babu Girija Prasanno Mookerjee of Gobardanga in the 24-Parganas, Raja Pramatho Bhusan Roy of Naldanga in Jessore, and Rao Jogendra Narayan Roy of Lalgola in Murshidabad, maintained their reputation for public spirit and benevolence.

Conclusion.

28. The Lieutenant-Governor has to thank Messrs. Beames and Westmacott for their administration of the Division, and the latter for his full and careful Report. The remarks on character of officers will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE CALCUTTA MUNICIPAL CORPORATION FOR THE YEAR 1892-93.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Calcutta, the 20th November 1893.

RESOLUTION No. 3631M.

READ—

The Administration Report of the Calcutta Municipal Corporation for the year 1892-93.

Read again—

The Report for 1891-92 and the Resolution recorded by Government thereupon.

In the Resolution on the Administration of Calcutta by the Municipal Commissioners during 1891-92 the Lieutenant-Governor pointed out that for three years in succession the report had been submitted some time after the due date, and he regrets to find that he must make the same complaint again, since the report, which was due on the 1st August, did not reach Government till the 8th September. It does not contain the introductory chapter, which was an important feature of the last report, and was commended in the Resolution upon it as a useful innovation. But, on the other hand, there is a further improvement in the form of the report, and its structure has been concisely explained in an introductory paragraph which is an important contribution to its value, while a useful preliminary chapter indicates the leading features of the year's administration besides containing a *précis* of a paper read by the Hon'ble Mr. Cotton, C.S.I., at the International Congress of Hygiene and Demography held in London in August 1891. Altogether, the Lieutenant-Governor congratulates the Commissioners on the improvements visible in the form and the manner of their report.

2. During the year under review two officers filled the post of Chairman, for Mr. Lee was on privilege leave for three months during 1892 and went on furlough on the 25th March 1893: Mr. Ritchie filled his place on each occasion, and has submitted the present report. The Commissioners suffered an irreparable loss during the year in the sudden deaths of Sir Henry Harrison, whose name will always remain inseparably connected with Municipal Administration in Calcutta, and of Pandit Prannath Saraswati, a Commissioner whose services to the Corporation were many and conspicuous. Since the close of the year death has removed from among them Nawab Abdul Latif, C.I.E., and Mr. John Cowie, for many years Secretary to the Commissioners: these are losses which would be felt heavily by any public body.

3. In the matter of the number of meetings Government has never had any cause to complain of the Corporation of Calcutta. The Commissioners are assiduous in their attendance at meetings, and thus furnish an excellent example to all municipal bodies. There are 75 Commissioners, of whom 50 are elected and 25 nominated, and the executive administration of the details of Municipal business is entrusted in the first instance to a General Committee of eighteen, in addition to seven Standing Committees, as well as to such special committees or sub-committees as necessity may call into existence. In the year under review there were 27 general meetings of the Commissioners, 59 meetings of the General Committee, 84 meetings of other Standing Committees, and 61 meetings of special committees and sub-committees, making 231 in all. These figures, though a good deal below those for 1891-92 (260), imply a great amount of consultation over the many important subjects which transpired during the year.

Attendance of Commissioners.

Thirty Commissioners as against twenty-two in 1891-92 attended more than 50 meetings, and four, viz., Maulvi Badruddin Haider (122), Babu Nolin Behari Sarcar (111), J. Ghosal, Esq. (111), and Babu Pashupati Nath Bose (110), were present on more than 100 occasions. Among the elected Commissioners, the percentage of attendance was 60·5, and the nominated Commissioners as a whole attended 46·5 times out of every 100 for which they were summoned. The general percentage of attendance was 57·2, marked improvement on 1891-92, when it was 47.

4. At these meetings much of the matter under discussion was necessarily of merely ephemeral importance, but besides the numerous projects examined in detail by the Standing and Special Committees, several subjects of more permanent interest were also considered, such as the memorial to Sir Henry Harrison, the contribution to the Calcutta Public Library, the regulation and supervision of *kalisthans*, the further adoption of incinerators, the proposal to establish a municipal market in the Northern Division, the request of Government that a larger sum should be expended on primary education, and the possibility of doing more to provide for the medical needs of the population in the south of the city. Most of these questions have already been disposed of, and the Lieutenant-Governor does not desire to say anything in this place, except as regards three of them. The regulation of the *kalisthans* is a matter which calls for early disposal, and His Honour, while approving the desire of the Commissioners to deal thoroughly with the subject, trusts that the measures adopted will be prompt as well as thorough. On the other hand, the withdrawal of the annual grant of Rs. 8,000 hitherto made to the Calcutta Public Library is, in Sir Antony MacDonnell's opinion, an ill-advised economy. The maintenance of such an institution befits the good name and the intelligence of the Corporation. It may be that there was in the withdrawal no positive breach of contract, but it undoubtedly involved the abandonment of pledges formally given to the Committee of the Library and fulfilled for some years, while, apart from that, the refusal to assist in maintaining a public free library deprives the rate-payers of Calcutta of a privilege which is enjoyed by many townships elsewhere which are not for a moment to be compared in wealth or importance with this great city. The plea in justification of this policy is the same as that advanced for failing to make any adequate provision for the relief of the sick, viz., want of funds. Sir Antony MacDonnell has already stated elsewhere that he admits the present force of this argument, but he would be glad to learn that the Corporation are disposed to reconsider both these matters.

Proceedings at meetings.

5. Large as the income of the Calcutta Municipality is, the Commissioners have for many years been accustomed to borrow largely for purposes of proper and useful expenditure, and the prices which their stocks command in the market and the facility with which a loan is floated indicate the confidence of the public in the solvency of the Corporation. On the 1st April 1892 the loan liability of the Commissioners was as follows:—

	Rs.	A.	P.
Unpaid balance of 6 per cent. debenture loans ...	8,500	0	0
5 per cent. debenture loans	1,44,01,900	0	0
4½ ditto ditto	30,48,300	0	0
	1,74,58,700	0	0
Balance of consolidated loans from Government ...	55,80,467	13	9
Loan without interest from Port Commissioners ...	2,00,000	0	0
	2,32,39,167	13	9

No new loans were raised during the year under review, but the Commissioners were able to pay off Rs. 3,500 from the 6 per cent. debenture loans and Rs. 2,29,557-4-4 out of the consolidated loans from Government, so that on the 31st March 1893 their loan liability had been decreased by Rs. 2,33,057-4-4, and stood as follows:—

Loans.

	Rs.	A.	P.
Balance of 6 per cent. debenture loans	5,000	0	0
5 per cent. debenture loans	1,44,01,900	0	0
4½ ditto ditto	30,48,300	0	0
	1,74,55,200	0	0
Balance of consolidated loans from Government ...	53,50,910	9	5
Loan from Port Commissioners	2,00,000	0	0
	2,30,06,110	9	5

To meet these liabilities the Commissioners held at the end of the year a sum of Rs. 8,13,601-14-9 in their reserve funds. As the borrowing power of the Commissioners, based upon the annual valuation, was during the year Rs. 3,20,68,090, it is apparent that they are still far from borrowing up to the full extent sanctioned by law.

Income and Expenditure.

6. The ordinary income of the Municipality, excluding the receipts from loans, which are necessarily occasional and should only be raised for special purposes, is derived from four main sources, viz., the general rate, the sewage rate, the water-rate, and the lighting rate. Certain miscellaneous receipts added to these brought the gross income of the Municipality in 1892-93 up to Rs. 43,00,431, against Rs. 42,25,054 in 1891-92. As the expenditure in 1892-93 was Rs. 43,63,638 as against Rs. 42,64,261 the outgoings in the latter year exceeded the receipts by Rs. 63,207 as against a similar excess of Rs. 39,207 in 1891-92. The principal items of receipts and expenditure in each year are compared below:—

	1891-92.	1892-93.
Receipts.		
	Rs.	Rs.
General rate at 9½ per cent.	16,07,146	16,14,107
Sewage rate at 2 per cent.	3,38,240	3,39,651
Water-rate at 6 per cent.	9,30,751	10,18,672
Lighting rate at 2 per cent.	3,38,436	3,39,560
Taxes on professions, &c.	5,25,113	5,36,614
Municipal Market receipts	1,22,478	1,27,221
Receipts from sale of water	86,805	98,347
Conservancy receipts	65,740	65,565
Expenditure.		
Interest on general loans	4,47,192	4,54,351
Contributions for repayment of loans ...	1,86,629	2,02,807
General establishment	3,88,022	4,03,580
General office expenditure	1,07,697	97,543
Road Department	4,34,383	4,35,580
Gowkhana	2,06,044	2,06,869
Conservancy	1,65,360	1,59,805
Bustee-cleaning	1,07,235	1,07,817
Sewage-rate charges...	2,79,976	2,67,404
Water-rate charges	10,84,278	11,11,942
Lighting-rate charges	3,65,147	3,78,336

As requested in the Resolution on the report for 1891-92, the principal variations from year to year and those between the actuals and the estimate have been explained in detail in the report.

Financial position.

7. The sum of the rates now realized is equivalent to a consolidated rate of 19½ per cent. on the annual value of house property in Calcutta. Efforts were made during the debates on the budget of 1893-94 to raise this consolidated rate to 20 per cent., but the majority of the Commissioners were opposed to the increase, and it was not carried out. But in the Lieutenant-Governor's opinion this additional half per cent. of taxation, which is estimated to bring in an extra Rs. 87,000 per annum, cannot much longer be postponed, and he is glad to observe that the Commissioners in their report (paragraph 33) express a similar opinion. The fact seems to be that the Corporation of Calcutta, although it has not yet borrowed up to the limit allowed by law, has of late years borrowed more than is prudent, for the figures given by the Chairman show that the expenditure on interest and sinking funds has increased more rapidly than the income from ordinary sources to meet it. The constant revaluations and reassessments which are being carried on in different parts of Calcutta will speedily produce equilibrium, provided that no further expenditure on interest and sinking fund is necessitated by raising fresh loans; and it is therefore clearly the policy of the Commissioners to abstain from all borrowing operations, except for purposes of unavoidable urgency, until the gradual improvement of their income places them beyond the reach of difficulty.

Expenditure on Suburban Improvement.

8. It was one of the conditions made when the Suburban area was added to the town proper by Act II (B.C.) of 1888, that three lakhs of rupees out of the receipts from three of the great revenue funds should be devoted annually to the improvement of the

added area. What objects were to be considered as improvements and what payments were to be debited to the statutory contribution of three lakhs have for some time been doubtful questions. But in the year under report the opinion of counsel was taken, and it is hoped that the Commissioners will soon be in a position to make up their accounts. The amount which they should have expended between the 1st April 1889, and the 31st March 1893 was 12 lakhs, but as a matter of fact the expenditure has been only Rs. 10,51,102, and the rate-payers of the Suburan area have therefore a claim against the Corporation for the immediate expenditure of nearly a lakh and a half of rupees on improving the area in question. Moreover, the Lieutenant-Governor observes that Rs. 3,38,296 of the expenditure already incurred has been met, not from revenue as the law provides, but from capital. Now that the question is in a fair way to be decided, the Lieutenant-Governor has no doubt that the Commissioners will adjust their accounts and in future comply year by year with the requirements of the law.

9. The arrangements for the collection of the rates remain the same as in 1891-92. An officer styled the Collector collects in the first instance the amounts due from rate-payers in the town proper, while those falling due in the area added by Act II (B.C.) of 1888 are collected by the Joint-Collector. Chapter VI of the Act lays down in the clearest terms the manner in which these rates shall be collected. The consolidated rate is payable quarterly in advance on the 1st day of April, July, October, and January, and as soon as it is due the law makes it incumbent upon the Commissioners to present to each person liable to pay it a bill for the sum payable. If this bill is not paid within seven days of presentation, the Commissioners may cause to be served upon such person a notice of demand, and if within seven days from the receipt of this notice the amount is not paid, the Commissioners may recover the same with all costs by distress and sale of the defaulter's moveable property. These short and simple provisions if vigorously used would enable the Corporation to collect their rates with ease within each quarter, but the practice in vogue, with the sanction of the Commissioners, is to abstain from issuing the notices of demand until after the close of the quarter to which they refer. The consequence is that a considerable proportion of the demand is three months in arrears, the Commissioners thus voluntarily submitting for the greater part of the year to forego the use of large sums which are realizable, but which they will not realize. This subject was noticed in the Resolution on last year's report, and Sir Charles Elliott expressed the hope that the Commissioners would take steps to remedy the defect then pointed out. The Lieutenant-Governor is disappointed to find that this advice has not been followed, and that although as before some improvement was visible in the last quarter of the year, no effort has been made to place the collection of rates upon a proper footing. "The prompt realization of public dues," as was remarked in 1892, "is absolutely essential to, and a distinctive feature of, vigorous municipal administration," and until the present injurious system of unnecessary indulgence is abandoned, His Honour cannot consider the administration of the Municipal Commissioners in this respect as efficient.

Collection of dues.

10. The faultiness in the system of collection is reflected in the details of its working, as might be expected. Out of a gross demand of the consolidated rate amounting to Rs. 36,38,959, only Rs. 31,03,096 were realized by the Collector and Joint-Collector, giving a joint percentage of collection of 85·2. The principal figures for each officer separately are given below:—

Officer.	Demand.	Collected.	Remitted and cancelled	Transferred to assessor for further enquiry.	Transferred to warrant officer.	Total.	Balance.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs	Rs.	Rs.	Rs.
Collector	29,97,982	25,77,173	44,152	37,505	2,72,975	29,31,806	66,176
Joint-Collector ...	6,40,977	5,25,923	21,323	15,374	63,119	6,25,738	15,238

These statistics show that the Collector realized 85·9 per cent. of the collections entrusted to him, and the Joint-Collector 82 per cent. The percentages for the Collector were 83·94 in 1890-91 and 86·40 in 1891-92, and for the

Joint-Collector 73·86 in the former and 76·66 in the latter year. The report further points out that the percentage of collections on realizable bills in 1892-93 was 89·17 in the case of the Collector and 87·01 in that of the Joint-Collector. There certainly is some improvement, but it is obvious that if the simple and summary procedure provided by the Act were carried out, the percentage of collections would rise higher still.

11. The animadversions passed upon the Warrant Officer's Department in 1892, both in the Chairman's note and in the Government Resolution, aided no doubt by the efforts of the Sub-Committee who considered the working of the Department, seems to have had a salutary effect, for the Warrant Officer succeeded during 1892-93 in disposing of 63·7 per cent. of the rate bills sent to him as against 52·1 per cent. in 1891-92, while his success with miscellaneous bills was still greater, since he collected 75·6 per cent. of them in place of a percentage of 38·7, and the sum in his hands for collection at the end of the year was Rs. 1,42,992, compared with Rs. 2,52,966 when the year commenced. The Lieutenant-Governor agrees with the Commissioners that, though these results are more satisfactory than before, there is still much room for improvement.

12. Besides the receipts from rates detailed above, the Corporation draws a large income from taxes and license fees, which are collected by what is known as the License and Registration Department. The figures for the main heads during the last two years are given below:—

	1891-92.	1892-93.
	Rs.	Rs.
(i) Tax on trades and professions ...	3,31,716	3,42,319
(ii) Do. on carriages and animals ...	1,42,144	1,42,510
(iii) Registration of carts and hackeries ...	71,837	71,750
(iv) Fees for removal of trade refuse ...	61,849	62,045
(v) Registration of bullock and cow-sheds	10	43
(vi) Ditto of hackney carriages and palkies	21,256	17,837
(vii) Miscellaneous receipts	446	475
Total ...	6,29,258	6,36,479

License and Registration Department.

Owing to changes in the staff of the Department and the introduction of new men, the collections in certain parts of the town fell off a good deal, otherwise the increase under this head would have been greater. Under section 90 of the Calcutta Municipal Act, no person is allowed to exercise any of the specified trades, professions or callings, without a license for the year, under pain of a fine on conviction by a Magistrate. The Chairman reports that the obligation is generally neglected, but that it is not thought advisable to enforce the law to the letter. There may be special reasons for this leniency, one of which doubtless is that the procedure for enforcing payment involves prosecution before a Magistrate, but as it is clear from the report that the fees are recovered with difficulty, the Lieutenant-Governor cannot but think that the Commissioners would do well to enforce the law vigorously after due notice of their intention to do so has been given. There would doubtless be complaints of hardship at first, but the habit of punctual payment once established would probably continue to the great benefit of the licensees as well as the Commissioners. No comparison can be made between the number of registrations and the amount of fees levied under the Hackney Carriage Act during 1892-93 and those of the previous year owing to changes made in the date of registration, but there seems reason to think that the hackney carriage service is improving, and it is reported that the Commissioners have framed a set of bye-laws for the regulation of these vehicles.

13. As noted in paragraph 7 above, reassessment is continually going on in some part or other of the Calcutta Municipality, and so great and general is the advance in the value of house property that revision almost invariably leads to an enhancement of the assessment; in fact almost the whole of such decreased assessments as took place were due to the premises having been absorbed in the Harrison Road. Twenty out of the twenty-five wards of the town have now been revalued, and the result has been an increase in valuation of Rs. 22,93,652, subject, however, to the result of 2,561 objections, which were still pending

at the end of 1892-93. Assuming that all these are rejected, the valuation of the town on the 1st April 1893 would amount to Rs. 1,91,58,568: the confirmed valuation, *i.e.*, that arrived at after the disposal of objections, was on the same date Rs. 1,87,35,968, the valuation on the same date in 1879 having been Rs. 1,29,85,156. The large number of objections still for hearing is a serious matter, since a new valuation cannot take effect until all objections that may be taken to it have been decided. Owing to the absence on leave for more than two months of the Vice-Chairman, whose duty it is to hear these objections, only 1,166 were disposed of during the year and 2,961 are still pending. The Lieutenant-Governor regrets that arrangements were not made for carrying on this work in the absence of the Vice-Chairman, and it is hoped that the outturn of work in the current year will be larger.

Revaluation and assessment.

14. The Surveyor's Department, which prepares plans, estimates and draft declarations in connection with all projects in the town, was exceptionally busy during the year under report, and the services of the staff are warmly acknowledged by the Commissioners. The Lieutenant-Governor recognises that the demarcation into suitable lots of the surplus lands near the Harrison Road must have been an arduous and responsible undertaking. In the Lighting and Market Departments also activity was displayed. The expenditure on lighting amounted to Rs. 3,94,725; and as this exceeded the receipts from the lighting rate, the deficiency had to be made good by a grant of Rs. 54,715 to meet the deficit. The Municipal Market, on the other hand, yielded a net profit of more than a lakh of rupees. The large expenditure on printing was unfavourably criticised in the Resolution on last year's report, and the Commissioners appear to have endeavoured to introduce some reforms: the balance sheet propounded by the Commissioners is not intelligible to the Lieutenant-Governor, but it is clear that the result has been unsatisfactory, and that the Corporation has been ill-served by its employés in this department, which should be subjected to further investigation. The expenditure was Rs. 28,992 as against Rs. 22,520 in 1891-92.

Minor Departments.

15. The Corporation appeared as plaintiff during the year in an unprecedented number of civil suits, viz. 89, the highest number previously having been 28 in 1891-92. It is explained that this increase was "mostly owing to the number of defaulters who removed their goods to their zanana apartments in order to evade seizure, and who by this expedient compelled the officers of the Municipality to file suits under section 149 of the Act."

Litigation.

16. As defendant the Commissioners appeared only seven times. The most important case was a reference to the Civil Court by the Land Acquisition Deputy Collector. On this case the Commissioners write as follows:—

Re 54, *Clive Street.*—This property was acquired, under the Land Acquisition Act, for the purposes of the new Harrison Road. The compensation tendered by the Government Collector under Act X was Rs. 2,27,925. The claimants (Babus Damodar Das Burmon, Aghorenath Chatterjee and Kailas Chandra Dass) demanded Rs. 21,24,640 *plus* Rs. 50,000 which has been claimed by Baboo Damodar Das Burmon alone, on the ground that his property, No. 55, Clive Street, has been injuriously affected by the acquisition.

The claimants appealed against the decision of the Collector under Act X, to the District Judge of the 24-Parganas, who, with two Assessors, after hearing the case for 40 days, found that the offer of the Land Acquisition Collector was too low, and fixed the amount of compensation at Rs. 6,57,039, exclusive of 15 per cent. statutory allowance for No. 54, Clive Street, and Rs. 15,000 for No. 55, Clive Street. Under section 19 of the Land Acquisition Act, Babu Radhikaprosad Mookerjee was appointed Assessor on behalf of Government and Mr. J. C. MacGregor on behalf of the claimants. The amount of compensation for Nos. 54 and 55, Clive Street, was estimated by the former in his award at Rs. 4,75,000, and by the latter at Rs. 12,44,687.

Babu Aghorenath Chatterjee has appealed to the High Court from the Judge's decision, and a cross appeal has been filed by the Corporation.

17. In two previous Resolutions the Lieutenant-Governor has conveyed to the Commissioners his opinion that their yearly provision of Rs. 2,950 for primary education is quite inadequate to the necessities of the case, and in a separate communication he has suggested that Rs. 10,000 would be a suitable annual allotment. But the Commissioners have displayed a disinclination to adopt the suggestion.

Education.

In the year just passed, owing to a delay in passing the school bills for payment, they expended only Rs. 392 out of the total grant, and in the report under review the subject has been very briefly treated. In these circumstances the Lieutenant-Governor must now consider whether he ought not to adopt the alternative course laid before the Commissioners in the Resolution of last year, and withdraw the Government grant for the primary education of boys in Calcutta from the 1st of April 1894.

18. The improvement or removal of the numerous *bastis* which abound in Calcutta, and are a standing menace to the health of its inhabitants, has long occupied the attention of the Commissioners, and sections 251 and 270 of the Act deal particularly with this subject. From a sanitary point of view the removal of these centres of disease is a distinct advantage, but there is more than one aspect of this question, and the remarks of the Commissioners on the subject are so apposite that they are reproduced in full:—

Basti improvement.

The sections of the Municipal Act, which enable the Commissioners to cause improvements to be made in *bastis* at the expense of the owners, fall into two categories.

By the first category, the Commissioners may call upon the owners to prepare plans showing certain improvements and to carry out those improvements, and till such requisitions are complied with, the Commissioners may refuse to sanction the building or rebuilding of any huts. These provisions are, as a matter of fact, rarely resorted to.

The second or more drastic category of *basti* sections provides in cases where the *basti* is so unhealthy that speedy measures are required—

(*a*) That the Commissioners in meeting may cause a *basti* to be inspected and reported on by two medical officers.

(*b*) That the medical officers shall prepare a standard plan and a schedule of the changes required to be made to bring the *basti* into conformity with the standard plan, coming under the following heads :—

(1) Removal of huts.
(2) Construction of roads and drains.
(3) Filling up of tanks and low lands.
(4) Other works necessary to remove or abate the insanitary condition of the *basti*.

(*c*) That the Commissioners in meeting may, on requisition of the owners, carry out the changes shown in the schedule.

(*d*) That in default of the owners, the Commissioners may cause the works to be carried out and recover cost from the owners, including the compensation paid to owners of huts.

The above provisions are to be read subject to the following important provisos, viz., that no standard plan shall show more than one-fifth of the area of the improved *basti* as roads, or more than one-half as open lands not to be built upon; that if in the case of any one plot a greater portion is taken than the proportion allowed above, the owner of that plot shall be entitled to compensation. This compensation is to be paid by the persons who benefit thereby, and if no such persons can be found, then by the Corporation.

The roads shown in the standard plan remain private streets (unless the Commissioners and owners otherwise agree), but are open for the use of the tenants and for scavenging purposes.

In applying these provisions, the Commissioners make no attempt to recover the cost of construction from the owners when they carry out works in default of the owners. If such attempts were made, they would find themselves opposed at every turn in their schemes of *basti* improvement by the *basti* owners, and the work of *basti* improvement would be brought to a standstill. It is exceptional for the owners to bear any part of the cost of construction, and the Commissioners are well content if they can get the land required for roads free of cost from the owners. *Basti* schemes resolve themselves into this :—That the *basti* property is improved at the expense of the Commissioners, the owners merely giving up to the use of the public the land required for the roads.

19. During the last ten years nearly 8¾ lakhs of rupees have been expended on *basti* improvement, the material advantage of which, setting aside the benefit to the public from a sanitary point of view, rests with the owners of the property. The Lieutenant-Governor finds it difficult to completely share the contentment which the Commissioners seem to feel with the existing state of affairs, since it appears to him that the present procedure differs from that embodied in Act II of 1888. It is a procedure which, to a very great extent, favours the owners of *bastis* at the expense of the general body of rate-payers. The law provides the Commissioners with ample powers to recover the cost of improvements from the owners benefitted, and although in certain cases which present special features, the Commissioners may reasonably abate something of their rights, the Lieutenant-Governor considers that they

owe it to the tax-payers not to abandon their legal rights altogether. The law should be enforced, no doubt with consideration and in a reasonable and proper spirit, but the law is not enforced at all if no recoveries are ever made from the owners of *bastis* which have been improved by the Commissioners. It is conceivable that difficulties may be experienced in giving effect to the law, but it is better that they should be met and overcome rather than that the law should be ignored.

20. The Harrison and Lansdowne Roads were completed during the year: these are fine works, which have greatly improved the city. The net cost of the Harrison Road is expected to be twenty lakhs of rupees, and it has been lighted with electricity at an additional cost of Rs. 93,383. The accounts for the Lansdowne Road are not yet closed, but the cost so far has been Rs. 2,40,205. In the suburbs Rs. 2,73,585 have been spent out of the statutory three lakhs referred to above, of which Rs. 44,005 were paid for the incinerator at Gobragatcha, and Rs. 61,429 on the extension of Lansdowne Row.

21. A very important branch of the municipal administration of Calcutta is the department of the Engineer to the Corporation, comprising the great heads of water-works, drainage, and roads, besides the maintenance of the sewers, of the Municipal Workshops and the Municipal Railway. The Commissioners are committed to the extension and development of their water-supply and drainage system, to which, especially to the former, is to be attributed the very marked improvement which has taken place in the general health of Calcutta during the past twenty years. Of the importance of these schemes the Commissioners are fully conscious, and improvements have been vigorously carried on during the year under report. Two new settling tanks have been constructed at Pulta to hold 48 million gallons, thus bringing up the settling tank capacity to 105 million gallons, or five times the present daily filtered supply of the town, which has been more than 20 million gallons, giving a consumption per head of 37·32 gallons in the town proper and 17·58 gallons in the added area. During the same period 18 miles of distribution pipes have been laid down, making the total 285·73 miles, and the number of premises supplied 22,831. In addition to the town supply, Barrackpore was provided with an average of 128,118 gallons per diem throughout the year. Unfiltered water is also supplied for bathing, for flushing drains and sewers, and for street watering: the amount passed through the 71 miles of pipes during the year was 4,320,879 gallons. The capital expenditure on the water-works of Calcutta up to the end of 1892-93 amounted to Rs. 64,25,832, and the total daily supply was 24,166,996 gallons; whereas in the year 1876, when the old series of works were completed, the capital expenditure amounted to Rs. 71,59,986 for a total daily supply of 7,162,819 gallons only. The capital cost per gallon up to 1876 had therefore been 15·9 annas, while in 1893 it had been reduced to 10·8 annas. The estimated cost of works sanctioned in detail and in progress amounts to Rs. 16,28,519, of which Rs. 12,60,502 have already been expended, but the Commissioners have in the present year's budget made provision for further important and useful works estimated to cost 2¾ lakhs. The Government attaches the greatest importance to the plentiful supply of good water to the town, and in course of time to the added area, and has nothing but commendation to bestow upon prudent farseeing efforts in this direction.

Engineer's Department.

Water-supply.

22. With the laudable object of extending the benefits of pure water to areas outside the limits of the Municipality, the Commissioners during the year agreed to supply the Maniktollah Municipality with filtered water up to a maximum of 10 gallons a head at a cost of 4 annas per 1,000 gallons, and, moreover, at the request of Government, they allowed their Municipal Engineer, Mr. Kimber, to undertake the preparation of a scheme and estimate for supplying with filtered water the riparian municipalities on the left bank of the Hooghly from Barrackpore downwards: the consent of the Corporation was conditional on compliance with two stipulations, which are reasonable enough, viz., that the municipalities concerned should pay all the cost of the surveys, &c., and that no portion of the water required for the Calcutta Municipality should be diverted for the benefit of any outside municipality. The scheme is necessarily a large one, and has not yet been completed.

Drainage.

23. The drainage system of the town proper has been virtually completed for some time, but improvements are constantly carried out as occasion offers or necessity arises. A large flushing reservoir, holding 300,000 gallons, was constructed during the year near the Bhawanipur Pumping Station, and provision has been made in the Loans Budget for 1893-94 for a large extension of the flushing system. Much remains to be done also in the added area, where there are 200 miles of open drains which can be adapted and used for surface drainage. The Lieutenant-Governor is glad to observe that this subject is receiving the careful attention of the Commissioners, and that a great advance may be expected in this direction during the current year.

24. The inspection of premises and house connections seems to have been carried on with activity, and Sir Antony MacDonnell hopes that there will be no reduction in the strength of this and other conservancy establishments for the sake of petty savings. The roads in Calcutta now measure upwards of 319 miles in extent, and the cost of their up-keep during 1892-93 was Rs. 4,35,580. The Lieutenant-Governor learns with regret that the Commissioners have effected a reduction of Rs. 75,000 in the provision under this head for 1893-94, since he fears that the result will only be a still larger expenditure in 1894-95.

25. Not less important than the services of the Engineer are those of the Health Officer, and the Commissioners are to be congratulated on possessing in Dr. Simpson an adviser of high attainments in sanitary science. He has submitted for the current year a full and interesting report, of which it is impossible to reproduce more than a very brief abstract.

Vital statistics.

26. In the matter of vital statistics, a distinct advance in the accuracy of registration is visible. As has frequently been observed, the vital statistics of the Municipality cannot fairly be compared with those of other areas, since the large proportion of adults in Calcutta in the prime of life, especially males, necessarily gives a special character to the population. But, comparing one year with another, the reported birth-rate was higher in 1892 than in any previous year since the amalgamation of town and suburbs. The figures are given in the margin, and the sudden inversion in 1890 of the relative positions of Calcutta and the Suburbs is significant of the introduction of better registration. The death-rate of the combined area was lower in 1892 than it has been since 1889, when it is certain that some deaths were omitted in the Suburbs as that area had been but recently added to Calcutta; but, under the arrangements now in existence, it is almost impossible for a death to escape registration, since the difficulties in the way of clandestine disposal of a corpse are almost insurmountable. Dr. Simpson is justified therefore in accepting as correct the figures now given which are quoted in the margin, and in using them to illustrate in forcible terms the effect of introducing a good water-supply. The death-rate varies greatly in different wards, and the figures given in Dr. Simpson's fourth paragraph have a terrible significance; they show that the added area of Burtollah has a mortality of 44·1 per mille, and that of Sukea's street one of 42·3: the same areas maintain the same evil predominance for fever and cholera. Dr. Simpson says: "The whole added area bordering on the Circular Canal is lowlying, crowded with people, has a large number of filthy tanks, and is very unclean. The people also are more residential; they die here, whereas in many other wards they go home to die." The attention of the Commissioners should be focussed on this locality during the current year.

Year.	Births per mille.		
	Calcutta.	Suburbs.	Total.

	Calcutta.	Suburbs.	Total.
1889 .	25	36·6	28·7
1890 ...	26·5	37·1	29·8
1891 ..	27 9	39·4	31·5
1892 ...	27·1	34·8	29·8

27. The Health Officer urges again the desirability of a low level outfall sewer to discharge the sewage of Calcutta into the Salt Lakes, but the Commissioners have rightly decided that the cost of such an undertaking is at the present moment prohibitive. It is noted further that the extension of the water-

supply to the suburbs has had the effect of water-logging the soil, a defect which will not be remedied till the drainage of that area has been placed on a satisfactory basis. When that has been done and proper arrangements have been concluded for the destruction of refuse by burning, the benefits which the Suburbs will have derived from the amalgamation will be great indeed.

28. The general cholera mortality of 1892 was less by nearly one-third than in 1891—a result largely due to the comparative immunity of the Suburbs, and this again is distinctly attributable to a definite cause. It appears that for many years the cholera death-rate in the Suburbs and in Howrah rose and fell together with a very close correspondence. Up till 1891 the sanitary condition of the two areas was very similar, since neither of them enjoyed any system of drainage, and both relied for their water-supply on sources frequently polluted. The average death-rate in Howrah previous to 1892 was 435 to 1,271 in the Suburbs. At the end of 1891 the filtered water-supply was extended to the Suburbs, and the number of cholera deaths fell at once in 1892 to 762, while those in Howrah rose in the same year to 771: had the previous ratio been preserved, the number in the Suburbs would have been over 2,000. The argument is clearly and forcibly stated; but the Lieutenant-Governor, although he admits its probability, is unable to accept it as conclusive at present, since it is based upon the observations of one year only. Howrah is about to be provided with a supply of filtered water, and if similar phenomena be observed to follow the operation in that area, Dr. Simpson's argument will be fully confirmed.

Cholera mortality.

29. The very important question of Building Regulations is brought prominently forward by the Health Officer in his report, and is discussed in that of the Commissioners. This subject was treated very fully in Dr. Simpson's report for the year 1889, and he insisted strongly on the fact that the law and bye-laws at present in force are quite insufficient to secure the preservation of proper sanitary rules as regards the building of streets, houses or huts. Government, in the Resolution on the report for 1889-90, fully endorsed his view of the vital importance of the question, and commended to the attention of the Commissioners the remedies proposed by him in detail, and the suggestion that a strong Committee formed of engineers, medical men and others should be appointed to thoroughly investigate and report on the whole subject. The Lieutenant-Governor is disappointed to learn that no action has been taken on the suggestion thus commended to the Commissioners, and in his report for the year just past, Dr. Simpson again comments in forcible terms on the continuous and growing evils of the present state of affairs and the urgent necessity of undertaking a reform of such vital importance. He writes:

Building Regulations.

"The deterioration in health conditions of certain localities during the past few years is very marked, and nothing can stop this deterioration while the present law remains in force. When a house can be built anywhere without reference to efficient ventilation, proper drainage or surroundings, when it may be built in any lane or passage irrespective of the width of that lane or passage, and when it may be built in such a manner as to permit it to obstruct the light and ventilation of the neighbouring houses so long as it is four feet away from them, no long time is necessary to create plague spots in different parts of the town. Such a process is going on continuously now, and while that process is allowed to continue, the money spent on the new Harrison Road and on the lanes which are constructed through bustees will have but a poor return, because the destruction of insanitary areas which is effected by new roads and lanes can never even keep pace with the progressive creation of areas much worse in type."

On this question the Commissioners are divided into two parties. The Health Officer is supported by a minority of the more advanced among them, including the Officiating Chairman, but is opposed by a large majority of the Corporation, who believe that the present law and bye-laws sufficiently meet the wants of the case, and that no further legislation is required. The arguments on both sides are well stated as follows:—

A very large majority of the Commissioners consider that, under the present law, there is ample power to regulate erection of proper buildings A set of bye-laws was passed some years ago after careful consideration, but experience having shown their inapplicability to certain cases, the Commissioners have recently appointed a Committee to revise them, and they believe that, if proper bye-laws are framed, much of the complaint made in the Health Officer's report is likely to disappear.

The cautious way in which the bye-laws have been worked has gone far to reconcile public feeling to them, and any hasty attempt at legislation must be deprecated by the bulk of the Commissioners as much in the interests of sanitary reform as out of deference for public opinion. The Commissioners are as eager for sanitary improvement as their Health Officer, but they are fettered by considerations which the Health Officer need not recognize. They have to take a practical view of the situation. They have to reconcile the interests of sanitation with the state of public opinion, and they feel from their past experience that they must proceed cautiously, and that a Building Act which would be resented by public opinion would not only prove a great hardship to the people, but would be practically inoperative.

The Commissioners in this connection would recall the words of Sir Ashley Eden in the Resolution on the Administration Report for 1876. Referring to the remarks of their former Health Officer, Dr. Payne, he wrote—"Mr. Eden is persuaded that to make sanitation efficient in Calcutta, the people of the city must be led, and not driven, into co-operation with the Sanitary Department. Dr. Payne should bear in mind that one case in which native society is induced by conviction to adopt a sanitary theory is worth hundreds of cases in which they are pressed into submitting to reforms of the benefits of which they are not satisfied. The Sanitary Officer must remember that the principles and theories which to him seem so obvious and so indisputable have not even yet received practical acceptation in many countries in a much more advanced condition of social progress than India. In some of the finest cities in civilized Europe, with every appliance and convenience for sanitary improvement available, there are streets, lanes, and houses whose description, if faithfully given, would throw into the shade the vivid pictures of the filth of Calcutta so graphically drawn by Dr. Payne."

The general question involved is one on which the most opposite opinions have been entertained among the Commissioners. Opinion is divided into two schools on much the same lines as it is divided on the same subject in London and other towns in Europe. The one School—whose views are represented above, and they form the large majority of the Municipal Commissioners—holds that whatever land is required to be taken up for roads should be acquired at public cost, and that to require the owner to give up land and prevent him from making the profit out of it which he otherwise could make amounts to unjustifiable confiscation. They point out that town property has been continually changing hands without any such disabilities attaching to the possession either existent or in prospect, that the ownership of town land is in many cases in the hands of very petty and numerous shareholders, and that it is impossible for them to enter into mutual arrangements that shall be equitable to all to give up lands for roadway. In short, it is contended that any attempt to get broad streets made in new localities otherwise than at the public cost would be spoliation.

The opposite school, on the other hand—which comprises a small minority of the Commissioners, including the Officiating Chairman—contend that the municipal income must for ever be inadequate to the burthen which the other party would impose upon it; that inasmuch as the value of a town property is enormously enhanced by the construction of a street with necessary drainage provision, it is not equitable that the rate-payer should bear the whole cost; that if no restrictions have hitherto been imposed and property has changed hands free from such restrictions, this result has been due to carelessness, and that, in view of the dangers to the public health from the present system which the Health Officer has pointed out, a change in that system is imperatively called for. It is pointed out that the value of land is increasing annually in Calcutta, largely owing to Municipal improvements, and that the longer the question is deferred, the more difficult of solution it will become. It is admitted that no legislation should be passed without the most careful preliminary inquiry so as to prevent injustice to individuals, but it is strongly urged, on the other hand, that on the general principle that property has its duties as well as its rights, and that, in the case of property in an overcrowded city, interference is necessary for the common weal, the State should place such restrictions upon building, even at the cost of diminishing the value of town property to its immediate possessor, as may be essential for the public health.

Sir Antony MacDonnell has great sympathy with Sir Ashley Eden's view as quoted above, but still there are occasions when it is necessary to anticipate rather than to follow public opinion, and among them is surely the occasion when inaction is injurious to the community at large. The Lieutenant-Governor will be glad to see a draft of the new bye-laws referred to above at an early date; and eventually, if in the opinion of a considerable section of the Commissioners these bye-laws are still insufficient, he will be prepared to consider any representations that may be made to him on the subject. His Honour believes that the public mind in Bengal is awakening to the benefits of sanitary improvement: and he notices with special pleasure the passage in this report in which the Commissioners assert that their eagerness for sanitary improvement is as great as that of their Health Officer. His Honour trusts that nothing will prevent them from giving full effect to these good intentions.

30. Sir Antony MacDonnell has perused with much interest the report reviewed in the preceding paragraphs: it records the execution of much useful work, especially in the direction of sanitation and of structural improvements, such as the extension of drainage and water-supply and the improvement of *bastis*, and for their share in carrying out these measures, the thanks

of the Lieutenant-Governor are due to the executive officers of the Corporation, the Engineer and the Health Officer. The Commissioners themselves have, as a whole, displayed a care and attention to their duties which is very meritorious, and has in some cases risen to the level of devotion. The year, though not actually one of straitened resources, was yet clouded by the shadow of impending pecuniary difficulties, and the policy of the Commissioners has doubtless on some occasions been guided by this circumstance which has induced them to shrink from expenditure on objects which have strong claims upon them. In executive matters the Lieutenant-Governor perceives an occasional want of vigour, especially in the collection of rates, the enforcement of the law in regard to license fees, and the recovery of expenses from the owners of *bastis*. But these defects admit of remedy; and on suitable opportunities they will no doubt be remedied. Leaving them out of consideration, Sir Antony MacDonnell very cordially acknowledges the services the Corporation have rendered to the city, and thanks them for the careful control which they have exercised over the various Departments of the municipal administration. Finally, His Honour desires to recognize the industry and tact displayed by Messrs. Lee and Ritchie in discharging the duties of an appointment which requires the display of these valuable qualities in a marked degree.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Govt. of Bengal.

FINANCIAL RESOLUTION.

FINANCIAL DEPARTMENT—FINANCE.

Calcutta, the 21st November 1893.

RESOLUTION No. 5032F.

THE Lieutenant-Governor is now in a position to review the actual financial results of the year 1891-92, the revised estimates for the year 1892-93, and the budget estimates for 1893-94. The Accountant-General's memorandum on the accounts of the first year has been received, and though his final report on the accounts for 1892-93 has not yet been submitted, his appropriation report for the year affords sufficient materials for framing an approximate estimate of the financial position of the Province at the close of the year. The figures of the revenue and expenditure of the first five months of the current year have been received from the Accountant-General, and these are sufficient to form the basis for a review of the budget estimates for 1893-94

PART I.

ACCOUNTS OF 1891-92.

2. The approximate actuals adopted in the Financial Resolution No. 5191F. of the 27th December 1892 assumed that the year 1891-92 had opened with a credit balance of Rs. 24,72,774, and had closed with a balance of Rs. 23,85,016, that the total amount available for expenditure during the year was Rs. 6,02,72,887, and that of this sum Rs. 5,78,87,871 had been spent. The final result was less favourable than this estimate by Rs. 31,585. The amount actually available for expenditure was Rs. 6,02,74,758, and the amount actually expended, Rs. 5,79,21,327, leaving a closing balance of Rs. 23,53,431. The actuals furnished by the Accountant-General in his memorandum on the accounts of the year are compared in the following table with the approximate actuals adopted in the Financial Resolution quoted above:—

RECEIPTS.		HEADS.	EXPENDITURE.	
Figures adopted in December 1892.	Actuals.		Figures adopted in December 1892.	Actuals.

		Provincial deficit (—).	(—)87,758	(—)1,19,343

3. There was an increase of Rs. 1,871 in Receipts, principally under Ferry Tolls, against an advance of Rs. 33,456 in Expenditure. The fluctuations in expenditure were chiefly under Stamps (Rs. 1,062), Police (Rs. 8,535), Minor Departments (Rs. 1,264), and State Railways—Working Expenses (Rs. 22,164). The increase under State Railways was due to an adjustment of Rs. 22,164 made under the orders of the Government of India on account of the working expenses of the Tirhut State Railway (old account).

4. The transactions under Provincial loans and advances, which are not included in the cash account of the year 1891-92, were as follows:—

HEADS.	Balance outstanding on 1st April 1891.	Repayments.	Outgoings.	Balance outstanding on 31st March 1892.

PART II.

REVISED ESTIMATE OF 1892-93.

5. The financial year which expired on the 31st March 1893, was the first of the quinquennial period for which a new contract has been made with the Government of India. A revised estimate, based on the actuals of eight

months, was submitted to the Government of India with letter No. 628F., dated the 31st January 1893. An amended statement was submitted on the 9th March 1893. Although the accounts of the year have not yet been finally closed, and are still open to adjustments, there are sufficient materials to frame an approximate estimate of the financial position of the province at the close of the year. The following statement shows the revised estimate as submitted to the Government of India, the estimate as passed by that Government, and the estimate now adopted by the Government of Bengal:—

RECEIPTS.

6. *Land Revenue.*—The revised estimate of total Land Revenue receipts for 1892-93 was placed at Rs. 3,85,50,000, but the actual collections only reached a total of Rs 3,84,96,000. The 12 per cent. on collections from Government estates amounted to Rs. 4,74,000, and the total Provincial share of Land Revenue for the year was therefore one-fourth of (Rs. 3,84,96,000—Rs. 4,74,000) + 4,74,000, or Rs. 99,80,000. This amount has been adopted as the revised estimate of the Provincial share of Land Revenue (proper) for 1892-93. The adjustments between the Imperial and Provincial revenues will probably result in a net deduction of Rs. 13,36,000, as shown below:—

	Estimate passed by the Government of India.	Revised estimate now adopted.
Fixed contribution to Imperial under the new Contract	—14,39,000	—14,39,000
Grant for the Hidgelee Tidal Canal ...	+49,000	+38,000
Ditto honorarium to Mr. Kilby for salt scales	+38,000	+38,000
Grant for the transfer of Imperial buildings to local agencies	+45,000	+45,000
Interest on the capital expenditure on Hidgelee Tidal Canal advanced from Imperial	—19,000	—18,000
Total ...	—13,26,000	—13,36,000

7. The Government of India, in the Public Works Department letter No. 33A.C.W., dated the 25th January 1893, directed that, before the close of each financial year, a statement of the claims against the Imperial Government, including the usual percentage charges for establishment and tools and plant on the grants for Imperial works and repairs made over to local bodies, should be submitted to the Finance and Commerce Department of the Government of India, in order that the necessary adjustment of accounts might be made through the head of Land Revenue. The required statement for 1892-93 was submitted to the Government of India with a request for an assignment of Rs. 47,690, but the Finance and Commerce Department has since decided that the final adjustment between Imperial and Provincial should be made with reference to the actual expenditure incurred by the local bodies during the year, and not on the grants provided in the estimates. The Public Works Department has accordingly been asked to call upon the local bodies concerned to submit, after the close of every year, a progress report showing the actual amount spent during the year on each Imperial work made over to them, and the further amounts that are likely to be required for their completion. As the year 1892-93 has already closed, the Public Works Department has been asked to supply the Financial Department with a statement showing the actual expenditure on Imperial works incurred by the local bodies during the year, so that an application may be made for final adjustment. Pending the receipt of this information, Rs. 45,000, the amount passed by the Government of India in the revised estimate, is adopted in this Resolution.

8. *Salt.*—The original estimate under this head was Rs. 1,30,000; but looking to the falling off under "Rents of Warehouses," the revised estimate was placed at Rs. 90,000. The actual realizations, however, amounted to Rs. 84,000 only against Rs. 1,10,854 in 1891-92. The decrease was due to the quantity bonded during the year being less, and to a general reduction in the stock kept at the golahs, in consequence of the consumption during the year being greater than the importation. Moreover, owing to the exceedingly low rate of freight, salt laden ships after discharge could not obtain export cargo, and it paid the owners better to sell salt direct from the ships instead of discharging and storing it.

9. *Excise*—The receipts under this head amounted to Rs. 1,15,95,000, against Rs. 1,14,10,000, the revised estimate passed by the Government of India. One-fourth of this sum or Rs. 28,99,000 have been taken as the share of the Local Government. The receipts of the year show an increase of 4 per cent. over those of the previous year, and are larger than the revenue of any of the preceding four years.

10. *Provincial Rates.*—The revised estimate under this head was placed at Rs. 45,40,000 against Rs. 45,24,517, the actuals of 1891-92. The percentage of arrear collections of both Road and Public Works Cesses on arrear demand was 80·9, that of current collection on current demand 84·9, and that of total collection on current demand 102·2. The year therefore closed with a smaller arrear balance than that with which it opened. The total collections under the head amounted to Rs. 46,16,000.

11. *Assessed Taxes.*—The original estimate for 1892-93 was Rs. 43,00,000 against Rs. 43,07,928, the actuals of 1891-92. Looking to the steady growth of revenue under this head, and also to the increased collections in the first eight months of the year as compared with those of the same period in the preceding year, the estimate was raised to Rs. 43,50,000 in the Financial Resolution dated 27th December 1892. The same figure was adopted by the Local Government in the budget report; but the Government of India, in view of the falling off in receipts in the later part of the year, reduced the estimate to Rs. 43,10,000. The actuals amounted to Rs. 42,28,000. The Provincial share of one-half has accordingly been taken at Rs. 21,14,000. The net revenue shows a decrease of 1·8 per cent. against an increase of 1·5 per cent. in the preceding year: the decrease is in the collection of the arrear demand.

12. *Registration.*—The Provincial share of the receipts under this head amounted to Rs. 7,17,000 as compared with Rs. 7,05,000 the revised estimate passed by the Government of India, and Rs. 6,67,156, the actuals of 1891-92. The increase is attributable partly to the influence of the season and partly to the growing confidence of the public in registration concurrently with the general advancement in education and in a knowledge of the law.

13. *Interest.*—The actuals amounted to Rs. 1,42,000 against Rs. 1,32,000, the revised estimate, as shown below:—

	Revised estimate passed by India. Rs.	Revised estimate now adopted. Rs.
Class I.—Interest on advances to cultivators	20,000	26,000
" II.—Interest on advances under special loans ...	5,000	4,000
" III.—Interest on loans to landholders and other notabilities	18,000	18,000
" IV.—Interest on loans to municipal and other public corporations	27,000	29,000
Interest on Government securities	13,000	13,000
Miscellaneous	49,000	52,000
Total ..	1,32,000	1,42,000

14. *Police.*—The receipts of the Police Department are compared below with the revised estimate passed by the Government of India:—

	Revised estimate passed by India. Rs.	Approximate actuals. Rs.
(1) Police paid for by Municipal, Cantonment and Town Funds ...	6,000	6,000
(2) Police paid for by Public Departments, Companies and private persons ..	23,000	25,000
(3) Presidency Police	93,000	1,02,000
(4) Recoveries on account of village police	2,000	3,000
(5) Fees, fines, and forfeitures ...	32,000	34,000
(6) Superannuation receipts	......	1,000
(7) Miscellaneous	70,000	71,000
Total ...	2,26,000	2,42,000

The fluctuation was chiefly in the receipts derived from the Presidency Police. The increase under (2) was due to larger recoveries in Patna for police supplied to private persons.

15. *Marine.*—The receipts under this head amounted to Rs. 9,20,000 as compared with Rs. 9,05,000, the revised estimate passed by the Government of India. The increase was chiefly under pilotage receipts, which amounted to Rs. 8,41,000, against Rs. 8,30,000, the revised estimate of the year.

16. *Medical.*—The revised estimate under this head, passed by the Government of India, was Rs. 1,50,000, but the actual receipts amounted to Rs. 1,70,000. The increase was under "Hospital receipts," and was due partly to the orders of Government enhancing the rate of payment from the Hospital Port Dues Fund on account of seamen sent to hospital, and partly to larger receipts from paying patients.

17. *Railways.*—Under the terms of the new contract with the Government of India, the Nalhati and the Tirhut State Railways have been made Imperial, while the net receipts of the entire Eastern Bengal Railway system are divided equally between the Imperial and the Provincial Revenues. The actual net receipts in 1892-93 amounted to Rs. 62,13,000 against Rs. 64,25,000, the revised estimate passed by the Government of India. The provincial share will now amount to Rs. 31,06,000, as shown below:—

	Revised estimate passed by the Government of India.	Preliminary actuals.
	Rs.	Rs.
Receipts	1,18,00,000	1,18,30,000
Working expenses .. .	53,75,000	56,17,000
Net receipts ..	64,25,000	62,13,000
Provincial share .	32,12,000	31,06,000

18. *Irrigation—Major Works.*—The total receipts in 1892-93 amounted to Rs. 18,88,000 against Rs. 16,50,000, the revised estimate passed by the Government of India. The increase was mainly due to the recovery of old outstandings and of current demands on account of the Sone Canals.

19. *Civil Works.*—The original estimate of receipts from departments in charge of the Public Works Department was Rs. 2,30,000, and was reduced to Rs. 2,10,000 in the revised estimate. The actual receipts, however, amounted only to Rs. 1,63,000. The high estimate was based on the expectation that the Government share of the profits from the Darjeeling-Himalayan Railway would be realized during the year, but the adjustment could not be made as the case tried by the High Court, on which the payment depended, was not decided until after the expiration of the year.

EXPENDITURE.

20. *Stamps.*—The cost of "Stamp paper supplied from Central Stores" in 1892-93 amounted to Rs. 2,90,000 against Rs. 2,82,000 passed by the Government of India as the revised estimate of the year. The Provincial share of the total charges of the Stamp Department amounted to Rs. 4,47,000 or Rs. 10,000 more than the figure adopted in the revised estimate.

21. *General Administration.*—There was larger expenditure under "Commissioners" than had been provided for in the revised estimate, and the total actual charges now amount to Rs. 16,37,000 against Rs. 16,25,000, the revised estimate passed by the Government of India.

22. *Jails.*—The total charges under this head amounted to Rs. 21,19,000 as compared with Rs 20,90,000, the revised estimate passed by the Government of India. The increase was chiefly on account of rations, clothing and bedding, and other supplies due to the increase in jail population and the high price of food-grains.

23. *Police.*—The revised estimate under this head was Rs. 57,84,000, but the total expenditure amounted to Rs. 58,47,000. The excess was under "Superintendence" (Rs. 4,000), "District Executive Force" (Rs. 39,000), "Special Police" (Rs. 17,000), and "Village Police" (Rs. 3,000). The increase under "District Executive Force" was chiefly under Supplies and Services and Contingencies, the expenditure on which accounts was unusually high in the last two months of the year.

24. *Marine.*—The total charges under this head amounted to Rs. 9,44,000 against Rs. 8,61,000, the revised estimate submitted to the Government of India. This estimate included a provision of only Rs. 25,000 to meet a part of the cost of the new pilot vessel to replace the *Cakeroon*, which is under construction at the Government dockyard at Bombay. The actual payment, however, on this account was Rs. 99,307. The charges for "Purchase of marine stores and coal for the building, repairs and outfit of vessels" also exceeded the revised estimate by Rs. 15,000.

25. *Medical.*—There was an increase of expenditure under "Hospitals and Dispensaries," and the total charges of the department amounted to Rs. 16,13,000 against Rs. 16,00,000, the revised estimate passed by the Government of India. There was, however, a corresponding increase in receipts.

26. *Political.*—The original estimate under this head, amounting to Rs. 29,000, was raised to Rs. 37,000 in the revised estimate. The actual charges, however, amounted to Rs. 18,000 only. The decrease was mainly under the head "Durbar presents and allowances to Vakeels, &c."

27. *Stationery and Printing.*—The original budget estimate under this head, amounting to Rs. 9,90,000, was raised by the Local Government to Rs. 12,48,000, and by the Government of India to Rs. 13,08,000 on information furnished by the Superintendent of Stationery, to meet a large increase of expenditure under "Stationery supplied from Central Stores." The actual charges under the sub-head, however, exceeded the revised estimate by Rs. 47,000. The increase is attributed to the large supplies furnished to the Survey and Settlement Department in connection with the settlement operations now in progress. The total charges under the head amounted to Rs. 13,56,000.

28. *Miscellaneous.*—There was an increase of expenditure under "Donations for charitable purposes" and under "Miscellaneous and Unforeseen charges" owing in the latter case to the adjustment of the excess charges on account of the telegraph lines from Rampur Hat to Dumka and from Chittagong to Demagri. The total "Miscellaneous" expenditure amounted to Rs. 2,12,000, whereas the revised estimate passed by the Government of India stood at Rs. 1,98,000.

29. *Irrigation—Minor Works.*—The charges in 1892-93 amounted to Rs. 13,94,000 against Rs. 15,46,000 passed by the Government of India as the revised estimate of the year. The saving is partly due to excess provision having originally been made for establishment and also to the amount provided for in the estimate for original works not being fully worked up to.

30. *Civil Works.*—The expenditure of the Public Works Department amounted to Rs. 27,24,000 falling but little short of Rs. 27,65,000, the revised estimate for the year. The saving is due to short outlay on the Collector's residence at Darbhanga and the Registration building at Dacca, and to a sum of Rs. 17,000 not having been appropriated during the year.

31. *Contributions.*—The estimate of Rs. 12,50,000 has been increased by one lakh, that being the sum which Government has decided to contribute towards the heavy expenditure incurred by the Darbhanga District Board on relief works and other famine charges during 1891-92 and 1892-93.

32. *Closing balance.*—According to the revised estimate now adopted, the closing balance of the past year will have been Rs. 23,47,000 against Rs. 23,02,000 estimated by this Government, and Rs. 22,46,000 anticipated by the Government of India when passing the estimates for the current year.

PART III.

BUDGET ESTIMATE, 1893-94.

33. The Lieutenant-Governor has already in separate Resolutions reviewed the estimates of receipts and charges for the current year under each head of account: later information, however, has led to a modification of these in some respects. The following table shows the estimates as submitted to the Government of India, the figures as passed by that Government, and the estimates which the Lieutenant-Governor has finally resolved to adopt. The figures now adopted do not include under the several service heads any provision for "Exchange Compensation Allowance" the payment of which has recently been sanctioned by the Secretary of State to European and Eurasian

servants of Government not domiciled in India. The Government of India has already decided that the allowances will be charged to the same head as pay, and will be Imperial or Provincial to the same extent as pay is Imperial or Provincial, and that no adjustment will be made between Imperial and Provincial funds to cover the Provincial share of the expenditure. The Accountant-General, who was asked to report on the effect of these orders on the Provincial revenues of Bengal, stated that, owing to doubt regarding the number and pay of officers who would be adjudged entitled to the allowance, an estimate could only be framed by the light of the actual charges recorded in the accounts. He has, however, promised to submit, later on in the year, a report on the subject based upon the experience gained from the first few months' operation of the scheme. Pending the receipt of this report, a lump provision of a lakh and a quarter has been made under "Miscellaneous;" but when the estimates shall have been prepared by the Accountant-General, the necessary adjustments will be made under the different service heads:—

RECEIPTS.

	Rs.
1888-89	3,73,73,000
1889-90	3,88,82,000
1890-91	3,88,19,000
1891-92	3,86,80,000
1892-93	3,84,96,000
Total for five years ...	19,22,50,000
Average per year ...	3,84,50,000

34. *Land Revenue.*—The total collections in 1892-93 amounted to Rs. 3,84,96,000, and the estimate for 1893-94 has been placed by the Government of India at Rs. 3,84,33,000. The average receipts during the past five years have been Rs. 3,84,50,000. The collections in the first five months of the current year amounted to Rs. 71,11,000 against Rs. 74,38,000 obtained in the corresponding period of last year. This decrease is probably due to the floods which have affected the prosperity of the raiyats, and caused payments to be temporarily withheld; but there is no reason to believe that the estimate for the current year will not be reached, and it will accordingly be retained. The provincial share will thus remain Rs. 99,88,000. The adjustments between Imperial and Provincial show the following results:—

	Estimate of the Government of India.	Estimate now adopted.
	Rs.	Rs.
Lump contribution under the new contract	(—)14,39,000	(—)14,39,000

Grant on account of Imperial buildings placed under Local officers ...	+10,000	+36,000
Interest on advances for the Hidgellee Tidal Canal	(—)21,000	(—)21,000
Contribution to Provident Fund for employés of the Tirhut State Railway for July 1890 to March 1892	.....	(—)9,000
Total ...	(—)13,50,000	(—)13,33,000

The last item is still under discussion. The Government of India while passing orders on the budgets for 1893-94 allowed the following adjustment on account of the transfer of Imperial Civil and Military Works to the management of local agency:—

	Rs.	Rs.
Annual grant for maintenance	8,341	
Percentage charges for establishment and tools and plant on above	2,044	
		10,385
In round numbers		10,000

The construction, maintenance and repairs of several other Imperial buildings have since been entrusted to local bodies. The Imperial Public Works estimates will be reduced by the amount of the grants provided for these works, but a credit for an additional sum of Rs. 26,000 will be provisionally taken under this head, that being the aggregate of the amounts made over to the local funds and to the Provincial Public Works budget on account of these works.

35. *Salt.*—The rent of warehouses shows a falling off of Rs. 6,365 during the first five months, amounting to Rs. 18,194, as compared with Rs. 24,559 during the corresponding period of last year. The total receipts in 1892-93 were Rs. 84,000, and the Lieutenant-Governor thinks that it will not be safe to place the estimate for the current year at a higher figure than Rs. 75,000 instead of Rs. 90,000, the original estimate for the year.

36. *Stamps.*—The total revenue from stamps has been estimated at Rs. 1,57,00,000, being Rs. 1,55,000 more than the latest revised estimate of last year, which amounted to Rs. 1,55,45,000. The Comptroller-General's latest statement shows that the receipts during the first five months of the current year have exceeded those of the corresponding period of last year by Rs. 3,64,000. In view of these figures the estimate is raised to Rs. 1,60,00,000, of which the Provincial share will be Rs. 1,20,00,000. The question of lowering the fees

levied for the issue of processes is now under consideration, but as the matter is not yet ripe for final settlement, no reduction in the estimate has been made on this account.

37. *Excise.*—The estimate of total revenue under this head as passed by the Government of India amounts to Rs. 1,15,00,000. The Comptroller-General's statements show that the actuals in 1892-93 amounted to Rs. 1,15,95,000, and the receipts of the first five months of the current year exceed those of the same five months of last year by Rs. 2,98,000. The results of the recent settlements of shops for the sale of country spirits just received from the Board of Revenue show a net increase of Rs. 2,41,923 in the demand for the current year, though the number of licenses settled is less than that of the past year by 98. The number of unsettled shops is still large, but the Excise Commissioner has taken steps to hasten the settlement of them. In view of the increased revenue already collected, the Lieutenant-Governor thinks that the estimate can safely be raised to Rs. 1,19,00,000. The Provincial share will thus amount to Rs. 29,75,000.

38. *Provincial Rates.*—The following statement compares the receipts under this head for three years :—

Heads.	Actuals, 1891-92.	Latest revised estimate, 1892-93.	Sanctioned estimate, 1893-94.	Estimate now proposed.
1	2	3	4	5
	Rs	Rs.	Rs.	Rs.
(1) Public Works Cess ...	40,79,753	41,95,000	41,50,000	41,50,000
(2) General management of Wards' Estates.	80,409	77,000	80,000	1,25,000
(3) Proportionate cost of collecting Road Cess.	3,64,355	3,44,000	3,31,000	3,40,000
Total ...	45,24,517	46,16,000	45,61,000	46,15,000

The current demand of the Public Works Cess for 1892-93 was Rs. 40,94,343, and the actual collections were Rs. 41,95,000. It is by no means certain that the receipts during the current year will be as high as in the previous year. The arrear balance is now much smaller than in 1892-93, and the floods, which have affected the prosperity of the raiyats, may affect the collections. On the other hand some increase is anticipated on account of revaluations, which have been completed and been given effect to from 1st April 1893. Taking all the circumstances into consideration, the Lieutenant-Governor would retain the estimate originally adopted. The estimate under (3) appears to be low compared with the actuals of 1891-92 and the latest figure for 1892-93. Since the budget was passed, the Board of Revenue have increased the estimate of total cost of collecting the cess by Rs. 12,555 in consequence of the revaluations now in progress. The estimate will be raised by two-thirds of this amount, representing the proportionate cost of collecting road cess or to Rs. 3,40,000. The rules under the Management of Private Estates Act of 1892, which are under the consideration of Government, propose to raise the estimate of receipts from the Management Rate from Rs. 80,000 to Rs. 1,40,000, but as, the rules have not yet been finally passed, the full increase cannot be provided for during the current year. The estimate will be raised to Rs. 1,25,000. The total estimate under Provincial Rates will therefore stand at Rs. 46,15,000.

39. *Customs.*—The estimate under this head amounts to Rs. 56,000 against Rs. 50,000, the latest revised estimate for 1892-93. The collections in the first five months of the current year amounted to Rs. 21,974 against Rs. 19,469 obtained in the corresponding period of last year. The estimate will be retained.

40. *Assessed Taxes.*—The revenue under this head showed a progressive increase from 1888-89 to 1891-92, and the estimate for 1893-94, which was based on the revised estimate for 1892-93, was placed at Rs. 43,30,000. The actuals for 1892-93 aggregated only Rs. 42,28,000 against the revised estimate

of Rs. 43,10,000 and showed a considerable falling off, attributable to larger collections of arrears in the year 1891-92. The decrease having occurred in the closing months of 1892-93 was not foreseen and provided for in the revised estimate for that year. The collections during the first five months of the current year again show a decrease of Rs. 30,000 mainly in Calcutta, as compared with those of the corresponding period of last year. It would perhaps be premature to assume that the collections in the current year will be less than those realised in 1892-93; but looking to all the circumstances, it would not be safe to adhere to the estimate passed in March last, which will therefore be reduced by one lakh, viz. to Rs. 42,30,000. The Provincial share will stand at Rs. 21,15,000.

41. *Registration.*—The estimate under this head amounts to Rs. 14,20,000 against Rs. 14,34,000, the latest revised estimate for 1892-93. The actuals in the first five months of the current year show an increase of about Rs. 33,000 over those of the corresponding period of last year. The estimate will be raised to Rs. 14,70,000. The Provincial share will stand at Rs. 7,35,000.

42. *Interest.*—The original estimate of the Local Government under this head for 1893-94, based on an anticipation of a net outgoing of Rs. 12,61,000 from the treasury as loans on Provincial account was Rs. 1,82,000, and it was passed by the Government of India. That Government have, however, made a lump deduction of Rs. 7,50,000 from the estimate of net outgoings proposed by this Government. This deduction will necessarily reduce the Provincial receipts from Interest by nearly Rs. 17,000. The estimate will therefore be altered from Rs. 1,82,000 to Rs. 1,65,000.

43. *Law and Justice—Courts of Law.*—The total receipts under this head in the first five months of the current year show an increase of Rs. 34,000 over those of the corresponding period of last year. The latest revised estimate for 1892-93 amounts to Rs. 8,68,000. The estimate for the current year will be raised from Rs. 8,76,000 to Rs. 9,00,000.

44. *Marine.*—The receipts during the first five months of the current year amount to Rs. 3,23,756 against Rs. 3,32,114 obtained in the corresponding period of last year, showing a decrease of Rs. 8,358. The decrease is under the Calcutta Pilotage receipts. The aggregate receipts in 1892-93 were Rs. 9,20,000, and the estimate for the current year amounting to Rs. 9,12,000 will be retained.

45. *Medical.*—The Government of India placed the revised estimates under this head for 1892-93 at Rs. 1,50,000, and the estimate for the current year at Rs. 1,51,000. The latest revised estimate for 1892-93 now stands at Rs. 1,70,000. The receipts in the first five months of the current year show an increase of Rs. 3,170 over those of the corresponding period of last year. The estimate will be raised to Rs. 1,75,000.

46. *Scientific and other Minor Departments.*—The total of receipts under this head in 1892-93 amounted to Rs. 1,90,000. This includes a special credit of Rs. 25,000, the amount contributed by Sir Dinshaw Manockjee Petit for the construction of a veterinary hospital, and the estimate for the current year was placed at Rs. 1,62,000. The receipts from "Cinchona Plantations" that is from the sale of cinchona and quinine amounted to Rs. 1,18,000 in 1892-93, and in the first five months of the current year show an increase of Rs. 8,000 over those of the corresponding period of last year: some quinine has also been bought from Messrs. Kilburn and Company lately at a cost of Rs. 15,762, and this will be available for sale to the public. The estimate under this sub-head, which is Rs. 1,09,000, may be raised to Rs. 1,25,000. But looking to the falling off of emigration fees from Rs. 21,000 in the first five months of last year to Rs. 11,000 in the corresponding five months of the current year, it will not be safe to disturb the original total estimate, which will be retained.

47. *Superannuation.*—The revised estimate of Provincial receipts under this head for 1892-93 now stands at Rs. 78,000. The receipts during the first five months of the current year very nearly correspond with those obtained in the same period of last year. The estimate will be raised from Rs. 56,000 to Rs. 75,000.

48. *Stationery and Printing.*—The total Provincial receipts in the first five months of the current year show an increase of about Rs. 8,000 over those of the corresponding period of last year. The latest revised estimate for 1892-93

now stands at Rs. 1,15,000. The estimate for the current year will be raised from Rs. 1,07,000 to Rs. 1,20,000.

49. *Miscellaneous.*—The latest revised estimate of receipts under this head for 1892-93 now stands at Rs. 8,29,000. The average receipts in each of the past five years amounted to Rs. 8,15,000. The actuals during the first five months of the current year show an increase of Rs. 29,000 over those of the corresponding period of last year. The estimate for the current year will be raised from Rs. 7,96,000 to Rs. 8,29,000, the latest revised estimate for 1892-93.

	Rs.
1888-89	8,35,000
1889-90	8,03,000
1890-91	7,70,000
1891-92	8,36,000
1892-93	8,29,000
Total ...	40,73,000
Average per year ...	8,15,000

50. *Railways.*—The gross earnings of the Eastern Bengal State Railway System from the 1st April to the 23rd September 1893 amounted to Rs. 52,91,000 against Rs. 51,66,000 obtained from the 1st April to the 24th September 1892, showing an increase of Rs. 1,25,000. The estimate of the Government of India will be retained.

51. *Irrigation Major Works.*—The Government of India placed the revised estimate, 1892-93, under this head at Rs. 16,50,000, and the estimate for the current year at Rs. 14,50,000. The returns of the Examiner of Public Works Accounts show that the receipts in the first four months of the current year were Rs. 1,39,000 less than those of the corresponding period of past year. The latest revised estimate for 1892-93 now stands at Rs. 18,88,000, and the average actuals of the past five years amounted to Rs. 15,51,000. In view of the fluctuating character of these receipts depending to some extent on the rainfall, which has this year been generally plentiful, it will not be safe to anticipate that the average of the last five years will be attained; but looking to the large collections of the last two years, the Lieutenant-Governor would place the estimate at Rs. 15,00,000.

	Rs.
1888-89	13,94,000
1889-90	15,21,000
1890-91	13,47,000
1891-92	16,03,000
1892-93	18,88,000
Total of five years ...	77,53,000
Average per year ...	15,51,000

52. *Irrigation Minor Works.*—The latest revised estimate for 1892-93 amounts to Rs. 7,54,000, and the estimate for the current year is Rs. 8,15,000. The receipts in the first four months of the current year show an improvement of Rs. 18,000 over those of the corresponding period of last year. The average actual receipts of the past five years were Rs. 8,15,000. The estimate will be retained.

53. *Civil Works in charge of the Public Works Department.*—The revised estimate for 1892-93, as passed by the Government of India, was Rs. 2,10,000, and the estimate for 1893-94 is Rs. 1,70,000. The revised estimate for last year included a sum of Rs. 80,000, being the Government share of the profits payable by the Darjeeling-Himalayan Railway Company for two years, while the estimate for the current year includes Rs. 40,000 on this account, being the amount for one year. As already stated in paragraph 19 above, no payment was made by the Railway Company in 1892-93, but in 1893-94 a sum of Rs. 95,250 has been paid up to date on account of—

			Rs.
The year ending 30th June	1890	...	33,142
Ditto	1891	...	26,771
Ditto	1892	...	35,337
	Total	...	95,250

If payment for the year ending 30th June 1893 is also made during the year, the total receipts from the Company may amount to, more or less, Rs. 1,25,000 against Rs. 40,000 provided in the estimate. The estimate may be raised to Rs. 2,55,000.

EXPENDITURE.

54. *Land Revenue.*—Since the budget was passed placing the estimate under this head at Rs. 34,19,000, an additional establishment has been sanctioned at an estimated cost of Rs. 4,000 for the office of the Deputy Commissioner of the Sonthal Parganas, and the estimate must therefore be raised to Rs. 34,23,000.

55. *Provincial Rates.*—The estimate under this head amounts to Rs. 3,86,000 against Rs. 4,34,000, the actuals of 1892-93. As stated in paragraph 37 above, an additional grant of Rs. 12,555 has been sanctioned at the instance of the Board of Revenue on account of revaluations in progress, but as the total receipts from the cess will, it is anticipated, be less than in 1892-93, a provision of Rs. 4,15,000 for the cost of collecting the cess, &c., may be sufficient for the current year.

56. *Customs.*—An extra establishment for the steam-launch *Ivy* of the Customs Preventive Department has been sanctioned at an additional cost of Rs. 3,400, and some provision must be made for additional preventive establishment costing Rs. 550 per month, which will be required if the Kidderpur Docks are largely used. It will be sufficient if the estimate be raised from Rs. 5,52,000 to Rs. 5,58,000.

57. *Assessed Taxes.*—The total expenditure for the collection of Income-Tax was originally estimated at Rs. 1,93,000, including Rs. 2,400 for house allowance to the Collector of Income-tax, Calcutta. The Government of India have sanctioned the grant of an allowance at the rate of Rs. 100 per mensem, which order will effect a saving of Rs. 1,200 on this account. On the recommendation of the Board of Revenue, a further reduction of Rs. 4,270 has been made in the income-tax establishment. The total saving may therefore be Rs. 5,470, and the total grant may be placed at Rs. 1,88,000. The Provincial share will stand at Rs. 94,000.

58. *Forests.*—The total grant of the Forest Department as passed by the Government of India amounts to Rs. 4,82,000, but a reduction of Rs. 2,500 has been made by the Revenue and Agricultural Department of the Government of India in the Imperial share of the grant for the reorganisation of the Forest Subordinate staff, to provide for the purchase of tramway plant required by the Forest Department in the Andamans, and for the construction of a gymnasium at the Forest School. A similar reduction will be made in the Provincial share. The total grant will then stand at Rs. 4,77,000 and the Provincial share at Rs. 2,39,000.

59. *Post Office.*—The estimate under this head for the current year will be raised from Rs. 3,000 to Rs. 5,000, since the actuals in the first five months of the current year amounted to Rs. 3,447 against Rs. 2,558 in the corresponding period of last year.

60. *General Administration.*—The estimate under this head will be raised by Rs. 4,000 for the purchase of an elephant for the Commissioner of Orissa, and for expenditure on the additional establishment and contingencies of the Legislative Department recently sanctioned in consequence of the expansion of the Legislative Council under the New Councils Act. In view of the actuals of 1892-93, amounting to Rs. 16,37,000, and those of the first five months of the current year, showing an increase of Rs. 6,000 over those of the corresponding period of last year, the estimate for 1893-94 will be placed at Rs. 16,40,000.

61. *Jails.*—The estimate under this head will be reduced by Rs. 6,860, which has been made over to the Public Works Department for strengthening and executing repairs to the barracks in the Rajshahi Central Jail, and for the conversion of No. 4 Yard of the Alipore Jail into a workshop. The grant will stand at Rs. 21,72,000.

62. *Police.*—The Government of India have raised the estimate of this Government by Rs. 75,000 for Lushai charges. This will again be raised by Rs. 4,000 to meet the cost of the additional police force sanctioned for the Patuakhali Municipality, of arrears of rent due to the East Indian Railway Company for accommodation of the State Railway Police, and of the charges for police guards employed at the Secretariat Building in Calcutta: the last charge has hitherto been borne by the Public Works Department, but will now be adjusted in the Civil Department. Additional grants have also been made for five additional Police Inspectors to be employed in the Patna Division at a total cost of Rs. 4,000, and for the employment of 250 constables with a proportion of superior officers for eight months: adding a sum of Rs. 600 for accoutrements, the total extra cost under this head will hardly be less than Rs. 16,000. A sum of Rs. 2,000, being the moiety of cost of a police van for Calcutta, has also been sanctioned. The estimate must therefore be raised by Rs. 22,000 or to Rs. 56,81,000 in all.

63. *Marine.*—The estimate passed by the Government of India, amounting to Rs. 10,37,000, includes a provision of Rs. 1,50,000 for the balance of the cost of constructing a pilot vessel to replace the *Coleroon.* The charges in 1892-93 on this account amounted to Rs. 99,307 against Rs. 25,000, provided in the revised estimate of the year: a reduction of Rs. 74,000 will therefore be made on this account this year. On the other side an increased provision of Rs. 10,000 will be made for payment of compensation to Captain Petley. The estimate will thus stand at Rs. 9,73,000.

64. *Education.*—The estimate under this head, amounting to Rs. 25,73,000, has been reduced by Rs. 14,000 on account of the following charges which have been eliminated:—

(a) A grant of Rs. 7,000 to the District Board of Malda for the construction of the new zilla school building, of which Rs. 5,000 have been met from the Public Works Department budget, and only Rs. 2,000 remain to be provided from the Education budget.

(b) A donation of Rs. 1,500 towards the construction of a building for St. Mary's House of Charity.

(c) A grant of Rs. 2,500 to the Public Works Department for furniture of the new Art School.

(d) A grant of Rs. 3,019 for the construction of two additional rooms in the Taki Government School building.

(e) A grant of Rs. 5,123 for the construction of two additional rooms in the zillah school building at Rangpur.

Against these reductions an additional grant of Rs. 6,270 has been made for the employment of a clerk on Rs. 15 per mensem, for each Deputy Inspector of Schools in thirty-eight Board districts with effect from the 1st April 1893. A further provision of Rs. 820 has been sanctioned under the head "Grant for the encouragement of useful publications" to provide for the salary of two clerks employed under Babu Sarat Chunder Dass for the completion of the Tibetian Dictionary. The total grant now stands at Rs. 25,66,000.

65. *Medical.*—The estimate of the Government of India has been raised by Rs. 10,000 to provide for additional remuneration which it is proposed to pay to Civil Surgeons' clerks for doing vaccination duty, for the payment of municipal taxes on the Campbell Medical School which have been raised from Rs. 1,287 to Rs. 4,191, for increased supernumerary pay of Civil Hospital Assistants for nine months, and for other petty increases in the Vaccination Department recently sanctioned by Government. The charges under Hospitals and Dispensaries durng the first five months of the current year show an increase of Rs. 26,000 over those of the corresponding period of last year. Taking all these circumstances into consideration, the total grant for the year will be placed at Rs. 16,20,000 against Rs. 16,13,000, the latest revised estimate for 1892-93.

66. *Scientific and other Minor Departments.*—The estimate under this head has been raised by Rs. 30,000 to provide for the following charges recently sanctioned:—

(a) Publication of a revised edition of Mr. Risley's Ethnographic Glossary, including Mr. Risley's deputation allowance.

(b) Grant to the Indian Museum for Mr. Mukerji's archæological enquiries in Orissa.

(c) Purchase of quinine from Messrs. Kilburn and Company.

A provision of Rs. 50,000 must also be made under this head for the payment of the first instalment to Messrs. Kilburn and Company of the purchase money of the Nimbong Cinchona Plantation. A further grant of Rs. 5,000 is also necessary for effecting certain urgent improvements in the Royal Botanic Gardens, Calcutta. The total estimate will be raised to Rs. 4,49,000.

67. *Superannuation.*—The estimate under this head amounts to Rs. 17,50,000. The actual charges in past years amounted to—

	Rs.	Increase.	
1888-89	13,70,000	......	
1889-90	14,36,000	66,000	
1890-91	15,13,000	77,000	
1891-92	16,00,000	87,000	
1892-93	17,03,000	1,03,000	
			3,33,000

The increase in the last four years amounted to Rs. 3,33,000, or an average of Rs. 83,000 a year. The actuals in the first five months of the current year show an increase of Rs. 25,000 over those of the corresponding period of last year. In view of these figures, it will not be safe to place the estimate for the current year at a lower figure then Rs. 17,65,000.

68. *Stationery and Printing.*—The expenditure under this head is estimated at Rs 13,05,000 against Rs. 13,56,000, the amount expended in 1892-93. The actuals of the first five months of the current year show an increase of Rs. 15,000 over those of the corresponding period of last year. The estimate will be raised to Rs. 13,80,000.

69. *Miscellaneous.*—The estimate of Rs. 2,29,000 under this head has been raised to Rs. 2,32,000 to provide for a donation of Rs. 1,500 towards the construction of a building for St. Mary's House of Charity, and for the maintenance of the telegraph line between Rampur Hât and Dumka. Applications for grants-in-aid from some of the charitable societies are under consideration, and it has been proposed to make a lump provision of Rs. 1,25,000 for Exchange Compensation Allowance under this head. The total estimate will be placed at Rs. 3,62,000.

70. *Subsidized Railways.*—An additional grant of Rs. 1,563-3 has been sanctioned for land charges in connection with the Duars Railway. The total grant now stands at Rs. 2,843-3 or Rs. 3,000 in round numbers.

71. *Miscellaneous Railway Expenditure.*—A grant of Rs. 1,206-10 has been sanctioned to the Public Works Department to adjust the charges already incurred by the Manager of the Eastern Bengal State Railway for establishment employed on marking out the land for the Sultanpore-Bogra Railway. This amount will be entered in the budget.

72. *Irrigation Major works.*—The estimate of Interest on debt as last revised by the Public Works Department amounts to Rs. 24,44,000 against Rs. 24,48,000 passed by the Government of India. The revised figure has been adopted.

73. *Irrigation Minor Works.*—The estimate under this head as passed by the Government of India amounts to Rs. 15,58,000. A sum of Rs. 1,023 has been made over to the District Board of Burdwan for the construction of culverts on the Grand Trunk Road, and a further sum of Rs. 66-4 to the Road Account, Sonthal Parganas, for reporting gauge readings. The total grant now stands at Rs. 15,57,000, in round numbers.

74. *Civil Works by Public Works Department.*—The grant under this head was originally fixed at Rs. 27,43,000. It now stands at Rs. 25,53,840 in consequence of the following additions and deductions:—

	Rs.	Rs.
As originally fixed		27,43,000
Additions—		
For percentage charges for establishment, tools and plant on Imperial works transferred to the management of local officers	6,377	
For two additional rooms in the Taki Government School building	3,019	
By sale proceeds of the old police buildings at Jalpaiguri	6,930	
For furniture for the new Art School ...	2,500	
For two additional rooms to the zilla school building at Rangpur	5,123	
For the completion of a new Court-house at Siliguri	3,000	
For strengthening and executing repairs to the barracks of the Rajshahi Central Jail ...	4,322	
For the conversion of No. 4 yard of the Alipore Jail into a workshop	2,538	
		33,809

Deductions—		
Grant to the Deputy Commissioner, Darjeeling, for a new road at Siliguri	620	
Grant for the maintenance of telegraph line between Rampur Hât and Dumka ...	1,835	
Grant for Police guards employed in keeping watch and ward at Writers' Buildings ...	1,632	
Grants to the Bankipore and Howrah Municipalities for the repairs of roads	2,002	
Grants to the several District Funds for Public Works	1,74,857	
Grants to the District Road Accounts for ditto	16,523	
Grants to the District Road Funds for ditto	26,000	
		2,22,969
Net deduction ...		1,89,160
Grand Total		25,53,840

An additional grant of Rs. 95,000 will be made to the Public Works Department to enable them to undertake the repair of the Darjeeling Hill cart road, and the Teesta Valley road which have been damaged by rain and floods (Rs. 50,000), to carry out repairs urgently required for the Eden Sanitarium Darjeeling (Rs. 30,000), and for the construction of buildings at the Alipur sub-division in the Jalpaiguri district (Rs. 15,000). The total grant will now stand at Rs. 26,49,000.

75. *Civil Works in charge of Civil Officers.*—The difference, Rs. 32,000, between the estimates of the Local Government and the Government of India represents the special provision for the construction of mule bridges over the Tuichang, Phyrang, and Sailang rivers in the South Lushai Hills. The estimate will be retained.

76. *Contributions.*—The sanctioned grants to the various Incorporated Local Funds already amount to Rs. 11,76,746, thus—

	Rs.	Rs.
To the District Funds—		
Annual grant to establish equilibrium between receipts and charges transferred from Provincial account	4,45,035	
Annual grant for the maintenance of certain Provincial roads	2,29,720	
Annual grant for the maintenance of Imperial Civil Works	7,542	
Annual grant for the maintenance of Provincial Civil Works	1,27,926	
Annual grant for allowance to Engineers ...	10,200	
Ditto to the Malda District Board for establishment	600	
Annual grant to the Malda District Board for maintenance of embankments	637	
Annual grant to the Cuttack District Board for repairs of road	862	
Special grant to the Burdwan District Board for arrears of contribution	24,843	
Special grant to the Howrah District Board for arrears of contribution	9,699	
Special grant for Imperial Works in 1893-94 ...	21,403	
Ditto for Provincial Civil Works in 1893-94	1,79,344	
		10,57,811
To the District Road Funds—		
As shown in the Incorporated Local Funds Budget for 1892-93	36,403	
Less amount to be provided by the Board of Revenue from the grant for the management of estates	2,500	
		33,903

To the District Road Accounts—		
As shown in the Incorporated Local Funds Budget	87,032	
Less grant to the Chittagong Hill Tracts to be met from the Public Works budget ...	2,000	
		85,032
Total ...		11,76,746

The Lieutenant-Governor has acceded to an application from the District Board of Bhagalpur to be reimbursed Rs. 21,881, being the expenditure incurred by that body on relief works during the scarcity in 1891-92 in excess of the budget provision, and has agreed to make available Rs. 10,000 for expenditure by the Commissioner of Dacca on Famine Relief in that Division during the current year. The total grant will now therefore be placed at Rs. 12,09,000.

77. *Closing balance.*—According to the estimates passed by the Government of India, it was expected that the year would close with a credit balance of Rs. 20,72,000. According to the estimate now adopted, the closing balance will be Rs. 21,75,000 against an opening balance of the year amounting to Rs. 22,47,000. The balance will thus be reduced by Rs. 72,000, and this represents the excess of expenditure over receipts of the year. The total estimate of expenditure now adopted exceeds, however, the total estimate of the Government of India by a net sum of about 4¾ lakhs, which includes 1¼ lakhs for Exchange Compensation Allowance, ½ lakh for grants-in-aid of Famine Relief and other expenditure of District Boards, 1 lakh for urgent public works, ½ lakh as part of the purchase money of the Nimbong Cinchona Plantation, ¾ lakh for increase under Stationery and Printing, and ¼ lakh for revaluation of cesses in progress.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 18th November, 1893.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.

* Means for six days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01
rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, *i.e.* from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 18th of November 1893.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 16th October 1893. Mean for district.	Normal mean.	Variation.	District.

Explanation.—.. indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 21st November* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 18TH OF NOVEMBER 1893.

DURING the previous week conditions had been disturbed in Bengal, due primarily to a small storm which had occurred off the South Madras coast. After the storm had broken up a wave of humid winds had advanced northwards along the west coast of the Bay, and had spread over Bengal, giving heavily-clouded skies and light rain. This advance of humid winds was, however, only temporary, and at the close of the week a dry northerly and north-westerly wind current was driving back the moist winds, and weather was again rapidly becoming of ordinary north-east monsoon condition. On the 12th, or the first day of the week under review, light northerly winds were blowing over the whole province, pressure was increasing slowly, and had become in excess of the normal by amounts usually ranging from about 0·06 inch to 0·08 inch. Temperature and humidity, on the other hand, were falling in almost all districts, the decrease in humidity being large at the western stations. The sky was lightly clouded in all districts except Orissa, where it was still heavily clouded, and rainfall had entirely ceased over the province except in Orissa and in the Darjeeling Hills, where a few local falls were reported, the heaviest being 0·25 inch at Gaa·ong. On the 13th again pressure was rising slowly, while temperature and humidity were falling. Winds on the whole were rather less steady than on the previous day, and the sky had become cloudless except over parts of South Bengal and Orissa. One or two local showers were also reported in Orissa and in the hills. On the 14th the increase of pressure had ceased, and a slow to moderate fall was reported. Winds had become variable in direction in Bihar, but elsewhere they were northerly, while a decided increase had occurred in humidity and cloud proportion, and a smaller increase in the temperature. Rainfall, however, had to a great extent ceased. On the 15th pressure was increasing, and had become above the normal by about 0·04 inch to 0·07 inch, while the mean temperature was usually in slight excess. Winds generally varied from north-westerly to north-easterly, and rainfall was absent except for some local showers in the hills. On the 16th these conditions continued practically unaltered, except that the mean temperature was becoming slightly below the normal over the west of the province. On the 17th a fall of pressure equalling about 0·05 inch had occurred, but the mean temperature had again become in slight excess over the greater part of the province. On the 18th pressure continued to fall by about 0·08 inch to 0·05 inch, and the distribution of pressure had become almost normal, the variations from normal pressure being generally less than 0·02 inch, though they were still in slight excess. The mean temperature also continued in slight excess over the greater part of the province, though at the extreme western stations very small defects were registered. For the second half of the week, except for two or three local showers in the hills, the whole province continued rainless, and light northerly winds with practically cloudless skies prevailed generally over the province.

Pressure.—For the greater part of the week pressure, as previously shown, was above the normal. Hence the mean for the week has been in decided excess, the amount of excess usually varying from 0·05 inch to 0·07 inch.

Temperature.—The mean temperature for the week in Bihar and Chota Nagpur has been almost normal, but in the remaining divisions an excess of about half a degree has been registered. For the whole province the mean for the week has been 0·3° in excess.

The actual temperatures registered during the week and their variations from the usual temperature for the present season are most clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. It will be seen that in eight out of the nine stations the day temperatures have been rather lower than usual, while in seven out of nine the night or minimum temperatures have been in excess:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 18th November 1893.

	Normal mean maximum temperature for the week ending 18th November.	Actual mean maximum temperature for the week ending 18th November 1893.	Variation of actual mean from the normal. Rainfall.—Except for a few unimportant showers at some stations in Orissa and in the Darjeeling Hills, the whole province has been rainless throughout the week.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 18th of November 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th Oct. 1893.	
			Of highest of each day.	Of lowest of each day.	Of mean of each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

	Inches.
The total fall of rain from 12th to 18th November 1893	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·05
The total fall from 1st January to 18th November 1893	85·23
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·14

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; ⌓, dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 20th November 1893.

C. LITTLE,
For Meteorological Reporter to the Govt. of India.

REPORT ON THE STATE OF THE SALT MARKET FOR THE SECOND QUARTER OF 1893-94.

No. 987B., dated Calcutta, the 25th November 1893.

From—T. INGLIS, ESQ., Secretary to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

SALT.

HON'BLE D. R. LYALL, C.S.I.

I AM directed by the Board of Revenue to submit the following report on the state of the salt market for the second quarter of 1893-94, comprising the months of July, August, and September 1893.

2. The quantity of salt of every description cleared during the quarter under report amounted to 24,44,590 maunds, against 24,33,242 maunds in the previous quarter, and 26,38,321 maunds in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 57,21,769, against Rs. 56,96,847 in the previous quarter, and Rs. 61,91,983 in the corresponding quarter of the previous year. In all cases fractions are omitted.

3. The quantity of excise salt removed from the golas in Orissa during the quarter under review, and the quantity which remained in store at the close of the quarter, are shown in table I:—

TABLE I.

Total ...	...	32,749 0	243 0
Sales during the quarter	...	15,385 0	71 0
Wastage	...	198 0	......
Total ...	...	15,583 0	71 0
Balance at close of the quarter	...	17,166 0	172 0

4. The total sale of excise salt during the quarter under review amounted to 15,456 maunds, against 2,596 maunds in the previous quarter, and 27,734 maunds in the corresponding quarter of the previous year. The total amount of excise salt on which duty was paid during the quarter was 15,467 maunds.

5. The subjoined table shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter under review compared with the figures of the corresponding quarters of the previous two years:—

* Means for six days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01
rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, *i.e.* from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 25th of November 1893.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. RAINFALL. Of week. Mean for district.	Of week. Normal mean.	Of week. Average number of rainy days.	Of week. Normal number of rainy days.	Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 16th October 1893. Mean for district.	Since 16th October 1893. Normal mean.	Since 16th October 1893. Variation.	DISTRICT.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least ·1 inch of rain has fallen.

CALCUTTA, *the 28th November* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 25TH OF NOVEMBER 1893.

At the close of the previous week conditions were of ordinary monsoon character over Bengal. In the Arabian Sea, however, a small cyclonic storm had formed, which was advancing northwards. On the other hand, in the Bay conditions were normal, and only light monsoon weather prevailed in the south of the Bay and fine weather over the remainder. On the 19th, or the first day of the present week, conditions remained practically unchanged in Bengal, pressure having risen slowly at nearly all stations; while, on the other hand, temperature was usually falling, and both pressure and temperature were usually in slight excess. The small but rather severe storm in the Arabian Sea continued to advance northwards towards the Runn of Cutch. In the Bay of Bengal, also, winds at the eastern stations began to strengthen, and disturbed and unsettled weather, or perhaps even a small storm, was formed in the south-east of the Bay on this day. On the 20th the barometric changes over Bengal were exceedingly small, the fall of temperature had practically ceased, while humidity was increasing at many stations, and the sky was also clouding over to a certain extent. The storm from the Arabian Sea had struck the Kathiwar coast near Verawal, and was giving very unsettled weather with rain over a large part of North-Western India. In the Bay of Bengal, also, the small storm or disturbed weather commenced to move in a westerly direction from the south-east of the Bay, and hence conditions over a large area were very disturbed. On the 21st the conditions in Bengal began to show the effect of the disturbances, the barometric changes were decidedly irregular, temperature was increasing rather rapidly, while humidity was also decidedly high at the majority of stations. The disturbed conditions and rainfall due to the storm from the Arabian Sea had spread over Central India and the North-Western Provinces, and the rainfall had even reached the Bihar stations, where rather numerous showers were reported, while a few light showers also fell in East Bengal. The disturbance in the Bay apparently continued its westerly movement across the south of the Bay. On the 22nd the increase of pressure continued over a large part of Bengal, while temperature was still rising at the southern and eastern stations, though a fall had set in at the western and northern stations. Wind directions had become decidedly irregular, humidity was very high in all districts, while the sky was considerably clouded over a large part of the province. Showers also were again reported in Bihar and Chota Nagpur. In the south of the Bay the small storm was approaching the South Madras coast. On the 23rd a slight to moderate fall of pressure had occurred, while temperature and humidity were beginning to decrease at the majority of stations. Winds were also again becoming more northerly, and conditions were much more settled, so that practically no rain was reported on this day. In the south of the Bay the storm had approached quite close to the coast, but it was of small size and not very intense, though it gave north-easterly gales and very heavy rain along the South Madras coast. On the 24th, again, the barometric changes over Bengal were small, and the pressure distribution was nearly normal, winds were usually north-westerly and northerly, while temperature and humidity had again increased at many stations, and the sky was also moderately clouded over a large part of the province. The small storm from the Bay had passed westward across the south of the peninsula, and had entered the Arabian Sea, so that conditions in the Bay began to improve. On the 25th a decidedly rapid increase of pressure had occurred over Bengal, and pressure had become in considerable excess. Temperature was also above the normal at almost all stations by amounts increasing towards the west of the province, where the excess in the mean temperature was about 6° to 7°. Winds also were rather more variable than they had been, and a few rain showers were reported in North Bengal. In the south of the Bay the disturbed weather, due to the small storm, had to a great extent disappeared.

It will be thus seen that weather conditions generally during the week have been very decidedly disturbed by the existence of the two storms, one from the Arabian Sea and one in the Bay of Bengal. Hence, as is usual during disturbed weather, temperature and humidity have been decidedly high in Bengal, the sky has been also much more clouded than usual during the north-east monsoon months, and light showers have fallen in many districts. At the close of the week, however, the disturbed conditions due to the two storms were very rapidly passing away.

Pressure.—The mean pressure for the week has been in excess of the normal in all districts, the usual excess equalling about 0·03″ to 0·05″. The excess has usually been smallest at the extreme western stations.

Temperature.—Has been very decidedly above the normal throughout the week. The average excess for the whole province has equalled no less than 2·7°, and it has been largest in the western districts, where in Chota Nagpur it has been as much as 4°.

The actual temperatures registered during the week, and their variations from the usual temperature for the present season, are most clearly seen in the table below, where the average maximum, minimum, and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period.

The main excess, it will be seen, has occurred in the night or minimum temperatures, which at such stations as Patna, Gaya, and Purnea have been about 7° higher than usual:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 25th November 1893.

	Normal mean maximum temperature for the week ending 25th November.	Actual mean maximum temperature for the week ending 25th November 1893.	Variation of actual mean from the normal. Rainfall.—The division receiving the largest fall has been South Bihar, which has averaged 0·11 inch. Smaller falls averaging only a few hundredths of an inch have also occurred in North Bihar and in East and North Bengal. The falls, however, have been of little practical importance.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 25th of November 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
			Averages for week.				Of week.			Rainy days.			Since 1st of month.		Since 16th Oct. 1893.	
	Highest observed during week.	Lowest observed during week.	Of highest of each day.	Of lowest of each day.	Of mean for each day.	Average mean of week above or below normal mean of week.	Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

The average temperature of the corresponding period for 24 years, Surveyor-General's Office	72·5
The extreme variation of temperature	19·9
The maximum temperature	82·4
	Miles.
The highest velocity of the wind in one hour	5
	lbs.
The highest pressure of wind on one square foot	?
	%
The mean relative humidity	80
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	71
	Inches.
The total fall of rain from 19th to 25th November 1893	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·01
The total fall from 1st January to 25th November 1893	85·23
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·15

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; △, dew; ≡, fog.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;

THE CANAL REVENUE REPORTS FOR 1892-93.

No. 1284*I.A.*

GOVERNMENT OF BENGAL—IRRIGATION DEPARTMENT.

Accounts.

Dated Calcutta, the 28th November 1893.

RESOLUTION.

READ—

The Canal Revenue Reports for 1892-93, and the Chief Engineer's note on the same.

THERE are in Bengal four canal systems which are classed as Major Works. Three of these systems were mainly intended for irrigation, whilst the fourth, the Hijili Tidal Canal, is a purely navigation canal. The Sone and Midnapore Canals are practically complete; the Hijili Canal is also finished, except two works, remodelling the Kalinagar lock and the pipe across the Russulpur river, which are still under consideration. As regards the Orissa Canals, the extension of the distributary system and the completion of the drainage and protective works in connection with them are still in progress. It is expected that by the 1st of July 1894, the new distributaries will be in a state admitting of their being used for irrigation, and that by the close of that year they will be practically finished. The minor works of which Capital and Revenue accounts are kept by the Calcutta and Eastern Canals, the Orissa Coast Canal and the Saran Canals are finished works. There are other minor works for which Revenue accounts only or no separate Capital or Revenue accounts are kept.

2. The total length of canals in Bengal is 916 miles, of which 495¼ miles are for irrigation and navigation, 242¾ miles are for irrigation only, and 178 miles are navigation channels from which there is no irrigation. There are in addition 2,431¼ miles of irrigating distributary channels. The area at present irrigable is 1,492,484 acres, of which 666,490 acres were irrigated during the year. The canals were during the year used by 219,946 boats carrying cargo valued at Rs. 13,69,79,995.

3. The canals of which Capital and Revenue accounts are kept have cost Rs. 7,41,72,616 to construct. Of this sum Rs. 6,07,93,546* has been provided from loan funds, Rs. 1,05,12,677 from Provincial revenues, and Rs. 8,66,000 contributed by the Government of India from the Famine Relief and Insurance Fund.

The outlay on each canal chargeable to Capital account during the last two years and up to date is shown in the table following:—

Works.	During 1891-92.			During 1892-93.			To end of 1892-93.

Total ...	18,83,347	13,91,020	94,373	14,85,393	3,97,954

The net revenue for the year, after providing for all charges, direct and indirect, but excluding interest, has been Rs. 3,97,954 against Rs. 1,60,673 for the year preceding. The interest charges payable from Provincial revenues amounted to Rs. 24,42,363.

The net revenue is the highest yet earned, that most nearly approaching being the year 1885-86, when it amounted to Rs. 3,75,981. With the exception of that year the revenue has never previously exceeded the amount realized in 1891-92, *viz.*, Rs. 1,60,673.

5. The areas irrigated during the past five years are shown in the table below :—

Year.	Orissa Canals.				Midnapore Canal.				Sone Canals.				Total.

* Exclusive of lands surreptitiously irrigated for which leases were granted in subsequent years.

Owing to the more favourable character of the season the area irrigated was less than in the year preceding, but it is still greatly in excess of the average. The decrease was wholly in season or yearly leases, the area under long leases having been 489,512 acres in 1891-92, and 519,666 acres in 1892-93. The main decrease has been in *rabi* irrigation from the Sone Canals. Water is only in extensive demand for that crop when the rains fail altogether, which seldom happens. The demand for water for rice irrigation is, however, rapidly, more especially in Bihar, becoming independent of the character of the season, the increased yield of the crops where water can be supplied, whenever required, more than compensating for the charges levied. As a consequence of the lesser area under irrigation, the water-rates due on crops irrigated during the year, fell from 13,77,864 to 11,95,358.

6. Allusion was made in last year's resolution to changes which had been made in the administrative arrangements for collections. During the year under review the collections from the Sone and Orissa Canals were managed by a Deputy Collector in charge of a Revenue Division working directly under the Superintending Engineer, and this plan has been introduced as regards the Midnapore Canal collections from the 1st of April 1893. The following table, which extends from 1885-86, shows that the improvement in the collections which was last year noticed has been more than maintained:—

Year.	Balance at beginning of year.	Balance at end of year.	Remissions, including cancelled demand statements and extraordinary remissions.	Irrecoverable items.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
1885-86 ...	8,84,289	5,33,175	1,41,162	41,229
1886-87 ...	5,33,175	3,69,789	57,375	22,612
1887-88 ...	3,69,789	5,59,883	32,356	19,796
1888-89 ...	5,59,883	5,79,987	42,666	14,074
1889-90 ...	5,79,987	5,09,188	80,282	20,592
1890-91 ...	5,09,188	4,72,113	48,674	16,476
1891-92 ...	4,72,113	4,04,120	38,421	12,126
1892-93 ...	4,04,120	2,26,174	61,576	11,168

As regards the Orissa Canals, the Superintending Engineer observes:

"Babu Jagdam Sahai, the Deputy Collector in charge of the Revenue Division, deserves the greatest credit for the immense improvement in the collections; this has, to my knowledge, only been effected by detailed and constant personal attention."

Both the Commissioner of Patna and the Superintending Engineer state that they consider the result of the collections very creditable to the Deputy Collector, Babu Saroda Prosaud Chatterjee, and the staff working under him. The remissions during the year have been swollen by Rs. 9,107, which was embezzled by tahsildars in the Sone Circle and has this year been finally written off, and by Rs. 38,851 remitted by the Deputy Revenue Superintendent of the Orissa Canals, partly in accordance with rule and partly under circumstances which were, when reported, unfavourably noticed by Government. Apart from these items the sums remitted and written off as irrecoverable compare favourably with previous years, except in the case of remissions by the Executive Engineers of the Sone Canals, which indicate a slight deterioration in the accuracy of the assessments.

7. The collections under the head "Navigation" were Rs. 30,193 less than in the year preceding, but otherwise considerably in excess of an average year. Particulars showing the collections from each Canal will be found in the table following:—

YEAR.		Orissa Canals.	Midnapore Canal.	Hijili Tidal Canal.	Sone Canals.	Total.	Miles open.	Tollage per mile.
1		2	3	4	5	6	7	8
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1887-88	...	66,628	1,26,574	40,406	50,984	2,84,592	490	580·7
1888-89	...	69,830	1,46,760	53,910	52,162	3,22,662	49 ½	649·9

1891-92	...	1,20,761	1,32,572	36,348	57,339	3,47,020	524¼	662·2
1892-93	...	1,00,503	1,14,141	52,180	49,996	3,16,827	524¼	604·3

8. Turning to the canal systems separately it was last year noticed that financially a decided improvement had been made as regards the return from the Orissa Canals. In the preceding five years the average deficit had exceeded two lakhs of rupees yearly. In 1891-92 the excess of working expenses above revenue was Rs. 52,164, whilst in 1892-93 the deficit has been reduced to Rs. 8,132. This improvement has been obtained in spite of increased working expenses caused by repairs to damages caused to the canals by the extraordinary flood in the river Mahanadi of July 1892, and by the cyclone of October of the same year. The working expenses amounted to Rs. 5,05,507, which is greatly in excess of the expenditure of the previous year, Rs. 4,23,086, and of the average of the five years preceding, Rs. 4,70,505. As already noticed, the arrear balance has been reduced from Rs. 2,33,704 on the 1st of April 1892, to Rs. 89,816 on the 1st of April 1893. This improvement was mainly effected by arranging that certificate cases should be more promptly disposed of. The number of cases pending at the commencement of the year was 4,723, which, with 7,991 instituted during its currency, gives a total of 12,714. Of these 11,183 were disposed of by being fully satisfied and 552 cancelled. Of the cancelled certificates 70 only were filed during the year; the remainder were old cases of which even the records were difficult to trace. The balance remaining at the close of the year was 979 only. Babu Jagdam Sahai remarks:

"I think it worth stating here that although these numerous old cases were disposed of during the year, there was not a single instance in which any defaulter was sent to jail or his immovable property sold."

The certificate office was inspected both by the Collector of Cuttack and the Commissioner of Orissa, the latter, Mr. Toynbee, remarking:

"On the whole I am much pleased with the Deputy Collector's work. He has done wonders since he joined, and I see on all sides ample evidence of order, method, and business capacity."

The Lieutenant-Governor trusts that, now the outstanding balances have mostly been collected, there will be a marked diminution in the number of certificate cases. Progress has been made more especially in the Brahmini-Byturni Division in executing new leases from which non-irrigable lands and lands requiring irrigation occasionally only have been excluded; but until all the old leases in which these areas are determined by an annual enquiry, fall in, there will remain the fluctuating demand which entails so much annoyance to the cultivator and labour to the staff. The Lieutenant-Governor notices with pleasure that there was practically no unauthorized irrigation, and that a good beginning has been made in the way of a more systematic regulation and distribution of the water-supply of the canals. The heavy working expenses, which were mainly due to breaches caused by a flood in the river Mahanadi, equal to the highest on record, were unavoidable, and it is noticed that the opportunity has been taken to raise the canal flood banks where necessary.

9. The chief feature in the year's working of the Midnapore Canal was the excessive demand for water in the latter part of the season. The average discharge of the Cossye river during October was 700 cubic feet per second only, and on the 23rd of that month it fell to 138 cubic feet per second. The area irrigated, 91,217 acres, was in excess of any year since 1883-84. The Superintending Engineer states that, except a few acres on high lands, which it was impossible to reach, the whole of the leased area received from two to four waterings during the season. The outturn on most distributaries was magnificent, whilst the unirrigated crops to the south and west of Midnapore almost entirely failed. The result of these good crops and high prices was that the number of certificates filed for the recovery of water-rates fell from 3,428 in 1891-92 to 1,223 in 1892-93, and the balance pending at the close of the year from 449 to 356. The balance of unrealized arrears due at the close of the year was, considering the demand high, Rs. 48,567, though it compares favourably with that due at the commencement of the year, Rs. 58,972. It has since been materially reduced. The net revenue was Rs. 84,451 in 1892-93, against Rs. 18,371 in 1891-92, chiefly owing to the working expenses having fallen from Rs. 2,66,326 to Rs. 1,95,550. The diminution in the working expenses was chiefly due to the thorough repairs carried out in 1891-92, when there was a long closure, but some part of it is attributable to the close supervision exercised by the Executive Engineer.

10. The Hijili Tidal Canal is in the same condition as last year, no steps having been taken towards constructing the pipe across the Russulpur river or the new lock at Kalinagar, the two works included in the remodelling scheme which are yet incomplete. It is probable that an extra supply channel will be substituted for the pipe, and the possibility of making alterations in the existing lock at Kalinagar in place of building a new one is now under investigation. The further deterioration of the crossing of the Russulpur river appears to have been arrested by the Balliaghai drain, which is now regularly used as a navigation canal. The net revenue was Rs. 20,301 against a deficit of Rs. 13,768 in 1891-92, an improvement due to the canal not having been closed during the year, there being consequently an increase in the revenue and a decrease in the working expenses.

11. The net revenue of the Sone Canals was Rs. 3,01,334 in 1892-93 against Rs. 2,08,234 in 1891-92, a result due to the collections on account of the rabi irrigation of the previous year. The area irrigated was 410,761 acres in the year under review against 474,723 acres in that previous, and the net revenue calculated on earnings was Rs. 1,48,422 against Rs. 3,78,516 in the year preceding. There is still a steady increase in the area under long lease, as will be apparent from the statement following, which shows the area under long and short leases during each of the last five years:—

	1888-89.	1889-90.	1890 91.	1891-92.	1892-93.
Long leases ...	200,102	224,268	223,556	234,791	271,966
Short leases ...	155,807	81,014	57,458	239,932	138,795
Total ...	355,909	305,282	281,014	474,723	410,761

The main reason of the increase in the working expenses from Rs. 6,97,840 in 1891-92 to Rs. 7,51,247 in 1892-93 was the silt clearance of the lower reaches of the Arrah Canal, which is only carried out once in five or six years, but there were other contributing causes amongst them, being the payment during the year of the fees due to headmen on the large area irrigated during the previous year. There has been a satisfactory decrease in the number of certificate cases from 3,178 in 1891-92 to 2,903 in 1892-93. There were 153 cases pending at the close of the year, of which all but eight had been disposed of by the 1st of September. The Commissioner of Patna remarks that—

"This is very satisfactory, as out of a total demand of Rs. 10,62,176 for the year, coercive measures had to be adopted for the realization of only Rs. 34,272."

Last year the Lieutenant-Governor expressed some dissatisfaction with the late date on which the demand statements, more especially for the rabi crops, reached the Deputy Collector. It is exceedingly unsatisfactory to learn that in 1892-93, so far from there being any improvement, the demand statements were forwarded to that officer at a later period of the year, though the area irrigated was much less. In 1891-92 about one-third of the rabi demand statements were forwarded for collection before the close of the year. In 1892-93 this proportion had fallen to one-eighth. It has already been remarked that the remissions on account of inaccurate assessments were slightly in excess of those granted in 1891-92, and altogether His Honour can come to no other conclusion than that the Divisional Engineers failed to exercise that care and energy which is indispensable if accurate demand statements are to be supplied to the collecting officers at the earliest possible date. The falling off is inconsiderable, but it is necessary that remedial measures should at once be taken, it being borne in mind that though promptitude is highly desirable, accuracy is of even more importance. The Lieutenant-Governor is glad to see that Mr. Buckley is able to report an improvement in the arrangements for distributing water and also in the state of the village channels.

12. The yearly increase in the area under long lease for the Sone Canals has already been noticed, as also the fact that the demand for water in the rice season is rapidly becoming independent of the rainfall. The Superintending Engineer gives the following table based for the year 1892-93 on 87 experiments, from which it appears that the yield of irrigated land cultivated with rice shows a tendency to produce heavier crops the greater the number of years it is continuously irrigated:—

Weight of grain from "good" rice crops irrigated with canal water.

	1892-93.		1891-92.		1890-91.		1889-90.	
	Mds.	Srs.	Mds.	Srs.	Mds.	Srs.	Mds.	Srs.
Sone Circle average ...	37	4	36	14	32	2	31	19

Mr. Buckley makes the following remarks:—

"It is rather remarkable that the average results of "good" rice crops show a steady improvement year by year, and this appears to suggest that one result of irrigation with the silty waters of the Sone, instead of the clear water from ahars and from rainfall, is to improve the soil and thus produce superior crops. It would be straining these figures too far to say that they prove this proposition, but they are certainly evidence in that direction. The fact that silt is valuable to the fields needs no proof; the magnificent crops which have been produced in Egypt for 6,000 years or more, with no deterioration of the soil, have established that fact. It is known that irrigation from the Sone Canals insures the rice crop in bad years from failure; it did so in 1888-89: it is known that the irrigation with canal water of a field not previously watered by the canals increases the outturn. If it is also true that continuous irrigation for a series of years produces a further increase of crop by improvement of the soil to even half the extent which the above table indicates, the value to the landowner and raiyat of canal irrigation is very vastly in excess of the water-rate paid by the latter. It was asserted at the time of the Sone Canals Commission in 1887-88 that not only was the crop produced by the aid of canal water inferior, but that the longer the land was irrigated, the worse the crop became. The facts which have been collected from these crop experiments are strong evidence that these statements were false, and stronger evidence is found in the fact that the time has already come when the canals in a period of even ordinary demand are not able to satisfy the demands of the people for rice irrigation."

13. The table following gives the financial results for the year of the canals classed as minor works:—

14. The irrigation canals classed as minor works are the Saran, Eden, and Madhuban Canals.

The Saran Canals have never been satisfactory, and orders to close them were issued in the latter part of the year 1890. In March 1891 an agreement was entered into with the proprietors of the Sadowa and Moniara Indigo Concerns, under which they were kept open for the year 1891-92 on the basis of the proprietors paying a sum equal to their working expenses, omitting establishment charges. This agreement, slightly modified, was continued during 1892-93. There have been difficulties connected with the agreement, and it will not improbably be necessary to close the canals on the 1st of April 1894.

The Eden Canal was constructed for the purpose of supplying the districts of Hooghly and Burdwan with wholesome water for drinking and domestic purposes. The water-supply of the town of Burdwan is derived from it. The canal has frequently in years of scarcity been used for the purpose of saving crops, comparatively small sums being received by private agreement as water-rates. The Government of India in 1875 absolutely refused to permit the canal to be carried out as an irrigation work unless arrangements were made to recover an adequate return in the way of water-rates. It was not found possible to devise any scheme under which a sufficient return could be obtained, and the project as an irrigation work was therefore dropped.

In April 1882 an estimate amounting to Rs. 8,38,533 was sanctioned for constructing the canal with reference to its utility as a work for supplying water to the silted-up river channels in the districts named. In order to secure to Government power to prevent the channels being obstructed, they were declared under section 8 of Act III (B.C.) of 1876, but the regularity of the proceedings is contested by some of the landholders interested. As regards the

masonry works, from which only a supply of water can be obtained and the artificial canal, there is no doubt as to the proprietary rights of Government. During 1892-93 the demand for water was pressing. Where canal-water could not be supplied, the rice crops failed wholly or in part, and 71,333 acres were irrigated on agreements being executed in a form prepared by the Solicitor to Government. The Lieutenant-Governor has had many petitions to extend and improve this canal, but there are grave practical difficulties mostly connected with the rights of the owners of the channels through which only water can be supplied, and moreover the discharge of the main canal is insufficient to irrigate more than the area to which water was supplied in the year under review. The landholders who have proprietary interests in the river channels have lately shown a disposition to meet Government in a conciliatory spirit, and it is hoped that an arrangement may be effected under which water will be made available for irrigation under regular rules, and some return obtained for the public money expended.

The Madhuban Canal is a small irrigation work in the Champaran district on the borders of Nepal from which 6400 acres were irrigated in 1892-93. There are no distributaries and it is improbable that it will be worthwhile to construct any.

15. The remaining minor works are canals for navigation, viz., the Calcutta and Eastern Canals, the Orissa Coast Canal, and the Nadia Rivers.

The report of the Committee on the Calcutta and Eastern Canals referred to in last year's resolution was not finally disposed of until the 1st of July 1893, when the system of measurement was altered, so as to make it more nearly correspond with the actual weight of cargo carried. At the same time the rate of tolls which have always been exceedingly moderate were adjusted so that the revenue will not suffer. The proposal to impose toll on loaded boats returning from Calcutta has been dropped, as it was found that the revenue derived would be small and it would entail stopping and examining all boats, only a fractional part of which carry cargo on the homeward journey. The toll levied was 0·68 per cent. on the value of the cargo carried. The net revenue for the year was Rs. 2,27,937 against Rs. 1,81,820 in the preceding year, or 4·2 per cent. on the capital expenditure. The increased profit was wholly due to a decrease in the working expenses, the gross revenue owing to slackness of trade being less than in 1891-92. These canals are in active competition with the Eastern and Central Bengal State Railways, which provide an alternative route from nearly all the places served. Of late years there has been a tendency for jute and other valuable goods to be sent by railway, but there are at present indications of a desire to return to the canals, a class of cargo boats more suitable for navigation having been constructed. The continued reduction in the number of missing tickets, the number of which has fallen from 3,086 in 1883-84 to 169 in 1892-93, may be taken as a sign of careful administration.

16. The orders of the Lieutenant-Governor as to the inspection of offices were only issued in January last, and the scale laid down has not in all cases been fully worked up to. His Honour expects that during the current year all divisional offices and subdivisional and toll offices, to the extent laid down, will be inspected by Superintending Engineers, and that Executive Engineers will not fail to inspect every office subordinate to them. The record of tours is satisfactory, the requirements of Government, except in one instance for which there were special reasons, having been fully met.

17. The Lieutenant-Governor considers that the Superintending Engineer's reports and the Chief Engineer's note thereon show that the Officers and Subordinates of the department have done good work during the year. In some respects there have been shortcomings of which notice has been taken in this Resolution, but in the main there has been a distinct advance both as regards assessments and collections, more especially the latter. His Honour notes the commendation bestowed by the Chief Engineer on the Engineers and Subordinates of the Orissa Circle, more especially on Mr. C. A. White, Executive Engineer, and also on Rai Bama Charan Paramanic Bahadur, Honorary Assistant Engineer, Eden Canal. To Babu Saroda Prosad Chatterjee, Deputy Collector Revenue Division, Sone Canals, the Lieutenant-Governor's thanks are due for the success of the arrangements by which the collections in the three districts of Patna, Gaya and Shahabad have been concentrated in one office.

The encomiums pronounced by the Commissioner of Orissa and the Superintending Engineer on the work of Babu Jagdam Sahai, Deputy Collector, Revenue Division, Orissa Canals, are in His Honour's opinion well deserved, as that officer has brought order out of something like chaos, and with a minimum of coercive measures, recovered arrears which had been left outstanding for years. Finally the Officiating Lieutenant Governor desires to specially thank the Chief Engineer, Mr. Odling, for the ability and zeal he has brought to bear on his important duties throughout the year.

ORDER.—Ordered that a copy of this Resolution and of the Chief Engineer's note and its accompaniments be submitted to the Government of India in the Public Works Department, and published in the *Calcutta Gazette*. Also that it be circulated to other Governments, and to all Departments and Officers of this Government as usual.

By order of the Lieutenant-Governor of Bengal,

G. C. MACONCHY,

Under-Secretary to the Government of Bengal.

Government of Bengal.

IRRIGATION DEPARTMENT.

REVENUE REPORT.

Note by C. W. ODLING, ESQ., M.E., M. INST. C.E., *Chief Engineer, on the Canal Revenue Reports of Bengal for the year* 1892-93.

DURING the year 1892-93, the Capital expenditure on Irrigation Works, for which Capital Accounts are kept, amounted to Rs. 5,31,969 for direct and Rs. 12,919 for indirect charges:—

	Direct charges.	Indirect charges.	Total.
	Rs.	Rs.	Rs.
Capital expenditure not charged against Revenue	4,57,786	11,541	4,69,327
Minor Works and Navigation ...	74,183	1,378	75,561
Total ...	5,31,969	12,919	5,44,888

2. The total Capital outlay at the end of the year 1892-93, including indirect charges, was as follows:—

	Direct charges.	Indirect charges.	Total.
	Rs.	Rs.	Rs.
Major Irrigation Works—			
Productive Public Works ...	6,12,87,962	17,16,963	6,30,04,925
Minor Works and Navigation—

* Exclusive of lands surreptitiously irrigated for which leases were granted in subsequent years.

The year's working and its financial results will now be dealt with separately for each of the canal systems of the province, as in previous years.

GENERAL.

In all statements showing totals of receipts or expenditure, the figures are those of the Examiner of Accounts. In dealing with details the figures of the Commissioner or of the Superintending Engineer have been taken.

ORISSA CANALS.

10. The Capital, Interest, and Revenue Accounts of these canals are given below:—

CAPITAL ACCOUNT.

I.—CAPITAL ACCOUNT.

HEADS OF ACCOUNT.	Outlay during 1892-93.	Outlay to end of 1892-93.
1	2	3
DIRECT CHARGES.	Rs.	Rs.
I.—Works	3,16,566	1,80,92,197
II.—Establishment	61,011	45,25,554
III.—Tools and plant	3,184	20,23,915
IV.—Suspense accounts	(—)17,477	1,46,314
Loss by exchange	...	2,68,070
Total ...	3,63,284	2,50,56,050
V.—*Less*—Receipts on Capital account	69	86,169
Net total Direct Charges ...	3,63,215	2,49,69,881

Capitalization of abatement of land revenue	62	33,130
Leave and pension allowances	8,542	5,29,704
Total Indirect Charges ...	8,604	5,62,834

The principal works charged to Capital account which were in progress during the year were:—The extension of the Taldunda Canal from 28 to 52 miles, the remodelling of the existing Taldunda Canal from Biribatty to Tarpore, the extension of the Byturni right embankment from 7th to 20th miles, and the Burra Khursooa left embankment, a large syphon under No. 4 distributary, and a self acting sluice and other works in connection with the Bhimiai Had drainage. The Daib embankment was completed, and most of the refuge mounds on Sunkaresahi island finished. The works in connection with the Sukendapat drainage scheme were also continued, and good progress was made with the distributaries, several of which were finished during the year.

			Less—Refunds of revenue.	79	283
INDIRECT CHARGES ...	27,070	30,283	Net total receipts	3,70,922	4,97,375
			Deficit ...	52,164	8,132
Total Working Expenses	4,23,086	5,05,507	Total ...	4,23,086	5,05,507

NOTE.—The details by heads of expenditure for the year 1892-93 and nine preceding years will be found in the table given in paragraph 12 following:—

The net result compared with previous years is very satisfactory. Omitting indirect charges, the receipts have exceeded the expenditure by Rs. 22,151; including them the deficit is only Rs. 8,132. This result is due to the recoveries of arrears of past years on account of water-rates and miscellaneous revenue. The receipts under these two heads are the highest on record.

The increased expenditure was mainly due to repairs to the damages caused to the canals by the flood of July 1892. Of the excess of Rs. 22,333 under the head Revenue establishment, Rs. 14,201 are arrears of headmen's fees, paid during the year. Under the new arrangements these fees will no longer be allowed.

11. The following statement shows the earnings, by which is meant the revenue due on the irrigation of the year, whether or no the demand statements EARNINGS.

were prepared before the 1st of April or not as opposed to collections and actual outlay, for the years 1891-92 and 1892-93:—

		1891-92.	1892-93.
		Rs.	Rs.
Earnings.			
Irrigation	...	2,66,587	2,40,200
Navigation	...	1,35,902	1,18,757
Miscellaneous	...	17,843	26,532
Total	...	4,20,332	3,85,489
Deduct refunds	...	79	283
Net earnings	...	4,20,253	3,85,206
Outlay	...	4,23,086	5,05,507
Net deficit	...	2,833	1,20,301

As regards irrigation the assessed revenue shows a decrease of Rs. 26,387 compared with that of the previous year, which is entirely due to the falling off of 16,733 acres in the leased area consequent on the favourable rainfall. The actual collections during the year amounted to Rs. 3,52,369, and was Rs. 1,12,169 in excess of the assessed revenue of the year. This is altogether due to the collection of arrear balance, a result of a new system of management, and a more efficient establishment.

FINANCIAL RESULTS. 12. The revenue receipts and working expenses for the last ten years are tabulated below:—

The very large increase in the total receipts for the year under review is the most striking feature presented by the figures above. The arrear balances, however, have now been mostly collected, and the revenue will in future largely depend on the rainfall and on irrigation on the new distributaries becoming general, a result which will only slowly take place.

13. The lengths of the canals and distributaries in operation at the close of the year 1892-93 compared with 1891-92, are given in the following table:— LENGTHS OF CANALS AND DISTRIBUTARIES.

NAME OF CANALS.	1891-92. Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.	1892-93. Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.

No change was made in the lengths of canals during the year. The completion of fifty miles of distributaries during the year resulted in an increase of 12,225 acres to the area irrigable. The total area protected from floods was increased by 10,000 acres, owing to the extension of the Byturni right embankment from 6¾ to 10 miles, and the completion of 10 miles of the Burra Khursooah left embankment.

14. In the following statement is shown the average rainfall at thirteen stations situated within the canal irrigated area, for the kharif and rabi seasons of the last five years:— RAINFALL.

		AVERAGE OF THIRTEEN STATIONS.				
		1888-89.	1889-90.	1890-91.	1891-92.	1892-93.
1		2	3	4	5	6
		Inches.	Inches.	Inches.	Inches.	Inches.
Kharif season ...	July ...	8·91	13·10	12·59	10·34	11·99
	August ...	21·61	13·11	7·58	16·98	8·08
	September ...	8·36	5·30	14·40	19·45	10·71
	October ...	1·11	9·16	8·63	1·17	5·66
	Total ...	39·99	40·67	43·20	47·94	36·44
Rabi season ...	November ...	2·88	11·24	1·94	6·77	0·85
	December ...	......	0·15	0·05	......	......
	January ...	0·06	0·06	......	......	2·00
	February ...	0·81	0·02	0·99	0·20	1·89
	Total ...	3·75	11·47	2·98	6·97	4·74
	Whole year ...	49·07	67·95	63·17	61·03	56·43

The total rainfall of the year was below the average, and in the kharif season there was a marked deficiency everywhere. The rains set in earlier than usual, and the amount which fell in June and July was plentiful, but it was

scanty in August and September, and this led to the renewal of some of the lapsed leases. After the 13th October the rainfall was seasonable, and there was no further demand for canal water. It is in this month that new leases are generally entered into, so that the rainfall was on the whole favourable to the unirrigated crops.

The average rainfall of the year at ten stations in the Central Provinces, which are drained by the Mahanadi, was 62·43 inches, against 56·14 inches in 1891-22.

FLOODS. 15. The flood in the Mahanadi river was the highest recorded during the last 50 years. There were high floods also in the Brahmini and Beropa. The highest recorded readings of the principal rivers for the year and up to date are given in the following statement:—

Name of river.	Locality.	1891-92.		1892-93.		Highest recorded.

IRRIGATION. 16. The areas of each crop irrigated during the last ten years with the yearly rainfall are shown in the following statement:—

Year.	Kharif.	Rabi.	Perennial.	Total.	Rainfall.
1	2	3	4	5	6
	Acres.	Acres.	Acres.	Acres.	Inches.
1883-84 ...	47,035	1,381	344	48,760	57·21
1884-85 ...	54,181	2,994	197	57,372	50·40
1885-86 ...	70,563	1,605	171	72,339	52·59
1886-87 ...	75,115	2,440	154	77,709	60·07
1887-88 ...	108,867	502	137	109,506	47·84
1888-89 ...	156,319	2,779	194	159,292	49·07
1889-90 ...	180,568	5,897	162	186,627	67·95
1890-91 ...	175,829	4,250	220	180,299	63·17
1891-92 ...	173,453	3,943	289	177,685	61·03
1892-93 ...	158,025	2,594	333	160,952	56·43

The whole of these areas was assessed.

17. The nature of the assessment of the crops irrigated during the year, as compared with the figures of the two preceding years, is shown in the statement below:— ASSESSMENT OF CROPS.

Crop.		Rate per acre.	1890-91. Area.	1890-91. Amount.	1891-92. Area.	1891-92. Amount.	1892-93. Area.	1892-93. Amount.
1		2	3	4	5	6	7	8
		Rs. A. P.	Acres.	Rs.	Acres.	Rs.	Acres.	Rs.
Kharif ...	Flow ...	1 8 0	(a) 168,227	2,52,173	(b) 168,655	2,56,314	(c) 155,727	2,33,448
	Lift ...	1 0 0	(a) 5,596	5,596	(b) 4,787	4,790	(c) 2,197	2,197
Perennial crops ...	Flow ..	6 0 0	121	712	141	843	125	748
	Lift ..	4 0 0	88	351	148	594	208	834
Rabi ...	Flow	0 8 0 to 2 0 0	3,634	3,888	3,259	3,435	2,291	2,408
	Lift ...	0 5 0 to 1 8 0	615	474	632	513	303	263
Unauthorised irrigation	Kharif	.	2,006	6,080	11	20	101	302
	Rabi	...	12	36	52	78	...	...
Total ...		...	180,299	2,69,310	177,685	2,66,587	160,952	2,40,200

(a) 173,577 acres 5-year lease, and 246 acres annual lease.
(b) 170,816 acres 5-year lease, and 2,626 acres annual lease.
(c) 156,458 acres 5-year lease, and 1,466 acres annual lease.

The area of unauthorized irrigation assessed was 101 acres, against 63 acres in 1891-92. There was a decrease of kharif irrigation on all the canals, except the Jajpur, the total amounting to 15,428 acres. Under rabi there was a large decrease on the Kendrapara Canal owing to the closure of some of the distributaries.

Of the commanded area 29·64 per cent., and of the area provided with distributaries 52·75 per cent., were under lease at the end of the year. These percentages are less than those of last year, owing partly to the area provided with distributaries having been increased by 12,225 acres, and partly to the decrease of the leased area.

The Superintending Engineer summarizes the general character of the irrigation season as follows:—

"There was early and seasonable rain in June, and on account of the heavy rainfall in July, there was no demand for canal water; but from the middle of August to the end of October demand was constant. The season was of an ordinary character, and at no time was the demand such as to put the canals to any severe test."

As before remarked, there was no rain towards the end of October, and generally the season was not favourable to any extensive increase in the irrigated area.

18. The duty obtained on each of the principal canals, and calculated from the gross discharge at the canal heads is given in the following table for the year under review and two preceding years :— DUTY OF WATER.

Particulars.		Kendrapara Canal system.	Taldunda Canal system.	High Level Canal, Range I.	High Level Canal, Range II.	High Level Canal, Range III.
1		2	3	4	5	6
1892-93	Kharif ... Acres	65,724	36,327	20,950	2,285	32,194
	Duty on gross supply	64·93	114·97	60·51	119·76	98·95
	Rabi ... Acres	2,004	264	275	44	7
	Duty on gross supply	5·80	13·03	1·82	74·58	0·74
1891-92	Kharif ... Acres	70,686	41,570	22,394	2,451	36,189
	Duty on gross supply	80·05	103·99	84·75	24·95	117·69
	Rabi ... Acres	3,494	336	29	62	22
	Duty on gross supply	7·60	3·50	0·14	2·88	1·02
1890-91	Kharif . Acres	71,403	41,247	21,893	2,473	39,033
	Duty on gross supply	66·42	102·22	66·07	37·61	107·81
	Rabi ... Acres	3,567	559	91	30	3
	Duty on gross supply	9·46	13·31	1·79	2·11	0·43

The rabi irrigation is so small that it is not worthwhile considering the duty in that season.

The results regarding the duty of water for the kharif season are shown in the following statement:—

	Kendrapara Canal system.	Taldunda Canal system.	High Level Canal— Range I.	Range II.	Range III.
1	2	3	4	5	6
Area of kharif irrigation ... Acres.	65,724	36,327	20,950	2,285	32,194
Average gross discharge at head of canal ... C. ft.	1,012·25	307·25	346·25	19·08	325·35
Average gross discharge at head of canal utilized "	956·68	269·25	268·15	14·48	318·60
Duty of quantity entering canal	64·93	114·97	60·51	119·76	98·95
Ditto utilized	68·70	134·92	78·13	157·80	101·05

The duty on the gross discharge was highest on the High Level Canal, Range II, and least on Range I, while that on the discharge utilized was highest also on Range II, and lowest on the Kendrapara Canal.

The duty obtained during the kharif season was higher on the Taldunda Canal System and High Level Canal, Range II, than in 1891-92. On all the other canals is has decreased.

The Officiating Superintending Engineer, Mr. Horn, who was previously Executive Engineer in charge of the Brahmini-Byturni Division, makes the following observations:—

"It seems to me that this system of deducing an average duty for the season has little practical value. For example, it is only necessary to point out that an average duty of 80·05 was obtained on the Kendrapara canal system in 1891-92, whereas the duty during October of that year was only 56. The high average duty is only explicable when it is remembered that the canal was practically closed during August and September on account of exceptional rainfall. Throughout the whole of October the strain on the canal was great, and every drop of water that could be admitted at Jagatpur was utilized."

The most important matter is the duty which can be obtained over a short lease not exceeding 15 days. In 1891-92 the duty in October was 56 acres per cubic foot per second only, but improvements in the distributaries and outlets have been and are being made which will give the Subdivisional Canal Officer more control over the supply. It is expected that even at the time of maximum demand a duty of 70 acres per cubic foot per second will ultimately be obtained.

CROP EXPERIMENT. 19. To test the outturn of crops, 267 experiments were made during the year—144 of them were on lands irrigated by canal water, and 123 on unirrigated lands. The results obtained are tabulated below:—

Name of division.	Number of experiments.	Outturn per acre from irrigated land. Rice ⅔rds of paddy.	Straw.	Number of experiments.	Outturn per acre from unirrigated land. Rice ⅔rds of paddy.	Straw.	Value of outturn from irrigated land. Rice 17 seers 3 chs. per rupee.	Straw at 9 maunds per rupee.	Value of outturn from unirrigated land. Rice 17 seers 3 chs. per rupee.	Straw at 9 maunds per rupee.

	1889-90	14·01	23·00	...	9·28	14·40	21·01	2·56	13·71	1·60
	1888-89	10·82	20·12	...	7·35	14·02	16·23	2·24	11·02	1·56
	1887-88	8·22	16·84	...	6·25	12·00	12·25	1·67	9·31	1·19

N.B.—In this statement the outturn is shown in rice by taking ⅔rds of unhusked paddy. The previous year's outturn paddy has been converted into rice by taking ⅔rds, and the quantities thus found are entered above.

20. The balances outstanding at the commencement of the year under review were as follows:— ASSESSMENTS COLLECTIONS, AND BALANCES

		Rs.
Water-rates	... ...	2,33,704
Miscellaneous Revenue	... ...	267
	Total ...	2,33,971

as against the balances outstanding on 1st April 1893, which were—

		Rs.
Water-rates	... ...	89,816
Miscellaneous Revenue	... ...	..
	Total ...	89,816

The table below shows the balances, assessments, and recoveries of water-rates for the last five years:—

YEAR.	Amount outstanding at commencement of year.	Amount falling due during the year.	Total for recovery.	Cash realizations.	Remitted or written off.	Balance at the end of the year.

	Rs	Rs.	Rs	Rs.	Rs.	Rs.
1888-89 ..	92,109	1,96,765	2,88,874	1,51,365	22,912	1,14,597
1889-90	1,14,597	2,87,277	4,01,874	1,99,844	25,268	1,76,762
1890-91 ...	1,76,762	2,69,650	4,46,412	2,09,806	38,242	1,98,364
1891-92 ...	1,98,364	2,82,880	4,81,244	2,17,256	30,284	2,33,704
1892-93 ...	2,33,704	2,61,023	4,94,727	3,52,368	52,543	89,816

The results disclosed by these figures cannot be regarded as otherwise than satisfactory. The outstanding balance, which at the end of 1891-92 was the highest on record, has been reduced at the end of the year under review, to a comparatively small amount. This improvement is very largely due to the new system of Revenue management under the supervision of the Superintending Engineer which was introduced during the year. The offices of the Revenue Superintendent and Deputy Revenue Superintendent of Canals were abolished, and a Revenue Division was formed on the 1st April 1892. The Special Deputy Collector, who was placed in charge, took up the task of collecting arrears with great assiduity. The Superintending Engineer writes as follows on the working of the Revenue Division:—

"The Deputy Collector deserves the greatest credit for the immense improvement in collections; this has to my knowledge only been effected by detailed and constant personal attention."

21. The progress of the year in realizing arrears and current demand is shown in the following table:— ARREARS

Year in which irrigation occurred	DEMANDS.			Collected or remitted	Balance on 31st March 1893
	Arrears on 31st March 1892	Demands for 1892-93	Total.		
1	2	3	4	5	6
	Rs	Rs.	Rs.	Rs.	Rs.
1889-90 and previous years	28,732	14,471	43,203	42,779	424
1890-91	81,940	53	81,993	66,734	15,259
1891-92 .	1,23,032	89,418	2,12,450	1,90,404	22,046
1892-93 ...	...	1,57,081	1,57,081	1,04,994	52,087
Total ..	2,33,704	2,61,023	4,94,727	4,04,911	89,816

The amount realised by the Collectors on water-rates and miscellaneous revenue was Rs. 3,73,244, against Rs. 2,28,451 so collected in 1891-92.

CERTIFICATES.

22. In the following table is shown (approximately) the amount of certificate work done in each district:—

	CUTTACK.				BALASORE.				TOTAL.			
	1891-92.		1892-93.		1891-92.		1892-93.		1891-92.		1892-93.

Balance outstanding at the close of the year	4,382	20,090	863	6,153	221	1,029	116	3,345	4,003	21,119	979	9,498

These figures show another satisfactory result of the establishment of a Revenue Division. Of 12,714 cases, of which 4,723 were pending from the preceding year, 11,735 were disposed of, and of this number 11,122 cases were dealt with by the Special Deputy Collector. That his task was no light one is evidenced by the following remark of the Superintending Engineer. "Most of the pending cases from last year were of a difficult nature, some of them referring to as far back as 1885-86." The balance of cases left pending at the close of the year was only 979.

The large number of cases struck off was due partly to the erroneous assessment of high and unirrigable lands, and partly to irrecoverable demands. There were scarcely any complaints regarding the measures adopted to realize the arrears, one only reaching head-quarters, and this on investigation was found not to have emanated from the person whose signature it bore. The Commissioner who inspected the Deputy Collector's office recorded a note expressing his approval of the manner in which Babu Jagdam Sahai had carried on the work generally, and more especially the certificate cases.

COMPLAINTS

23. The following table shows the number of objections against assessment filed and disposed of during the year:—

DIVISION.	(I)—ORDINARY REMISSION.				(II to IV)—OTHER COMPLAINTS.					
	Received during the year and pending from previous year.	Disposed of.		Pending.	Received during the year and pending from last year.	Disposed of.		Pending.	Total complaints received during the year excluding those pending from previous year.	Pending.

24. The amounts remitted and written off as irrecoverable during the year on account of water-rates aggregated Rs. 52,541 as compared with Rs. 30,485 written off under the same heads in 1891-92. The details are given below:— REMISSIONS.

Revision of Assessment.

		Rs.
(a) Unirrigated crops	... ...	17,641
(b) Damaged „	... ...	7,421
(c) Chaukidar's jagir	... ...	5,048
Total	...	30,110

Remissions

(a) Waste land	... ...	1,444
(b) Land occupied by canals	... ...	175
(c) Twice assessed	... ...	244
(d) Barred by limitation	... ...	2,664
(e) Excess recovery refunded	..	990
(f) Change of rates	.. ...	5,642
(g) Erroneous assessments	.. ...	491
(h) On account of death of defaulters	...	631
(i) Absconding of defaulters	.. ...	266
(j) Lease cancelled	... ...	825
(k) Cyclone damages	... ...	3,296
Total	...	16,668

Written off.

Irrecoverable demands	... ...	7,532
Total	...	54,310
Deduct remissions under miscellaneous revenue	...	1,769
Net remission	...	52,541

Of the above amount Rs. 38,851 were remitted by Mr. Roberts, the late Deputy Revenue Superintendent of Canals before he made over charge of his office. The matter was brought to the notice of Government, and orders taking exception in some respects to the course adopted were passed.

The large amount of remission under the head unirrigated crops is somewhat misleading. Under the old revenue system it was the custom to include the whole area of the village jamabandi in the lease and demand statement, and afterwards to remit such portion of it as was found to be unirrigable. This system has now been abolished, and under the new rules a large portion of the area remitted would not have been entered either in the lease or demand statement. The same remarks apply to the remission under damaged crops, as the lowlands which do not derive benefit from canal water would find no place in the new leases.

The amounts remitted by the Special Deputy Collector with the Superintending Engineer's sanction aggregated Rs. 13,654, which was largely due to damage caused by the cyclone of October 1892.

The undernoted table shows the distribution of the remission year by year, and under each canal:—

YEAR.	Kendrapara Canal system	Taldunda Canal system	High Level Canal, Range I.	High Level Canal, Range II, including Jajpur Canal	High Level Canal, Range III	Total
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
1886-87 ...	324 8 6	199 9 2	17 6 7	8 3 6		549 11 8
1887-88 ...	1,853 9 11	95 7 11	927 0 4		42 15 4	2,919 1 6
1888-89 ...	2,313 7 4	1,290 2 10	1,245 15 1	115 1 11	140 6 11	5,136 2 1

1892-93 ...	69 12 6	660 11 9	...	..	86 7 5	817 1 8
Total ...	24,286 6 6	18,430 1 11	7,167 2 1	197 9 9	2,461 2 6	52,542 6 9

REVENUE ESTABLISHMENT.

25. The cost of the revenue establishment for the last five years is given in the following statement:—

	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.
1	2	3	4	5	6
Establishment under Deputy Collector.	Rs.	Rs.	Rs.	Rs.	Rs.
Permanent establishment, including travelling allowance	21,448	22,116	21,848	22,014	31,086
Temporary establishment	9,941	19,112	17,451	17,504	16,020
Contingencies	2,889	4,482	2,928	3,458	4,098
Headmen's fees	1,680	2,244	2,803	6,591	20,040
Establishment under Executive Engineer.					
Permanent and temporary establishment ...	3,052	3,398	3,417	3,447	5,930
Water-regulation establishment	4,151	4,150	4,144	4,127	3,274
Total ...	43,161	55,502	52,591	57,141	80,448
Collections of water-rates and miscellaneous revenue by the Canal Revenue Department	1,60,328	2,09,823	2,19,692	2,28,451	3,73,244
Percentage ...	26·9	26·4	23·9	25·0	21·0

The increased cost of establishment was, as previously remarked, mainly owing to the payment of arrears of headmen's fees due on irrigation in former years. There has, however, been some increase in the cost of establishment owing to the introduction of a new system which has in increased efficiency more than repaid the extra expenditure.

NAVIGATION.

26. The tollage receipts of each of the canal systems for the last five years are shown below:—

YEAR.	TALDUNDAH CANAL SYSTEM.		KENDRAPARA CANAL SYSTEM.		HIGH LEVEL CANAL, RANGE I.		HIGH LEVEL CANAL, RANGE II.		HIGH LEVEL CANAL, RANGE III.		JAJPUR CANAL.		TOTAL.	
	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.
1888-89	31	4,310	75	53,786	33	6,642	12¼	3,[illegible]92	19	1,001	6¼	99	177	69,830
1889-90	31	4,126	75	60,245	33	8,2[illegible]	12¼	3,[illegible]33	19	1,386	6¼	163	177	78,039
1890-91	31	2,148	75	86,007	33	12,229	12¼	3,185	19	2,174	6¼	318	177	1,06,961
1891-92	55¼	4,357	78	98,462	33	1[illegible]54	12¼	3,027	19	1,775	6¼	286	204¾	1,20,761
1892-93	55¼	6,534	78	73,500	33	15,278	12¼	3,165	19	1,761	6¼	275	204¾	1,00,503

The decrease in the total tollage receipts is due chiefly to the diminished exports from False Point caused by the high price of grain in the local market.

The up traffic in salt largely increased, while the down traffic was only half that of the previous year.

TRAFFIC.

The following table details the traffic (excluding the transport service) of all the canals in Orissa for the last ten years:—

		1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.
1		2	3	4	5	6	7	8	9	10	11
Number of miles open ...	No.	164½	164½	170¼	170¼	170¼	177	177	177	204¾	204¾
Toll collections	Rs.	61,692	52,784	64,093	58,664	66,628	69,830	78,039	1,06,961	1,20,761	1,00,503
Rate of toll per mile ..	,,	374·4	320·8	375·9	344·1	390·7	394·5	440·9	604·3	589·8	490·8
Number of boats plying cargo and passenger ..	No.	15,507	18,768	20,662	14,311	12,084	11,475	11,937	12,095	12,946	13,325
Tonnage of cargo and passenger boats	Tons.	145,685	157,017	180,142	128,398	175,996	153,674	186,019½	250,243	266,601½	239,583
Estimated value of cargo, including rafts	Rs.	47,59,655	44,80,105	46,32,733	41,81,650	50,32,093	47,40,957	48,68,255	85,21,551	95,40,756	84,69,728

27. During the year the cost of working the transport service amounted to Rs. 17,297 and the actual receipts were Rs. 18,891. The service therefore, which has hitherto always worked at a loss, worked at a profit of Rs. 1,594. The working charges under miscellaneous include Rs. 5,417 as tollage debited to the account by book adjustment. If this amount be excluded, the profit would amount to Rs. 7,011 against Rs. 2,521 in 1891-92. TRANSPORT SERVICE.

28. The miscellaneous receipts for the last five years are shown in the following statement:— MISCELLANEOUS RECEIPTS.

DETAILS.		1888-89.	1889-90.	1890-91.	1891-92.	1892-93.
1		2	3	4	5	6

	Total ...	14,242	15,143	13,708	17,843	26 532

29. The charges for works, and maintenance and repairs during the year were Rs. 2,39,483 against Rs. 1,75,467 in the previous year distributed as in the following statement:— MAINTENANCE AND REPAIRS.

	1890 91.	1891-92.	1892-93.
1	2	3	4
	Rs.	Rs.	Rs.
Extensions and improvements	11,081	8,679	9,123
Head-works	74,407	48,151	53,456
Main canals	90,592	82,741	1,23,060
Distributaries	21,992	15,324	30,033
Drainage and protective works	12,676	10,389	11,997
Cost of working transport service	11,478	10,180	11,814
Total ...	2,22,226	1,75,467	2,39,483

The amount under extensions and improvements includes a sum of Rs. 8,172 expended during the year in remodelling the Byturni weir shutters on the Sone pattern.

HEAD-WORKS. 30. The cost of maintenance of the weirs was Rs. 42,666 out of the total Rs. 55,125 spent on head-works. Details are given below:—

Name of weir.	Length.	Expenditure.			Rate per running foot.		
		1890-91.	1891-92.	1892-93.	1890-91.	1891-92.	1892-93.
1	2	3	4	5	6	7	8
	Feet.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Naraj	3,833	4,728	3,194	4,031	1·23	0·83	1·05
Mahanadi ...	6,349	33,310	19,484	15,136	5·25	3·07	2·38
Beropa	1,980	7,616	8,433	9,546	3·85	4·27	4·77
Brahmini... ...	4,000	4,302	2,721	2,985	1·08	0·69	0·74
Pattia	783	4,194	2,538	3,224	5·36	3·39	4·11
Byturni	1,026	3,792	1,244	4,604	3·70	1·21	4·48
Burra	526	4,450	1,067	3,140	8·46	2·02	5·97
Total of all weirs...	18,497	62,422	38,681	42,666	3·37	2·09	2·30

The cause of the excess in the expenditure on head-works is summarised as follows by the Superintending Engineer:—

"*Naraj weir.*—Extra expenditure incurred on repairs to shutters and damage caused by flood.

Mahanadi weir.—Expenditure less on ordinary repairs, and only a small portion of flood damage was charged during the year.

Beropa.—Extensive repairs were done to the tail apron of the right shore sluice, and also to the weir.

Brahmini.—Expenditure normal.

Pattia.—Additional packing below the line of cribs was required.

Byturni.—The apron was scoured in five places during the high flood, which were repaired with gabions filled with rubble.

Burra.—A large sum was expended in repairing the shutters."

MAIN AND BRANCH CANALS. 31. The expenditure on each canal for the last three years is shown below:—

Canals.	1890-91.			1891-92.			1892-93.		
	Miles.	Cost.	Per mile.	Miles.	Cost.	Per mile.	Miles.	Cost.	Per mile.
1	2	3	4	5	6	7	8	9	10
	No.	Rs.	Rs.	No.	Rs.	Rs.	No.	Rs.	Rs.
Kendrapara	39	30,723	787	39	24,459	627	39	40,132	1,029
Ditto extension ...	15	1,835	122	15	2,442	163	15	7,630	509
Gobri	15	8,448	563	15	10,286	685	15	7,747	516
Do. extension	6	14,406	2,401	9	7,516	835	9	5,008	556
Pattamundi	47	9,972	212	47	4,367	93	47	8,526	181
Taldundah	27	6,471	239	51¾	7,587	146	51¾	14,051	271

High Level, Range I ...	33	12,017	364	33	9,160	277	33	8,914	270
Ditto, do. II ..	12½	3,757	300	12½	4,071	326	12½	6,836	547
Ditto, do. III	19	5,589	294	19	4,007	258	19	6,870	362
Jajpur Canal	6½	1,033	158	6½	1,275	196	6½	1,932	297
Total ...	252	99,746	395	279¾	82,741	295	279¾	1,18,818	425

The expenditure was in almost every case in excess of that of the previous year. The causes, fully described by the Superintending Engineer, were briefly as follows. On the Kendrapara, Pattamundi, Taldunda and Machgong canals, the damages caused by the great Mahanadi flood of July 1892 and by the cyclone of that year were considerable and necessitated a heavy outlay in repairs. A portion of the Kendrapara canal bank had to be raised to bring it above high flood level, and extra expense was incurred in revetting the inner banks of that canal and in silt-clearance from a sluice channel. The renewal of the Beribatty lock-gates on the Taldundah Canal and the dredging of silt, the result of breaches, were also costly works.

On the High Level Canal a very high flood in the Pattia caused much damage, and the repairing of this and the increased cost of masonry works explain the increased maintenance charges.

32. The average mileage rate for the maintenance of distributaries was Rs. 39·06 as compared with Rs. 20·94 in the previous year:— DISTRIBUTARIES.

	1890-91.			1891-92.			1892-93.		
	Miles.	Cost	Per mile	Miles.	Cost.	Per mile.	Miles.	Cost.	Per mile.

Ditto, do. II									
Ditto, do III	49½	2,011	4 80	49½	2,168	43 80	49½	2,164	43 71
Pattamundi Canal							37½	680	18 25
Total	731½	21,992	30 06	731½	15,324	20 94	768½	30,033	39 06

The lengths of distributaries in the above are those which have been brought on the revenue account and consequently differ from the lengths given in paragraph 13 which include all so far advanced as to be fit for use, whether the capital account is still open or not.

The increased cost of distributaries was due to the expenditure on repairs to flood damage and to the thorough repairs of the beds of the distributaries which were levelled, cleaned from silt, and supplied with datum blocks, and the outlets provided with shutters.

33. The most important works under this head were raising the Kendrapara canal and flood embankments, and the repairs to the embankments on the High Level Canal. The total expenditure on drainage and protective works was Rs. 14,525 against Rs. 10,389 in 1891-92. DRAINAGE AND PROTECTIVE WORKS.

34. The cost of silt-clearing and dredging during the year 1892-93 is given in the following table:— DREDGING AND SILT CLEARING.

	Silt-clearing.			Dredging.		
	Quantity.	Cost.	Rate per 1,000 c. ft.	Quantity.	Cost.	Rate per 1,000 c. feet.

* Inclusive of 257,626 cubic feet hand dredged during the rains.

Compared with the previous year the rate for silt clearing was slightly higher on the Gobri Extension and High Level Canals, and less on all the other canals.

35. Three combined post and telegraph offices were opened during the year at Jagatpur, Kendupatna and Aquapada, this department giving a guarantee for three years of a gross receipt of Rs. 400 from each office and undertaking TELEGRAPH OFFICES.

to make good by a charge against the canal revenue any difference between that sum and the actual receipts.

A statement is subjoined showing the working of each of the Telegraph offices :—

Name of Telegraph office.	Service telegrams.		Private telegrams.		Total.		Number of telegrams received.		Date of opening of the office.
	Number.	Amount.	Number.	Amount.	Number.	Amount.	Service.	Private.	
						Rs. A. P.			
Jagatpore ...	88	...	79	...	167	149 6 0	99	40	1st July 1892.
Kendupatna ...	...	...	...	...	420	440 13 0	283		Ditto.
Aquapada ...	52	...	120	...	172	188 15 0	58	57	3rd July 1892.

The Superintending Engineer remarks :—

"The receipts from the Kendupatna Telegraph office exceeded the amount guaranteed by Government. This office it is reported is now being largely used by the merchants and other private parties, and the total receipts from April to August 1893 amounted to Rs. 206. Additional accommodation for the office has been asked for, which is under consideration, and traffic in the other two offices is reported to have increased since April 1893."

PLANTATIONS.

36. The following table shows the state of the plantations for the last two years:—

Year.	Trees over 12 feet.	Saplings from 4 to 12 feet.	Seedlings below 4 feet.	Total.

	Kantapukhur	Ditto ..	13·80	Ditto ...	15·20	Ditto ...	16·80

The greatest discharge of the Cossye during the year was 38,778 cubic feet per second on the 17th June 1892. After July the discharge diminished rapidly. The minimum discharge occurred on the 1st February 1893, when only 21 cubic feet per second was registered.

ATION. 44. The area of each crop irrigated during 1891-92 and the nine previous years exclusive of unleased areas compared with the yearly rainfall is shown below:—

Year.	Kharif.	Rabi.	Perennial.	Total.	Rainfall.

* Mean of observations of two stations—Midnapore and Panchkurah.
† Average of four stations throughout the irrigated areas under the Midnapore and Panchkurah weirs.

The area irrigated during the year was 91,217 acres, as compared with 83,973 acres of the previous year, thus showing an increase of 7,244 acres. The Superintending Engineer gives the following extracts from the Executive Engineer's report:—

"Owing to the almost total failure in the rains from August to October, the demand for canal irrigation during these months was very great. The only way it was possible to meet this demand was to supply the distributaries in rotation, and even then in the long distributaries, irrigation would be only carried out from half their lengths at one time. When the demand on the upper half of a distributary had been fairly met, all the outlets were taken out and the water forced down to the lower half. This was the only way in which anything like a fair distribution of the available supply could be effected. The removal of outlets produced some discontent among the lessees, who in one or two instances proceeded to cut the distributary banks. They were, however, caught in the act and handed over to the police and punished."

This is not a satisfactory system of management, but until masonry outlets are provided, at any rate in the upper halves of distributaries, it appears unavoidable.

The Executive Engineer states:—

"The discharge of the Cossye river went down on the 23rd October to 138 cubic feet per second, while the average discharge of the whole month was about 700 cubic feet per second. It was at this time that the greatest demand for irrigation arose; 90,000 acres were under lease, and every man wanted his fields to be irrigated at once. Excepting a few acres on high lands, which it was impossible to get at, the whole of the leased area received from two to four waterings during the season. The outturn was on most distributaries magnificent. Indeed, the cultivators state that they have not reaped such an excellent harvest for a very long time."

Unirrigated crops in this district to the south and west of Midnapore almost entirely failed.

45. The areas under lease at the beginning of the year, the progress of leasing during the year, and the leases which remained in force after its close, are given in the following table. The figures do not include assessments for illicit irrigation for which leases were executed after 31st March 1892:— LEASES.

46. The duty obtained from the gross discharge during the past three years is detailed in the following statement:— DUTY OF WATER.

PARTICULARS.			Under Midnapore weir.	Under Panchkurah weir.
1			2	3
1890-91	Kharif ...	Acres	76,645	4,981
		Duty on gross supply ...	160	89
1891-92	Kharif ...	Acres ...	77,631	5,898
		Duty on gross supply ...	172	64
1892-93	Kharif ...	Acres	82,642	7,690
		Duty on gross supply ...	138	54

The duty is still high, though owing to the scanty rainfall it is below that obtained in the preceding year.

47. No experiments on outturn of crops were carried out during the year. CROP EXPERIMENTS.

48. The balances, assessments, and recoveries of water-rates on the Midnapore Canal during the last five years are shown in the following statement:— ASSESSMENTS, COLLECTIONS, AND BALANCES.

YEAR.	Amount outstanding at commencement of year.	Amount falling due during the year.	Total for recovery.	Cash realization.	Remitted or written off.	Balance at the end of the year.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1888-89 ...	56,493	1,23,337	1,79,830	91,016	4,041	84,773
1889-90 ...	84,773	1,17,202	2,01,975	1,16,424	34,907	50,644
1890-91 ...	50,644	1,30,595	1,81,239	1,15,438	834	64,967
1891-92 ...	64,967	1,29,822	1,94,789	1,32,981	2,836	58,972
1892-93 ...	58,972	1,39,990	1,98,962	1,49,057	1,338	48,567

The figures in the above statement have been furnished by the Special Deputy Collector in charge of the new Revenue Division formed during the year under the orders of the Superintending Engineer, and agree with those given in the Examiner's memorandum. They show an improvement in all items. The assessments of the year are Rs. 10,168 and the realizations Rs. 16,076 in excess of the figures of the previous year, while the remissions are Rs. 1,498 less than in 1891-92, and the balance for recovery has decreased by Rs. 10,415. This balance, however, was much in excess of what it should have been with so small a demand. Since the close of the year it has been greatly reduced. The failure of rainfall leading to a large demand for water is the cause of the increase in assessments.

ARREARS. 49. In the following table, arrear and current dues are distinguished, the sums composing the demand being distributed by the years in which they were earned, and the proportions of each year's earnings, recovered or remitted, are separately shown:—

Year.	Amount previously due and unrealised.	Amount falling due within the year.	Total amount due to end of the year.	Adjustment of the year.				Balance unrealised at end of the month of March 1893.
				Cash recoveries.	Remission authorised.	Written off as being irrecoverable.	Total.	
1	2	3	4	5	6	7	8	9
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
1888-89 ...	625 5 3 −266 7 6	...	358 13 9	80 1 6	8 0 3	..	88 1 9	270 12 0
1889-90 ...	0 7 9 −231 12 0	43 6 0	275 9 9	263 11 6	11 10 6	...	275 6 0	0 3 9
1890-91 ...	4,441 13 3 +34 11 6	832 5 0	5,308 14 3	4,020 4 6	586 15 3	...	4,607 3 9	701 10 6
1891-92	53,994 10 9	2,245 8 9	56,150 3 6	51,501 11 6	731 5 9	.	52,233 1 3	3,917 2 3
1892-93 ..	...	1,36,868 13 9	1,36,868 13 9	93,191 9 9	..	.	93,191 9 9	43,677 4 0
Total ...	58,972 5 6	1,39,990 1 6	1,98,962 7 0	1,49,057 6 9	1,337 15 9	.	1,50,395 6 0	48,567 0 6

These figures show that the total amount collected or otherwise adjusted during the year was 75·5 per cent. of the amount due for water-rates, against a percentage of 69·8 last year.

REMISSIONS. 50. The remissions granted during the year were as follows:—

	Rs.
By Collector under rule 27	1,135
Remissions granted by officers disposing of certificate objections ..	241
Ditto by Government, *vide* letter No. 4391.A., dated the 2nd April 1892	223
Total ...	1,599

Of this sum, Rs. 261 are for miscellaneous revenue. Deducting this amount from the total remissions, there remains a balance of Rs. 1,338, which is the figure shown in the foregoing statements.

CERTIFICATES. 51. The following statement gives particulars of the number of certificates issued and disposed of during the year:—

Particulars.	Midnapore.			
	1891-92.		1892-93.	
	No.	Amount.	No.	Amount.
1	2	3	4	5
Cases for disposal.		Rs.		Rs.
1. Cases pending at the close of the preceding year ...	1,958	6,085	449	3,572
2. Cases instituted during the year	3,428	17,765	1,223	9,080
Total ...	5,386	23,850	1,672	12,652
Cases disposed of.				
1. By being struck off, owing to the demand having been remitted.	1,422	6,239	153	1,384
2. By being wholly satisfied	3,515	14,039	1,163	9,306
Total ...	4,937	20,278	1,316	10,690
Balance outstanding at the close of the year ...	449	3,572	356	1,962

The decreases which occurred in the number of cases instituted and the balance outstanding at the end of the year are satisfactory.

Out of the total number of 1,672 certificates for disposal, 142 were for surreptitious irrigation, and 1,530 for satisfaction of demands under kabuliyats. Of the 153 cases struck off, 142 were on account of illicit irrigation and 11 for satisfaction of demands under kabuliyats. The percentage of disposals is 78·1, against 91·66 in the preceding year. Out of 356 cases pending on the 31st March 1893, only 25 remained pending on the 14th August 1893.

52. The following table shows the number of complaints filed during the last two years, and how they have been disposed of:— OMPLAINTS.

Year.	Class of complaints.	Received.			Disposed of.			Balance pending at end of the year.		
		Balance pending from previous year.	Received during the year.	Total.	Allowed.	Refused.	Total.	Received during previous years.	Received during the year.	Total.
1	2	3	4	5	6	7	8	9	10	11
1891-92 ...	Ordinary remission	103	474	577	112	407	519	...	...	58
	Other complaints	67	152	219	26	156	182		...	37
	Total ..	170	626	796	138	563	701	...	...	95
1892-93 ...	Ordinary remission	58	182	240	60	152	212	...	...	28
	Other complaints	37	159	196	45	110	155	...	...	41
	Total ...	95	341	436	105	262	367	...	...	69

The number of cases received during the year was only 341 compared with 626 of 1891-92. Of the total number of 436 cases, of which 95 were complaints pending on the 1st April 1892, 367 were disposed of during the year, and of this number 28·6 per cent. were established and 71·4 per cent. rejected.

53. The following statement compares the cost of the revenue establishment during the last five years:— REVENUE ESTABLISHMENT.

Establishment under the Collector.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Permanent establishment, including travelling allowances ...	20,474	18,984	19,757	17,947	20,263
Temporary establishment ...	660	604	649	682	441
Contingencies	1,459	1,253	1,260	1,154	1.014
Headman's fees	2,135	49	60	335	375
Total ...	24,728	20,890	21,726	20,118	22,093

In addition to the amounts specified in the foregoing table, the following sums were paid by the Executive Engineer for water regulation:—

	Water-regulation.	
	Permanent.	Temporary.
	Rs.	Rs.
1888-89	546	653
1889-90	480	533
1890-91	488	595
1891-92	473	682
1892-93	419	500

The cost of collection was 14·07 per cent. on the amount realised, against 15·1 per cent. in 1891-92.

NAVIGATION. 54. The total tollage receipts of the year were Rs. 1,14,141, against Rs. 1,32,572 in 1891-92. The Superintending Engineer makes the following comments on this decrease :—

"The total tollage receipts of the year were Rs. 1,14,141, against Rs. 1,32,572 of the year before. The revenue from tolls on private boats was slightly less as compared with that of the last year, but the total number of passengers was far in excess, viz. 205,804, against 163,836 for 1891-92. The tolls realised from the Calcutta Steam Navigation Company show a decrease of Rs. 12,114 and that from country boats Rs. 6,317. The falling off in the collections of the year is solely due to the failure of the rice crop in parts of the Midnapore district. There was hardly any export of rice or paddy from the south and south-west of Midnapore from October to January. While the receipts from rice and paddy fell, those from other items of import, such as metal, oil-seeds, salt and miscellaneous goods, show an increase over the previous year."

There was a decrease of 14,514 tons of rice and 2,485 tons of paddy carried on the Midnapore Canal as compared with that carried in the previous year.

TRAFFIC. The usual particulars regarding the traffic carried in vessels, including those of the Calcutta Steam Navigation Company for the last ten years are given below:—

DESCRIPTION.		1883-84.	1884-85.	1885-86	1886-87.	1887-88	1888-89.	1889-90.	1890-91	1891-92.	1892-93.

	Other items ...	1,189	748	370	2,670	5,166
Total ...		11,299	13,016	9,004	19,147	16,979

MAINTENANCE AND REPAIRS. 56. The following figures show the actual cost of maintenance and repairs during the last three years distributed by subheads:—

	1890-91.	1891-92.	1892-93.
	Rs.	Rs.	Rs.
Head works, including buildings ..	11,610	8,373	9,965
Main canal and branches ...	77,323	1,18,241	59,802
Distributaries	11,851	10,365	12,612
Drainage and protective works ...	1,151	1,239	2,090
Working steamers	3,103	3,044	2,961
Total ...	1,05,038	1,41,262	87,430

57. The expenditure on the Midnapore and Panchkurah head works during the year was Rs. 7,619 and Rs. 2,846, respectively, against Rs. 4,582 and Rs. 3,700 in last year. On weirs the expenditure was at the rate of Rs. 2·08 per foot run at Midnapore, and Rs. 0·46 at Panchkurah, against Rs. 0·30 and Rs. 1·84, respectively, last year. HEAD WORKS AND WEIRS.

58. The outlay on repairs to the main canal, including that on head works, on working steamers, and on drainage works, was Rs. 74,818 against Rs. 1,30,897 in the previous year. This large decrease in the expenditure on general repairs was mainly owing to the thorough repairs carried out in the preceding year when there was a long closure, but is also partly attributable to close supervision. The expenditure on tools and plant was Rs. 29,885 as compared with Rs. 51,761 of the previous year. MAIN CANAL.

59. On distributaries the expenditure on repairs was Rs. 12,612, or Rs. 44 per mile, against Rs. 10,365, or Rs. 36 per mile, in the previous year. The increase was caused by the bringing into use again of one or two distributaries which had practically been abandoned. DISTRIBUTARIES.

60. The mileage rates for the last ten years, both for main canals and distributaries, are shown in the following table:—

YEAR.	MAIN CANAL AND HEAD WORKS, &C.			DISTRIBUTARIES.		
	Length of canal open.	Total cost of work.	Rate per mile.	Length of distributary channels.	Total cost of work.	Rate per mile.
1	2	3	4	5	6	7
	Miles.	Rs.	Rs.	Miles.	Rs.	Rs.
1883-84 ...	48	1,06,425	2,216	277	21,195	76
1884-85 ...	48	1,15,171	2,399	277	18,865	68
1885-86 ...	48	1,10,350	2,299	277	14,424	52
1886-87 ...	48	1,20,135	2,503	283	17,617	63

1888-89 ...	48	83,675	1,743	283	22,464	79
1889-90 ...	48	93,738	1,953	283	19,769	69
1890-91 ...	48	93,187	1,941	283	11,851	41
1891-92 ...	48	1,30,897	2,727	283	10,365	36
1892-93 ...	48	74,818	1,558	283	12,612	44

61. The quantity of silt dredged during the year was 3,825,213 cubic feet, at an average rate of Rs. 5·9 per 1,000 cubic feet, whereas the quantity during the previous year was 4,030,769 cubic feet, and the rate Rs. 4·76. The falling off was due to the dredgers being laid up for repairs for considerable periods DREDGING AND SILT CLEARING.

The work done by the steam dredgers during the year under review and the cost of working them is shown below:—

NAME OF DREDGER.	Quantity of earth dredged.	Actual cost of lifting.	COST OF REMOVING—		Total.	Lifting rate per 1,000 cubic feet.	Removing rate per 1,000 cubic feet.	Total rate per 1,000 cubic feet
			Steam hopper-barges.	Ordinary hopper-barges.				
1	2	3	4	5	6	7	8	9
	C. ft.	Rs.	Rs.	Rs.	Rs.

Cadmus steam excavator ...	510,860	2,388	...	...	2,388	4·6	...	4·6
S. L. *Cricket*	...	451	...	...	451	..	...	...
Total for 1892-93	3,825,213	16,611	5,978	...	22,589	4·3	1·5	5·9
Total for 1891-92	4,030,769	13,948	5,276	...	19,219	3·45	1·3	4·76

PLANTATIONS. 62. The state of the plantations for the last two years is shown in the following statement:—

YEAR.	Trees upwards of 12 feet high.	Saplings between 4 and 12 feet.	Seedlings below 4 feet.	Total.
1	2	3	4	5
	No.	No.	No.	No.
1891-92 ...	10,082	10,351	2,452	22,885
1892-93 ...	10,296	10,216	2,346	22,858

GENERAL RESULTS. 63. The results of the year may be considered on the whole satisfactory. There was a slight falling off in the receipts due to the diminished exports, but there was also a decrease in the cost of maintenance, and the result is a net profit of Rs. 84,451 against Rs. 18,371 of the previous year. The unusually scanty rainfall in September and October which was noticed in 1891-92 was even more pronounced during the year under review and led to a similarly excessive demand for water for kharif irrigation. It is satisfactory to note that 98 per cent. of the leased area was thoroughly irrigated, notwithstanding the difficulties experienced in meeting the heavy demands, and that bumper crops resulted.

HIJILI TIDAL CANAL.

64. The capital, interest and revenue accounts of this canal are given below:—

CAPITAL ACCOUNT.

1.—CAPITAL ACCOUNT.

HEADS OF ACCOUNT.	Outlay during 1892-93	Outlay to end of 1892-93.
1	2	3
DIRECT CHARGES.	Rs.	Rs.

Capitalization of abatement of land revenue	......	11,210
Leave and pension allowances	357	45,655
Total—indirect charges ...	357	56,865

The works in connection with the remodelling scheme for this canal have been practically completed, with the exception of the new lock at Kalinagar and the arrangements for the supply of Range II. It is expected that a definite decision as to the manner in which these works should be carried out will shortly be arrived at.

The cost of maintenance was Rs. 33,089 against Rs. 50,683 of the previous year. The high cost of maintaining this canal has been chiefly owing to the heavy influx of silt. In 1892-93 owing to the improved feeding arrangements by means of supply channels there was no closure for purposes of silt clearance. It will, however, probably be necessary to close the canal in the cold weather of the current year.

RAINFALL.

66. The rainfall at Contai station was 52·71 inches against 49·97 inches in 1891-92.

FLOODS.

67. There were no very highfloods in any of the rivers crossed by the Hijili Tidal Canal during the year. The highest gauge readings of the rivers Hooghly, Haldi, and Russulpore are shown in the following statement:—

Name of river.	Locality.	1891-92.		1892-93.		Highest record.		Remarks.
		Date.	Reading.	Date.	Reading.	Date.	Reading.	
1	2	3	4	5	6	7	8	9

Haldi ...	Etamugra ...	Ditto	116·40	Ditto	117·20	* Not known ...	120·23	* Recorded on plan without date (Mr. Vertannes's).
Russulpore ...	Kalinagar ...	18th Sept. 1891	114·70	Ditto	115·30	26th August 1888	118·50	

NAVIGATION.

68. The usual particulars regarding the traffic on the Hijili Tidal Canal carried in vessels during the last ten years are given in the following statement. The figures include those relating to the steamers belonging to the Calcutta Steam Navigation Company:—

Particulars.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.

(a) Inclusive of tolls, Rs. 1,603, Rs. 1,592, Rs. 4,590, Rs. 5,523, Rs. 3,346, Rs. 3,634 and Rs. 5,508 paid by the Calcutta Steam Navigation Company.
(b) Inclusive of passengers, 23,243, 17,554, 21,209, and 31,792, carried by the Company's steamers.

The toll-collections for the year, though still below the figures of 1883-84 and of 1888-89, indicate a decided increase of traffic. The receipts would probably have been much larger if there had not been an indifferent rice crop in Hijili. The introduction of the revised toll tarif will probably give a stimulus to the use of the canal route and still further augment the receipts.

MISCELLANEOUS RECEIPTS.

69. The miscellaneous receipts for the last five years are shown below:—

1888-89.	1889-90.	1890-91.	1891-92.	1892-93.
Rs.	Rs.	Rs.	Rs.	Rs.
1,249	1,614	899	567	1,282

The increase in the miscellaneous receipts during the year, amounting to Rs. 715, was due to the completion of the remodelling works and to the increased rents realized during the year.

DREDGING.

70. The amount of silt dredged from the Terapakia and Etamugra lock entrances, and the cost of removal is shown in the statement below:—

Name of dredger, hopper barges and mud punts.	Cubic feet dredged.	Actual cost of lifting.	Cost of removing.				Lifting rate per 1,000 cubic feet.	Removing rate per 1,000 cubic feet.	Total rate per 1,000 cubic feet.	Remarks.
			By hopper barges.	By mud punts.	Total.	Total cost of lifting and removing.

Indirect Charges.		
Capitalization of abatement of land revenue	... ..	37,911
Leave and pension allowances	2,580	8,75,220
Total indirect charges ...	2,580	9,13,131

The original Capital estimate of the Sone Canals was closed on the 30th March 1891, and works chargeable to capital which remained to be finished are being carried out under the rules laid down in Chapter XV of the Public Works Department Code. The present sanction is for Rs 7,22,013, out of which Rs 4,39,485 had been expended up to the close of the year. The outlay charged to Capital during the year compared with that of 1891-92 is shown in the following statement:—

	1891-92.	1892-93.
I.—Works—	Rs.	Rs.
(1) Head-works ...	2,035	4,096
(2) Main canal and branches ...	31,337	15,944
(3) Distributaries	79,312	49,311
(4) Drainage and protective works ...	57,728	11,361
Total works ...	1,70,412	81,312
II.—Establishment	37,083	18,425
III.—Tools and plant	(—) 1,352	5,762
IV.—Suspense accounts	(—) 1,715	(—) 47,088
Grand Total ...	2,04,428	58,411
V.—*Less*—Receipts on capital account ...	330	2,159
Net total	2,04,098	56,252

The works which were executed during the year were:—planting trees at Dehri, the construction of permanent outlets on many distributaries, masonry crossings to carry village channels under district and other roads, the Kunjee drainage cut in the Buxar Division, several other smaller drainage projects, the construction of a quay wall at Nokha on the Buxar Canal, and several other works of less importance.

INTEREST ACCOUNT.

2.—INTEREST ACCOUNT.

		Rs.
Interest charges to end of 1891-92	... ...	1,65,88,027
Ditto for 1892-93	... ...	10,30,409
Total	...	1,76,18,436

REVENUE ACCOUNT.

3.—REVENUE ACCOUNT (ACTUALS.)

PARTICULARS.	EXPENDITURE—		PARTICULARS.	RECEIPTS—	
	During 1891-92.	During 1892-93.		During 1891-92.	During 1892-93.

			Miscellaneous ...	31,827	29,214
Total Direct Charges	6,48,060	6,97,691	Total ...	9,10,094	10,56,373
Indirect Charges ...	49,780	53,556	*Less*—Refunds of revenue.	4,020	3,792
Total Working Expenses.	6,97,840	7,51,247			
Profit	2,08,234	3,01,334			
Total ...	9,06,074	10,52,581	Total Receipts ...	9,06,074	10,52,581

NOTE.—The details by heads of expenditure for the year 1892-93 and nine preceding years will be found in the table given in paragraph 74 following.

EARNINGS.

73. The earnings as opposed to collections and the actual outlay were as follows:—

	1891-92.	1892-93.
	Rs.	Rs.
Earnings—		
Irrigation ..	9,82,032	8,15,158
Navigation ...	66,517	59,089
Miscellaneous ...	31,827	29,214
Total ...	10,80,376	9,03,461
Deduct refunds of revenue	4,020	3,792
Net earnings ...	10,76,356	8,99,669
Outlay ...	6,97,840	7,51,247
Profit ...	3,78,516	1,48,422

The net earnings include the actual realisations of navigation and miscellaneous revenue, together with the revenue assessed on the irrigation of the year, after deducting refunds. The demand statements for the *rabi* season were mostly despatched after the close of the financial year, but the sums due under them are nevertheless included under earnings, which shows the amount due on account of the irrigation of the year.

The collection of outstanding arrears has helped to swell the receipts. The arrear balance is now small.

FINANCIAL RESULTS.

74. The receipts on revenue account and working expenses of the canals for the year 1892-93 and the nine preceding years are shown in the statement below :—

	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.

Net revenue	61,648	2,26,944	4,78,644	3,04,871	(—)1,[illegible]	36,846	1,51,045	27,071	2,08,234	3,01,334

Compared with 1891-92 the receipts (less refunds) have increased from Rs. 9,06,074 to Rs. 10,52,581, that is, by Rs. 1,46,507, and the working expenses (direct charges) from Rs. 6,48,060 to Rs. 6,97,691, or by Rs. 49,631. Including indirect charges the net revenue has increased from Rs. 2,08,234 to Rs. 3,01,334. The increase in the working expenses was due mainly to heavy silt clearances in the lower reaches of the Arrah Canal costing over Rs. 18,000 only required every fifth or sixth year, and to increased charges for engineering and revenue establishments amounting to Rs. 19,614 and Rs. 7,187 respectively. The works carried out under the head extensions and improvements were of a minor character, chiefly alterations to bridges. The Eastern Main Canal was closed from the 28th March to the 5th May 1892, and the Western Main Canal from the 6th to the 16th May, for silt clearance, and the lower portion of the Arrah Canal was closed for six weeks for the silt clearance already alluded to.

LENGTHS OF CANALS AND DISTRIBUTARIES.

75. The following table shows the lengths of canals and distributaries in operation, and the areas commanded, provided with distributaries, and irrigated, at the close of the last two years:—

Name of Canal.	1891-92.								1892-93.						
	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.	Navigable canals.	Canals for irrigation only.	Distributaries.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.

The Government village channels which in 1891-92 were classed as village channels, have since the close of that year been classed as distributaries. The total length of distributaries was only increased by three quarters of a mile during the year, and the canals are now fully provided with them.

VILLAGE CHANNELS AND OUTLETS.

76. The length of village channels made by villagers up to the end of 1892-93 and the number of outlets in use during the year are shown below:—

Division.	Total length of village channels completed up to end of 1892-93.	Total number of temporary and permanent outlets in use during 1892-93.	Number of permanent outlets.
1	2	3	4
	Miles.	No.	No.
Eastern Sone	381½	1,511	786
Arrah	833½	2,255	1,373
Buxar	659	1,458	589
Total, 1892-93 ...	1,874	5,224	2,748
Total, 1891-92 ...	1,987	5,943	2,356

The decrease in the length of channels in the Buxar Division is due to the fact that an unusually large number of channels was made during 1891-92 to irrigate the rabi crop of that year, when there was an extraordinary demand for water. These channels have now disappeared. Although there has been a reduction of 719 in the total number of outlets in consequence of the reduced rabi area of the year, which led to the removal of many temporary outlets, it is satisfactory to note that the number of permanent outlets has risen from 2,356 to 2,748.

77. The rainfall during the last five years registered at 22 stations on, or in the neighbourhood of, the Sone Canals is shown below:— RAINFALL

		Average of 22 Stations.				
		1888-89.	1889-90.	1890-91.	1891-92.	1892-93.

* Hot weather crop.

The copious rainfall that occurred during the rabi season accounts for the marked decrease in the area of rabi irrigation, compared with that of the previous year, when the rainfall was very scanty. The Superintending Engineer remarks:—

"It is indeed rather surprising that the rabi area was so great as it was, and the fact seems rather to show that the cultivators, who had been compelled by the bad season of 1891-92 to take canal water, had so far acknowledged its benefits that they took it again even in a rabi season of such abundant rainfall as that of the year under review."

The new rules under the Irrigation Act (Notification No. 42 of the 10th February 1891) which had been introduced in 1891-92 were fully in force during the year under review. Under these new rules irrigation is treated mainly by "seasons" and the rates are "season" rates, whereas the old rules treated irrigation more by crops. Under the new rules the area irrigated in any year is the sum of the areas irrigated in the three "seasons." This may lead in some cases to an apparent exaggeration of the area of a crop irrigated. For instance, if a sugarcane crop is irrigated in each of the three seasons—it is frequently irrigated in two—the total area shown under the new system as

irrigated during the year would be treble of the actual area of the crop. Although at first sight this may be held to be objectionable, it is actually correct, if it be allowed that the total area irrigated during the year is the sum of the areas irrigated in the three seasons. Under the old rules the rate for sugarcane under "annual" leases covered the irrigation of the crop in the kharif and rabi seasons, and if it was irrigated in the hot weather a separate lease was taken out. The total irrigated area of the year was found by adding the "hot weather" irrigation to other items (see appendix XIII for instance), this process really resulting in giving a total which included twice over those fields of sugarcane included in "five-year" and "sugarcane" leases which were also irrigated in the hot weather. In this, as in other respects, the old system was faulty.

On account of the change of rules and because one of the old crop rates (that for sugarcane) survived into part of 1891-92, a comparison of the areas irrigated in the two years cannot be made accurately.

80. The following statement gives the areas of each crop irrigated under annual and five-year leases up to 1891-92, and under season and long-term (seven and three-year) leases in 1892-93 under the new rules:—

Crop.		1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	
1		2	3	4	5	6	
		Acres.	Acres.	Acres.	Acres.		Acres.
Kharif ...	Five-year leases...	154,825	174,780	189,227	200,716	Long-term leases	235,637
	Annual leases ...	69,628	41,917	22,499	48,103	Season leases	39,202
	Total ...	224,453	216,697	211,726	248,819		274,839.
Rabi ...	Five-year leases...	27,408	31,128	20,761	20,274	Long-term leases	36,329
	Annual leases ...	69,817	20,336	20,632	177,308	Season leases	89,866
	Total ...	97,225	51,464	41,393	197,582		126,195
Sugarcane	Five-year leases...	17,869	18,360	13,568	13,801	*	
	Annual leases ...	4,600	5,004	4,402	1,196	*

Basawan ditto	... ...	24,472	
			150,791
Total	... ...		410,761

The year 1891-92 was the last in which any five-year leases were granted under the old rules. The new rules passed (in notification No. 42 of the 10th February 1892) by the Lieutenant-Governor under the Irrigation Act made marked changes in the system of leasing; under rule 71 the new schedule of long-term leases (schedule No. 1) came into force on the 1st April 1892, and it is under this schedule that seven and three-year leases, which will in time entirely supersede the old five-year leases, have been introduced. It may perhaps be explained here that the seven-year leases are at the same rate of two rupees an acre (or Re. 1-4 a bigha) which obtained under the five-year leases, but that the three-year leases are rated at Rs. 2-8 an acre (or Re. 1-9 a bigha). In the year under review five-year leases for 44,553 acres lapsed, as they had run their course, and seven and three-year leases for a total area aggregating 65,066 acres were executed. The following statement shows by divisions the main facts with reference to these leases:—

Division.	Leases which lapsed on 31st March 1892.	Five-year leases in force on 1st April 1892.	Leases entered into during 1892-93.		Total area under long-term leases in 1892-93.
			Seven-year leases.	Three-year leases.

		Kharif.	Rabi.	Hot-weather.			Kharif.	Rabi.	Hot-weather.	
	Acs.	Acs.	Acs.	Acs.	Acs.	Acs.	Acs.	Acs.	Acs.	Acs.
1892-93	82,351	16,494	46,883	5,063	150,791	271,966	39,202	89,866	9,727	410,761

The area measured during 1892-93 was 111·87 per cent. of the area for which permits were issued. The proportion of flow to lift irrigation was as 24·6 to 1.

82. The average gross discharge is the average supply entering at the head of the canal or series of canals named: the discharge utilised is the discharge at the head less the quantity gauged as escaping from recognised escapes. These duties show a decided improvement over those of the previous year in the kharif season, but the rabi duties are far lower than those of 1891-92, as is shown by the following table:— DUTY OF WATER.

Kharif.

	1892-93.		1891-92.		1890-91.	
	Acres.	Duty.	Acres.	Duty.	Acres.	Duty.
Eastern Main Canal Series ...	68,284	56·43	75,937	57·59	56,600	55·22
Arrah Canal System ...	122,471	70·46	119,304	61·25	112,584	86·87
Buxar Canal System ...	81,084	74·87	69,465	55·13	60,512	79·20
Western Main Canal Series ...	206,565	71·52	188,779	57·94	173,096	83·66
Sone Canals ...	274,839	67·06	263,816	57·84	229,696	74·24

Rabi.

	Acres.	Duty.	Acres.	Duty.	Acres.	Duty.
Eastern Main Canal Series ...	11,377	45·51	20,851	48·60	6,735	20·72
Arrah Canal System ...	53,174	76·73	60,115	70·39	30,492	57·75
Buxar Canal System ...	61,644	96·77	131,613	130·82	22,136	55·48
Western Main Canal Series ...	114,818	86·33	191,728	103·02	52,628	56·77
Sone Canals ...	126,195	79·87	212,579	92·83	59,363	47·41

In the case of the Sone Canals, the most important duty is that obtained at the period of maximum demand, as the area leased in the kharif season is restricted to that which it may reasonably be expected can be irrigated at that time.

In the year under review the rainfall in October (Subsidiary Form IVE*a*) was very deficient, and there was a large demand for water. During the ten days ending on the 19th October, when the demand was greatest, the average supply required for the irrigation on the Western Main Canal Series was 3,939 cubic feet per second for 193,118 acres of kharif (exclusive of sugarcane), which is equivalent to a duty of 49 acres per c. ft. per second to the lease of ten days. On the Eastern Main Canal Series the corresponding figure was 42 acres only.

CROP EXPERIMENTS.

83. *Crop experiments.*—The following tables show the results of the experiments made during the year to determine the yield of rice crops, wheat irrigated from the canals during the year 1892-93:—

TABLE I.

Result of experiments on "good" rice crops irrigated with canal water for the year 1892-93.

Division.	Number of experiments.	Average yield per acre weighed dry. Grain.		Straw.		Remarks.
		Maunds.	Seers.	Maunds.	Seers.	
Arrah	13	32	38	68	27	
Buxar	14	30	22	68	0

Sone Circle average ...	87	37	4	88	1	

N.B.—A good crop means a crop decidedly above the average crop in the village in which it was taken.

TABLE II.

Result of experiments on "good" rabi crops irrigated with canal water for the year 1892-93.

Division.	Staple.	Irrigated with canal water. Number of experiments made.	Average yield per acre. Grain.		Straw.	
			Maunds.	Seers.	Maunds.	Seers.
Eastern Sone ..	Wheat ...	16	24	28	49	4
Arrah	" ...	57	16	38	27	7
Buxar	" ...	34	14	6	22	13
Sone Circle average ...	...	107	17	8	28	36

The Superintending Engineer makes the following interesting comments upon the effects on the land of continued irrigation with Sone water:—

"It is rather remarkable that the average results of "good" rice crops show a steady improvement year by year, thus:—

Weight of grain from "good" rice crops irrigated with canal water.

	1892-93.		1891-92.		1890-91.		1889-90.	
	Mds.	srs.	Mds.	srs.	Mds.	srs.	Mds.	srs.
Sone Circle average ...	37	4	36	14	32	2	31	19

and this appears to suggest that one result of irrigation with the silty waters of the Sone, instead of the clear water from ahrahs and from rainfall, is to improve the soil and thus produce superior crops. It would be straining these figures too far to say that they prove this proposition, but they are certainly evidence in that direction. The fact that silt is valuable to the fields needs no proof; the magnificent crops which have been produced in Egypt for 6,000 years or more, with no deterioration of the soil, have established that fact. It is

known that irrigation from the Sone Canals insures the rice crop in bad years from failure; it did so in 1888-89: it is known that the irrigation with canal water of a field not previously watered by the canals increases the outturn. If it is also true that continuous irrigation for a series of years produces a further increase of crop by improvement of the soil to even half the extent which the above table indicates, the value to the landowner and raiyat of canal irrigation is very vastly in excess of the water paid by the latter. It was asserted at the time of the Sone Canals Commission in 1887-88 that not only was the crop produced by the aid of canal water inferior, but that the longer the land was irrigated, the worse the crop became. The facts which have been collected from these crop experiments are strong evidence that these statements were false, and stronger evidence is found in the fact that the time has already come when the canals in a period of even ordinary demand are not able to satisfy the demands of the people for rice irrigation."

DEMANDS, COLLECTIONS AND BALANCES.

84. The demands, collections, and balances of water-rates for the last five years are shown below:—

YEAR.	Amount outstanding at commencement of year.	Amount falling due for recovery during the year.	Total for recovery.	Cash realization.	Remitted or written off.	Balance at the end of the year.
1	2	3	4	5	6	7

1889-90 ...	3,80,613	7,52,788	11,33,401	8,16,394	35,225	2,81,782
1890-91 ...	2,81,782	6,29,121	9,10,903	6,44,718	21,460	2,44,728
1891-92 .	2,44,728	6,93,685	9,38,413	8,11,750	15,220	1,11,443
1892-93 ..	1,11,143	9,50,733	10,62,176	9,59,172	14,914	87,790

The Examiner gives the "assessments of the year" as Rs. 8,91,632, but the above statement shows the "amount falling due during the year" as Rs. 9,50,733, which is arrived at in this way:—

	Rs.	Rs.
Examiner's "assessments of the year" ...	...	8,91,632
Add—The assessments of the rabi of 1891-92 which were "received" in that year but legally due in 1892-93	87,567	
Deduct—The assessments of the rabi of 1892-93 which were "received" in that year but legally due in 1893-94	21,359	63,208
		9,54,840
Deduct—Certain excess recoveries which are treated as "amounts falling due during the year" (see paragraph 21 of Deputy Collector's revenue report)		4,107
Amount falling due during the year		9,50,733

The Examiner gives the outstanding balance at the end of the year as Rs. 1,12,149 instead of Rs. 87,790 as shown above. The Superintending Engineer offers the following explanation of the difference:—

"The demand statements for the rabi crop ought to be submitted to the Deputy Collector on the 15th March, but it is hardly possible to do this; some are submitted before and some after the last day of March. The Deputy Collector includes in his account of "assessments received during the year" all demand statements which reach him between 1st April and 31st March inclusive, and the Examiner's "balance outstanding" is based on those assessments. It is the fact, however, that the money due on the rabi assessments is not legally due until the 1st April, so the amount included in rabi "assessments received during the year" is not "outstanding at the end of the year," although it may be "outstanding on the 1st April" of the next year. The Examiner's figure exaggerates the true outstandings. If all the money legally due on the 1st April were collected on that day, the Examiner's figure, which is really based on the accounts for March, would still show a balance due, although such balance would not exist. At the end of March 1893, the rabi "assessments received during the year" by the Deputy Collector amounted to Rs. 24,359, so that the true "outstanding at the end of the year was (1,12,149—24,359) Rs. 87,790."

The amounts assessed during the last three years as unauthorised use of water and as wastage of water are shown below :—

	1889-90.	1890-91.	1891-92.	1892-93.
	Rs.	Rs.	Rs.	Rs.
For unauthorised use of water ...	913	2,734	13,861	14,549
For wastage of water ...	224	256	314	105

ARREARS. 85. In the following statement the Deputy Collector shows the extent to which the arrears as well as current demand have been worked off:—

	Demand of 1892-93 consisting of	Collected or remitted in 1892-93.	Percentage of demand adjusted.	Unadjusted balance at close of year.
1	2	3	4	5
	Rs.	Rs.		Rs.
Arrears previous to 1890-91	11,626	11,626	...	...
Arrears of 1890-91	4,481	4,207	93·8	274
" of 1891-92	95,337	88,258	92·5	7,079
Total arrears outstanding on 1st April 1892 ...	1,11,444	1,04,091	93·4	7,353
Current demand for 1892-93	9,50,732	8,70,295	91·5	80,437
Total ..	10,62,176	9,74,386	91·7	87,790

There is on the whole a reduction on the outstanding balance of Rs. 1,23,653, but the rabi assessments which formerly became due on the 31st March, and are now due on the 1st April, no longer form a part of the balance.

COLLECTIONS. 86. The following statement gives the collections in each district :—

DISTRICT.	DEMAND.			ADJUSTMENTS.				Balance on 31st March 1893.	Percentage, column 9 on column 4.
	Arrears on 31st March 1892.	Current demand for 1892-93.	Total.	Collection.	Remission made by canal officers.	Written off as irrecoverable.	Total.		
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
Shahabad . . .	56,678	7,72,654	8,29,332	7,71,169	1,837	1,443	7,74,449	54,883	93·3
Patna . ..	29,154	74,280	1,03,434	71,778	8,476	1,583	81,837	18,597	82·0
Gaya	25,611	1,03,798	1,29,410	1,16,525	965	610	1,18,100	14,310	88·9
Total ...	1,11,443	9,50,732	10,62,176	9,59,472	11,278	3,636	9,74,386	87,790	91·7

The collections during the year were everywhere satisfactory and show improvement over those of the preceding year. The heavy balance of Rs. 6,95,306 in 1884-85 was reduced to Rs. 87,790 at the close of the year under review. This result is very creditable to the Deputy Collector and his staff.

Besides the collections of Rs. 9,66,712 shown above, a further sum of Rs. 7,239 was credited to water-rate accounts as below:—

	Rs.
Surplus or excess recoveries	4,107
Process fees in certificate cases	2,945
Miscellaneous	187
Total ...	7,239

REMISSIONS. 87. The sums remitted during the year under review and the preceding year according to the figures given by the Examiner of Accounts are:—

	1891-92.	1892-93.
	Rs.	Rs.
By Canal officers ...	2,555	2,171
By Civil " ...	12,665	8,252
	15,220	10,423

According to the figures supplied by the Superintending Engineer the remissions are—

	1891-92.	1892-93.
	Rs.	Rs.
Written off by Civil officers as irrecoverable ...	11,510	12,743
Remissions granted by Executive Engineers ...	3,304	4,620
Extraordinary remissions by Superintending Engineer ..	1,248	...
Remitted on revised and cancelled khatianies ...	1,365	1,921
	17,427	19,284

Leaving out the extraordinary items amounting to Rs. 9,107, which were misappropriated by tahsildars in past years in the Patna district under the old system of collections which is not real remission, and Rs. 2,449 treated as refunds of revenue and charged to working expenses, there remains Rs. 5,807, which is the actual remission during the year. This amount consists of Rs. 2,172 granted by the Canal officers to correct wrong and unfair assessments, and Rs. 3,635 remitted by the Revenue officers owing to death or absconding of rate-payers, or owing to their being too poor to pay. Compared with 1890-91 and 1891-92, when the amounts remitted were Rs. 21,460 and Rs. 15,221, the result is apparently favorable, but is really so only in the case of sums written off as irrecoverable by civil officers. The remissions by Executive Engineers were in excess of those granted during the previous year, and besides demand statements aggregating Rs. 1,921 were cancelled as against Rs. 1,365 in 1891-92. This unsatisfactory result is probably not unconnected with the delay in submitting demand statements, which it is claimed were held back with the view of ensuring greater accuracy. The Superintending-Engineer is taking steps to bring about an improvement in this respect.

The ordinary remissions by the Executive Engineers are classified in the following table:—

Class.	Causes.	Eastern Sone Division.	Arrah Division.	Buxar Division.	Total, 1892-93.	Total 1891-92.
1	2	3	4	5	6	7
		Rs.	Rs.	Rs.	Rs.	Rs.
a	Charged by mistake for land cultivated by others	...	...	...	...	23
b	Excess measurement or errors in calculation	557	189	191	940	417
c	Lift charged as flow	25	38	156	219	61
d	Irrigation not denied, but remitted as not chargeable under the Act ...	59	4	170	233	797
e	Land not having been irrigated at all	733	162	110	1,005	691
f	Injury to crop due to insufficient supply	193	69	...	262	694
g	Land thrown temporarily out of cultivation	...	1	69	70	...
h	(Applicable to long leases only) Failure of crop originally sown, rule 82	27	382	1,162	1,571	306
i	Land appropriated for other purposes than cultivation	...	16	...	16	42
j	Double assessment, as when land assessed on a season lease is subsequently included in a long lease in the same year	189	88	27	304	363
	Total ...	1,783	949	1,888	4,620	3,304

The increase in the amount remitted is not satisfactory, as evincing less careful preparation of the demand statement. The increase under head *h* is

mainly due to rule 82, having been held by some Executive Engineers to justify remissions in cases to which it was scarcely intended to apply. The matter is now under consideration.

The remissions implying errors in assessments were for the last five years as follows:—

1888-89.	1889-90.	1890-91.	1891-92.	1892-93.
Rs.	Rs.	Rs.	Rs.	Rs.
18,813	11,284	6,555	3,304	4,620

The percentage on the gross demand of remissions by canal officers is as follows:—

		Percentage of remissions to gross demand.	
		1891-92.	1892-93.
Eastern Sone Division	...	0·68	0·73
Arrah "	...	0·31	0·24
Buxar "	...	0·22	0·41

REVENUE ESTABLISHMENT.

88. The expenditure on the revenue establishments employed during the year under review and the four previous years is shown below:—

PARTICULARS.	1888-89.	1889-90.	1890-91.	1891-92	1892-93.
1	2	3	4	5	6
Establishment under Collector.	Rs.	Rs.	Rs.	Rs.	Rs.
1. Permanent establishment, including travelling allowances.	29,427	30,589	31,253	40,997	58,538
2. Temporary establishment .	1,011	710	687	4,752	3,070
3. Contingencies ..	2,878	2,522	2,398	2,784	2,663
4. Fees to tahsildars or establishment employed in lieu thereof.	28,362	28,603	24,499	16,868	2,580*
Fees to patwaris. Rule 40	4,128	3,763	3,988	2,205	1,152

Contingencies	3,338	3,695	3,500	5,443	4,768
Water-regulation establishment ...	2,270	2,299	2,235	2,286	2,310
Headmen's fees	38,118	29,007	28,861	26,550	32,032
Total ..	1,58,249	1,52,823	1,45,528	1,52,113	1.59,300
Collections of water-rates and miscellaneous revenue by the Canal Revenue Department	7,63,376	8,19,762	6,47,839	8,15,858	9,71,202
Percentage	20 7	18·6	22·3	18·66	16·4

* Lumbordar's fee and contractor's percentage.

The increased expenditure is due to the large rabi irrigation of the previous year and to the heavy collections of that under review. A large part of the expense of the rabi assessments of 1891-92 is shown in the accounts of 1892-93, the headmen's fees being wholly calculated on the assessments of the previous year. The result of substituting fixed establishments for tahsildars paid by fees has been an increase in cost of from Rs. 2,000 to Rs. 3,000 a year, accompanied, however, by a very considerable increase in the efficiency of the staff. Columns 3 and 4 of the table are not altogether satisfactory, as the establishment is also employed on matters connected with areas measured and assessed in previous years. They are, however, useful for purposes of comparison.

89. The cost per acre of assessments, including permanent and temporary establishments and headmen's fees, is given in the statement below:— A SSESSMENTS.

Division.	Areas measured and assessed during 1892-93.	Cost of permanent and temporary establishment.		Area which concerns headmen's fees.	Headmen's fees earned.		Total cost of assessments per acre.	
		Total.	Per acre assessed.		Total.	Per acre assessed.	1892-93.	1891-92.

Total, 1890-91 ...	3,703	1,598	1,936	100	194	190	4	3,171	113

The Superintending Engineer writes:—

"There is an increase in the number of complaints in the Arrah Division from 2,333 in 1891-92 to 2,770 in 1892-93, mainly due to the partial failure of the hot weather supply: in the Buxar Division the increase is from 737 to 3,944; in the Eastern Sone Division there is a decrease from 1,785 to 719; the increases are largely under the heads "(*b*) excess measurements" and "(*e*) land charge not having been irrigated." The cause assigned for the increase in the Buxar Division is that in the heavy rabi season of 1891-92 there was no time to check the rabi khasrahs before the khationees had been despatched, and afterwards mistakes were found to have occurred. Out of 7,417 complaints dealt with during the year, one-third were held to be good and two-thirds were refused. The number of cases in which the petitioners were not satisfied with, or at any rate did not accept, the orders of the canal officers in the 7,417 cases dealt with, was 33 only; in these cases an appeal was made to the

Collector of the district. Out of 45 such cases about 25 per cent. were allowed by the Collectors to be good and 75 per cent. of the appeals were rejected" The following table shows the figures in the different Divisions:—

Division.	Number of appeals.		Appeals allowed.	Appeals discharged.	Pending.
	Pending from last year.	Instituted during the year.			
1	2	3	4	5	6
	No.	No.	No.	No.	No.

Total, 1892-93	4,788	1,576	2,578	634
Total, 1891-92	5,025	1,867	2,412	746
Total 1890-91	4,335	2,312	1,557	466

APPEALS. 91. There were, including 12 pending from the previous year, 45 appeals to the Collectors of districts against Executive Engineers' decisions. Of these 11 were allowed, 32 discharged, and two had not been decided at the close of the year.

Nine cases were decided by Engineers vested with magisterial powers under the Bengal Irrigation Act. Twenty-five persons accused of offences under the Act were convicted, and twenty-five discharged. The amount of fines imposed was Rs. 357, and the number of days' imprisonment thirty-eight.

CERTIFICATES. 92. The Special Deputy Collector in charge of the collections still continues to deal with the certificates required in realising water-rates.

The amount of certificate work done in each district during the year under review, as compared with that of the previous year, is shown in the following statement:—

	Shahabad.				Patna.				Gaya.				Total.			
	1891-92.		1892-93.		1891-92.		1892-93.		1891-92.		1892-93.		1891-92.		1892-93.

Balance outstanding at the close of the year.	156	2,028	98	1,664	67	6,888	37	1,752	11	277	18	111	234	9,193	153	3,527

The number for disposal was 3,137, inclusive of the outstanding balance from last year, covering a sum of Rs. 34,272 as compared with Rs. 4,764 and Rs. 56,460 in the previous year. The demand adjusted was Rs. 30,745 as against Rs. 47,267, the remissions being Rs. 5,992 compared with Rs. 15,882. The outstanding balance was reduced from Rs. 9,193 to Rs. 3,527, and the number of cases pending at the close of the year shows a satisfactory decrease of 81 cases.

The following are the Deputy Collector's remarks:—

"In Shahabad, where the arrears were generally at a normal level, there was a decrease in the number of cases. In Patna and Gaya, there was necessity for larger institutions, with a view to the adjustment of very old arrears outstanding since the year 1883-84. It may be here observed that in Patna the institutions were not above the average; on the contrary, less. Here in 1891-92 the institutions were almost nil, as in this year all the good and realizable arrears were got in, leaving only the bad debts to be dealt with in the year under report. All the 153 cases left pending at the close of the year have since been disposed of, with only eight exceptions.

Resistance to process.—Two cases of resistance to processes were prosecuted before the Criminal Court, and in both these conviction was obtained."

93. The following statements show the receipts from navigation for the last five years:— NAVIGATION.

NAVIGATION RECEIPTS.

Boats, including empties ... No.	8,096	8,058	8,644	8,645	6,710
Tonnage of boats ... Tons.	106,788	104,390	114,996	129,147	97,841
Estimated value of cargo, including rafts ... Rs.	58,04,029	49,36,564	65,25,714	70,06,595	57,32,365

The decrease in all items was caused by the rather poor outturn of crops in all but the irrigated parts of the district, the result of the scanty rainfall of the previous year.

TRANSPORT SERVICE.

94. The transport service was worked by Messrs. Hodges and Radford under the contract which had been renewed for two years from 1st December 1892. The charges, Rs. 600 per month for steamer hire, and Rs. 500 for compounded tolls, are the same as in past years. The ordinary repairs of the steamers which belong to Government are executed by the lessees.

The extent of the traffic in connection with the steamers is shown below:—

PARTICULARS.	Arrah Canal.	Buxar Canal.	Patna Canal.	Total.
1	2	3	4	5
Passengers carried { Up ... No.	11,665	8,295	4,192	24,152
Passengers carried { Down "	11,217	8,027	4,225	23,469
Cargo carried { Up ... Tons.	399	251	971	1,621
Cargo carried { Down ... "	918	465	773	2,156

On the Arrah and Buxar Canal the steamers make two, trips each way in every week. On the Patna Canal, which is the longer route the steamer makes

only one trip each way in a week. For the hire of the steamers Rs. 7,220 was realized during the year.

There are in addition to the steamers four cargo boats, the property of Government, for the hire of which Rs. 1,710 was received during the year, besides which Rs. 163 was recovered by way of fees for the use of the accommodation boats and mud punts.

MISCELLANEOUS RECEIPTS.

95. The following table shows the details of the miscellaneous receipts for the last five years:—

PARTICULARS.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.
1	2	3	4	5	6
	Rs	Rs.	Rs.	Rs.	Rs.
Sale of water	387	514	393	1,056	805
Plantations	383	279	365	995	852
Other canal produce	1,816	1,542	1,815	742	967
Water-power	835	769	1,158	1,049	1,138
Rent of buildings	8,247	8,313	8,164	8,397	8,807
Fines	224	28	40	5	362
Miscellaneous — Rent of lands	7,995	6,939	8,114	9,920	9,241
Miscellaneous — Fisheries	734	597	431	489	523
Miscellaneous — Cost of process	3,739	3,244	2,937	3,769	2,965
Miscellaneous — Sale of old materials	102	17	121	82	35
Miscellaneous — Other items	2,012	1,100	2,610	5,323	3,529
Total	26,604	23,342	26,128	31,827	29,214

MAINTENANCE CHARGES.

96. The expenditure on works and maintenance will now be briefly reviewed.

EXTENSIONS AND IMPROVEMENTS.

The principal works executed under "extensions and improvements," on which Rs. 6,541 were spent, have already been described in paragraph 74.

REPAIRS.

97. The expenditure on maintenance and repairs by main sub-heads for the last three years is shown below:—

PARTICULARS.	1890-91.	1891-92.	1892-93.
1	2	3	4
	Rs.	Rs.	Rs.
Head works	20,353	20,922	22,374
Main canal, including branches	1,78,593	1,75,837	2,00,130*
Distributaries	67,616	58,248	55,918
Drainage and protective works...	6,101	3,622	2,157
Cost of working transport service	...	1,155	...
Compensation	168	28	...
Total	2,72,831	2,59,832	2,80,579

* Includes Rs. 600 for the Arrah Dehri Telegraph line, and Rs. 4,491 on account of a theft money in the Revenue Division and of money embezzled in the Patna district.

REPAIRS TO HEAD WORKS.

98. The figures below give the cost of repairs to head works during the last three years:—

	1890-91.	1891-92.	1892-93.
	Rs.	Rs.	Rs.
Weir on Sone River	11,151	11,617	14,058
Other works	8,743	8,773	7,577
Total	19,894	20,390	21,635

The increased cost of maintenance of the Sone weir is due to extra dredging which had to be done in the Sone river during the year.

MAINTENANCE OF MAIN CANALS AND DISTRIBUTARIES.

99. Details of the expenditure on maintenance and repairs on the main canals and distributaries in each division during the last three years are given in the following statement:—

	Arrah Division.			Buxar Division.			Eastern Sone Division.			Total.		
	1890-91.	1891-92.	1892-93.	1890-91	1891-92	1892-93.	1890-91.	1891-92	1892-93.	1890-91.	1891-92.	1892-93.
1	2	3	4	5	6	7	8	9	10	11	12	13
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

Distributaries	33,706	24,943	24,668	17,747	16,927	15,587	16,161	16,377	15,663	67,614	58,247	55,908
Drainage and protective works	4,332	1,811	1,099	...	140	102	1,768	1,605	956	6,100	3,586	2,157
Total ...	1,21,905	1,08,003	1,28,084	57,321	52,258	50,842	73,493	79,118	75,530	2,52,722	2,39,379	2,54,456

* Includes cost of maintaining the Telegraph line from Arrah to Dehri.

An increase of Rs. 15,077 has taken place in the total expenditure during the year, as compared with 1891-92.

The lower portion of the Arrah Canal was closed during the year for six weeks, a longer period than usual. Advantage was taken of the long closure to carry out a good deal of work in repairs and silt clearance, and this was the main cause of the increase under those heads. The increase in the Buxar Division was mainly due to heavy repairs to bridges on the Main Western and Gurra Chowbey Branch Canal. In the Western Main Canal the decrease was the result of the efforts to effect economy in working the dredgers.

SILT-CLEARING AND DREDGING.

100. The following table shows the quantity of silt dredged from the Eastern and Western Main and Buxar Canals, and the rate at which the work was done during the last three years:—

CANALS.	1890-91.			1891-92.			1892-93.		
	Quantity dredged.	Cost, including removal over spoil bank, or discharge into river.	Rate per 1,000 cubic feet.	Quantity dredged.	Cost, including removal over spoil bank, or discharge into river.	Rate per 1,000 cubic feet.	Quantity dredged.	Cost, including removal over spoil bank, or discharge into river.	Rate per 1,000 cubic feet.
1	2	3	4	5	6	7	8	9	10
	C. ft.	Rs.	Rs. A. P.	C. ft.	Rs.	Rs. A. P.	C. ft.	Rs.	Rs. A. P.
Eastern Main and Patna ..	2,235,724	11,747	5 4 0	1,706,541	10,905	6 6 2	1,842,959	10,783	5 13 6
Western Main (1—9 miles) ...	7,833,182	45,498	5 12 11	6,749,057	43,040	6 6 0	6,725,424	40,368	6 0 0

River Sone	1,502,555	2,148	1 6 10	1,921,530	3,990	2 1 2	3,376,392	7,309	2 2 7
Head Lock ...	66,224	281	4 3 10	64,124	313	4 14 1	1,23,939	506	4 1 3
Total ...	12,357,802	62,644	5 1 1	10,628,252	59,371	5 9 3	12,068,714	58,966	4 8 4

In addition to the above, the following dredging work was done in the Arrah and Buxar Divisions during the year :—

Arrah Division.—Fouracres' dredgers were employed in this Division in dredging silt: 630,457 cubic feet were dredged in the Nasriganj subdivision at a cost of Rs. 2,893, and 135,440 were dredged in the Agoaon subdivision at a cost of Rs. 890.

Buxar Division.—In this Division a Fouracres' dredger was at work for 567 hours in the 13th mile of the Main Western Canal, where it excavated 213,448 cubic feet of silt at a cost of Rs. 964. The same dredger also works at lock No. 1 of the Buxar Canal, where 6,930 cubic feet of silt were excavated at a cost of Rs. 68.

The rates shown in the above table include the cost of lifting the silt into barges and of carrying it either over the spoil banks or into the river. The rates necessarily vary much under the latter head owing to different heights of spoil bank and of different lengths of lead to the river.

The cost of lifting the silt on to the barges or dredging proper was as shown below :—

	1890-91.			1891-92.			1892-93.		
	Quantity dredged.	Cost of dredging.	Rate per 1,000 cubic feet.	Quantity dredged.	Cost of dredging.	Rate per 1,000 cubic feet.	Quantity dredged.	Cost of dredging.	Rate per 1,000 cubic feet.
1	2	3	4	5	6	7	8	9	10
	C. ft.	Rs.	Rs. A. P.	C. ft.	Rs.	Rs. A. P.	C. ft.	Rs.	Rs. A. P.
astern Main and Patna ...	2,235,724	3,674	1 10 3	1,706,541	3,186	1 13 10	1,842,959	2,605	1 6 7
Vestern Main	7,833,182	15,276	1 15 2	6,749,057	12,731	1 14 2	6,725,421	12,483	1 13 8
uxar	720,117	1,385	1 11 9	187.000	374	2 0 0	...	...	...
iver Sone	1,502,555	1,928	1 4 6	1,921,530	3,571	1 13 7	3,376,392	6,727	1 15 10
lead Lock	66,224	208	3 2 3	64,121	177	2 12 1	123,939	316	3 5 5
Total ...	12,357,802	22,171	1 13 1	10,628,252	20,042	1 14 2	12,068,714	22,161	2 2 4

Taking the Eastern Main and Patna Canal together, the cost of "lifting" the silt was only Rs. 1-6-7 per 1,000 cubic feet as compared with Rs. 1-13-10 in 1891-92 and Rs. 1-10-3 in 1890-91. A considerable reduction. The cost for "labour" is also less than in 1891-92. The cost for "discharging" was Rs. 4-6-11 per 1,000 cubic feet against Rs. 4-8-4 in the previous year. The total cost per 1,000 cubic feet of removing the silt was Rs. 5-13-6 as compared with Rs. 6-6-2 in 1891-92.

101. The statement below compares the expenditure on repairs to dredgers during the year under review with that of the two previous years :—

	1890-91.	1891-92.	1892-93.
1	2	3	4
	Rs.	Rs	Rs.
12 Fouracres' dredgers	6,857	7,004	6,752
2 Bruce's ditto	436	750	546
2 English ditto	3,552	3,170	3,081
Mud punts ...	4,790	3,009	3,076
Total ...	15,635	13,933	13,455

102. The cost of lifting the silt on to barges, for each class of dredger used, including interest on capital cost and expenditure on repairs, is compared by Superintending Engineer as follows:—

	Average cost in 1892-93 of lifting per 1,000 cubic feet.	Interest on capital cost per 1,000 cubic feet lifted.	Cost of repairs per 1,000 cubic feet lifted.	Total.
1	2	3	4	5
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Fouracres' dredgers ...	1 14 1	0 8 7	0 13 7	3 4 3
Bruce's dredger ...	1 11 2	0 12 4	0 5 1	2 12 7
English ladder dredgers	2 1 4	1 6 8	0 14 5	4 6 5

These figures do not include the charges for interest and repairs of mud punts amounting to 14 annas and 11 pies for each class of dredger. The results show that the Bruce's dredgers are the most economical.

103. The quantity of silt cleared by hand from main canals in the Eastern Sone Division and the cost, compared with the figures for the two previous years, is shown below:—

	1890-91.			1891-92.			1892-93.		
	Quantity cleared by hand.	Cost.	Rate.	Quantity cleared by hand.	Cost.	Rate.	Quantity cleared by hand.	Cost.	Rate.
1	2	3	4	5	6	7	8	9	10
	C. feet.	Rs.	Rs. A. P.	C. feet.	Rs.	Rs. A. P.	C. feet.	Rs.	Rs. A. P.
ern Main and Patna Canals...	4,282,127	19,021	4 7 0	6,283,001	24,798	3 15 2	5,836,101	23,430	4 0 2

The Western Main Canal was closed during the year from 6th May to 16th May, and 986,104 cubic feet of silt were excavated by hand.

ED CLEARING. 104. The following figures give the cost of weed-clearing for the last five years:—

Division.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Eastern Sone ...	217	9	396	277	366
Arrah ...	1,053	715	1,299	2,470	466
Dehri Workshops ...	899	911	1,350	1,060	1,435
Buxar ...	869	726	1,505	2,206	1,583
Total ...	3,038	2,361	4,550	6,013	3,850

The decrease in the cost of weed-clearing was mainly due to the long closure of the lower reaches of the Arrah Canal.

MILEAGE RATES OF REPAIRS OF CANALS AND DISTRIBUTARIES.

105. The cost per mile of repairs to main canals and distributaries for the last three years are shown below:—

Canal.	Division.	1890-91.		1891-92.		1892-93.	
		Number of miles.	Cost per mile.	Number of miles.	Cost per mile.	Number of miles.	Cost per mile.
1	2	3	4	5	6	7	8
		No.	Rs.	No.	Rs.	No.	Rs.
Eastern Main Canal ...	Eastern Sone ...	7¼	4,054	7¼	4,472	7¼	3,870
Western ditto ...	Dehri Workshop ...	9	6,266	9	6,194	9	5,641
	Buxar	12½	364	12½	267	12½	467
Buxar Canal ...	Do.	45¼	351	45¼	305	45¼	306
Patna do. ...	Eastern Sone	79	323	79	361	79	388
Arrah do. ...	Arrah	65½	383	65½	350	65½	653
Doomraon Branch ...	Do.	40¼	163	40¼	144	40¼	145
Behea ditto ...	Do.	31	193	31	162	31	256
Chowsa ditto ...	Buxar	39½	117	39½	166	39½	150
Gurrah Chowbey Branch	Do.	38	76	38	74	38	107
Distributaries ...	Arrah	467¾	72	469	53	469	53
	Buxar	370¼	48	373¼	45	388¾	40
	Eastern Sone	358	45	350¼	47	350¼	45

The charge for establishment not specially shown under the head "Revenue establishment" was Rs. 2,08,810 in 1892-93, against Rs. 1,89,196 in 1891-92. This increase was not unforeseen. In last year's note it was shown that the cost of establishment debitable to revenue was largely dependent on the expenditure on capital construction and on provincial roads and buildings, works for which a percentage charge is made.

PLANTATIONS.

106. Below is a statement showing the number of trees, classified according to size, in the plantations in each division:—

Division.	1891-92.				1892-93.				Increase.
	Trees over 12 feet in height.	Saplings between 4 and 12 feet.	Seedlings under 4 feet.	Total.	Trees over 12 feet in height.	Saplings between 4 and 12 feet.	Seedlings under 4 feet.	Total.	
1	2	3	4	5	6	7	8	9	10
	No.	No.	No.	No.	No.	No.	No.	No.	No.
Eastern Sone	81,317	29,422	57,704	168,443	94,864	34,576	51,642	181,082	12,639
Arrah	50,755	27,738	39,900	118,393	53,936	37,842	33,611	125,389	6,996
Dehri Workshop	6,658	46,089	5,564	58,311	8,343	45,340	12,544	66,227	7,916
Buxar	20,149	8,185	14,798	43,132	19,671	10,448	14,682	44,801	1,669
Total ..	158,879	111,434	117,966	388,279	176,814	128,206	112,479	417,499	29,220

It is satisfactory to notice that there has been an increase in the number of trees in all the divisions. The least progress was made in the Buxar Division.

The receipts and expenditure of the year were as under:—

Division.	Receipts.	Expenditure.
	Rs.	Rs.
Eastern Sone ...	345	680
Arrah ...	220	2,165
Dehri Workshop ..	201	882
Buxar ...	86	2,344
Total ...	852	6,071

The Superintending Engineer remarks:—"The expenditure in the Buxar Division is the largest, and the result the least satisfactory. The special attention of the Executive Engineer has already been drawn to the matter. He explains that the decrease in the number of trees is partly due to the fact that trees were formerly planted too near together and had to be thinned out: he also has some doubts as to the correctness of the former account of the trees, and doubts if there were as many as reported: storms, too, are said to have destroyed some trees. The Buxar Canal is at present conspicuously the least wooded of all the main canals."

CALCUTTA AND EASTERN CANALS.

107. The Capital and Revenue Accounts of these canals are given below:—

CAPITAL ACCOUNT.

1.—CAPITAL ACCOUNT.

Heads of Account.	Outlay during 1892-93.	Outlay to end of 1892-93.
	Rs.	Rs.
Direct charges	72,923	53,49,933
Less—Receipts on capital account	...	54,467
Total direct charges ...	72,923	52,95,466
Indirect charges	1,356	62 383

The only works chargeable to Capital Account which were carried out during the year were—(*a*) improving two bad bends in the Jangulia river, which on account of silt deposits had become very difficult to navigate, (*b*) the construction of tow-paths with rustic bridges in No. 5 subdivision, (*c*) the construction of a toll-house at Chetla at the entrance of the boat canal. Rupees 16,800 was spent in the construction at the Calcutta Workshops, Sibpur, of six mud barges for use in the Division.

REVENUE ACCOUNT.

2.—REVENUE ACCOUNT—(Actuals).

1892-93	74,279	53,57,849	4,80,114	2,52,177	2,27,937	4·2

(a) Is Rs. 35,185 larger than it should be by reason of error of account.
(b) Is Rs. 35,185 smaller than ditto ditto ditto.

It will be seen from these figures that the increase in the net revenue derived from the canals during the year was due not to an increase in the receipts which were Rs. 45,105 less than in the previous year, but to a marked reduction in the working expenses of Rs. 91,222 compared with the figures of 1891-92. The large decrease in the net receipts was due almost entirely to the general depression of trade and falling off of exports from Calcutta during the year. As this depression has been very keenly felt by both Railway Companies and shippers, it is not necessary to enter into its details, and to trace its causes is beyond the scope of this note. The other causes that contributed to the falling off in the receipts were the transfer of the carriage of coal by the Oriental Gas Company from the canals to the Eastern Bengal State Railway, the Company having constructed a branch line from their premises to Sealdah; the withdrawal of a large amount of the jute traffic from the canals, owing to it being shipped from Chittagong instead of from Calcutta; the realisation in 1891-92 of a sum of Rs. 2,800 for arrears of rent for godowns

which swelled the receipts of that year compared to those of 1892-93; and the successful competition of the Eastern Bengal State Railway with the canals in a few minor instances.

LENGTHS OF CANALS. 109. The lengths of canals open for navigation during the year, including the steamer route, was the same as that of the preceding year 1891-92, viz., 713 miles as detailed below:—

			Miles.
Calcutta and new canals	...		10
Tolly's Nala with 20 miles of Kaorapookhar khal ...	...		37
Total Calcutta Canals	...		47
Eastern Canals { Inner boat route		189	
Eastern Canals { Outer ditto		127	
			316
Steamer route	...		350
Total Calcutta and Eastern Canals	...		713

NAVIGATION. 110. The navigation receipts during the last two years by the Collector and Supervisor of the canals and by the Executive Engineer are shown in the following statement:—

CANALS.	Number of boats and rafts.	Collections by Collector and Supervisor.						Collections by Executive Engineer.	GRAND TOTAL, GROSS REVENUE.
		Tolls from boats and rafts.	Demurrage.	Ferry tolls.	Tolls from steamers and flats.	Rents of buildings, lands, and other miscellaneous receipts.	Total.	Rents of buildings, lands, and other miscellaneous receipts.	
1	2	3	4	5	6	7	8	9	10
	No.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Calcutta and Eastern ..	80,414	3,54,752	6,233	4,945	4,955	5,606	3,76,491	} 11,295	4,80,244
Tolly's Nala ...	62,174	90,027	979	1,070	...	382	92,458		
Total 1892-93 ..	142,588	4,44,779	7,212	6,015	4,955	5,988	4,68,949	11,295	4,80,244
Total 1891-92 ...	140,748	4,96,980	6,747	6,090	5,455	7,980	5,22,258	3,085	5,25,343

The chief source of revenue from these canals is the tolls from boats and rafts. They amounted to Rs. 4,44,779 during the year against Rs. 4,96,980 of 1891-92, showing a decrease of Rs. 52,201.

The recent construction by some of the leading Steamer Companies of large cargo flats for canal navigation appears to indicate an approaching development in a new direction of the boat traffic which will probably swell the toll receipts in the future.

BOATS. 111. The particulars regarding the boats which used the canals during the last two years are given below:—

CANAL.	YEAR.	Number and Class of Boats.					
		Up to 100 maunds.	Between 100 and 1,000 maunds.	Between 1,000 and 2,500 maunds.	Between 2,500 and 5,000 maunds.	Over 5,000 maunds.	Total.
1	2	3	4	5	6	7	8
Calcutta and Eastern Canals.	1892-93	36,389	20,658	17,389	52,11	716	80,363
Tolly's Nala ..	1892-93	15,716	16,425	4,310	42	...	36,493
Total ...	1892-93	52,105	37,083	21,699	52,53	716	116,856
Calcutta and Eastern Canals.	1891-92	36,117	24,552	20,178	2,802	98	83,747
Tolly's Nala	1891-92	17,331	19,100	6,104	73	...	42,608
Total ...	1891-92	53,448	43,652	26,282	2,875	98	126,355

There was a general decrease in all classes of boats up to 2,500 maunds and an increase in those above it. The decrease is mainly due to the falling off in the rice traffic, while the increase in the number of larger boats is attributed to the preference given them by the mahajans who find them more economical than small ones.

The number of small boats and dinghies, which entering Tolly's Nala from Kourapukhar, pay toll at Kussa, was 25,607 against 23,244 in 1891-92. They are not classified.

TRAFFIC.

The following table gives the tonnage of boats by canal measurement and the estimated weight and value of the cargoes for the Calcutta Canals and Tolly's Nala compared with the corresponding figures for 1891-92:—

	Number of boats.	Tonnage of boats by canal measurement.	Weight of cargo carried	Value of cargo carried.	Tollage including demurrage.	Percentage of toll on value of cargo.
1	2	3	4	5	6	7
	No	Tons	Tons	Rs	Rs	
1892-93 .. Calcutta Canals	80,363	1,686 150	603 906	5,27 61,674	3 65,898	
1892-93 .. Tolly's Nala ...	62,100	574,606	193,552	1,39 99 716	90,704	
Total ..	142,163	2 260,756	797 458	6,67 61,390	4,56,002	0 68
1891-92 .. Calcutta Canals	83 717	1 872,508	639,822	5,57 69,888	3,96,613	
1891-92 .. Tolly's Nala	65,852	692,744	212 011	1,56,91,127	1,12,240	
Total ..	149,599	2,565,252	851,833	7,14,61,015	5,08,853	0 71

The dulness in the rice trade in Calcutta during the year is probably the principal cause of the decrease in all items of traffic.

MISSING TICKETS.

112. The continued reduction in the number of missing tickets is shown by the figures below, and shows that the toll system is steadily improving.

YEAR.	No.	YEAR.	No.
1883-84	3,086	1888-89	329
1884-85	1,104	1889-90	238
1885-86 .. .	653	1890-91	212
1886-87	542	1891-92	210
1887-88	677	1892-93	169

REVENUE ESTABLISHMENT.

113. The cost of the revenue establishment employed on toll collections for the last five years is shown below:—

PARTICULARS	1888-89.	1889-90	1890-91	1891-92	1892-93
1	2	3	4	5	6
	Rs	Rs	Rs	Rs	Rs
Salary and commission of Supervisor ...	12 972	11 053	11,475	11 863	10,529
Salary of Canal Inspector ..	4,034	3,900	5 172	5 016	5,013
Supervisor's office establishment	5,183	5 142	5 155	5 424	6,076
Canal police	2,060	2 050	2 061	2,049	2,059
Supervisor's steam-launch establishment ...	944	735	98		
Inspector's and chalan boat establishment ...	1,112	1,138	1,049	1,036	696
Dhappa water-boat establishment .	180	173	168	168	166
Dafadar	...		271	480	828
Travelling allowance	11	39	22	71	71
Contingencies	1,401	1 627	1,261	3,125	2,106
Toll-collecting establishment	9,787*	10 421*	11,178*	12,127*	12,391
Total cost of establishment ...	37,684	35,281	38,210	41,359	39,935

* Includes salary of darogas, clerks, cashiers, kootnavises, kayals, toll peons and dinghies with crew.

These figures show a decrease in the total cost of establishment Rs. 1,424 compared with those of the previous year.

MISCELLANEOUS RECEIPTS.

114. The miscellaneous receipts during the year were Rs. 15,528 against Rs. 10,218 in 1891-92, showing an increase of Rs. 5,310. This was mainly due to the crediting under this head of the sale proceeds of certain canal surplus lands, and also of the security deposit of the Pachete Trading Company, who failed to supply stone metal in accordance with the terms of their contract.

EXTENSIONS AND IMPROVEMENTS.

115. Under this head Rs. 1,502 was spent during the year, of which Rs. 256 was on the construction of a latrine in the compound of the Chitpur Lock and Rs. 1,246 on the iron girder bridge over Tolly's Nala at Kalighat which had been completed during the previous year. The recovery of Rs. 30,000, contributed by the Calcutta Municipality towards this work, converts the total expenditure under this head into a credit balance of Rs. 28,498.

MAINTENANCE AND REPAIRS.

116. The cost of maintenance of the canal by sub-heads as compared with that of the previous year is given below:—

CANALS.	Locks.	Masonry bridge.	Roads.	Buildings.	Plantations.	Dredging.	Channel and banks.	Tow-path.	Rustic bridges.	Steam-launches.	Miscellaneous.	Drainage.	TOTAL
1	2	3	4	5	6	7	8	9	10	11	12	13	14
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

Ditto, 1891-92 ...	...	...		..		...	...	...	...	.	1,920	...	1,920
Eastern Canals, 1892-93 ..	...	...	.	1,850	919	8,657	44,373	16,072	19,873	...	4,912	..	96,656
Ditto, 1891-92 ...	...	...	...	2,779	736	7,249	37,986	15,754	20,072	.	4,202	...	88,778
Total, 1892-93	2,546	7,999	16,422	4,588	1,322	19,592	51,779	17,403	20,599	4,919	18,033	...	1,65,223
Total, 1891-92	12,039	8,828	16,482	5,591	1,219	24,118	39,973	17,243	20,620	3,703	21,311	1,297	1,72,457

The expenditure of the year shows a decrease of Rs. 7,234 compared with that of 1891-92. The causes of the increase and decrease under the several sub-heads may be briefly noticed. The decrease of Rs. 9,493 under the head 'Locks' was because the canal locks needed no extensive repairs during the year. Under the head 'buildings' the decrease is nearly Rs. 1,000, due to the fact that extensive repairs to certain buildings in 1891-92 were not needed in 1892-93.

Under the head 'dredging' the decrease is Rs. 4,526, very little dredging was done during the year, and the expenditure would have been still less than it was, but for the fact that an arrear of Rs. 16,000 for silt clearance in Bhangor and Assassooni khals done in 1891-92 was paid in 1892-93.

Under "channel and banks" the increase was Rs. 11,806, due to a variety of petty works being required. Under the head 'miscellaneous' a new latrine constructed in 1891-92 at a cost of Rs. 3,845 swelled the accounts of that year, and as no such works were found necessary during the year under review, the decrease amounted to Rs. 3,390.

117. The quantity of silt dredged, the expenditure incurred, and the rate per 1,000 cubic feet during the year, including the cost of delivering the mud are shown below:— DREDGING AND SILT CLEARANCE.

	Quantity dredged.	Cost.	Rate per 1,000 cubic feet.
1	2	3	4
	C. feet.	Rs.	Rs. A. P.
Steam dredger *Victoria* ...	1,384,875	8,282	5 15 0
Fouracres' dredger ...	556,680	4,690	8 6 1
Marchant's dredger ...	273,900	2,719	9 14 9
Hydraulic dredger *Clinker* ...	756,600	6,133	7 14 11

Omitting the cost of delivering the mud, the rates of dredging proper, exclusive of the cost of repairs and of interest on original cost, were per 1,000 cubic feet—

	Rs.	A.	P.
Steam dredger *Victoria*	4	0	7
Fouracres' dredger	3	1	0
Marchant's dredger	0	12	1
Hydraulic dredger *Clinker*	2	11	0

118. The state of the plantations for the last two years is shown below:— PLANTATIONS.

YEAR.	Trees over 12 feet.	Saplings from 4 to 12 feet.	Seedlings below 4 feet.	Total.
1	2	3	4	5
	No.	No.	No.	No.
1891-92 ...	2,307	1,381	1,308	4,996
1892-93 ...	2,304	1,627	1,773	5,104

The cost incurred during the year was Rs. 1,322 against Rs. 1,249 in 1891-92.

119. *Floods.*—There were no high floods during the year in any of the rivers crossed by the Calcutta and Eastern Canals. The highest gauge readings of the river Hooghly at Chitpur, Salt-Water Lake at Dhappa, and river Ichamati at Titulia are shown in the following statement:— FLOODS.

River.	Locality.	1892-93.		1891-92.		HIGHEST KNOWN.	
		Date.	Height, R. L.	Date.	Height, R. L.	Date.	Height R. L.

(a) Highest since 1883. | (b) Highest since 1882.
(c) Highest since 1885.

ORISSA COAST CANAL.

120. The Capital and Revenue Accounts of this canal are given below :—

CAPITAL ACCOUNT.

1.—CAPITAL ACCOUNT.

HEADS OF ACCOUNT.	Outlay during 1892-93.	Outlay to end of 1892-93.
1	2	3
	Rs.	Rs.
Direct charges	2,460	42,44,752
Less—Receipts on capital account	...	3,293
Total direct charges ...	2,460	42,41,459
Indirect charges	22	1,02,975

The canal was open throughout its entire length of 97½ miles. The only work which remained to be completed during the year was the Panchpally dock on Range IVA. Fair progress had been made on it before the year closed. The measures to be adopted, in view of the changes in the Subarnarekha river, to secure an easy communication between the Jamcunda and Bhograi locks are under consideration.

REVENUE ACCOUNT.

2.—REVENUE ACCOUNT—(Actuals).

Net revenue ...	(—)16,492	(—)14,718			
Total ...	62,057	64,934	Net total receipts	62,057	64,934

NOTE.—The details by heads of expenditure for the year 1892-93 and seven preceding years will be found in the table given in paragraph 121 following.

There was an improvement in the total receipts of Rs. 2,877 over the figures of the previous year, but the working expenses still exceeded the receipts by Rs. 14,718. The tolls, however, realised in March and amounting to Rs. 9,663 show what the canal can do, and there is reason to consider the prospect more hopeful, and that the stimulus to traffic afforded by the recent reductions in the through tolls will result in an increase in the receipts.

FINANCIAL RESULTS.

121. The receipts on Revenue account and working expenses of the canal for the last eight years are shown in the following statement:—

	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.

The total direct charges were Rs. 979 higher than those of last year, though the cost of repairs was Rs. 3,108 lower. The excess charges were chiefly under Tools and Plant, and were caused by repairs which were necessary to the steamer "*Falcon*" and to dredgers, punts, barges and other floating plant.

On works alone the cost of maintenance was at the rate of Rs. 466 per mile against Rs. 498 of the preceding year. The constant work that is required at the Sabarnarekha crossing to keep the river channels navigable swells to no inconsiderable degree the yearly maintenance charges.

NAVIGATION. 122. As compared with 1891-92 an increase of traffic on all ranges except range III took place, and a large number of Bengali boats from and beyond Ghatal came for the time on to Range V.

The tollage receipts on each range of the canal for the last five years are shown below:—

Ranges.	Miles of canal open.	Tollage receipts.				
		1888-89.	1889-90.	1890-91.	1891-92.	1892-93.

MISCELLANEOUS RECEIPTS. 124. The miscellaneous receipts during the last five years are shown below:—

1888-89.	1888-90.	1890-91.	1891-92.	1892-93.
Rs.	Rs.	Rs.	Rs.	Rs.
1,381	1,563	1,410	2,072	9,149

125. Two dredgers, the *Comus* and the *Marchant*, were at work during the year in excavating silt at Bhaitghar lock and at certain points along Range V, where the crossing of thousands of cattle had caused the accumulation of bars of silt. The quantity dredged, and the cost and rate per 1,000 cubic feet, for the last two years are shown in the following table:— DREDGING AND SILT CLEARANCE.

YEAR.	Names of dredgers.	Quantity dredged.	COST OF—			RATE PER 1,000 C.FT.		
			Lifting by dredger.	Removing by mud-punts.	Total.	Lifting.	Removing.	Total.

130. The lengths of canal and distributaries in operation at the close of the year 1892-93, compared with 1891-92, are given in the following table:— LENGTH OF CANALS OPEN AND AREAS COMMANDED AND IRRIGATED.

NAME OF CANAL.	1891-92.								1892-93.							
	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Saran Canals.		Miles			Acres.		Acres.			Miles			Acres.		Acres.	
Main canal or head cut		6·31								6·34						
Branch Canals.																
I.—Daha feeder ...		3·34	...	...	64,000		3,560	..		3·34	...	...	64,000	...	5,965	...
II.—Gandaki		1·57								1·57						
III. Dhanai ...		1·00								1·00						
IV. Gangri		6·57								6·57						
In addition to the above, the following are maintained:—																
I.—Thakraha Sota		1·50	.	.	..		...	..		1·50	...	...	...	...	...	...
II.—Roopan Chap Sota		27·00	.		.		..	...		27·00	..	...	...	.	...	...

There was no alteration in the lengths of the cuts and channels constructed and maintained by the Manager of the Moniara Estate, which aggregate about 33 miles. No distributaries or village channels are maintained by Government. There are nine permanent dams and regulators in the branch canals, and twenty-five temporary bunds were constructed during the year to regulate the supply of water.

131. The average rainfall on the area under command is shown by seasons in the table below for the last four years:— RAINFALL.

	1889-90.	1890-91.	1891-92.	1892-93.
	Inches.	Inches.	Inches.	Inches.
Kharif season*	19·47	24·60	11·52	27·52
Rabi	1·20	1·43	0·61	2·33
Year	45·09	58·63	35·05	48·82

* August, September and October.

The total rainfall was slightly in excess of the normal, but in October there was no rainfall, and there was in consequence a large demand for water for rice irrigation.

132. A very high flood occurred in the river Gandak in August 1892. The height reached at Sisua was only 0·83 below the maximum recorded. No damage to the canals resulted. FLOODS.

133. The areas irrigated as obtained from the Canal Manager's reports during the past ten years, together with the rainfall, are given in the table below:— IRRIGATION

YEAR.	Kharif.	Rabi.	Perennial.	Total.	Rainfall.
1	2	3	4	5	6
	Acres.	Acres.	Acres.	Acres.	Inches.
1882-83 ..	Not known		...	1,747	40·89
1883-84 ..	Not known		...	21,122	26·32
1884-85 ..	1,917	5,306	...	7,223	35·42
1885-86 ...	888	3,677	...	4,565	39·27

1892-93 ...	1,338	2,222	...	3,560	48·82

DUTY OF WATER.

134. The duty of water cannot be calculated, as there is no regular irrigation, and the canals are drainage as well as irrigation channels.

The agreement with the proprietors of Moniara and Sadowa under which the canals were worked in 1891-92 was subsequently revised, and a new agreement between the Secretary of State and the proprietors was entered into. This agreement cancelled the previous one, and its terms consequently embraced both the years 1891-92 and 1892-93. Under it the lessees are to pay Government the actual cost of maintaining the canals, excluding the cost of establishment up to a limit of Rs. 22,000 for the two years, less the net amounts realized from irrigation and the sale of water, &c., outside the limits of their dehats. Government on the other hand undertakes to maintain the canals in good order, but to limit the expenditure on maintenance for the two years to Rs. 22,000 excluding the cost of establishment. It is, however, very doubtful whether this agreement will ever form a permanent basis for the administration of the Saran canals. The Manager of the Sadowa Estate has shown no desire for the extension of the agreement, and it is more than probable that Government will eventually be compelled to close the canals.

ASSESSMENTS, COLLECTIONS AND BALANCES.

135. The following comparative statement shows the balances, assessments, and recoveries of water-rates for the last thirteen years:—

YEAR.	Amount outstanding at commencement of year.	Amount falling due during the year.	Total for recovery.	Cash realization.	Remitted or written off.	Balance at the end of the year.
1	2	3	4	5	6	7
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
1880-81		9,770 0 0	9,770 0 0	10,080 6 9	...	330 6 9

1885-86	33,602 7 3	21,750 0 0	55,352 7 3	30,718 9 3	2,770 13 1	12,863 0 8
1886-87	12,863 0 8	21,750 0 0	34,613 0 8	11,072 10 5	..	23,540 6 3
1887-88	23,540 6 3	21,850 0 0	45,390 6 3	21,069 9 0	.	24,320 13 3
1888-89	24,320 13 3	21,850 0 0	46,170 13 3	20,115 0 0		25,755 13 3
1889-90	25,755 13 3	21,850 0 0	47,605 13 3	22,990 0 3	1,250 0 0	23,365 13 0
1890-91	23,365 13 0	21,850 0 0	45,217 13 0	37,058 2 9		8,179 10 3
1891-92	8,179 10 3	11,000 0 0	19,179 10 3	15,786 8 4	231 4 6	3,162 13 5
1892-93	3,162 13 5	11,000 0 0	14,162 13 5	1,491 11 4	...	12,671 2 1

The outstanding balance shows an increase from Rs. 3,163 to Rs. 12,671 at the end of the year under review.

MAINTENANCE AND REPAIRS.

136. The following table shows the expenditure on maintenance during the past four years:—

	Miles	1889-90.	1890-91.	1891-92.	1892-93.
1	2	3	4	5	6
		Rs.	Rs.	Rs.	Rs.
Repairs to head cut and river protective works ...	6·34	10,026	7,445	4,304	1,341
Repairs to Daha feeder ...	3·34	909	1,290	357	514
" to Gandaki feeder	1·57	1,118	1,735	221	1,550
" to Dhanai feeder ...	1·00	722	592	65	411
" to Gangri feeder .	0·57	768	2,777	129	565
" to dams and channels for irrigation purposes	...	11,357	12,615	3 945	5,106
Total ...	...	24,900	26,454	9,021	9,517
Establishment	...	12,422	10,560	3,710	3,772
Tools and plant (actual) ...	...	991	389	(—)193	213
GRAND TOTAL ...	...	38,313	37,403	12,538	13,502

The cost of maintaining the head works was much less during the year than in 1891-92. The reason of this is that there was no time for clearing silt from the head cut on account of the early demand for water, and consequently there was no expenditure under this head.

137. There are no dredgers on the canals, and the silt is removed by hand only. DREDGING AND SILT CLEARANCE.

The following statement shows the total quantity of silt removed from the canals and the cost during the year as compared with the two previous years:—

	1890-91.		1891-92.		1892-93.	
1	2	3	4	5	6	7
	C. ft.	Rs.	C. ft.	Rs.	C. ft.	Rs.
Head cut or main canal .	342,745	1,740	44,465	244	18,201	100
Feeders or branch canals	1,339,675	4,080	24,755	95	445,891	1,567
Thakaraha Sota mouth ...	549,781	2,077	594,957	1,785	383,159	1,149
Total ...	2,232,201	7,897	664,177	2,124	847,258	2,816

138. The state of the plantations for the last two years is shown below:— PLANTATIONS.

YEAR.	Trees over 12 feet.	Saplings between 4 and 12 feet.	Seedlings under 4 feet.	TOTAL.
1	2	3	4	5
	No.	No.	No.	No.
1891-92	2,642	2,979	3,993	9,614
1892-93	4,939	6,973	6,983	18,895

These figures show that the number of trees has increased from 9,614 to 18,895. The expenditure has decreased from Rs. 57 to Rs. 45.

NADIA RIVERS.

139. The approximate length of the channels comprising the Nadia rivers' system is 477 miles. No capital account of expenditure is kept. The revenue account for the last two years is given below:— REVENUE ACCOUNT.

PARTICULARS.	EXPENDITURE.		PARTICULARS.	RECEIPTS.	
	During 1891-92.	During 1892-93.		During 1891-92.	During 1892-93.

Total indirect charges ...	5,617	4,867	4,419	4,101	5,870	6,075	5,395	6,357	6,417	7,221
Total working expenses ...	1,30,892	1,00,643	82,087	64,314	97,892	1,40,769	92,989	1,09,894	1,13,274	1,30,275
Net revenue ...	71,942	94,814	1,01,694	1,38,936	1,00,783	51,119	92,834	90,588	79,463	35,245

There was a heavy fall in the total receipts during the year as compared with 1891-92, the decrease amounting to Rs. 27,217. This was almost entirely due to the abnormally depressed condition of trade during the year, though the bad state of the head of the Mathabhanga river which closed early in the year may have contributed in some measure towards making the net revenue the smallest on record.

RAINFALL AND FLOODS.

141. No rainfall register is kept up for these rivers. The flood of 1892 was higher than that of the previous year, but still much below the highest recorded level.

The gauge readings at Gheria and Berhampore for the last four years are given below:—

		GHERIA.		BERHAMPORE.
1889	...	34·00	...	30′ 1½″
1890	...	31·70	...	30′ 11¾″
1891	...	29·30	...	26′ 7″
1892	...	31·55	...	29′ 1¼″

A statement showing the highest gauge readings of the Nadia rivers is given below as compared with those of the previous year:—

River.	Locality.	1892-93.		1891-92.		Highest known.	
		Date.	Reading.	Date.	Reading.	Date.	Reading.
1	2	3	4	5	6	7	8

143. The following statement shows the number of boats, tonnage, weight, and value of cargo and toll collections:— TRAFFIC.

Name of River.	Number of boats, inclusive of steamers, flats and rafts.	Tonnage of boats.	Weight of cargo	Value of cargo.	Toll collection.	Percentage of toll on value of cargo.
1	2	3	4	5	6	7
	No.	Tons.	Tons.	Rs.	Rs.	
Bhagirathi	10,987	161,353	73,045	51,44,253	31,117	...
Ditto and Bhyrub-Jalangi...	32,948	501,824	193,663	2,66,11,567	1,09,302	...
Mathabhanga and Ichamati ...	10,855	120,312	39,586	38,37,074	24,961	...
Total, 1892-93 ...	54,790	783,489	306,294	3,55,92,894	1,65,380	0·46
Total, 1891-92 ...	60,167	804,623	352,744	3,76,05,221	1,92,718	0·53

144. The cost of the revenue establishment for the last five years is shown below:— REVENUE ESTABLISHMENT.

	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Salary and commission of Collectors	12,671	11,943	13,224	13,210	12,391
Accounts and office establishment	9,397	8,986	9,223	8,942	8,879
Travelling allowance ...	463	390	711	530	601
Contingencies	475	441	472	452	411
Total ...	23,006	21,760	23,630	23,134	22,282

The decrease results from the smaller commission earned by toll-collectors and darogas owing to diminished revenue.

The Teur weir was again damaged during the floods of 1892, a large portion of the east revetment having been carried away, with a resulting erosion that at first threatened to outflank the weir.

During a portion of the year, a qualified sub-overseer was especially deputed to reside in the vicinity of the canal and to examine carefully by actual observations its capabilities as regards the areas irrigable. His presence stimulated irrigation, which is usually resorted to in a very half-hearted manner, although no charge is made for water. The development of irrigation from this canal by the construction of distributaries is now under consideration.

No revenue is derived from the canal.

The miscellaneous receipts were Rs. 163 against Rs. 92 in 1891-92.

IRRIGATION. The areas irrigated during the last three years are shown below:—

Nature of crop.	1890-91.	1891-92.	1892-93.
1	2	3	4
	Acres.	Acres.	Acres.
Kharif	...	2,539	4,895
Rabi	2	495	150
Poppy	852	552	734
Other crops ...	...	...	640
Total ..	854	3,586	6,400

GENERAL RESULTS.

NET REVENUE. 154. The net results of the year 1892-93, compared with those of the previous year, are shown below:—

PARTICULARS.	Receipts from all sources.	Working expenses, including refunds of revenue. (Direct and indirect charges.)	Profit or loss.
1	2	3	4
MAJOR IRRIGATION WORKS.	Rs	Rs.	Rs.
1891-92	16,02,710	14,42,037	+1,60,673
1892-93	18,87,670	14,89,716	+3,97,954
MINOR WORKS AND NAVIGATION.			
For which Capital and Revenue accounts are kept.			
1891-92	6,03,297	4,35,195	+1,68,102
1892-93	5,46,751	3,46,036	+2,00,715
For which only Revenue-accounts are kept.			
1891-92	1,92,965	1,13,502	+79,463
1892-93	1,65,538	1,30,293	+35,245
For which neither Capital nor Revenue accounts are kept.			
1891-92	10,250	36,208	−25,958
1892-93	31,276	47,262	−15,986
Total { 1891-92 ...	24,09,222	20,26,942	+3,82.280
Total { 1892-93 ...	26,31,235	20,13,307	+6,17,928

The actual receipts exceeded the figures of the revised Budget estimates by Rs. 2,07,235, while the expenses were Rs. 1,06,720 more than the budgetted amount.

155. Compared with 1891-92 the net result of the Major Irrigation Works reckoned on earnings, that is, on assessed revenue instead of on actual receipts, was:— EARNINGS.

	Earnings.	Working expenses.	Profit or loss.
	Rs.	Rs.	Rs.
1891-92 ...	18,14,485	14,37,935	+ 3,76,550
1892-93 ...	16,09,209	14,85,393	+ 1,23,816

The expenditure was only slightly above the average.

The revenue from Minor Works and Navigation is derived mainly from tollage receipts.

156. The following summary shows the progress in the recovery of water-rates during the year:— ARREARS.

CANALS.	Outstanding on 1st April 1892.	Demand of 1892-93.	Collected or adjusted.	Outstanding on 1st April 1893.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Orissa Canals	2,33,704	2,61,023	4,04,911	89,816
Midnapore Canal	58,972	1,39,990	1,50,395	48,567
Sone Canals	1,11,444	9,50,732	9,74,386	87,790
Total ...	4,04,120	13,51,745	15,29,692	2,26,173

157. The approximate value of crops irrigated by Major Irrigation Works during the last two years is shown below:— VALUE OF CROPS.

CANALS.	1891-92.		1892-93.	
	Area irrigated.	Value of crops.	Area irrigated.	Value of crops.
1	2	3	4	5
	Acres.	Rs.	Acres.	Rs.
Orissa Canals	177,685	47,87,546	160,952	42,12,253
Midnapore Canal	83,973	20,99,325	91,217	22,80,425
Sone Canals	474,723	1,44,85,957	410,761	1,58,91,273
Total ...	736,381	2,13,72,828	662,930	2,23,83,951

The average value per acre of the various crops irrigated has increased from Rs. 29·0 to Rs. 33·7.

158. Two tables are attached as appendices to this note, (I—showing the number of days spent on tour by each officer of the Irrigation Department, (II) the dates of inspections of the divisional and subdivisional offices by each of the Superintending and Executive Engineers during the year 1892-93. TOURS AND INSPECTIONS.

159. The date fixed for the submission of revenue reports to the office of the Chief Engineer is the 5th September. The dates when the different reports were received are shown below :—

		In 1892.	In 1893.
Orissa Circle	Commissioner's report ...	27th September.	13th October.
	Superintending Engineer's report	23rd ditto.	5th September.
South-Western Circle	Commissioner's report ...	24th ditto.	21st ditto
	Superintending Engineer's report	17th ditto.	6th ditto
Sone Circle	Commissioner's report ...	26th ditto.	7th ditto
	Superintending Engineer's report	15th ditto.	7th ditto

All the reports were practically punctual, excepting that of the Commissioner of Orissa, which was not received until the 13th October 1893. The delay was in the office of the Superintending Engineer, who received the report early in July.

160. Last year I remarked that I thought the results of the year's working, which showed a net profit on major and minor works of Rs. 3,82,280, against Rs. 1,42,628 in 1890-91, would be considered satisfactory. This year the net revenue has reached Rs. 6,17,928. In major works only the profit has been Rs. 3,97,954, against Rs. 1,60,673 in 1891-92. If, however, earnings are considered in place of collections, the revenue during 1891-92 was, owing to the failure of the autumn rains in that year, the greater, viz., Rs. 3,76,550, against Rs. 1,20,685 in the year under review. The net revenue is largely dependent on the sum expended on repairs, and by minimizing these, it would be possible to show returns more favourable than the real facts of the case warranted. In 1892-93 the working expenses were Rs. 13,635 only less than in 1891-92, there having been extra expenditure on major works, whilst a smaller sum sufficed to keep the minor works in good order.

161. There is still more, especially in Orissa, great pressure on the staff, the system on which the canals are managed has in that circle been entirely changed during the last two years, and credit is due to the Engineers and subordinates for the energy with which they have endeavoured to meet the altered circumstances. Mr. C. A. White, Executive Engineer in charge of the Kendupatna sub-division, deserves special praise for bringing nearly all the existing irrigation under lease on the conditions approved by Sir Charles Elliott in April 1892. The irrigation from the Eden Canal was very extensive, and Rai Bama Charan Paramanic Bahadur, Honorary Assistant Engineer, had a difficult task in making the most of the water-supply available and in distributing it equitably, in both respect he succeeded. In the body of this note the good work of Babu Saroda Prosad Chatterjee, Deputy Collector, Revenue Division, Sone Canals, and Babu Jagdam Sahai, Deputy Collector, Revenue Division, Orissa Canals, has been frequently alluded to, and they both, I think, deserve the thanks of Government.

C. W. ODLING,
Chief Engineer.

The 25th November 1893.

APPENDIX I.

Statement showing the number of days spent on duty by Superintending, Executive, and Assistant Engineers and Upper Subordinates of the Irrigation Branch of the Public Works Department during the year 1892-93.

Name.	Circle or Division.	Number of days— On duty.	Number of days— On tour.	Remarks.
Superintending Engineers.				
Lieut.-Col. A. D. McArthur...	South-Western ...	356	87	On privilege leave for 9 days.
Mr. D. B. Horn ...	Ditto ...	9	...	
„ W. Connan ...	Orissa ...	365	154	
„ W. A. Inglis ...	Sone ...	365	190	
Executive Engineers.				
Mr. J. P. Scotland ...	Cossye ...	365	226	
„ T. M. L. Thompson ...	Northern Drainage and Embankment.	365	183	
„ C. E. Livesay ...	Nadia Rivers ...	365	236	
„ D. B. Horn ...	Brahmini-Byturni ...	365	134	
„ G. A. G. Shawe ...	Puri, Mahanadi and Superintending Engineer's Office.	92	29	Returned from furlough and joined Division on the 30th December 1892.
„ T. Butler ...	Mahanadi ...	273	102	On privilege leave for 92 days.
„ J. R. Swinden ...	Puri ...	173	64	On 2 years' furlough from 15th October 1892.
„ M. H. Arnott ...	Aqunpada-Jajpur and Brahmini-Byturni.	365	253	
Rai Bahadur Prosunno Coomar Daneary.	Puri ...	28	...	Returned from furlough and joined Division on the 4th March 1893.
Mr. C. A. White... ...	Kendupatna ...	365	248	
„ H. Barlow	Jagatsingpore ...	340	258	On 25 days' privilege leave.
„ J. S. L. Long ..	Gandak, Puri, and Kendupatna.	212	87	Joined Division 3rd September 1892.
„ M. J. J. P. Norman ...	Buxar	365	169	
„ O. C. Lees	Gandak ...	274	104	On 91 days' privilege leave.
„ A. S. Thomson ...	Eastern Sone ...	273	110	On 92 days' privilege leave.
„ L. R. Fraser	Dehri Workshops ...	365	68	The greater part of the work of this Division is at head-quarters.
„ R. E. Carter ...	Arrah	340	156	Transferred to the Orissa Circle from the 6th March 1893.
	Brahmini-Byturni ...	14	...	Joined Division on the 18th March 1893.
„ A. E. Silk ...	Arrah	6	2	Transferred to Eastern Sone.
	Eastern Sone ...	122	35	Joined Division on 11th April 1892. Transferred to the Roads and Buildings Branch from 18th August 1892.
„ C. H. DeMello ...	Arrah	25	7	Transferred to Buxar Division.
	Buxar	330	179	Took 10 days' joining time.
„ H. H. Green ...	Gandak ...	101	44	Transferred from the Roads and Buildings Branch and joined Division on 28th April 1892. Took charge of the division on 7th May 1892. Made over charge on the 6th August 1892.
	Ditto ...	237	119	Took charge of Siwan sub-division on 7th August 1892.
„ A. Hayes	Balasore ...	359	160	On leave for 6 days.
„ T. H. Clowes ...	Ditto ...	314	195	On leave for 7 days. Proceeded on 9 months' furlough from 22nd February 1893.
Assistant Engineers.				
Mr. A. H. C. MacCarthy ...	Arrah ...	5	...	Transferred to the South-Western Circle.
	South Western ...	172	88	Joined Superintending Engineer's office from 15th July 1892. Leave on private affairs for 6 months from 3rd January 1893.
„ W. S. Bremner ...	Cossye ...	365	170	
Rai Bahadur Bama Charu Pramanic.	Northern Drainage and Embankment.	365	235	
Mr. J. W. Fox	Circular and Eastern Canals.	364	187	On leave for one day.
„ P. G. Jacobs ...	Eastern Sone ...	297	181	Transferred to the South-Western Circle.
	Balasore ...	53	31	Joined Division on 7th February 1893.
„ J. O. Hewitt ...	Buxar	292	156	
	Eastern Sone ...	73	45	
„ F. A. A. Cowley ...	Arrah	365	278	
Rai Sahib Beni Madhab Mittra	Do. ...	340	252	On leave for 25 days.
Mr. E. A. Smith ...	Dehri Workshops ...	50	...	Joined Superintending Engineer's office in the latter part of December 1892. Joined workshops on 8th January 1893.
	Arrah	32	21	Joined Division on 28th February 1893.

APPENDIX I—*continued.*

Name.	Circle or Division.	Number of days— On duty.	On tour.	Remarks.
Assistant Engineers—concld.				
Mr. G. L. Searight ...	Buxar	69	27	Returned from 18 months' special leave and joined Division on 1st February 1893.
" J. Zorab	Do.	78	46	Transferred from the Roads and Buildings Branch, and joined Division from 16th November 1892. Was employed in charge of a section from 16th November 1892 to 17th January 1893.
" J. S. L. Long ...	Gandak ...	102	13	On leave for 40 days. Transferred to the Orissa Circle.
Rai Sahib Kally Pada Sen ...	Aquapada ...	273	134	On 92 days' privilege leave.
Rai Sahib Annada Prosad Sircar.	Ditto ...	365	208	
Mr. O. S. Smith	Brahmini-Byturni ...	341	182	Transferred from the Roads and Buildings Branch. Joined Division on 18th May 1892.
" H. G. Gearing ..	Mahanadi ...	365	39	Most of the works are within 5 miles of head-quarters.
Sub-Engineers.				
Babu Jodunath Bose ...	Cossye ...	365	123	
Rai Sahib Gopal Chunder Daw	Northern Drainage and Embankment.	365	242	
Babu Rakhal Dass Roy ...	Circular and Eastern Canals.	273	74	Returned from employment under the District Board of Khulna, and joined the Division on the 2nd July 1892.
Mr. J. Bradshaw ...	Balasore ...	360	207	On leave for 5 days.
" I. J. Atkinson ...	Ditto ...	357	39	On leave for 8 days. Principal works lie at head-quarters being in charge of workshops.
Rai Sahib Satcowry Chatterjee	Eastern Sone ...	285	12	On privilege leave for 80 days. Principal works lie at head-quarters.
Mr. S. Street	Arrah	305	191	On privilege leave for 60 days.
" J. C. Coxe	Puri ...	365	307	
Rai Sahib Prosunno Coomar Pal.	Aquapada-Jajpur ...	365	229	
Supervisors.				
Babu Jogendra Lall Chatterjee.	Northern Drainage and Embankment.	199	128	Returned from famine duty in Madras and joined the Division on the 20th September 1892.
" Rakhal Dass Chatterjee	Nadia Rivers ...	365	113	
" Lokenath Mitter ...	Ditto ...	365	216	
Mr. C. M. S. Rooke ...	Ditto ..	365	...	Employed as Toll-collector, Jangipur.
Babu Dukhina Runjan Mookerjee.	Circular and Eastern Canals.	190	85	Returned from famine duty in Madras and joined Division on the 23rd September 1892.
" Ashutosh Mitter ...	Ditto ...	358	235	On leave for seven days.
Mr. W. W. H. Leslie ...	Gandak ...	365	139	
Babu Rudra Prosonno Singh	Do. ...	365	112	
" Troylokho Nath Sircar	Do. ...	176	14	On privilege leave for 81 days.
" Gopal Chander Mukherjee.	Do. ...	174	12	
" Chundra Bhusan Dutt	Eastern Sone ...	76	2	On privilege leave for 90 days'
	Gandak ...	14	2	Principal works lie at head-quarters.
	Dehri Workshops	289	216	On privilege leave for 60 days and 2 days' joining time.
" Kanti Chundra Banerjee.	Arrah ...	60	49	
	Eastern Sone ...	286	78	On leave for 19 days, including joining time on two occasions. Principal works lie at head-quarters.
Mr. H. E. Willimson ...	Dehri Workshops ...	365	42	Principal works lie at head-quarters.
Babu Gopal Chunder Ghose	Ditto ...	365	80	Ditto ditto.
" Durga Charan Chakerbutty.	Eastern Sone ...	363	226	Two days' joining time.
" Kenaram Bose ...	Ditto ...	365	185	
" Mohendro Nath Sircar	Buxar ...	365	235	
" Pran Kissen Sen ...	Mahanadi ...	365	257	
Mr. C. A. Marchant ...	Ditto ...	201	11	Transferred from the Calcutta Canals and joined Division 28th October 1892.
Overseers.				
Babu Romanath Sircar ...	Cossye ...	365	254	
" Kirtybas Myti ...	Do. ...	365	84	Worked principally at head-quarters.
Mr. P. Mauge	Do. ...	14	...	Transfered to Madras from 15th April 1892.

APPENDIX I—*concluded.*

NAME.	Circle or Division.	NUMBER OF DAYS—		REMARKS.
		On duty.	On tour.	
Overseers—concld.				
Babu Mohini Mohan Lahiri	Northern Drainage and Embankment.	144	73	On leave for 14 days. Appointed to the Department, and joined the Division on the 24th November 1892.
" Akhoy Krishna Bose ...	Nadia Rivers ...	164	122	Was on Madras famine duty from 1st April 1892 to 22nd September 1892. Was on transit form 23rd September to 1st October 1892.
" Rajendra Nath Mukherjee.	Ditto ...	365	129	
Mr. A. E. Hefferman ...	Balasore ...	320	135	On privilege leave for 45 days.
Babu Suresh Chunder Ganguli.	Ditto ...	353	152	On leave for 12 days.
" Rajendro Lall Sircar ...	Arrah ...	359	324	
" Kherodo Chunder Mukherjee.	Dehri Workshops ...	10	...	Transferred from the Roads and Buildings Branch and joined the Division on the 22nd March 1893.
" Surendra Nath Barat ..	Brahmini-Byturni ...	307	272	On leave for 31 days. Transferred from the Arrah Division, and joined 26th April 1892.
" Hurry Churn Mukerjea.	Mahanadi ...	296	240	On leave for 69 days.
" Banku Behari Mukerjea.	Puri ...	365	166	
" Bhoosun Chunder Banerjea.	Do. ...	296	...	Transferred from the Gandak Division, and joined on the 19th June 1892. Work at head-quarters.
" Krisna Dhone Banerjea	Aquapada-Jajpur ...	359	165	
" Bankim Krishna Ghose	Brahmini-Byturni ...	365	335	
" Troyluckonath Muzumdar.	Ditto ...	296	288	Appointed to Department on 15th June 1892, and joined Division on 21st June 1892.
" Soshi Bhushan Muzumdar.	Mahanadi ...	348	271	
" Hira Lall Sen ..	Puri and Mahanadi	365	122	
" Upendranath Mukerjea...	Aquapada-Jajpur ...	132	26	Appointed to the Department on 16th November 1892, and joined Division 20th November 1892.
CALCUTTA CANALS.				
Supervisors.				
Mr. W. R. Cooksey ...	......	365	...	Daily inspections of few hours only.
" P. O. Wight ...	Toll Inspector, Dhappa.	137	...	Joined Division on 15th November 1892.
Babu J. N. Gupta ...	Canal Inspector, Tolly's Nala.	365	...	Daily inspections of few hours only.
SONE CANALS.				
Revenue Division.				
Babu Soroda Prosad Chatterjee.	Deputy Collector ...	273	93	On privilege leave for 92 days.
" Siva Sanker Singh ...	Ditto ...	355	243	On leave for 10 days.
" Madho Lall ...	Sub-Deputy Collector	297	173	Joined Division on 8th June 1892.
" Probhat Chundra Mukerjee.	Ditto ...	64	34	
Orissa Canals.				
Rai Bahadur Jugdum Sahai...	Deputy Collector ...	341	146	
Babu Gopal Bullub Mitter ...	Sub-Deputy Collector	325	178

* The area (5,000 acres) commanded by the Sasaram distributary has been added.

(a) Rupees 19,58,356 sanctioned for direct outlay on the Orissa Project from 1st April 1890 to date of closing of construction estimate on 31st March 1895—*vide* Government of India, Public Works Department, letter No. 295I., dated 8th December 1892. From 1890-91 to 1892-93 Rs. 10,83,351 have been expended out of this amount.

(b) and (c) The estimates for the Midnapore and Hidgellee Tidal canals, respectively, having been withdrawn and closed, the figures shown are the totals of the old and fresh sanctions.

(d) Sanction to the construction estimate for the Sone Project expired on 31st March 1891. The expenditure from 1st April 1891 is chargeable against the schedule of works amounting to Rs. 7,05,707 for direct outlay and Rs. 16,306 for indirect outlay sanctioned in Government of India, Public Works Department letter, No. 6I., dated 6th January 1893.

(e) There is no general sanctioned estimate for this project.

(f) Includes Rs. 8,66,000 expended from Famine Relief funds.

* Cannot be filled in, as the payment is partly for water supplied for the manufacture of indigo.

Note A.—In this table the water rates shown as assessed during the year are the amounts for which occupiers have rendered themselves liable in return for canal water supplied during the year, and include some demands which were not legally recoverable, and others of which the assessment papers were not completed till after the close of the year.

Note B.—Refunds of revenue have been deducted from "Gross assessed revenue from all sources."

SONE CIRCLE.

The following schedule is in force with reference to long leases taken in, and previous to the year 1891 92:—

Five-years Leases.

Class.	Nature of crop.	Irrigation per—		
		Cottah.	Bigha.	Acre
		Rs. a. p.	Rs. a. p.	Rs. a. p.
	For all crops ...	0 1 0	1 4 0	2 0 0

The following schedules are in force with reference to all leases taken during 1892-93 :—

Schedule No. I.

Leases for a term of years.

For water supplied between the 25th of June of one year and the 25th March of the next.	Flow or Lift.		
	Rate per acre.	Rate per bigah.	Rate per tenth of a bigah.
	Rs. a. p.	Rs. a. p.	Rs. a. p.
For leases for seven years—all crops ...	2 0 0	1 4 0	0 2 0
" for three years " ...	2 8 0	1 9 0	0 2 6

Schedule No. II.

Season Leases (Kharif).

Name of crop.	Date of supply.	Flow or Lift.		
		Rate per acre.	Rate per bigah.	Rate per tenth of a bigah.
		Rs. a. p.	Rs. a. p.	Rs. a. p.
Rice and sugarcane for kharif season only	25th June to 25th October.	3 0 0	0 14 0	0 3 0
Bhadoi, serba rice or any other crops ...	25th June to 15th October.	2 8 0	1 9 0	0 2 6

SCHEDULE No. III.

Season Leases (Rabi).

TIME OF SUPPLY.	Locality.	FLOW.			LIFT.		
		Per acre.	Per bigah.	Per tenth of a bigah.	Per acre.	Per bigah.	Per tenth of a bigah.
		RS. A. P.	RS. A. P.	RS. A. P.	RS. A. P.	RS. A. P.	RS. A. P.
15th October to 25th March.	Water supplied for all crops including sugarcane from distributaries open for kharif irrigation.	2 0 0	1 4 0	0 2 0	1 8 0	0 15 0	0 1 6
25th October to 25th March.	Water supplied for all crops including sugarcane from distributaries or parts of distributaries from which rabi irrigation only is allowed.	1 8 0	0 15 0	0 1 6	1 0 0	0 10 0	0 1 0

SCHEDULE No. IV.

Season Leases (Hot weather).

	FLOW OR LIFT.		
	Per acre.	Per bigah.	Per tenth of a bigah.
	RS. A. P	RS. A. P.	RS. A. P.
For water supplied between the 25th March and the 25th June, or at the option of the applicant, between the 25th of February and the 25th of May, for all crops.	4 0 0	2 8 0	0 4 0

In the case of charges under schedules I to IV, any smaller area than one-tenth of a bigah will be charged as one tenth. The bigah contains 27,225 square feet.

SCHEDULE No. V.

For water supplied by volume in the kharif season.

For water supplied between the 1st of September and the 31st October, four rupees for a calculated discharge of one cubic foot per second for twelve hours. For less than a cubic foot per second or less than twelve hours, a proportionate charge shall be made, but a fraction of less than one-sixteenth shall be charged as one-sixteenth.

SCHEDULE No. VI.

For water supplied by volume to fill aharas

For water supplied between the 1st of November and the 25th of March, one rupee for a calculated discharge of one cubic foot per second for twelve hours. For less than a cubic foot per second or less then twelve hours, a proportionate charge shall be made, but a fraction of less than one-sixteenth shall be charged as one-sixteenth.

List of Officers in charge of Irrigation Circles and Divisions during the year 1892-93.

Circle or Division.	Name of Officer.	Period of charge.
SECRETARIAT.		
Joint-Secretary, Irrigation Department.	Mr. C. W. Odling ...	From 1st April 1892 to 16th January 1893.

Dehri Workshop Division ...	" L. R. Fraser ...	Ditto ditto.

CANAL REVENUE OFFICERS.

Deputy Collector, Revenue Division, Sone Canals.	Babu Saroda Prosad Chatterjee.	From 1st April 1892 to 31st March 1893 (on privilege leave from 17th June 1892 to 16th September 1892).
Ditto ...	Babu Siva Sanker Singh ...	" 17th June 1892 to 16th September 1892. Officiating.
Deputy Revenue Superintendent, Orissa.	Mr. S. C. Roberts ...	" 1st to 24th April 1892.
Deputy Collector, Revenue Division, Orissa Canals.	Babu Jugdum Sahai	" 25th April 1892 to 31st March 1893.
Deputy Revenue Superintendent, Midnapore.	Mr. Koylash Chunder Ghose	" 1st April 1892 to 31st March 1893.
Supervisor, Calcutta Canals	" W. R. Cooksey ...	Ditto ditto.

RESOLUTION ON THE REPORT FROM THE BOARD OF REVENUE ON THE ROAD AND PUBLIC WORKS CESS OPERATIONS FOR THE YEAR 1892-93.

FINANCIAL DEPARTMENT—ROAD AND PUBLIC WORKS CESS.

Calcutta, the 5th December 1893.

RESOLUTION No. 5301R.P.

READ—

The Report of the Board of Revenue on the Road and Public Works cess operations for the year 1892-93.

The Road and Public Works cesses were levied at maximum rates during the year under review in all the districts in which Bengal Act IX of 1880 is in force, except in Backergunge, where, as in preceding years, the Public Works cess continued to be levied at the full rate, and the Road cess at half of the maximum rate. In reviewing the reports for 1890-91 and 1891-92, it was observed that the reasons which led to the reduction of the rate in Backergunge in 1877-78 had spent their force, and that the opposition of the District Board to increase the rate was no longer justifiable. The Lieutenant-Governor is glad to notice that the District Board have decided to levy road cess at three-fourths of the maximum rate in 1893-94. This is a step in the right direction, but the local authorities should not rest content until the full rate has been imposed, or the inability of the district to pay it has been satisfactorily demonstrated.

2. The following statement exhibits the main results of the working of the Cess Act during the past two years:—

			1892-93.		1891-92.
1	Current demand	Rs.	80,91,015	Rs.	79 67,933
2	Arrear demand (a)	„	16,58,357	„	19,44,615
3	Gross demand	„	97,49,372	„	99,12,548
4	Advance collections made in previous year ...	„	2,49,067	„	2,29,276
5	Net demand	„	95,00,305	„	96,83,272
6	Total collections	„	82,76,738	„	80,61,032
7	Remissions	„	13,368	„	25,453
8	Net balance (a)	„	14,86,471	„	18,35,454
9	Percentage of total collections on current demand...		102·2		101·1
10	Percentage of current collections on current demand		84·9		83·3
11	Number of revenue-paying estates assessed ...		212,670		255,655
12	Number of revenue-free estates and rent-free tenures assessed ...		188,593		196,955
13	Number of tenures assessed		1,264,601		1,211,264
14	Number of recorded shareholders in estates ...		1,302,506		1,597,918
15	Number of recorded shareholders in tenures ...		2,326,776		2,222,256
16	Current demand of land revenue	Rs.	3,83,72,332	Rs.	3,78,53,979
17	Present gross rental	„	14,94,80,155	„	14,78,83,221
18	Gross rental at first assessment	„			13,11,68,432

3. The figures for 1891-92 under the following heads, as given in the report under review, do not correspond with those given in the report for that year:—

(11)—Number of revenue-paying estates assessed.
(12)—Number of revenue-free estates and rent-free tenures assessed.
(13)—Number of tenures assessed.
(14)—Number of recorded shareholders in estates.
(15)—Number of recorded shareholders in tenures.

The differences are due to rent-free tenures being shown separately in accordance with the orders of the Government, to the effect of revaluations, to the opening of separate accounts, to the creation of new estates by partition, to transfers of estates from one district to another, to the mutation of names of shareholders, and to the correction of errors.

(a) Excluding advance collections made in the current year on account of future years.

4 The arrear demand given above, as brought forward from 1891-92, is less than the net closing balance shown in the report of that year by Rs. 1,77,097, and the alteration in the figures is attributed to the adjustment of the accounts of rent-free tenures in Burdwan and in other districts, to the revaluations of rent-free holdings with retrospective effect, to the correction and adjustment of accounts, and to the revision of assessments. The total collections show an increase of Rs. 2,15,706 as compared with the figures of the preceding year. The percentage of arrear collections on arrear demand, and that of current collections on current demand, were 80·9 and 84·9 respectively, against 70·6 and 83·3 in 1891-92. The balance unrealised at the close of the year was smaller by Rs. 1,71,886 than that with which it opened. The remissions were reduced from Rs. 25,453 in 1891-92 to Rs. 13,368 during the year under review, but these figures do not include a sum of Rs. 1,90,310 written off with the sanction of the Board on account of the cesses of certain rent-free holdings in Burdwan. The general results of the year's work show an improvement over those of the preceding year, and are satisfactory as a whole, notwithstanding that in several districts, owing to the partial failure of crops, the collections fell off somewhat and that in this as in other years the fifteen days' grace allowed to assessees under section 45 of the Act affected collections.

5. The percentage of current collections on current demand fell short of 90 per cent., the accepted standard, in twenty-four districts against twenty-five in the year before that under review:—

	Percentage of current collections on current demand.	
	1892-93.	1891-92.
Manbhum	59·2	64·7
Hooghly	68·8	69 1
Champaran	69·6	75·7
Saran	70·7	66·2
Midnapore	72·0	76·9
Muzaffarpur ...	77·1	70·5
Patna	77·2	76·1
Jessore	77·9	74·6
Faridpur	78·8	74·2
Gaya	80·2	74 7
Bankura	80·6	79·7
Purnea	81 1	93·4
Monghyr	81·5	72·7
Rajshahi	82·0	82·6
24-Parganas	85·1	85·3
Darbhanga	86·2	85·4
Bakergunge	87·1	84 0
Murshidabad	87 3	88·4
Palamau	87·3	......
Cuttack	87 8	91·5
Khulna	88·1	86·5
Burdwan	88·6	83·6
Lohardaga	88·8	93·5
Pabna	89·2	86·3

In all these districts, except Purnea, Cuttack, and Lohardaga, there was a failure to collect 90 per cent. in 1891-92 also, and the realisations in Manbhum, Hooghly, Champaran, Midnapore, and Murshidabad, during the year under review, were even worse than those of the preceding year. The short collections in Manbhum are explained by the Deputy Commissioner to be due to the unwillingness of the people of the district to pay the cesses until the certificate procedure is put in force. The Board rightly observe that the reason assigned is insufficient, because cess-payers would not voluntarily submit, without some good cause, to the extra payments which the issue of process involves, and the Lieutenant-Governor is not prepared to accept the explanation as satisfactory. The percentage of collections in this district has declined from 89·8 in 1889-90 to 59·2 in the year under review, and His Honour requests that energetic measures may now be taken to put matters on a proper footing.

The poor results in Hooghly are ascribed to a falling off in voluntary payments owing to the partial failure of crops during the past two years, and to the

difficulty of realising cesses from rent-free holdings, of which there are some 30,000 recorded in the district. The non-payment of cesses by some of the principal landholders of the district is said to have affected the collections in Champaran. The short collections in Midnapore are attributed to failure of crops and to the fact that coercive measures could not be taken until after December, in consequence of the whole office establishment having been engaged up to that time in correcting the mistakes of previous years and adjusting accounts. The involved circumstances of certain zamindars, the difficulty in tracing out the owners of rent-free holdings, and the fifteen days' grace allowed for payments, are said to have interfered with the collection of the demand in Murshidabad. No explanation is given of the short collections in Purnea, Rajshahi, the 24-Parganas, and Lohardaga. The bad result in Cuttack is said to have been due to the prevalence of high prices during the greater part of the year, and to the inability of the Collector's office to issue certificates in time. The latter in its turn is attributed to the issue of a larger number of certificates owing to the collections having been taken out of the hands of kanungos, and to the inadequacy of the amount provided in the budget on account of court-fees. It is stated that an application was made for an additional grant, but that no orders were received during the year. The Board observe that the high prices were due less to bad harvests in Orissa than to short harvests in Madras and Bengal, and that the high prices of produce with a fair crop should have facilitated collections; while as regards the delay in the issue of certificates, they consider that the Collector would have acted wisely if he had exceeded the grant in anticipation of sanction. The Lieutenant-Governor agrees with the Board in thinking that the reasons put forward in explanation of short collections in this district are inadequate. In the remaining districts given in the list above, the collections, though far from satisfactory, show an improvement as compared with the previous year.

6. In eight, as compared with thirteen, districts in the year 1891-92, the percentage of collection of the arrear demand was below 80 per cent.—

	Percentage of arrear collections on arrear demand.	
	1892-93.	1891-92.
Murshidabad	49·3	43·0
Burdwan	50·7	14·2
Bankura	53·1	51·3
Cuttack	60·0	80·5
Gaya	68·5	58·5
Shahabad	71·8	72·8
Midnapore	76·5	87·4
Darbhanga	76·9	80·2

In all these districts, with the exception of Shahabad, the current demand also was indifferently collected, the receipts being below 90 per cent. It is, however, satisfactory to notice that in the first three districts the collections, which were very low in 1891-92, show some improvement, although they are not yet up to the standard. In Cuttack and Darbhanga the percentage of collections was far below that of the preceding year, and in the former the causes which interfered with current collections are said to have affected the arrear collections as well. The bad result in Darbhanga is ascribed to the scarcity from which the district suffered in the first two quarters of the year, and to the people having been engaged in celebrating marriages in the fourth quarter. The last is an excuse which does not commend itself to the Lieutenant-Governor, as the condition is more or less constant, and it seems likely that after the bad harvests in the earlier part of the year its effect must have been less rather than greater than usual.

7. Arrears to the extent of Rs. 6,618 have become barred by limitation. They occurred in five districts, Burdwan heading the list with Rs. 3,672. These figures are exclusive of the sum of Rs. 1,90,310 referred to in paragraph 4, which was written off as barred by limitation or otherwise irrecoverable. Moreover demands are said to have become barred in two other districts, viz., Midnapore and Hooghly, but the particulars have not been furnished.

8. The gross collections, *i.e.*, the sum of both current and arrear collections, exceeded 90 per cent. of the gross demand in the seventeen districts given below as compared with eleven in 1891-92, and seven in 1890-91:—

	1892-93.		1891-92.	
	Percentage of current collections on current demand.	Percentage of arrear collections on arrear demand.	Percentage of current collections on current demand.	Percentage of arrear collections on arrear demand.
Darjeeling	99·8	100	99·8	100
Singhbhum	99·8	...	100	...
Jalpaiguri	99·5	100	94·4	100
Noakhali	97·6	99·3	89·9	91·5
Puri	97·3	91·0	96·1	69·6
Hazaribagh	96·1	99·9	97·2	100
Bogra	94·8	100	94·0	100
Birbhum	94·7	95·6	94·8	97·1
Nadia	94·3	98·9	93·9	99·3
Balasore	93·8	92·2	92·2	73·6
Rangpur	93·4	96·3	92·7	95·2
Dinajpur	92·3	99·5	84·1	99·5
Tippera	92·1	97·1	86·8	94·0
Mymensingh	92·0	93·4	92·5	95·6
Chittagong	91·1	95·9	91·8	94·4
Dacca	90·5	93·5	86·1	92·3
Malda	90·2	99·9	86·6	99·6

The results are satisfactory and creditable to the officers concerned, and the success of the local officers in Singhbhum, where there was no arrear demand and 99·8 per cent. was collected of the current demand, serves to accentuate the failure in the neighbouring district of Manbhum noticed in paragraph 5.

9. The certificate procedure under the Public Demands Recovery Act is in some parts of the province largely employed for the realisation of cesses, and the following statement compares the working of this procedure during the past two years:—

	1892-93.	1891-92.
Certificates pending from the previous year ...	49,718	30,494
Filed during the year	77,794	84,984
Total for disposal	127,512	115,478
Cancelled on objection	1,118	912
Struck off	7,341	1,631
Fully discharged	79,728	63,211
Pending at the close of the year	39,325	49,724
Sales effected	1,045	791
Sales set aside	30	17

The number of certificates filed was as usual smallest in the Chota Nagpur Division (553) and largest in the Patna, Burdwan and Presidency Divisions, where they amounted respectively to 25,053, 18,100 and 8,575. Taking districts singly, the largest number was instituted in Hooghly (7,154), Darbhanga (6,077); Gaya (4,543), Bankura (4,463), and Saran (4,141). In Midnapore the number of certificates filed was 350 in excess of that of the previous year, but owing to the delay in issuing the notices of demand the number disposed of was small, so that the unrealized balance at the close of the year rose from Rs. 72,347 in 1891-92 to Rs. 94,300 in the year under review. It is stated that this balance has been reduced by Rs. 25,000 since the close of the year, and now that the accounts have been put in order, the Lieutenant-Governor trusts that active measures will be taken to realise the arrears. His Honour is glad to observe that although the number of cases for disposal was larger than in 1891-92, the number disposed of was also greater, so that the number of certificate cases pending at the close of the year was in the whole province 10,399 less than in the preceding year.

10. Complete revaluations of the districts of Murshidabad, Nadia, Pabna, and Balasore were brought to a close during the year and resulted in each case in an increase on the existing valuation; and partial valuations and revaluations were concluded in the districts of the 24-Parganas, Jessore, Dinajpur, Bogra, Darjeeling, Jalpaiguri, Faridpur, Backergunge, Chittagong, Noakhali, Monghyr, Balasore, and Manbhum. Statement VII attached to the Board's

report shows that valuation or revaluation work is in progress in eighteen districts. In two of these, viz. Mymensingh and Noakhali, the valuation operations have been completed, but no completion report has been received. The Lieutenant-Governor desires that in future a column may be added to Statement VII showing the date of the commencement of proceedings in each district.

11. Statement VI, appended to the Report, compares the gross rental for 1892-93, calculated from the returns under the Cess Act, with the gross rental ascertained in the same manner when road cess was first assessed. The gross rental at first assessment compares as follows with the gross rental in 1891-92 and in 1892-93:—

			Rs.
Gross rental at first assessment	...	...	13,11,68,432
Ditto in 1891-92	...	...	14,78,83,221
Ditto in 1892-93	...	...	14,94,80,155

As in the preceding year, there was a decrease of gross rental in eight districts compared with the gross rental at first assessment: in seven of them the decrease is due either to transfer of areas from these districts to others, or to diluvion. Backergunge, the remaining district, which last year showed an increase on the original valuation, now shows a decrease owing to a reduction in the valuation of the Dakhin Shabazpur estate under section 37 of the Cess Act. Tippera shows an increase of Rs. 1,22,364 as against a decrease of Rs. 1,00,615 in 1891-92. This result is attributed to the effect of valuations and revaluations.

12. The names of the Deputy Collectors whose work is favourably noticed by the Board will be communicated to the Appointment Department.

13. The Lieutenant-Governor's acknowledgments are due to the Board for their careful and efficient administration of the Department, and for the complete report now submitted.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 2nd December, 1893.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
BURDWAN DIVN.	1	Burdwan Dec. 2, '93 Kalna ... Katwa ... Raniganj ...	Nil Nil Nil Nil	Weather—cold and occasionally cloudy. Winter rice is being harvested. Sowing of *rabi* crops nearly finished. Fodder and water sufficient. Prices of common rice :— Srs. Burdwan ... ... 12 to 15 } Kalna ... ... 9 to 13 } per rupee. Katwa ... ... 15 } Raniganj ... ... 15 }

* Means for 6 days. | † Mean of 5 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01
rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, *i.e.*, from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 2nd of December 1893.

					DISTRICT OBSERVATIONS.										
					Of week.				Rainfall.						
									Since 1st of month.			Since 16th October 1893.			
Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Mean for district.	Normal mean.	Variation.	Mean for district.	Normal mean.	Variation.	District.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least ·1 inch of rain has fallen.

CALCUTTA, *the 5th December* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 2ND OF DECEMBER 1893.

THE meteorological changes during the week have been small and unimportant, and fine settled weather has prevailed in most districts during this period. During the previous week conditions in Bengal had been distinctly disturbed from the existence of two storms, the first of which had passed over North-Western India from the Arabian Sea, and the second which passed from the Bay of Bengal across the south of the Peninsula. At the close of that week the unsettled conditions were rapidly passing away, and fine north-east monsoon weather was establishing itself over the province. At the beginning of the present week therefore pressure was comparatively high over the province, though on the 26th it had fallen by small amounts; a fairly steady north-westerly and northerly wind current had established itself, and conditions were fairly normal, except that temperature was in excess, the excess being small at the eastern stations and increasing towards the west of the province where the mean temperature was 4° and 5° above the normal at many stations. On the 26th, however, both temperature and humidity had fallen by small amounts. On the 27th the changes were very similar to those on the 26th, and pressure had fallen slowly, while humidity was lower, and a rather rapid fall of temperature had occurred. On the 28th the barometric changes over north-eastern India were irregular, humidity had decidedly increased, while temperature had fallen. On the 29th a rather rapid fall of pressure had occurred, and pressure became in defect by amounts varying up to 0·06″ at the north-western stations. Temperature and humidity changes were decidedly irregular, and a rapid increase of cloud had taken place in and near the hills, and a few rain showers were reported in the Jalpaiguri and Darjeeling districts. On the 30th a rapid increase of pressure had occurred, the rise being largest in and near the hills, and the distribution of pressure had become distinctly irregular. The large changes on the 29th and 30th pointed clearly to the existence of disturbed conditions, particularly in and near the hills, and on the 30th moderate general rain was reported in the Jalpaiguri, Kuch Bihar and Darjeeling districts. Humidity increased considerably on the 30th, but temperature had generally fallen. A further rapid increase of pressure took place on the 1st December, and pressure became in excess by about a tenth of an inch, and the distribution over the province was more regular. Hence conditions improved in North Bengal, and weather became fine again over the whole province, while temperature also rapidly decreased and became generally below the normal. On the 2nd pressure had begun to fall, but it was still in excess. Temperature changes were also small, and at the majority of stations the mean temperature was nearly normal. Light northerly winds also prevailed over the whole province. Thus weather has been of north-east monsoon character throughout the week except in parts of North Bengal, where unsettled conditions prevailed on the 29th and 30th.

Pressure.—The mean pressure for the week has been in excess of the normal by from about 0·02″ to 0·04″. This excess has been fairly equally distributed in all districts.

Temperature.—The mean temperature of the whole province for the week has again been in excess by about half a degree. The largest excess has been registered in Orissa, where it equals 1·7°.

The actual temperatures registered during the week and their variations from the usual temperature for the present season are most clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations from the normal it will be seen have been small.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 2nd of December 1893.

	Normal mean maximum temperature for the week ending 2nd December.	Actual mean maximum temperature for the week ending 2nd December 1893.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 2nd December.	Actual mean minimum temperature for the week ending 2nd December 1893.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 2nd December.	Actual mean daily temperature for the week ending 2nd December 1893.	Variation of actual mean from the normal.

Rainfall.—The average rainfall in the Kuch Bihar and Darjeeling districts has equalled 0·52 inch, and in the Jalpaiguri district 0·39 inch. Elsewhere the whole province has been practically rainless.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 2nd of December 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th Oct. 1893.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌒, dew.

CONTENTS.

REPORT OF THE WINTER RICE CROP, 1893.

THE following is published for general information.

REVENUE DEPT.,
The 11*th December*, 1893.

C. E. BUCKLAND,
Secy. to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final report on the winter rice crop of Bengal, 1893.

1. *Character of the Season.*—The character of the season up to the middle of September last was described in the summary of the district returns given in the preliminary forecast issued on the 4th October 1893. Up to that time the season, although characterized by excessive rainfall, proved favourable on the whole to the winter rice crop, except in certain limited areas, where the crop could not be sown or transplanted on account of excessive accumulation of water or was damaged by floods. Since the middle of September, the distribution of rainfall has been exceedingly favourable to the winter rice crop, and prospects have generally improved. From 26 out of the 46 districts a better outturn of

the crop is now reported than was reported in the preliminary forecasts. Fourteen District officers have maintained and only six* have reduced their preliminary estimates. In three out of the six last mentioned districts namely Darbhanga, Muzaffarpur and Champaran, the crop appears to have been damaged by the recurrence of flood in October.

* Darbhanga. Champaran. Hazaribagh. | Muzaffarpur. Cuttack. Singhbhum.

2. *Area cultivated.*—The district estimates of area cultivated with winter rice in the current and the last year, as reported in the preliminary forecasts, remain unaltered with a few minor exceptions. The total area in Bengal cultivated with winter rice this year appears from the district returns appended hereto to be 30,570,388 acres, against 29,881,460 acres estimated to have been cropped last year (or 30,172,678 acres as returned for the year 1892 in this Department's note, dated the 15th November 1892.

3. *Character of the crop.*—It will be seen on reference to the district returns that 21 out of the 46 districts have reported a full average (16 annas) or more than a full average crop, 16 have reported the crop to vary from 12 to 16 annas, and 9 from 9 to 12 annas. No district, as a whole, returns less than a 9 anna crop, although there are a few subdivisions where the crop has been estimated at 8 annas or less in consequence of the injury caused by excessive rainfall and floods. Thirty-one out of the 46 districts have reported this year's crop to be better than last year's; two have reported the crop to be equal to that of the last year, and only 13 have reported worse crops. This year's crop may, therefore, be taken to be better than the crop of 1892. For Bengal as a whole the winter rice crop of 1892 was estimated in the final report on that crop at about 14 annas; the crop of 1893 may be estimated at fully 16 annas, or about 2 annas in excess of the last year's crop.

4. *Gross outturn.*—The outturn in cwts has been obtained in rough fashion for the whole province by multiplying the total area cultivated by 15 maunds, or 1,230 lbs., which has been assumed to be the average yield of clean rice to the acre in the case of the winter rice crop. An attempt was made to obtain from district officers estimates in cwt. of the outturn of the crop, based on such rates of yield as they might think proper to adopt whether with reference to the estimates made in this office letter No. 291T., dated 14th June 1892 (addressed to the Government of Bengal) or to other reliable sources of information. On the whole, however, it has been thought best in the present note to omit the district figures. It is not clear whether in forming their estimates, district officers have taken into account the yield of winter rice only or also the yield of the early rice crop, and the figures representing yield of rice must be further elucidated before particular estimates for each district are substituted for the rough estimate for these provinces hitherto adopted.

B. C. BASU,
Asst. to Director of Land Records
and Agriculture, Bengal.

W. C. MACPHERSON,
Offg. Director of Land Records and
Agriculture, Bengal.

CALCUTTA,
The 6th December 1893.

Final Report on the Winter Rice Crop of Bengal, 1893.

Khulna.																
Sadar	210,000	192,000	223,600	...	...	18	12	...	...	...	...	...	...	...	In the Sadar subdivision, as there was heavy rain in due time, the outturn is better than what had been expected. Owing to timely rains the prospect in the Satkhira subdivision is somewhat better than last year, but as the bil lands could not be brought under cultivation, the outturn is below average. In some places of the Bagerhat sub division there was a bumper crop and in some places an average one owing to sufficient rains, but as in some low places the crop was utterly destroyed, the outturn may be little below the average.	The Collector raises the average of current year's crop from 432,900 as given in the preliminary forecast of winter rice crop, 1893, to 600,000 on the ground that it is unlikely that one-third of the area usually under winter rice has been left waste this year.

Nadia.															
Sadar ...	34,000	42,000	65,[illegible]0	...	...	10	7	...	...	...	...	...	...	...	At Sadar and Ranaghat subdivisions the outturn of crop is better this year than that of the preceding year, at Meherpur it is equal, while at Kushtea it is worse. The Subdivisional Officer of Kushtea, since the submission of the preliminary forecast in which outturn was estimated at 3 annas, has ascertained by local enquiry that the outturn would not be less than 5 annas this year, and accordingly reported this latter figure in his final report of winter crops. He further reports that excessive and continued rainfall just after the transplantation hampered the growth and development of the young plants, and affected the outturn to a certain extent.

															present estimates are more accurate. The area brought under the crop in the Bangaon sub-division is much less than last year's normal, owing to a large portion of the lands, specially in thana Mohespur, having been submerged under rain water in the sowing season. In all the sub-divisions except Bangaon, the outturn will be below normal and last year's owing to excessive rainfall. In Bangaon the crop planted on high lands has suffered less from the rains, hence the outturn will be better than that of the last year, in which the crop suffered from short rain.	
District Total...	475,000	501,600	57[illegible],0[illegible]6	−5·30	−17·82	9	13	..	..	..	..	..	..	..

Sahahabad.																
Arrah ...	100,600	222,800	373,200	......	......	13	8	......	......	......	......	......	......	......	In Arrah the decrease is due to excessive rainfall which partially damaged the crop. The greater portion of culturable land remained under water owing to the overflow of the rivers, and hence could not be cultivated and sown in time. The figure in column 4 is the normal and not the maximum area capable of being cultivated with winter rice. In Buxar the timely rainfall did much good to the crop this year. In Sasaram the heavy rain in October affected partially the winter rice, which was otherwise good, and in consequence of the excessively wet character of the season, the standing crop was damaged.	If the figures reported for the current year are correct, the area entered against Arrah subdivision in column 4 appears to be impossible. The Collector's attention was drawn to this figure in the remarks on the preliminary forecast. The figures entered against Sasaram are equally open to comment.
Buxar ...	123,600	126,618	126,618	......	......	12	8

Sadar (a) ...	282,000	282,000	290,000	Nil.	−2·75	14	14								(a) This year's crop was somewhat below the average on account of the damage caused by the floods in the low lands.
Kishanganj (b)	242,900	265,000	352,000	−8·34	−3·09	16	16								(b) In the preliminary forecast the outturn was put at 14 annas, but the seasonable heavy rain at the end of September and at the beginning of October caused the plants to thrive well and to fill in the ears with grains. There was some injury to the crop from inundation, but this was confined only to tracts bordering the rivers. This partial loss was made up by the better outturn of this crop on high lands, which were immensely benefited by their timely rainfall, and hence the outturn has been estimated at 16 annas (average).

LIBERALITY OF HIS HIGHNESS THE MAHARAJA OF HILL TIPPERA AND CERTAIN OTHER NATIVE GENTLEMEN IN RELIEVING DISTRESS CAUSED BY THE INUNDATIONS OF AUGUST 1893, IN TIPPERA AND NOAKHALI.

REVENUE DEPARTMENT, AGRICULTURE.

Calcutta, the 7th December 1893.

RESOLUTION—No. 5013.

READ—

A letter No. 727G., dated the 20th November 1893, from the Commissioner of the Chittagong Division.

The Lieutenant-Governor is glad to record his recognition of the liberality displayed by His Highness the Maharaja of Hill Tippera and other native gentlemen in the promotion of measures to alleviate the distress which occurred in the districts of Tippera and Noakhali owing to the inundations of August 1893.

2. His Highness the Maharaja of Hill Tippera placed sums aggregating Rs. 6,000 at the disposal of the Collectors of these districts for the relief of his distressed tenants. Rai Abhoy Churn Mitra Bahadur, the contractor for the South Lushai Hills, who has property in Tippera, contributed Rs. 400 for relief operations in the two districts. Maharaja Durga Churn Laha, C.I.E., of Calcutta, and Mr. Arthur Caspersz, Receiver, Joynagar estate, Noakhali, each gave a donation of Rs. 200 to the Collector of Noakhali to be spent in relieving sufferers.

3. Nawab Khaja Ahsanulla Bahadur, C.I.E., of Dacca, and Maharajkumar Benoy Krishna Deb of Sobhabazar, Calcutta, dealt directly with their distressed tenants. The former distributed Rs. 5,000 in gratuitous relief and gave Rs. 5,000 in loans to such of his tenants as required them. The exact amount spent by the latter on these objects has not been ascertained, but the Commissioner reports that his liberality was on a similar scale.

4. In Noakhali M. Yakub Ali Chouдhuri and his brothers, Zamindars of Raipur, and Babu Chandra Kumar Roy of Dalalbazar, distributed 10 maunds of rice daily for a period of over a month.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Commissioner of Chittagong for information and for communication to the noblemen and gentlemen referred to.

Ordered also that this Resolution be published in the *Calcutta Gazette.*

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 9th December, 1893.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF NOVEMBER 1893.

THE principal features which have characterised the meteorology of November have been:—

1. Pressure has been in excess of the normal in each week of the month, and the mean excess has varied from 0·04" to 0·07"

2. Temperature was nearly normal for the first ten days, and then became rather excessive, and for the period from about the 18th to the 25th the mean temperature was about 3° higher than usual. This excess, however, quickly decreased towards the end of the month, and the average excess for the whole of November equalled about a degree.

3. Humidity and cloud proportion were decidedly higher than usual for the greater part of the month, and the mean monthly amounts were in moderate excess.

4. Rainfall was almost absent for the greater part of the month, though a few unimportant showers fell during certain periods of disturbance. The total falls for the month in most districts have not averaged more than a tenth of one inch, and the highest only a fifth of an inch in South Bihar. Hence rainfall has been less than the normal amount, except in Bihar, where very small excess falls have been registered.

5. The weather during the month has been far less settled than usual, owing to the existence of several storms which formed over the sea area. One cyclonic storm formed in the south of the Bay and struck the Madras Coast to the south of Madras on the 6th, when the disturbed conditions due to the breaking up of the storm, advanced northwards over Bengal. A severe cyclonic storm from the Arabian Sea struck the coast of Kathiawar near Veraval on the 20th, and the disturbed conditions from this spread over the whole of Northern India, Bihar, &c. Another small cyclonic storm formed in the south of the Bay and crossed the south of the Peninsula on the 24th. Lastly, slightly disturbed conditions existed in the hills to the north of Bengal towards the close of the month. All of these disturbances affected the weather in Bengal, and hence conditions in Bengal were unusually disturbed during November.

The meterology of November in Bengal calls for little detailed review. For the first few days weather was of fine settled character in Bengal, though in the south of the Bay a feeble storm had commenced to form. This advanced slowly towards the Madras Coast, and on the 4th was at some little distance from it, and was still probably only of little importance. On the 5th a brisk fall of pressure occurred in the south-west of the Bay, and a very distinct barometric depression was formed, the centre of which was lying off the South Madras Coast. Conditions having thus become more seriously disturbed over the Bay, weather in Bengal also became a little more unsettled, and the sky clouded over rapidly at the southern stations. From the 5th to the 6th the small storm advanced in a westerly or north-westerly direction, and struck the Madras Coast a little to the south of Madras, probably close to the Seven Pagodas, shortly before 8 A.M. on the 6th. The barometric depression at the centre was considerable, and the storm, though small, was accompanied by a severe gale of wind, very high sea and heavy rain. The depression apparently broke up as a separate storm on striking the coast, but the disturbed conditions due to its disintegration steadily and rather rapidly spread northwards. A moderate wave of humid monsoon winds advanced along the west coast of the Bay, and gave heavily clouded skies with rain at first in Orissa and over the southern parts of Bengal from the 6th to the 8th and 9th; and then as the moist winds again advanced northwards over the province, rainfall extended to Chota Nagpur and Bihar, the rain being reported over the last district, principally on the 9th instant. As the wave of humid winds advanced up the west coast of the Bay, it did not penetrate to any great extent over either East or North Bengal, which districts therefore received very little rain. This advance of humid winds was only temporary and was soon overcome by the superior force of the winds from Upper India, and it was soon driven back towards the Bay by the dry north-westerly and northerly current from Northern India, and on the 11th the rainfall over the province had practically ceased.

Conditions in Bengal therefore from about the 6th to the 11th, were very abnormal, and for the greater part of the time the sky was heavily clouded, the air was unusually damp, the day temperatures were comparatively low, and the night temperatures high, and rain was received in most districts on one or two days.

For the period from the 11th to the 18th weather was generally fine and of ordinary north-east monsoon character, and only a few showers occurred in Orissa and in the hills to the north of Bengal. The humid winds brought up by the storm in the Bay had completely retreated from Bengal, though temperature, humidity, and cloud proportion were still somewhat higher than usual. At this time weather conditions in Bengal again became disturbed, the disturbance being due to the formation and of advance of two storms. The first storm formed in the Arabian Sea, probably about the 17th, and rapidly increased in intensity. It moved in a northerly and north-easterly of direction, and struck the Kathiawar coast near Veraval on the 20th. The disturbed conditions and rainfall due to this storm spread in an easterly direction over Central India and the North-Western Provinces, and reached Bihar, and on the 21st and 22nd moderate showers were reported over this area, while more or less disturbed and cloudy weather prevailed over a large part of Bengal. The disturbed conditions at this time were increased by the existence of a storm in the south of the Bay, which formed on the 19th or 20th and advanced slowly in a westerly direction, crossing the south of the Peninsula on the 24th.

It will be thus seen that weather conditions generally during the period from the 18th to the 25th were very decidedly disturbed by the existence of the two storms. Hence, as is

usual during disturbed weather, temperature and humidity were decidedly high in Bengal; the sky was also much more clouded than usual during the north-east monsoon months, and light showers fell in many districts. From about the 25th instant, however, the disturbed conditions due to the two storms were very rapidly passing away, and from the 25th to the close of the month fine settled weather of ordinary north-east monsoon conditions obtained.

Pressure—At the commencement of the month was above the normal by about 0·06″ to 0·1″. In the second week the excess had increased to 0·07″ to 0·11″, but it then diminished and equalled about 0·05″ for the next fortnight, and at the close of the month it had still further decreased and equalled about 0·02″ to 0·04″. For the whole month the mean excess has usually ranged between 0·04″ and 0·07″, and the smallest excess pressures have been shown in Orissa and parts of Bihar, while the largest excess pressures have been registered in the extreme east and extreme west of the province, where Sibsagar on the one hand and Ranchi on the other have registered an excess of 0·075″.

Temperature was almost normal up to about the 18th, but from the 18th to the 25th it was in excess by about 3°, and from the 25th to the end of the month by about half a degree. For the whole month the average excess in the mean temperature has equalled 1°.

This excess has, however, been almost entirely confined to the night or minimum temperatures, which for the month have been from about 1° to 3° in excess. On the other hand, at the great majority of stations the average day or maximum temperatures for the month have been slightly below the normal, the defect usually equalling about a degree.

Rainfall.—The largest average divisional fall has only equalled 0·22 inch in South Bihar. In Orissa, North Bengal and North Bihar the falls have averaged from a fifth to a tenth of an inch, and in the remaining divisions the falls for the month have been less than a tenth of an inch. The only division receiving a fall in excess of the usual amount for November has been Bihar, and in this division the Shahabad district has received the largest amount of 0·85 inch. In the remaining districts a fall of 0·89 inch is reported in Darjeeling, one of 0·69 inch in Kuch Bihar, and one of 0·42 inch in Puri.

The following table gives in a condensed form the rainfall information for each of the seven large meteorological divisions of Bengal for the present year up to the close of November. The numbers there given as in the case of the former months of the year are the actual average rainfalls in each division expressed as a percentage of the normal fall for the period, and the last column also gives the total rainfall up to the close of November expressed in the same way. The rainfall for the year, it will be seen, has been rather largely in excess of the normal in all divisions.

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	Actual rainfall of first eleven months of 1893 expressed as a percentage of the normal fall for the period.

The table's top heading reads "STATION OBSERVATIONS."

* Means for 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10
rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, *i.e.* from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 9th of December 1893.

DISTRICT OBSERVATIONS.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	Of week: Mean for district.	Of week: Normal mean.	Of week: Average number of rainy days.	Of week: Normal number of rainy days.	Rainfall since 1st of month: Mean for district.	Since 1st of month: Normal mean.	Since 1st of month: Variation.	Since 16th October 1893: Mean for district.	Since 16th October 1893: Normal mean.	Since 16th October 1893: Variation.	District.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is "when at least 0·1 inch of rain has fallen.

CALCUTTA, *the* 12*th December* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 9TH OF DECEMBER 1893.

THE changes during the week have been very small, and have been of a character to intensify the north-east monsoon conditions obtaining over Bengal. At the commencement of the week pressure and temperature were in excess of the normal by small to moderate amounts, and a rather light northerly wind current was reported in all districts. Pressure fell slowly on the 3rd on the first day of the week under review, and this fall continued on the 4th, but a rather brisk increase set in on the 5th, which continued on the 6th, but was succeeded on the 7th by a moderate fall, though on the 8th and 9th pressure was again increasing moderately. The effect of these changes was to make pressure in excess at the close of the week by about 0·11″ to 0·12″, and as the excess pressure in the south of the Bay was much smaller than this, baric gradients had become decidedly favourable for a strong north-east monsoon, and thus at the close of the week a moderately strong northerly wind current was blowing in all districts. Temperature also has been falling decidedly for the greater part of the week, and from being in excess at the commencement by nearly 2°, at its close the mean temperature had become in defect at all except the extreme south-eastern stations and at the western stations in Bihar, Chota Nagpur and Orissa. In the districts named moderate excess temperatures were still registered at the end of the week, but elsewhere the mean temperature was in defect by amounts ranging up to about 3° in North-East Bengal. In most districts also fine settled weather with nearly cloudless skies has prevailed for almost the whole week, but somewhat cloudy weather was reported in East and North Bengal on two or three days, and a few local showers, but of no practical importance, fell in these districts on the 4th and 5th. Fine settled and dry weather with rather low temperature and humidity therefore prevailed generally for the greater part of the week.

Pressure has been above the normal for the greater part of the week, and the average has shown an excess of about 0·06″ to 0·1″, the excess being largest at the northern stations and smallest in Orissa.

Temperature.—The mean temperature was in excess at the beginning and in defect of the normal at the close of the week. For the whole of the period an excess of 1·3° has been registered, the excess having been largest in South Bihar and Chota Nagpur, where it has equalled about 2°.

The actual temperatures registered during the week and their variations from the usual temperature for the present season are most clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations it will be seen have been largest in the night or minimum temperatures, which have been rather considerably above the normal.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 9th of December 1893.

	Normal mean maximum temperature for the week ending 9th December.	Actual mean maximum temperature for the week ending 9th December 1893.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 9th December.	Actual mean minimum temperature for the week ending 9th December 1893.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 9th December.	Actual mean daily temperature for the week ending 9th December 1893.	Variation of actual mean from the normal.

Rainfall.—Except for a few unimportant local showers in East and North Bengal, the whole province has been rainless during the week.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 9th of December 1893:—

Meteorological Divisions.	Temperature.						Rainfall.											
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th Oct. 1893.

The average vapour tension of November from 9 years' registers	0·616		
The mean cloud proportion of the month	2·90		
The average cloud proportion of November from 16 years' registers	2·54		
The total rainfall of the month	0·03		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	0·02		
The average fall of November from 48 years' registers ...	0·65		
The greatest fall in 24 hours	0·03	6th.	
	Days.		
The number of rainy days in the month	1		
The average number of rainy days in November from 24 years' registers	2		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	132·7		
The mean difference of sun and air temperatures	52·3		
The greatest sun temperature	143·4	3rd.	
The greatest excess of sun over air temperature	61·2	3rd.	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	60·0		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	5·7		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	8·3	30th.	
	Miles.		
The mean movement of the wind per day	34·1		
The greatest movement of the wind in one day	57·0	13th.	
The greatest movement of the wind in one hour	10·0	26th, 1 to 2 P.M. and 2 to 3 P.M.	

The number of hours with winds from each of the 8 points—

N. 219, N.E. 72, E. 14, S.E. 6, S. 1, S.W. 2, W. 20, N.W. 66, Calm 320.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 1·6° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

C. LITTLE,

For Meteorological Reporter to the Govt. of India.

The total fall from 1st January to 9th December 1893	85·23
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·19

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; △, dew; =, fog.

NOTE ON THE EARLY COTTON CROP IN BENGAL, 1893.

THE following is published for general information.

REVENUE DEPT.,
The 14th December, 1893.

C. E. BUCKLAND,
Secy. to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Note on the Early Cotton Crop in Bengal, 1893.

1. *Explanatory.*—There are, generally speaking, two cotton crops in Bengal, namely, the early crop, believed to be the more important of the two, which is sown during the monsoon rains and harvested during the cold weather, and the late crop which is sown at the close of the rainy season and harvested in the hot weather. This report is prepared in accordance with the orders of Government prescribing the issue of two annual forecasts—one dealing with the early crop, and the other with the late crop. The report on the late cotton crop of this year will be issued in the beginning of February next.

The cultivation of cotton has ceased to be important in Bengal, except in the Chittagong Hill Tracts and in a few districts of Bihar, Chota Nagpur, and Orissa. The Chittagong Hill Tracts is the only district which now grows cotton for export; the produce of the other districts is locally consumed.

2. *Area sown.*—The total area sown in early cotton this year appears from the returns annexed hereto to be 226,437 acres against 231,780 acres estimated to have been sown last year. In some districts the area sown this year is reported to be less than last year's area on account of excessive rainfall at the sowing time, but on the whole there does not appear to have been any marked decrease in the area sown this year.

3. *Character of the crop.*—The excessive rainfall which characterised the last rainy season is reported to have more or less injured the cotton crop in most districts; and in some places the crop was further damaged by floods. Taking all the cotton-growing districts together, the outturn of the early crop may be estimated at 10½ annas or two-thirds of an average crop. The crop is reported to be extremely poor in the Chittagong Hill Tracts, which is, as already remarked, the only cotton-exporting district in Bengal.

B. C. BASU,
Assistant to Director of Land Records and Agriculture, Bengal.

COUNTERSIGNED.

W. C. MACPHERSON,
Offg. Director of the Dept. of Land Records and Agriculture, Bengal.

CALCUTTA,
The 8th December 1893.

Forecast of the early cotton crop of Bengal, 1893.

1	2	3	4	5	6	7	8	9
DIVISION.	DISTRICT.	Approximate normal area under cotton in acres.	Approximate area sown last year in acres.	Estimated area sown this year in acres.	Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year ?	Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn ?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
					Annas.	Annas.		
Burdwan ...	Bankura ...	2,050	1,650	1,440	8	7	Owing to rainfall during the sowing time the cultivation of this crop is not very favourable, and it is expected that the outturn will be much below the normal.	In the preliminary bhadoi crop's forecast for 1893, the area under early cotton was shown as 2,0[illegible]0 acres.
	Birbhum ...	1,100	1,000	1,000	16	18	... .	No return was called for from this district. The figures shown here have been taken from the preliminary bhadoi forecast for 1893.
	Midnapore ...	7,000	7,000	5,100	9	7	The decrease in the area and outturn is due to the unusually heavy rainfall during the year.	In the preliminary bhadoi crop's forecast for 1893 the area under early cotton this year was shown as 7,2[illegible]0 acres.
Rajshahi ...	Jalpaiguri ..	450	240	275	14	12	Owing to moderate rain in sowing time an increased area was sown. Heavy rainfall at the growing time injured the growth of the plant; hence this year's outturn will be worse than that of the last year.	It is not apparent why the area sown in early cotton this year should be short of the normal.
Chittagong ..	Chittagong Hill Tracts.	17,000	17,000	17,000	7½	4	Excessive rain did much damage to cotton crop; hence the low forecast. The acreage under cotton crop is shown in Table AI of the agricultural statistics for 1891-92 as 12,500, but 17,000 acres as returned under jum crops in Table AI of 1892-93 represent, according to the process of cultivation followed by hill-men here, the area actually under cotton.	The figures in columns 3, 4 and 5 have been changed in consequence of the Assistant Commissioner's remarks to 17,000 acres.

1	2	3	4	5	6	7	8	9
DIVISION.	DISTRICT.	Approximate normal area under cotton in acres.	Approximate area sown last year in acres.	Estimated area sown this year in acres.	Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Patna ...	Patna	13,072	9,880	6,938	Annas. 11½	Annas. 6	In the Sadar sub-division there is a decrease in the area sown which was due to excessive rainfall, but the area, though smaller, will give a better yield as the crop is doing well. There is a decrease both in area sown and the estimated outturn in the Barh sub-division, which is due to excessive rain at the ploughing and sowing season. It also injured the seeds sown. In the Dinapore sub-division, owing to heavy rainfall throughout the season, the seeds did not germinate properly, hence there is a decrease in outturn.	Hitherto the area under cotton cultivation in this district used to be estimated at 3,400 acres (*vide* Table A1-3 of 1891-92, and Report on cotton crops in Bengal for year ending June 1892.) In the preliminary bhadoi crops forecast for 1893, the area sown in cotton during the last rainy season was shown as 2,263 acres. The Collector now estimates the normal area under *early* cotton crop *i.e.* exclusive of late cotton, if any) at 13,072 acres, and the area sown this year at 6,938 acres. It is necessary to reconcile such discrepant estimates. Out of the estimated average under cotton this year, 6,700 acres appear to be in the Barh sub-division alones the area, the Sadar and Dinapur sub-divisions are insignificant.
	Gaya	100	100	100	16	16	The cultivation of cotton is only nominal, any slight change in the cultivated area or estimated outturn is therefore almost imperceptible.	The estimates of area under cotton appear to be very doubtful.
	Darbhanga ...	12,914	12,914	12,914	12	10	The excessive rain in August and September has affected the outturn.	The rainfall during August was almost equal to the normal, but in September and October it was considerably in excess of the normal fall.

	Mussaffarpur	9,000	9,000	9,000	16	5	The decrease in the outturn of this year is due to the excessive rains and high floods that have caused a great damage to this crop throughout the district.	Much of the loss is believed to have been due to floods, for the distribution of rainfall was very much like what it was in the neighbouring district of Saran, where a full average crop is expected.
	Saran ...	40,000	40,000	40,000	13	16	Better outturn this year is due to favourable rainfall.	The present estimate of area sown in cotton agrees with the estimates given in Table A of Agricultural Statistics for 1891-92 and in the Report on cotton crop for year ending 30th June 1892; but it differs very widely from the estimate given in the preliminary bhadoi forecast for 1893, while it is put at 11,709 acres.
	Champaran ...	1,000	1,000	1,0[illegible]0	14	10	Incessant rains and floods are the causes of decrease in the outturn.	
Bhagalpur ...	Monghyr ...	10,7[illegible]	10,520	10,730	13¼	[illegible]	.....	No return was called for from these two districts. The figures shown here have been taken from the preliminary bhadoi forecast for 1893, with the exception of the estimate of normal area in Monghyr, which has been taken at the same figure as the area sown this year. The estimate of outturn in Monghyr seems rather low.
	Bhagalpur ...	14,000	14,0[illegible]	14,000	15	10[illegible]		
	Sonthal Parganas	12,530	12,150	12,[illegible]99	12	13	The increase in the area sown this year is due to the favourable rain that fell.	The present estimate of area sown with early cotton this year differs slightly from the estimate (11,0[illegible]6 acres) given in the preliminary bhadoi forecast of 1893, but it differs greatly from the estimate of area (both early and late) sown in 1891-92, which is given as 1,557 acres only in the Report of cotton crop for that year.
Orissa ...	Cuttack	3,[illegible]61	2,1[illegible]0	1,914	11	10	Owing to unusual heavy rain and consequent floods at the sowing time, the area under this year's cotton crop is below the normal. The low outturn is also due to the same cause and to the high floods and untimely rainfall.	The area sown in cotton during the last bhadoi season was given in the preliminary bhadoi forecast as 3,3[illegible]8 acres against 1,914 acres now shown.
	Balasore ...	983	983	910	11	12	The decrease in area is due to excessive rain at the time of sowing, and the increase in outturn, as compared with that of last year, is in consequence of good rains.	

1	2	3	4	5	6	7	8	9
DIVISION.	DISTRICT.	Approximate normal area under cotton in acres.	Approximate area sown last year in acres.	Estimated area sown this year in acres.	Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year.	Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn?	Remarks by the District Officer.	Remarks by the Department of Land Records and Agriculture, Bengal.
	Puri	14,460	12,492	9,080	Annas. 6	Annas. 12	Owing to abundant rainfall in May, the area under cotton decreased, but the outturn is expected to be good owing to the season being favourable.	In the preliminary bhadoi crops forecast for 1893, the area sown in cotton during the last *bhadoi* season was shown as 8,500 acres
	Angul and Khand Mals.	5,000 ?	5,000 ?	5,000	7	16	....	No return was called for from this district. The figures shown have been taken from the preliminary bhadoi forecast of 1893, with the exception of the figures in columns 3 and 4, which have been assumed to be equal to the area sown this year.
Chota Nagpur .	Hazaribagh ...	7,471	7,471	7,471	19¼	12	....	The return for Hazaribagh has not been received. The figures shown here have been reproduced from the preliminary bhadoi crops forecast.
	Lohardaga ...	11,000	11,000	11,000	16	12	This is not a cotton-producing district. What is produced is barely sufficient to meet the consumption of the people of the district.	In the report of cotton for year ending June 1892, the area under cotton in this district was estimated at 61,175 acres. This includes both early and late cotton, but the area under the latter is believed to be insignificant as compared with the acreage under the early crop. The present estimate agrees, however, with the estimate of area sown in cotton in the last bhadoi season as shown in the preliminary bhadoi forecast for 1893.
	Palamau	10,000	5,827	5,827	13	11	Owing to excessive rainfall the outturn is worse than last year.	In the preliminary bhadoi forecast for 1893, the area sown in cotton

							in the last bhadoi season was shown as 7,927 acres. It is not stated why the area sown this year should be below the normal. Is it due to excessive rainfall at sowing time or to the usual misconception about the terms 'normal area,' which are wrongly taken to be the maximum area capable of being sown in a particular crop?
Manbhum	40,000	40,000	40,000	6	7	The heavy rains were injurious to cotton. At the Sadar the outturn is estimated at 8 annas on an average, and in the Gobindpur sub-division at 6 annas.	
Singhbhum ...	23,000	10,413	10,413	13	11	The area sown this year is equal to that of last year, but the little decrease in outturn of this year is due to the excessive rainfall.	In the preliminary bhadoi forecast of 18[illegible], the area sown in cotton in the last bhadoi season was given as 9,731 acres. It is not explained why this year's area should be so short of the normal. *Vide* remarks under Palamau.
Total for the cotton-growing districts above entered.	255,800	231,780	226,437	11½	10½		

FINAL REPORT ON THE BHADOI CROPS, 1893.

THE following is published for general information.

REVENUE DEPARTMENT,
The 19th December, 1893.

C. E. BUCKLAND,
Secy. to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final Report on the Bhadoi crops, 1893.

Character of the season.—The yield of the *bhadoi* or *aus* crops is, generally speaking, determined by the rainfall of the period from April to September, and especially by the rainfall from the middle of May onwards. The earlier months of the present year, namely, from January to April, were unusually wet, and although the frequent and abundant showers which fell during this period were favourable on the whole to the preliminary operations of cultivation, they prevented much of the low-lying areas from being brought under cultivation. During May and June, when the sowing and weeding operations were in progress, the weather was unfavourable. Except in a few districts of North Bengal and North Bihar: the rainfall during these months was exceedingly heavy, and the growth of the young crops was checked in consequence; while in some parts the crops in low-lying lands suffered from accumulation of water. In July, again, the rainfall was above the normal, except in Orissa and South-West Bengal. During August the rainfall was generally short of the normal, but September was marked again by exceedingly heavy rainfall, except in some of the Eastern districts. Excessive rain was, therefore, a marked characteristic of the last monsoon season, and the mischief thereby caused to the *bhadoi* crops was aggravated by floods in many districts of Eastern Bengal and in parts of Darbhanga, Muzaffarpur, Champaran and Cuttack.

2. *Area sown.*—The total area cropped with *bhadoi* crops this year appears from the appended returns to have been 15,650,099 acres against 15,963,824 acres estimated to have been sown last year. Out of the total area cropped this year, *bhadoi* paddy occupied about 7,300,000 acres or about 46 per cent., and maize and millets nearly three million acres or about 20 per cent. Taking the Provinces as a whole, the total area sown with *bhadoi* crops this year does not seem to have been much below that of last year. The localities where the area sown was returned as considerably short of that sown last year were shown in a statement appended to the first forecast of the *bhadoi* crops issued on the 24th September last.

3. *Estimated outturn of the crops.*—The *bhadoi* food crops, including paddy, maize and millets, have been more or less damaged by excessive rainfall in almost every district in Bengal, and in some districts in East Bengal, and parts of Cuttack and North Bihar, by floods also. It will appear from the appended returns that only a few districts* or sub-divisions have reported a full or more than a full crop. A statement is annexed to this report showing the sub-divisions in which the food crops have suffered to the extent of eight annas and upwards. The outturn of the *bhadoi* food-crops in these Provinces may be estimated at about $\frac{11}{16}$ths of an average or 16 annas outturn, at which it was estimated in the first forecast, dated the 24th September 1893. The estimates of outturn now returned for several sub-divisions are found to vary from those stated in their preliminary forecasts, but the variations, though large in case of a few sub-divisions, do not appreciably affect the preliminary estimate of outturn for Bengal as a whole. The *bhadoi* crops of this year have been much poorer than those of the last year, which were estimated at fully 16 annas.

* Bankura, Birbhum. Sadar (Hooghly), Basirhat (24-Parganas), Ranaghat (Nadia), Dinajpur, Kurigram and Gaibanda (Rangpur), Jamalpur (Mymensingh), Gopalganj (Saran), Madhepura (Bhagalpur), Purnea, Malda, and Khurda (Puri).

B. C. BASU,
Assistant to Director of Land Records and Agriculture, Bengal.

CALCUTTA,
The 7th December 1893.

W. C. MACPHERSON,
Offg. Director of the Dept. of Land Records and Agriculture, Bengal.

APPENDIX I.

Final Report on the Bhadoi crops, 1893.

Jessore ...	Sadar ...	568,960	[illegible]4,000	Bhadoi paddy	135,2[illegible]	1[illegible]3,[illegible]	120,[illegible]	16	12	The decrease in area sown with bhadoi paddy, jute, til and miscellaneous crops as compared with normal and last year's is due to heavy rainfall at the sowing season. The decrease in outturn is due to injury caused to the crops by heavy and incessant rains. The increase in the normal area under bhadoi paddy is due to the fact that the area previously grown with indigo which has ceased to be cultivated, is now brought under cultivation of this crop.	
				Jute	[illegible]	[illegible]	[illegible]	16	[illegible]

The area sown this year with bhadoi paddy, bhadoi pulse and indigo are below normal and last year's owing to excessive rain at the sowing season. The slight increase in the area under jute over last year's calls for no explanation, but the decrease as compared with normal is attributed to heavy rains. The area under til is larger than in the preceding year, but below normal. The increase may be attributed to the season being more favourable to the sowing of this crop. The decrease in the area under miscellaneous crops as compared with normal may be attributed to the heavy rainfall of the year. The fall in the outturns of bhadoi paddy, bhadoi pulse, jute, and indigo is attributed to excessive and incessant rain which destroyed the young plants or stunted their growth. The slight increases in the outturns of til and miscellaneous crops call for no comments.

Rangpur—*concld.*	Gaibanda	458,400	371,200	Bhadoi paddy	64,000	64,000	64,000	14	16		
				Jute	51,200	51,200	51,200	15	18		
	Total ...	456,400	371,200	All bhadoi crops ..	115,200	117,200	115,200	14½	17		
	Whole district...	2,231,640	1,602,700	Bhadoi paddy ..	275,400	283,400	285,100	13¾	16	The price of winter rice was high last year. People naturally turned their attention to food-crops, but unseasonable weather interfered with their growth. The outturn was better, however, than at first feared. The unequal distribution of rain did little harm to the hardy thakri pulse. Jute, being a profitable crop, is gaining steadily in area year by year. But for the lands being water-logged the crop would have been still more plentiful.	The outturn of Jute was estimated in the Final Jute Report at 14 annas. It is now estimated at 18 annas.
				Millets	5,500	....	5,500	..	12	Very little indigo is grown in the district.	
				Indian-corn (maize) ..	100		100		16		
				Bhadoi pulse	12,700	12,727	12,800	7	13	The excessive rains did not harm the *til* crop so badly as was feared at first.	
				Jute	286,300	276,400	295,500	13	18		
				Indigo	7,700	7,863	6,600	5½	16		
				Til (gingelly) . .	1,930	1,900	2,069	9	12	There is an increase in area under this year's bhadoi crops owing to a large quantity of lands having been utilized in sowing bhadoi paddy owing to the high price of rice during the previous year.	
				Miscellaneous (not included in the above).	94,600	94,600	94,600	16	12		

	District Total .	2,231,440	1,002,700	All bhadoi crops .	684,200	646,530	702,000	13	15¼	The crop would have been a bumper one this year had there not been heavy rain during the weeding season. The outturn of this year has been estimated to be 15¼ annas, which is better than that of the last year, during which the crop was injured by excessive rainfall at harvesting time and by floods in July and August.

Mymensingh—concld.	Kishoreganj ...	470,160	224,000	Bhadoi paddy ...	64,000	57,600	57,600	10	10	Owing to the incessant heavy rain in May last, the area cultivated this year has been smaller than the normal area; but the area brought under jute cultivation this year is greater than that of last year. This is owing to the high prices of jute in early part of last year. In the preliminary forecast the expected outturn was shown 8 annas, but the actual outturn proved to be 10 annas, as the rains did not do so much damage as was apprehended.	
				Jute	57,600	44,800	45,000	12	10		
	Total ...	470,160	224,000	All bhadoi crops ...	121,600	102,400	102,600	11	10		
	Jamalpur ...	817,752	627,200	Bhadoi paddy ...	69,700	25,000	25,000	8	16	This year's outturn is much better than last year's owing to the seasonable and sufficient rainfall. It had been estimated at 17 annas but the harvest came to 16 annas, as a small portion was lost for the excessive rainfall at the time of reaping.

DISTRICT.	Sub-division.	Total area of sub-division in acres.	Total area estimated to be under cultivation in acres.	Name of crop.	Approximate normal area under each *bhadoi* crop in acres.	Approximate area under each of the last year's *bhadoi* crops in acres.	Estimated area under each of the this year's *bhadoi* crops in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year.	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
								Annas	Annas		
Darbhanga	Sadar	782,080	594,560	Bhadoi paddy ..	26,112	26,112	26,112	16	4	Favourable and timely rainfall during the sowing season helped the raiyats to cultivate bhadoi crops as in ordinary years, but the late excessive rainfall followed by unprecedented flood caused severe damage to the bhadoi crops of almost the whole Sadar Sub-division. The average outturn is roughly estimated at 4 annas.

Muzaffarpur	Sadar ...	779,520	614,000	Bhadoi paddy ..	40,000	50,000	40,000	16	5	The decrease in the area sown this year, as compared with the figures in column 7, is due to the fact that in the last year's forecast the area was very disproportionate. The figures have now been revised and should be taken as approximately correct. The material falling in the estimated outturn of this year is due to damages caused by the continued rains and unprecedented high floods throughout the district.

Banka ...	758,400	588,000	Bhadoi paddy ...	30,200	30,200	30,200	16	16	There is no reason to alter the estimates of outturn generally. But the Subdivisional Officer, Banka, has reduced the estimate under indigo. The plant in *dearas* was injured by too abundant rainfall. The Subdivisional Officer, Supaul, has also modified his estimates for paddy and millets, the former having been injured by heavy floods, and the outturn of the latter having proved better than was anticipated. The modifications are too slight to materially affect the original estimates for the whole district.

Puri	Sadar ...	979,200	460,800	Bhadoi paddy	29,400	29,400	27,500	7	8	Last year the outturn was small in consequence of deficient rainfall and damage done by floods. This year the excessive rainfall in May retarded sowing and also affected the area. The reason of increase in columns 4 and 6 is that some new land has been brought under cultivation. Last year the rainfall was deficient. This year it was favourable.	It is not understood why bhadoi paddy and millets should yield such poor outturn in the Sadar sub-division, although the season is said to have been favourable.
				Millets (marua or ragi).	17,900	17,900	17,900	6	9		
	Total ...	979,200	460,800		47,300	47,300	45,400	6½	8½

APPENDIX II.

Statement showing sub-divisions and districts in which bhadoi food-crops of 1893 are estimated at 8 annas or less.

District.	Sub-division.	Estimate of outturn in annas.	Remarks.
Midnapore ..	Contal	7	The loss is due to excessive rain fall.
Hooghly ...	Uluberia	8	Ditto ditto.
24-Parganas ...	Diamond Harbour ...	4	The loss is due to excessive rainfall. The *bhadoi* food crops in the Diamond Harbour sub-division occupy a small area (about 3,000 acres), and are unimportant.
	Sadar	6	
Khulna	Bagirhat	2	The loss is due to excessive rains.
Nadia	Kushtea	8	Ditto ditto.
	Meherpur	8	
Jessore	Jhenida	8	
	Narail	6	The loss is due to excessive rains, and early rise of the rivers.
Dacca	Sadar	6	Excessive rain and high floods damaged the crops.
	Narainganj	7	
	Manickganj	8	
Faridpur	Sadar	6	
	Goalundo	8	The loss is due to high floods. The crops were destroyed on about one-half the area. Much of the area could not also be sown owing to accumulation of water in the *beels*.
	Madaripur	5	
Backergunge ...	Sadar	2	The loss is due to heavy and continuous rainfall and unusual floods.
	Patuakhali	8	
	Pirojpur	8	
	Bhola	4	
Mymensingh ...	Netrokona	8	Ditto ditto.
Tippera	Bramhanbaria ...	8	Ditto ditto.
	Chandpur	6	
Noakhali	Sadar	7	Ditto ditto.
Chittagong Hill Tracts.	......	7	The loss is due to abnormally heavy rainfall. The area cropped is very small.
Patna	Barh	7	Ditto ditto.
	Dinapur...	6	
Gaya	Sadar	7	Ditto ditto.
	Jahanabad	8¼	
Shahabad	Sasaram	5¾	The loss is due to excessive rainfall. In Bhabua the crops were further damaged by the overflowing of the *Durgaoti* and *Karmanassa*.
	Sadar	8	
	Bhabua	4	
Darbhanga... ...	Sadar	4	The damage is due to heavy floods.
Muzaffarpur ...	Sadar	5	Ditto ditto.

REPORT OF THE TRUSTEES OF THE INDIAN MUSEUM ON THE ECONOMIC AND ART SECTION OF THE MUSEUM.

REVENUE DEPARTMENT—MISCELLANEOUS.

Calcutta, the 18th December, 1893.

RESOLUTION No. 5216.

READ—

The Report of the Trustees of the Indian Museum on the Economic and Art Section of the Indian Museum for the year 1892-93.

The Report of the Officer in charge of the Economic and Art Section of the Indian Museum with the remarks of the Trustees was received on the 7th December 1893.

The most important work in the Economic and Art Section of the Museum during the year was the arrangement of the specimens in the Sudder Street extension. In August 1892 the arrangement of the Art Court was complete. On the 1st September 1892 the Court was opened to the general public. The Ethnological Court was subsequently opened to the public on the 1st January 1893. Both these Courts are reported to be very popular with the visitors to the Museum.

2. During the year under report some specimens of Art manufactures from the extinct Shillong Museum were incorporated with the Museum Collections. Other additions worthy of note were:—in the Ethnological Court (i) a very interesting collection of specimens illustrating the Sonthals and Oraons by Mr. J. Cleghorn, Executive Engineer, Public Works Department, and (ii) a series of excellent photographs of the Andamanese taken by Mr. V. Portman, Assistant Superintendent, Port Blair; and in the Art Court (i) a collection of the silver jewellery worn by the peasantry of the Simla Hills, (ii) some cotton fabrics from Bengal, and (iii) mats from Tanjore and Tinnivelly.

3. The collection of both specimens and information was actively carried on, and a number of useful handbooks on individual products were compiled by Mr. Thurston, Officer in charge of the Economic and Art Section, assisted in the case of "Coal" by Dr. W. King, the Director of the Geological Survey, and in the case of "Mica" by Mr. T. H. Holland of the same Department.

4. Certain changes occurred during the year among the Trustees nominated by the Lieutenant-Governor. Mr. C. E. Buckland, Secretary to Government, proceeded to England on three months' leave, Mr. W. Maude, Officiating Secretary, acting as a Trustee during his absence. On the 3rd May 1892 Mr. W. C. Macpherson was appointed to officiate as Director of the Department of Land Records and Agriculture, Bengal, *vice* Mr. M. Finucane, and took the latter's seat at the Trustees' Board. On the 31st May 1892 the Lieutenant-Governor re-appointed Mr. A. Simson to the seat vacated by Mr. J. D. Maxwell on his departure for Europe.

5. The Lieutenant-Governor has heard with great regret of the death of Mr. J. Wood-Mason, Superintendent of the Indian Museum, on the 10th May 1893 on his journey homewards for the benefit of his health. The memoir of Mr. Wood-Mason's career and researches, quoted by the Trustees in their annual report, is a record of excellent service rendered to the Indian Museum and to the cause of Science.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

RESOLUTION ON THE LEPER ASYLUM COMMITTEE'S REPORT.

MUNICIPAL DEPARTMENT, MEDICAL.

Calcutta, the 18th December 1893.

RESOLUTION—No. 403/Med.

READ—

Bengal Government Resolutions (Medical), dated the 29th July 1890 and the 16th September 1890.

The Report of the Leper Asylum Committee, dated 13th March 1893.

The Calcutta Leper Asylum, which in one form or another has been in existence since the year 1811, has since 1840 been established in its present site in Amherst Street. But, while the benefits which the institution has conferred upon a section of the population universally pitied have been continually acknowledged, certain disadvantages of the present site have from time to time been pointed out. In 1889 public interest in the local asylum was stimulated in Calcutta, and when His Royal Highness the late Prince Albert Victor visited Bengal in the winter of the same year, a general desire was felt that as a permanent memorial of his visit a new Leper Asylum should be erected to replace the old institution.

2. In these circumstances the Lieutenant-Governor decided to appoint, for the consideration of the whole question, a Committee which should be thoroughly representative, and accordingly, after nominations had been obtained from the principal bodies concerned, a Committee consisting of the following gentlemen was appointed by the second of the Resolutions quoted in the preamble:—The Hon'ble Mr. Justice Prinsep (President), Messrs. J. Lambert, C.I.E., H. Lee, W. M. Osmond, W. J. Simmons, Drs. Gregg and Simpson, Nawab Abdul Latif Bahadur, C.I.E., Babus Issur Chunder Mitter, Surendra Nath Banerjea, and Amrita Nath Mitter, with Mr. P. McGuire as Secretary. The name of Mr. W. Banks Gwyther was subsequently added. All these gentlemen have signed the report with the exception of Dr. Simpson and Mr. W. M. Osmond, whose places, owing to their absence from India, have been taken by Dr. R. Sen and Dr. A. L. Sandel.

3. The duties of the Committee were laid down in the Resolution of the 29th July 1890 in the following terms:—

"The most obvious topics for the consideration of the Committee appear to be the locality for a new asylum, the number of inmates for whom accommodation should be provided (on the assumption that no more stringent provision is made for compulsory detention than is contained in the Bill already circulated by the Government of India), the provision of funds for its maintenance and superintendence, the constitution of a governing body, and the regulation of the conditions under which patients are to be admitted, retained, and discharged. But this enumeration is not intended to be exhaustive, and Sir Steuart Bayley will be glad to receive the advice of the Committee on any other points which may appear to them likely to promote the successful establishment and management of this most important institution."

4. The report which has now been submitted is the outcome of these orders. The deliberations of the Committee have extended over a period of two and-a-half years; but it is explained that they have been much protracted, partly by the uncertainty which was felt as to the intentions of the Government of India in regard to the compulsory seclusion of lepers, and partly by the delay which has occurred in the publication of the report of the Leprosy Commission, the appearance of which it was thought advisable to await, but which after all has been published some time subsequent to the submission of the report under review.

5. The first point with which the report deals is the locality of the proposed new Asylum. The recommendation of the Committee is that the existing site and buildings should be sold, and that, with the proceeds of this sale and the subscriptions collected by the Prince Albert Victor Memorial Committee, a house and grounds then available in Manicktollah should be purchased and improved by the alteration of existing and the erection of additional buildings. As regards the number of inmates for whom accommodation should be provided, the finding of the Committee is that at

present 200 may be regarded as a maximum, of whom twelve men and the same number of women would be non-Asiatics, and the remainder natives of India in the proportion of three males to one female. On the subject of funds, the report deals fully with the proposed arrangements for selling the present site and preparing the new one; but the Committee have been unable to make any recommendation as to the source from which the funds for maintenance are to be supplied, nor have they attempted to propound any rules for the admission, retention, and discharge of lepers. On the other hand, their recommendation is clear and definite that the Leper Asylum should be a Government institution managed by a Committee to be appointed by Government, upon which all persons or bodies contributing towards the foundation or maintenance of the Asylum should be suitably represented. To all these recommendations the Lieutenant-Governor has given his careful attention, and is pleased to pass the following orders upon them.

6. As regards the question of site, although the Manicktollah premises, which the Lieutenant-Governor has personally inspected, possess many advantages, Sir Charles Elliott is unable to accept the recommendations of the Committee in respect of them. He considers it to be of the first importance that a Leper Asylum should be provided with a complete and sound system of drainage. It is notorious that this condition is not fulfilled by the site in Manicktollah; and although it might be possible to remedy the defect, this operation would add considerably to the cost of the scheme. Moreover, the Lieutenant-Governor is advised that if the Asylum is located outside the limits of the Calcutta Municipality, there would be legal obstacles to the contribution of funds by the Commissioners, who, in His Honour's opinion, should liberally support the institution. Many representations have been made to Government against the retention of the Asylum in its present situation, and these have received careful attention, but in no instance has any other suitable site been indicated. The Officiating Lieutenant-Governor, Sir A. P. MacDonnell, also made enquiry into the question, but failed to discover any such locality, and was constrained to decide that the Asylum shall remain where it is, and that the efforts of those interested in the welfare of its inmates must be directed, not to its removal, but to its improvement. With this conclusion Sir Charles Elliott agrees.

7. In these circumstances it is manifest that the funds which were anticipated from the advantageous sale of the old site will not now be available; but the Committee of the Prince Albert Victor Memorial Fund have, through their Secretaries, intimated their willingness to fall in with the scheme now propounded, and to place at the disposal of Government the funds which they have collected, on certain conditions, one of which is that the Asylum should be named after His Royal Highness the late Prince Albert Victor. To this stipulation the Lieutenant-Governor gladly assents, and the Secretaries to the Fund have been asked to take the necessary steps to transfer the amount collected to the Treasurer of Charitable Endowments. With the sum so provided it is in the first place proposed to acquire a plot of land adjoining the present Asylum, and there to erect suitable buildings for the female patients; and secondly, to remodel and extend the existing wards so as to provide additional space for male patients and separate accommodation for non-Asiatics. The area thus enlarged will provide room for about 120 Hindu and Muhammadan male patients, 50 female patients and 25 or 30 European or Eurasian patients of both sexes.

8. At present the cost of the institution averages Rs. 9,929 a year for 87 patients, and the cost of each patient is thus about Rs. 114 per annum. This expenditure is met by the interest on certain special Trust Funds (Rs. 820) by a Government contribution for medicines (Rs. 125), and by a subsidy from the Calcutta Corporation of Rs. 2,400, the deficiency (about Rs. 7,000) being made up from the funds of the District Charitable Society. The Lieutenant-Governor is now prepared to relieve the District Charitable Society of this charge, and to make a contribution of Rs. 8,000 per annum from Government Funds. The available balance of the sum collected by the Prince Albert Victor Memorial Fund amounts to Rs. 27,000, and it is possible that a portion of the sum of Rs. 13,000 which has been promised but not paid in, may be

realised. From this source the cost of the land to be acquired and part of the cost of new buildings will be met, the remainder being defrayed by Government. As the number of lepers increases, it may be hoped that the endowment of the Asylum will be enriched by the donations of the benevolent and by an increased contribution from the Calcutta Corporation.

9. The Lieutenant-Governor accepts the recommendation of the Committee that the institution should be under Government management, and he has decided that the governing body shall consist of a Committee of seven, of whom four shall be *ex-officio* members, viz., the Inspector-General of Civil Hospitals (President), the Secretary to the Government of Bengal in the Medical Department, the Chairman of the Corporation of Calcutta, and the Commissioner of Police, Calcutta; two of the remaining three places will be filled up on the nomination of the Committees of the District Charitable Society and the Prince Albert Victor Memorial Fund, the seventh member being appointed directly by the Lieutenant-Governor. The executive charge will, as recommended, remain with the Commissioner of Police, Calcutta. Steps have already been taken for the acquisition of the land required; and it will be the duty of this Committee, whose appointment is separately notified, to take over the charge of the Asylum as soon as possible, to arrange for the alteration and construction of the buildings as already described, and to revise thoroughly the rules for the admission, maintenance, and discharge of the lepers, and the general conduct of the institution. The ground on which the Asylum stands and the existing buildings are the property of the District Charitable Society, who, since they will now be relieved of the support of the Asylum, have agreed to transfer them in due form to the Committee of the new institution. The Trust Funds which will be transferred by the District Charitable Society under proper legal safeguards, and the sum to be made available by the Permanent Memorial Committee, together with any sums that may hereafter be contributed, will be held by the Accountant-General as Treasurer of Charitable Endowments under Act VI of 1890.

10. In conclusion, the Lieutenant-Governor desires to express his acknowledgments to the gentlemen who formed the Leper Asylum Committee, and to say that the many other points of detail in their report, which have not been dealt with in the foregoing Resolution, will receive due consideration at the hands of the Committee of the enlarged Leper Asylum.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Government of Bengal.

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF DISTRICT BOARDS IN BENGAL DURING THE YEAR 1892-93.

MUNICIPAL DEPARTMENT—LOCAL SELF-GOVERNMENT.

Calcutta, the 18th December, 1893.

RESOLUTION—No. 4036L.S.-G.

READ—

The Reports from the several Commissioners of Divisions on the working of District Boards in Bengal during the year 1892-93.

Read again—

The Resolution reviewing the Divisional Reports on the working of District Boards in Bengal during 1891-92.

The Lieutenant-Governor has in previous years been obliged to notice the late submission of Divisional reports, but in 1892 an improvement was visible, and only one was received after the due date. His Honour regrets to observe that this improvement has not been maintained, for out of the eight Divisional reports for 1892-93 five only were received on or about the prescribed date, while the last to arrive, viz. that from Dacca, was one month and eleven days late. It is explained that the delay is caused by the submission of incomplete or late reports by some district officers. Commissioners of Divisions are again requested to take timely steps to secure the punctual submission of these reports.

2. The number of District Boards remained unchanged during the year, but the number of Local Boards was reduced from 106 to 104 owing to the abolition of the Chuadanga sub-division in the Nadia district, and the Lalbag sub-division in the Murshidabad district. This number has, since the close of the year, been further reduced to 102 in consequence of the abolition of the Barrackpore and Dum-Dum sub-divisions in the district of the 24-Parganas. As compared with the previous year, the area controlled by District Boards and the population of that area exhibit a decrease, which is understood to be due to the exclusion of certain tracts from the jurisdiction of District Boards and their inclusion within municipal limits, and also to the substitution for the old figures of those furnished by the latest census returns. Similar variations are noticeable in the area and population subject to the authority of the various Local Boards, and are attributable to the same cause.

3. *Constitution of District Boards.*—The number of members of District Boards amounted to 793, being three greater than in the previous year. Of this number, 170 held their seats *ex-officio*, 314 were nominated by Government, and 309 were elected by the Local Boards: 247 of them were officials and 546 non-officials. The European or Eurasian members numbered 192, and the natives of the country 601. The variations in the composition of the Boards since the previous year are too slight to call for any remarks. In every instance the Magistrate of the district was re-appointed Chairman under section 24 of the Act on the expiry of his term of office.

4. The Boards held altogether 624 meetings, giving an average of 16·4 meetings for each Board, as compared with 512, or an average of 13·4 in the previous year. The District Board of Dinajpur heads the list with 24 meetings; Jalpaiguri comes next with 23 meetings, while the District Boards of Bogra, Gaya, Cuttack, Puri, Mymensingh and Rangpur held 20 or more meetings each. But these figures include adjourned meetings and those that have proved abortive from the want of a quorum. The total number of such meetings amounted to 114, of which 8 occurred in Jessore, 7 each in Champaran

and Jalpaiguri, and 6 each in Dinajpur, Murshidabad, Backergunge, and Bhagalpur, while in Cuttack they reached the large number of 19. In the last-named district only two meetings were successfully convened at the first attempt, ten being adjourned and nine ineffectual for want of a quorum. On this subject the Chairman (Mr. Stevenson) writes—

> "Members did not always attend regularly, which necessitated adjourned meetings as above shown; some, I fear, contracting the habit of not attending the first summons in the expectation that there could not be a quorum, and thus bringing about that very result. Several of the town members evinced interest in the proceedings. As a [illegible] the mufassal members fail to attend unless some subject comes up for discussion affecting their part of the district directly. This is not perhaps altogether to be wondered at."

The Commissioner of the Division (Mr. Cooke), however, attributes the poor attendance of members to the persistent failure of the Chairman to preside up till 15th November, since which date he has done so under protest. The Lieutenant-Governor fully endorses the observations of the Commissioner on Mr. Stevenson's view of his duties, which His Honour considers incorrect. The smallest number of meetings was held by the District Boards of Bankura, the 24-Parganas, Patna, Saran and Monghyr (12 meetings each). The falling off in the 24-Parganas is said to be due to the delay which occurred in reconstituting the Board after the general elections held in September 1892. In the case of the other District Boards mentioned no explanation has been offered.

5. The average attendance at each meeting of a District Board was 9·43, or 45·3 per cent. of the members, as compared with 9·61, or 46·4 per cent., in the previous year. The attendance was best in Tippera, Chittagong, Noakhali, and Backergunge, and worst in Cuttack, Bhagalpur, and Dinajpur, where it was below one-third of the actual strength of the Boards. The attendance of non-officials was on the whole fair, except in Jalpaiguri, Malda, and Champaran; that of the official members was bad in Purnea, Puri, Cuttack, Bhagalpur, Khulna, and Darbhanga. The Lieutenant-Governor trusts that in these districts such unsatisfactory results will not be allowed to recur, whether they are due to the apathy of the members themselves, or to the nomination of gentlemen who have not the leisure to attend.

6. *Constitution of Local Boards.*—The 104 Local Boards had a total strength, including the Chairmen, of 1,230 members, of which 152 were officials and 1,078 non-officials. Of the total number, 45 sat as *ex-officio* members, 720 were nominated by Government, and 465 were elected. The preponderance of nominated members is due to the privilege of election not having been extended to several Local Boards. Europeans or Eurasians held 104 and natives of India 1,126 seats on the Boards.

7. The Local Boards held 1,048 meetings, or 87 more than in 1891-92. Of this number, 197, or 18·7 per cent., were adjourned or proved abortive from the absence of a quorum. Only 26 Local Boards held more than 12 meetings during the year. The highest number (19) was attained by the Local Board of the Sadar sub-division in Backergunge; Bangaon and Birbhum come next with 18 meetings each. The Local Boards that met least often were those noted in the margin. Looking at the figures for the province as a whole, there has been a slight improvement in the attendance of members, the average number present at each meeting being 5·24, or 44·4 per cent., of the members, against 5·16, or 44·1 per cent., in the previous year. Taking the classes separately, the attendance of official members at the Local Boards, as in the case of District Boards, shows a falling off which is much to be regretted.

Puri ...	2	Vishnupur ...	4
Basirhat ...	3	Midnapore ...	4
Barrackpore	3	Khurda ...	4

8. *Elections.*—During the year under review were held the third general elections of members of those District and Local Boards which had been formed soon after the passing of Act III (B.C.) of 1885. The elections as a rule excited little or no interest, except in a few localities, such as Burdwan, Hooghly, Kisnaghar, Rampur Boalia and some thanas of the Dacca district: in a large number of the mufassal thanas so little store was set by the right of election that the proceedings ended in failure. Considering that in many districts this is the third occasion on which a general election has been held, the results show clearly how indifferent the masses still are to what is sometimes described as a dearly prized privilege.

9. *Occupations of members of District and Local Boards.*—In the subjoined table the members of the several District and Local Boards are classified according to their professions and occupations:—

Name of Division.		Government servants.		Zamindars, talukdars, and zamindars' servants.		Pleaders and mukhtears.		Planters.		Missionaries.		Government pensioners.		Other occupations.		Total number of members

These figures call for little comment. It is but right and proper that the landholding interests should be largely represented on both District and Local Boards. The percentage of representatives of the legal professions has risen, as compared with the figures for 1891-92, from 22·6 to 23·3 in District Boards, and from 23·8 to 26·4 in Local Boards. The Lieutenant-Governor is inclined to concur with the opinion of the Presidency Commissioner that this result is not entirely satisfactory. No doubt very useful and energetic members are frequently drawn from among gentlemen of this class; but inasmuch as local knowledge of the wants of the interior of the district is essential to the successful administration of the District and Local Board funds, and as these gentlemen, owing to the exigencies of their profession, necessarily reside at head-quarters, their predominance on the Boards is not altogether a matter for congratulation. The Commissioner of Chittagong states that on the several District Boards of his Division the Muhammadans are not sufficiently represented. The Commissioner of Dacca remarks that the bulk of the people are unrepresented unless it may be assumed that their interests are protected by the official members of the Boards.

10. *Powers of Local Boards.*—In paragraph 11 of the Resolution on Local Self-Government for 1891-92, the Lieutenant-Governor recorded his views as to the measure of power which should be accorded to Local Boards and as to the principles on which such delegation should be based, and he invited all District Boards to review the subject in the light of the remarks then recorded. This has been done in most cases, but the powers delegated to Local Boards underwent but little change in consequence. The management of ferries and primary education was made over to the Local Boards of Hooghly, and of pounds and ferries to the Local Boards of Howrah. The Tippera District Board, moreover, with the sanction of Government, have granted, to the Local Boards in that district with effect from 1st April 1893, certain modified powers in regard to primary education, pounds, ferries, public works and roads. The Local Boards in Midnapore, owing to their inefficient administration, have been relieved of the duty of constructing and repairing village roads: this change apparently leaves them with no duty beyond that of managing the pounds, which is hardly enough to justify their existence. Admitting that great discretion must be used in the delegation of authority to Local Boards, the Lieutenant-Governor desires to point out that too great a curtailment of their powers must necessarily defeat its own object by depriving the Boards of all interest in their work. In other districts the Local Boards continued to perform such duties as have been made over to them, including the repair of village roads, the administration of pounds, ferries and primary education, the supervision of dispensaries and the disbursement of grants for sanitary purposes. As to the manner in which these powers have

been exercised by the Local Boards concerned, the Commissioner of Burdwan remarks that all the Local Boards in Burdwan are said to have displayed some interest in educational matters, and paid attention to the maintenance of village roads. The Local Boards in the district of Birbhum are said to have administered with fair zeal the grants for village roads and primary education.

11. The Chairman of the District Board of Nadia states that some of the Local Boards worked with regularity, while complaints were made against others of dilatoriness in the despatch of business. The management of secondary education by the Local Boards in the Jessore district has not been satisfactory, and the question whether the District Board should take it into their own hands is under consideration. Mr. Fiddian, the Chairman of the Board, writes:—

"The administration by Local Boards has given only a moderate degree of success. They have not been so successful as might have been expected from their local knowledge in dealing with pounds, and their attitude towards the managers of middle schools has not evinced sufficient tact."

This only corroborates the opinion of the Lieutenant-Governor as expressed in paragraph 11 of last year's Resolution:—"Whatever may be said of primary education, the Lieutenant-Governor feels no doubt that Local Boards should have no concern with secondary education." His Honour hopes that, having found out by experience the justice of these remarks, the District Board will hesitate no longer to act upon them. The Chairman of the Khulna District Board (Mr. B. De) remarks that as a body each Local Board takes much interest in the condition of the roads and bridges under its supervision, but that they are unable to do much real good for want of comprehensive knowledge of the areas under their jurisdiction. He adds that the quality of their work depends a great deal on the kind of Chairman they have. The Chairman of the Murshidabad District Board writes:—

"The Local Boards, both under official and non-official Chairmen, really do very little work indeed. I cannot find that a single member anywhere helps the Chairman in checking the work done on village roads, and the Chairmen themselves do far too little in this matter. Things are left too much altogether to sub-overseers and contractors."

In Mr. Westmacott's opinion Local Boards do not appear to have been of much use anywhere, thus fulfilling his anticipations on the subject.

12. The Chairman of the Rajshahi District Board (Mr. Price) reports that the Local Boards have exercised the powers delegated to them in a very intelligent and satisfactory manner, and that they take considerable interest in their work. Mr. Harris writes from Rangpur that the duties entrusted to the Local Boards were satisfactorily discharged on the whole. The Chairman of the Pabna District Board (Kumar Gopendra Krishna) complains of the delay that the system of Local Boards entails in the disposal of business, on the ground that all points not coming within the scope of the powers delegated to them require to be referred to the District Board for final orders. From this remark and from the context of the Commissioner's report it appears clear that the distribution of duties between the District and Local Boards in Pabna should be scrutinised afresh.

13. From Dacca it is reported that the Local Boards of that district exercised the powers entrusted to them fairly well. Mr. Growse, the Chairman of the Faridpur District Board, complains that, even in the simple duty of distributing the funds allotted for the repairs of roads, the Local Boards have sometimes displayed a want of proper discretion, and in the matter of pounds and ferries their administration cannot be pronounced successful: he therefore cannot recommend any extension of their powers. Mr. Savage, who has long been Chairman of the Backergunge District Board, remarks that the various Local Boards have exercised carefully and satisfactorily the powers delegated to them. Mr. Earle, the Chairman of the District Board, Mymensingh, states that the administration of the Local Boards was generally successful, but in the matter of primary education they do not appear to have shown sufficient interest.

14. Five out of the twenty-one Local Boards in the Patna Division, viz. Bihar, Aurangabad, Buxar, Muzaffarpur, Hajipur, and also all the Local Boards of Saran, failed to utilise the full amount of the allotment made for village roads. The expenditure under Sanitation and Medical Relief was, however, generally satisfactory. In Gaya there was an apparent failure to work up to the allotment, but this, it is stated, has been explained satisfactorily. With regard to

the powers which are or should be given to Local Boards, and the manner in which they exercise them, Mr. Hare, of Muzaffarpur, says:—

The question of giving more powers to Local Boards is now under the consideration of the District Board. It may be possible to make over to them a larger number of roads and more funds to administer. This is the direction in which probably most can be done.

In Gaya, where the Local Boards enjoyed some extended powers, Mr. Macpherson writes:—

They continued to administer the grants for village roads and to control the working of cattle-pounds and ferries. With regard to dispensaries, they are practically only consultative bodies, merely preparing estimates and forwarding recommendations for the District Board, and disbursing most of the expenditure on bills passed by the latter.

15. Mr. Faulder, the Chairman of the Purnea District Board, remarks that the members of the Sadar Local Board rendered much help with their supervision in the repair of roads and bridges. The Chairman of the District Board of Balasore (Mr. Cornish) states that the Local Boards exercised their powers satisfactorily, and increased regularity of inspection and supervision by the Sadar Local Board has been specially noticed. The members of the Cuttack Local Board are said to have taken a lively interest, those of the Kendrapara Local Board a fair interest, and those of Jajpur but little interest, in the proceedings. The Commissioner Mr. Cooke remarks:—

It may be noted that the day is far distant in Orissa when the Local Boards will contend for increased powers. This cannot be expected in the infancy of the institution in a backward division. It is satisfactory to note that these bodies are working fairly on the whole.

16. In perusing the above-quoted remarks, it must be borne in mind that the views taken by local officers of the work of the Boards vary very much according to the standard by which they judge them. As compared with a country where local self-government is an indigenous institution, the total sum of the year's work may not seem great, nor the manner of its execution altogether and universally successful, but compared with the work of other years, which is a fairer standard to adopt, and having regard to the progress made since the introduction of the system, the Lieutenant-Governor is of opinion that the past 12 months have been marked by fair progress.

17. *Union Committees.*—No Union Committees have yet been formed under the Local Self-Government Act; but in accordance with the wishes of the Government of India, the question of forming a few village unions experimentally in selected rural areas in the more advanced districts is under the consideration of this Government.

18. *Financial results.*—The following statement shows the principal items in the income and expenditure of District Boards during the two years 1891-92 and 1892-93:—

INCOME.

	1891-92.	1892-93.
	Rs.	Rs.
I.—Land Revenue	33,829	66,249
VI.—Provincial rates	35,10,235	36,27,676
XII.—Interest	453	666
XVII.—Police (including pounds)	4,72,187	4,57,159
XIX.—Education	37,803	62,761
XX.—Medical	10,006	17,095
XXI.—Scientific and other Minor Departments ...	3,123	3,631
XXV.—Miscellaneous	1,55,633	1,61,812
XXX.—Irrigation—Minor Works and Navigation	410	286
XXXII.—Civil Works (including ferries) ...	4,18,759	4,44,518
Contributions	8,01,509	11,63,815
Debt	7,69,377	11,88,137
Total ...	62,13,324	71,93,805

EXPENDITURE.

	1891-92.	1892-93.
	Rs.	Rs.
1.—Refunds	93	403
18.—Administration	2,82,895	2,98,983
20.—Police (pounds)	33,874	35,235
22.—Education	11,05,375	10,54,477
24.—Medical	76,323	96,420
26.—Scientific and other Minor Departments ...	8,016	8,579
29.—Superannuation allowances and pensions ..	3,459	3,530
30.—Stationery and printing	48,527	50,022
32.—Miscellaneous	40,890	55,390
33.—Famine relief	12,675	2,86,713
43.—Minor works and navigation ...	13,181	12,302
45.—Civil works	40,43,238	42,88,747
Contributions	5,130	12,370
Debt	6,12,636	8,12,821
Interest on debt...	5,345	7,758
Total ...	62,91,657	70,23,750

Credit balance.—The year 1891-92 closed with a credit balance of Rs. 15,93,162. At the close of the year 1892-93, this balance was increased to Rs. 17,63,217.

INCOME.

19. *Land Revenue* (*Rs.* 66,249).—The receipts under this head advanced from Rs. 33,829 to Rs. 66,249. The increase is chiefly due to the fact that certain collections which during previous years were credited to "miscellaneous" in the Dacca and Rajshahi Divisions were treated as land revenue in the year under report. The revenue derived from canal tolls in Chittagong also increased from Rs. 12,444 to Rs. 13,741, and fees, fines and forfeitures from Rs. 544 to Rs. 8,984.

20 *Provincial rates* (*Rs.* 36,27,676).—The whole amount shown under this head represents the receipts of the road cess in each district which is credited to the District Board after deducting the cost of collection and revaluation. Compared with the figures for the previous year, the income derived from this source showed an increase from Rs. 35,10,235 to Rs 36,27,676, which is attributed to the successful realisation of arrears, to the effect of revaluation, and to collections made in advance. The largest increase during the year was in Muzaffarpur and Gaya—from Rs. 1,77,036 and Rs. 2,14,036 in 1891-92 to Rs. 2,16,192 and Rs. 2,39,315 in 1892-93 respectively.

21. *Pounds* (*Rs.* 4,57,159).—The receipts from pounds show a decrease of Rs. 15,028 as compared with the collections of 1891-92, although there is an increase of Rs. 13,381 over those of 1890-91. The decrease is variously attributed in different districts to the poor harvests of the year, to the effect of floods, to the exercise of a stricter supervision over the profits of farmers to the practice of insisting on the payment of rents in advance, to cattle disease and other causes. In Burdwan the number of pounds had been allowed to grow unduly large, having been 251 in 1891-92, and a reduction of 64 in their number was so successful that the receipts increased. One pound inspector was entertained throughout the year in each of the districts of Burdwan and Birbhum, and three in Midnapore for some months. They are reported to have done good work in expediting collections and making satisfactory settlements, but their services were dispensed with under Government order No. 42L.S-G., dated 1st December 1892. The Lieutenant-Governor takes this opportunity to point out that it was not intended by that circular that District Boards should be debarred from employing paid Inspectors for the inspection of their pounds, and any District Board may entertain a paid official for the purpose. The services of the pound inspector appointed by the Champaran District Board during the preceding year were dispensed with from January last, as no marked improvement had resulted in the working of the pounds, and his duties are now being peformed by the Sub-Inspectors of Schools in addition to their ordinary work. A paid inspector of pounds and ferries was appointed by the Shahabad District Board during the second half

of the year under review. In Gaya the sub-overseer under each Local Board is entrusted with the duty of inspecting pounds.

22. In sanctioning the continuance of the system of farming cattle-pounds in Bengal, in deference to the confident opinion expressed by Sir Charles Elliott that on the whole that was the system most suitable to Bengal, the Government of India gave expression to the hope that the Local Government would be able to make such arrangements for inspection as would prevent abuses and ensure the proper exercise of the powers of control given by law. Accordingly, Sir Charles Elliott commended to the notice of Commissioners of Divisions the following measures which, if thoroughly carried out, would in his opinion exercise a most important effect upon the administration of pounds, whether farmed or managed direct:—

(a) the regular and systematic inspection of pounds by officers of Government and of the District Boards;
(b) the grant of leases for a longer period than one year to persons of known position and solvency residing in the neighbourhood of the pound;
(c) an alteration of the form of agreement, so as to define better the District Boards' power of control; and lastly
(d) the introduction of such registers and forms of receipt as would enable a proper check to be kept over the pound-keepers without making unduly close enquiry into the amount of the farmer's profits when the pounds are let in farm.

Sir Charles Elliott was accordingly pleased to direct that pounds should in future be inspected by District Officers and their Assistants and Deputies, as well as by Chairmen of Local Boards, Vice-Chairmen of District and Local Boards, and Sub-Inspectors of Schools, besides the Inspectors employed by the District Boards. The form of the pound keeper's agreement has also been altered, and revised registers and forms of receipts have been prescribed for general use. If the officers named above carry out with care the examination of the books and registers now prescribed, the Lieutenant-Governor is confident that the check will be sufficient to prevent all abuses, and that the District Boards will be supplied with adequate and timely information as to the administration of their pounds.

23. A statement is annexed (Appendix A) giving the number of pounds and their income and expenditure under the several District Boards during the past three years. It shows that the total income from pounds during each of these three years exceeded the estimate of Rs. 4,20,153 on which the Provincial allotment to District Boards was based, thus justifying the often repeated assertion of Government that with judicious management the Boards have in pounds a fertile source of revenue.

24. *Education (Rs. 62,761)*.—The receipts under this head increased from Rs. 37,803 to Rs. 62,761. To this increase all the District Boards contribute, except those of Rajshahi, Jalpaiguri, Backergunge, Saran, Cuttack and Puri, in which districts there was a decrease. Compared with the previous year, the receipts in the Dacca Division show a considerable increase, which is due to a contribution of Rs. 11,000 made by Babu Jogendra Kishore Rai Choudry of Ramgopalpur in Mymensingh towards the cost of establishing a technical school at the district Head-quarters. In Pabna, Rangpur, Tippera and Purnea also the receipts have been swelled by private subscription. Elsewhere the increase appears to be mainly due to the refund by Government of contribution paid on account of the pensions of teachers.

25. *Medical*.—(Rs. 17,095). Compared with the previous year, the total income under this head shows an increase which occurred chiefly in the Bogra district of the Rajshahi Division. A sum of Rs. 5,178 for constructing five dispensary buildings in the interior of the district was placed at the disposal of the District Board of Bogra by the Reception Committee formed for commemorating the visit of His Honour the Lieutenant-Governor of Bengal in August 1892.

26. *Scientific and other Minor Departments*.—(Rs. 3,631). The income under this head was Rs. 3,631, against Rs. 3,123 in 1891-92. The receipts are reported from four districts only, viz. the 24-Parganas, Pabna, Dacca, and Saran, and were on account of conservancy arrangements made at various fairs in those districts.

The realization of the small amount of Rs. 6 in the Pabna district has not been explained.

27. *Miscellaneous.*—(Rs. 1,61,812). The income under this head, amounted to Rs. 1,61,812, against Rs. 1,55,633. It includes the proceeds of the sale of old stores, the receipts from serais and staging bungalows and other miscellaneous receipts, notably fines and forfeitures, many of which were awarded in connection with revaluation proceedings. The increase is noticeable under all the heads except "Staging bungalow and Serai fees," in which there is a decrease of Rs. 1,089.

28. *Civil works.*—(Rs. 4,44,518). Of the several items which make up the total under this head, receipts from ferries alone call for notice. Compared with the previous year, there was a falling off of Rs. 7,247. The decrease occurred in fifteen districts, viz. Burdwan, Howrah, 24-Parganas, Murshidabad, Rajshahi, Rangpur, Jalpaiguri, Dacca, Noakhali, Shahabad, Champaran, Malda, Cuttack, Balasore and Puri. The decrease in Burdwan is said to be due to lower prices having been realized at auction for the leases owing to the shallowness of the Bhagirathi river and to the opening of the Bengal-Nagpur Railway, which affected the receipts of the ferry over the Damudar river. The falling off in the 24-Parganas (Rs. 2,447) is due partly to the total of the year 1891-92 having been swelled by large collections of arrear rents, and partly to the resettlement of certain ferries at reduced rents owing to the original lessees having defaulted. The falling off in Murshidabad (Rs. 837) is ascribed to the ferries having been plied for two months only instead of four on account of scanty rainfall. In Jalpaiguri it is due to the adjustment of outstanding balances of deposits received from the ferry farmers in 1891-92, and in Dacca (Rs. 3,882) to the fact that in 1891-92 the gross receipts of the steam ferry at Naraingaunj were credited to the District Fund without deducting the expenditure incurred on account of establishment, &c. The falling off in Noakhali (Rs. 1,593) is attributed to the shifting of the steamer station, and in Champaran to the resettlement of two of the ferries in the district having resulted in a loss of income. In Balasore the decrease of Rs. 789 is ascribed to the pilgrims preferring the steamer journey to that by land. In Cuttack (Rs 2,783) it is partly due to the contribution for municipal ferries not being paid in time to be credited during the year, and partly to the inability of certain lessees to pay their dues. The falling off in the remaining six districts is unimportant.

29. In paragraph 24 of the Government Resolution on the working of District Boards for the year 1891-92, it was suggested that the leases executed by ferry farmers should provide for the payment of a quarter's rent in advance as well as the deposit of an equal amount as security, and that the ferries should be leased out for a longer period than one year to persons of known solvency. The Commissioner of the Presidency Division states that these suggestions have as a rule been carried out in the 24-Parganas, and the Commissioner of Patna reports similarly of the districts in his Division. No mention is made of the matter in the reports from other districts, but the Lieutenant-Governor trusts that both in regard to pounds and ferries these suggestions have not been overlooked.

30. *Contributions* (*Rs.* 11,63,815).—The contributions made to District Boards from the provincial revenues principally to maintain equilibrium between the receipts and expenditure of those bodies amounted to Rs. 11,54,584, against Rs. 8,01,198 in 1891-92. The increase is mainly due to the grants made by Government during the year, as explained in paragraph 50 below, for the maintenance of Government buildings and roads transferred to the care of District Boards, as well as for original works executed by the Boards on behalf of Government. In Chittagong there is an item of receipt of Rs. 4,370, made up of contributions from the Khas Mahal Improvement Fund, from the Sitakhund Lodging house Fund and from the District Fund to defray the cost of excavating a tank at Sitakhund for the supply of good drinking-water for the annual gathering of pilgrims.

31. *Loans.*—The sum of Rs. 30,000 shown against the Dinajpur District Board is part of the loan of Rs. 2,00,000 obtained from Government in 1890 to enable the Board to construct permanent bridges on the more important roads of the district. The loan was to be advanced by Government in five instalments of Rs. 40,000 each, but the District Board drew only Rs. 30,000 during the year under review. The sum of Rs. 2,80,000 shown against Darbhanga represents the amount of advances made by Government during the year to the District Board for carrying on relief works in the district. The amount was in the first instance granted as a loan at $4\frac{1}{2}$ per cent., but since the close of the year Government has decided that of the whole amount Rs. 1,00,000 is to be

granted to the Board absolutely as a contribution from Provincial revenues towards the expenditure on famine relief, and only the remaining sum of Rs 1,80,000 is to be treated as a loan to be repaid by the District Board in due course.

32. *Deposits and Advances.*—The sums deposited by farmers of pounds and ferries as security for payment of revenue and the advances given by the Boards for the execution of works to be recovered by subsequent adjustment advanced from Rs. 6,39,377 to Rs. 8,78,137. The increase is marked in the Patna and Bhagalpur Divisions. In the former Division it is principally due to the adjustment of advances made in 1891-92 and 1892-93 on account of famine relief works, and in the latter Division to the recoveries of such advances, and to deposits made in Malda by farmers of pounds and ferries.

EXPENDITURE.

33. *Administration.*—The cost of general administration has increased from Rs. 2,82,895 to Rs. 2,98,983. The various reasons assigned for the increase are the creation of new posts, the grant of annual increments to employés, the payment of increased charges for establishment in offices of account, control and audit, the expenses incurred in elections and increased charges on account of travelling allowance. In no Division or district does the fluctuation deserve special notice.

34. *Pension and Provident Fund Rules.*—With the exception of Bhagalpur, all the District Boards in Bengal have now adopted the model rules for the management of a Provident Fund for the benefit of those of their employés whose whole service has been under them. The Lieutenant-Governor trusts that in consideration of the admitted advantages of the Provident Fund system, both as regards efficiency and economy, the District Board of Bhagalpur will soon see its way to accepting it. Twenty-nine out of the thirty-eight District Boards have framed pension rules for those of their employés who have been transferred from pensionable service under Government or under the late Road Cess Committee: it is hoped that the remaining nine District Boards, viz., Bankura, Dinajpur, Jalpaiguri, Faridpur, Tippera, Chittagong, Bhagalpur, Purnea, and Malda, will at no distant time follow the example of the majority.

35. *Pounds.*—The expenditure on account of cattle pounds shows an increase of Rs. 1,361. The increase is considerable nowhere except in Rajshahi and Dinajpur, where it was caused by the employment of Inspectors of Pounds during the year. The new statement prescribed by Government and which appears as Appendix A shows that out of 3,389 pounds in the province only 208 are now managed direct. It also shows that the average profit on each farmed pound was nearly Rs. 124, while that on each pound managed direct amounted only to Rs. 49, owing greatly to the fact that while the expenditure on a farmed pound averaged only Rs. 5, that on pounds managed direct reached the high figure of Rs. 90. As a matter of fact the system of direct management now survives only in Bihar and Orissa

36. *Education.*—The expenditure on education during the year under report amounted to Rs. 10,54,477 against Rs. 11,05,375 in the year 1891-92, showing a decrease of Rs. 50,898. This decrease occurred in all the districts, except fourteen, viz., 24-Parganas, Murshidabad, Faridpur, Mymensingh, Tippera, Noakhali, Chittagong, Patna, Darbhanga, Balasore, Rangpur, Purnea, Puri and Pabna. The figures in the margin taken from Form No. III, prescribed by the Government of India and appended to the Divisional Reports, show how much was spent in 1891-92 and in the year under review by District Boards on each main head of expenditure. The fluctuations under almost every head are so large as to raise a doubt whether the figures have been compiled on the same system in both years, and the Lieutenant-Governor considers it useless to comment upon them. He is the less inclined to do so, because he caused to be prepared during the year statistics which will be found as Appendix B in a form which, it was hoped, would set forth more clearly the amount really expended under each head, and would also bring the figures supplied by the local officers into accord with those furnished by the Director of Public Instruction in his annual report. The second of these expectations has not been realised, and on this subject separate orders will be issued. The value of the new form will not be fully appreciated till the figures for the current

year come to be reviewed and compared with those of the year just past, but even as it is, the new table yields the following figures, which, in the opinion of His Honour, afford a more accurate view of the educational expenditure of the District Boards than the authorized forms hitherto in use. The main heads of expenditure are detailed in the margin, and they show that out of the total expenditure, 46·6 per cent. was spent on primary schools, 23·8 per cent. on middle schools, and 22·6 per cent. on Inspection. In the Lieutenant-Governor's opinion too large a proportion of the funds of the District Board is devoted to other than primary education: in the Resolution on the administration of municipalities in 1891-92 and in other places Sir Charles Elliott has inculcated the principle that until full provision has been made for primary education, no part of a Local Fund should be diverted to the support of education of a higher kind, which is beyond the needs of the majority of tax-payers, and which may well be paid for by those who desire it. To these principles he again wishes to draw attention, and desires that they may not be lost sight of when District Boards prepare and Commissioners of Divisions scrutinise the budget estimates of District Boards for 1894-95.

Total ...	59,96,437	5,12,168	10,54,477	8·5	17·5

The object of this statement is apparent from paragraphs 31-33 of the Resolution on the Report for 1891-92. Sir Charles Elliott there expressed the hope that those District Boards which contributed to education less than 10 per cent. of their ordinary income, would raise their grants and increase the number of schools maintained or aided by them, as he looked on it as one of the primary duties of a District Board to afford the opportunity of obtaining elementary education to every boy residing within its jurisdiction, and it was desired that a more liberal expenditure should be sanctioned for this purpose during the current year. His Honour is mortified to notice that so far from this being the case, the average expenditure on education incurred by the District Boards during the year was 17·5 per cent. of their ordinary income against 20·5 in 1891-92, and that on primary education 8·5 per cent. against 9·9. The highest place in respect of educational expenditure as a whole is taken by the District Boards of Balasore, Bankura, Cuttack, Howrah, Nadia and Puri, all of which devoted 30 per cent. or more of their income to this purpose, while fourteen others show an expenditure 20 per cent. or more. On the other hand, in all the districts of the Patna Division, the expenditure was below the general average, and in five, viz., Gaya, Shahabad, Darbhanga, Muzaffarpur, and Saran, it was below 10 per cent. of their income. In Bhagalpur it was 9·2 per cent. and in Jalpaiguri it was only 5·2 per cent. In last year's Resolution the Lieutenant-Governor drew attention to the low expenditure in the first four of the districts just named, and he is dissatisfied to find that the percentage of expenditure, far from having increased, is now in each case less than that in the previous year. The explanations given are not adequate, and the Lieutenant-Governor trusts that he may not have occasion to utter a similar admonition again.

38. Comparing expenditure on education generally with that on primary education, the District Boards of Tippera, with 13·9 per cent. out of 23·7 and of Champaran with 10·9 per cent. out of 16·9, deserve special commendation, as do those of Bankura, Murshidabad, and Backergunge. On the other hand, the principles stated in paragraph 36 have been ignored by twenty-five District Boards, all of which have devoted less than half their educational expenditure to primary education, the most flagrant cases being Nadia, Bogra and Jalpaiguri.

39. *Special Schools.*—The Backergunge District Board continues to support a technical school at Barisal, which is said to serve a very useful purpose as a survey school. A site has been acquired for the technical school which Babu Jogendra Kishore Chaudhuri of Ramgopalpur has founded at Nasirabad, the head-quarters of the Mymensingh district, and a commodious building has been erected. The Bihar Industrial School was opened at Bankipore on the 25th November 1892: the endowment consists of the surplus balance from the Prince of Wales' Reception Fund collected in 1876, which, with interest, amounted to Rs. 2,50,410 at the close of the year. The number of boys at present under instruction is 53, viz. 28 apprentices and 25 in the artisan class. All the boys except six hold scholarships from the various District Boards or receive an allowance from the endowment fund of the school. There are five special schools under the Rangpur District Board, namely, one technical school, two madrassas and two Sanskrit tols. A technical school in which surveying, drawing, mensuration, and carpenter and blacksmith's work are taught was started at Pabna by private subscriptions, and made over to the District Board during the year. The cost of the school building, furniture and tools was over Rs. 16,000. Besides the technical school, the Pabna District Board paid Rs. 10 a month to a Sanskrit *tol* at Salgorea during the year. A new class has been opened in the Comilla Elliott Artizan School since August 1892 for teaching smith's work: one passed carpenter pupil of this school is said to have set up a workshop in his native village. The Maharaja of Hill Tippera has given a donation of Rs. 1,700 towards this institution, and Maharaj Kumar Binay Krishna of Sobhabazar in Calcutta has promised a yearly grant of Rs. 500 for five years. The scheme for starting a technical school at Noakhali received the sanction of Government in September last, but the school could not be opened till the latter end of March for want of a competent head-master. A technical school was opened in the town of Burdwan on the 11th April 1893; it is maintained by the Burdwan Board; but the local municipality

contributes Rs. 20 a month. The Mysadal Raja's Technical School under the management of the Midnapore District Board is now supported by subscriptions and grants from the District Board and Government. In Bankura the number of Sanskrit tols increased from 30 to 42, and the number of pupils from 287 to 335, but the number of Arabic or Persian schools decreased from 8 to 5, and the number of pupils from 141 to 59. In Hooghly there were 70 Sanskrit tols with 346 pupils, and 36 Arabic and Persian schools with 507 pupils, besides 34 elementary schools with 230 pupils. In Howrah there were 12 Muhammadan schools teaching the Koran with 168 pupils. There were also tols attended by 49 young men. In Burdwan 9 maktabs were started during the year, teaching Persian and Urdu in addition to Bengali. The District Boards of Howrah, Midnapore, Balasore, and Cuttack granted scholarships to students in the Sibpur Engineering College or in other similar institutions.

40. *Female Medical Education.*—Scholarships to female medical students were granted by the District Boards of Burdwan, the 24-Parganas, Backergunge, Mymensingh, Patna, Saran and Puri. In Bankura, Faridpur, Champaran, Muzaffarpur, Rajshahi, Pabna and Dinajpur scholarships were available, but no candidates came forward. Some progress was made during the year in the direction of providing medical attendance for women in addition to that mentioned above.

41. *Medical.*—The total outlay under this head amounted to Rs. 96,420, being Rs. 20,097 more than in the previous year. The excess is chiefly in the expenditure on "Hospitals and Dispensaries," but all the sub-heads show an increase except "General Medical Establishment." The increase is satisfactory so far as it goes, but the percentage on the total expenditure even now amounts only to 1·6 on the ordinary income for the year, and this appears to the Lieutenant-Governor far too low in a province many of the districts of which are notorious for the insalubrity of their climate. In the healthier districts no doubt there is less necessity for any large expenditure, but there can be no question that the District Boards of Hooghly and Murshidabad, who have spent nothing during the year on medical relief, have failed to realize the importance of this branch of their duties. The District Boards of Nadia, Dacca, Khulna, Malda, Jalpaiguri, Midnapore, Howrah, Rajshahi and Darbhanga, whose expenditure amounted to less than Rs. 1,000 each, are in a scarcely better position. The Lieutenant-Governor hopes that prompt measures will be taken in these districts to carry out the very obvious duty of bringing medical relief within reach of the inhabitants of non-urban areas. Even among those District Boards who are shown to have spent something on the medical requirements of their districts, there appears to be a tendency to make over their grants bodily to municipalities, and thus avoid the responsibility and trouble of seeing the money properly disbursed. The medical expenditure of the District Board of Bankura, for instance, as of Nadia, is represented solely by grants to municipal institutions, and no provision is made for the inhabitants of the district. In Birbhum, out of a total expenditure of Rs. 2,444, Rs. 1,441 were expended in this way. The Lieutenant-Governor admits that, in so far as inhabitants of the interior of districts make use of municipal dispensaries and hospitals, it is equitable for District Boards to make some contribution towards the support of those institutions, but it should always be borne in mind that the District Fund is intended primarily for expenditure in the district outside municipal areas. From an examination of Form III, which exhibits the expenditure of the various District Boards during the year under report, it will be seen that more than half of the total medical expenditure of the year was incurred in the two Divisions of Patna and Chittagong, which, it may be noted, are by no means the most unhealthy in the province. Of all the districts Tippera heads the list with an expenditure of Rs. 9,636: besides contributing to the Dufferin Fund and to the municipal institutions at Comilla and Brahmanbaria, the Board maintained eleven dispensaries. The number of patients in those dispensaries shows a most satisfactory increase from 41,004 in 1891-92 to 54,042 in the year under report. The zenana hospital, called after Nawab Sahiba Faizunissa Begum, who gave the site and Rs. 10,000 for it, is still under construction. The Patna district comes next with an expenditure of Rs. 9,404, or nearly double that of the previous year. The increase is due chiefly to the establishment of six new dispensaries. In Gaya the expenditure of Rs. 8,832 was slightly less than

in the previous year. Of this sum Rs. 3,578 went to the Gaya Pilgrim Hospital, and the remainder (except for an item of Rs. 105 for vaccination) to dispensaries. In Chittagong Rs. 6,612, or more than double the outlay of the previous year, were spent under this head. The Board employs a lady doctor, paying her Rs. 100 a month, and with the help of local subscriptions maintains five dispensaries, which are reported to be working well and to be appreciated by the people. The District Boards of Shahabad and Saran each devoted more than Rs. 5,000 to their medical requirements; in the latter district Rs. 4,179 represents the cost of maintenance of four mufassal dispensaries. The District Board of Bogra have decided to open five additional dispensaries in the interior of the district, the money for the buildings having been subscribed on the occasion of the visit of His Honour the Lieutenant-Governor to the district in August 1892. In Faridpur a new dispensary has been opened at Bhanga, and the District Board has expressed its willingness to come forward with aid in any case where it can be shown that the people want a dispensary and will contribute to it, but the Lieutenant-Governor is of opinion that unless some steps are taken to bring the advantages of this offer forcibly home to the people, the poor and ignorant for whose benefit charitable dispensaries exist will not avail themselves of it. In all these districts the work during the year has been satisfactory, and the Lieutenant-Governor trusts that the progress made will encourage the Boards of other districts to follow their good example.

42. The Tippera District Board contributed Rs. 50 a month to the pay of a lady doctor, and the Chittagong District Board continued, as in the previous year, to make a grant for the same purpose. Trained midwives were engaged by the District Boards of Saran and Shahabad. In Birbhum an attempt was made, but without success, to obtain the services of a lady doctor, and the Midnapore Board have resolved to devote a monthly sum to the same purpose. Srimati Kailash Basini Dasi, who has received a medical education at the cost of the Rangpur District Board, commenced during the year, according to her agreement, to practise in the district. The District Board of Gaya expended Rs. 557 during the year in the training of midwives at the Gaya Pilgrim Hospital. As no lying-in patients, however, resort to it, the Board has had for the present to abandon the scheme as one for training midwives, but since the 1st of January 1893 it has kept on the nurses as an establishment for the female ward of the hospital. An opportunity of training in midwifery is expected to be obtained when the Dufferin Female Hospital is established.

43. *Sanitation.*—Particulars of the sanitary works undertaken by District Boards during the year are given in Appendix IV. The total expenditure of the year amounts to Rs. 1,31,915 as against Rs. 56,119 in 1891-92: details are given in the margin.

	1891-92. Rs.	1892-93. Rs.
Improvement of water-supply .	37,278	97,402
Ditto of village sites ...	1,176	635
Conservancy of towns and villages ...	2	...
Sanitation at fairs, &c. ..	6,497	8,066
Other expenditure on sanitary objects	11,166	25,812
Total ...	56,119	1,31,915

The advance is respectable, but the amount is still comparatively insignificant, representing only 2·7 per cent. of the ordinary income of District Boards during the year, and it is subject to the important qualification that Rs. 52,500, or more than one-third of the whole amount, were expended in the Monghyr and Bhagalpur districts in digging new and cleaning out old tanks as measures of famine relief, and not primarily for any sanitary purpose. It is also disappointing to find that the greatest diversity exists in the action of the different District Boards in this matter. Bogra spent absolutely nothing, and the expenditure in Howrah, Khulna, Pabna, Backergunge, Chittagong and Malda has been less than Rs. 500. The Divisional expenditure, excluding that on tanks in Bhagalpur and Monghyr, is detailed in the margin.

	Rs.
Burdwan	8,421
Presidency	10,619
Rajshahi	11,135
Dacca	20,753
Chittagong	3,926
Patna	18,523
Bhagulpur	15,835
Orissa	2,672

It is clear that most District Boards are not yet alive to their duties in respect of sanitation, which is a matter of vital importance to the people. In this regard Bengal is far behind other provinces of the Empire, while the need for sanitary reform is greater in these provinces than in most others. In the Resolution on the Sanitary Commissioner's Report for 1892 the Officiating Lieutenant-Governor dwelt upon the importance of a pure water-supply, and Sir Charles Elliott, though he does not go so far as to desire to

increase taxation generally for the purpose, would view gladly the inception by local bodies of moderate and well-considered efforts to improve water-supply, drainage and the conservancy of rural areas. His Honour hopes that during the current year a suitable proportion of the income of District Boards may be devoted to these objects.

44. Among districts the expenditure incurred in the improvement of water-supply was largest in that of Bhagalpur, amounting to Rs. 45,037. Of this amount, Rs. 35,915 were expended in the excavation of tanks in the Supul sub-division during the late scarcity, and Rs. 8,852 in the re-excavation of 14 tanks in the Madhipur sub-division. The districts of Murshidabad, Bogra, Tippera, Gaya, Darbhanga and Balasore also shew no expenditure under the head of water-supply. The District Boards of the Dacca Division, except that of Dacca district, appear to have realised that small sums spent at random throughout a district are wasted and lead to nothing, but that the result is very different if the same amounts are devoted to furthering some recognized scheme. Mr. Savage, Chairman of the Backergunge District Board, says that in his opinion one tank reserved for the supply of drinking-water is required in every village in the district, and the Board has voted Rs. 10,000 for expenditure during 1893-94 in commencing to carry out the scheme. The Chairman of the District Board of Mymensingh reports that, in view of the heavy cost of excavating tanks and of constructing masonry wells, it is proposed to consider the introduction of ring wells or tube wells. The Chairman of the District Board of Faridpur states that the tanks excavated or re-excavated in that district are more or less a failure on account of the sandy nature of the soil, and a general scheme for sinking wells is therefore under the consideration of the Board. In the Chittagong Division the District Board of Noakhali have devised a scheme for reserving tanks for drinking purposes, and hope to induce the owners of centrally situated tanks to make them over to the management and control of the Board. The Chairman of the District Board of Rajshahi raises an old objection to the digging of wells, viz., that they will not be used by all castes and sects alike. The Lieutenant-Governor agrees with the Commissioner of the Division that the difficulty does not seem to be of much importance. The Commissioner of Patna writes:—

"On the whole I consider that sufficient attention has not been paid in the different districts during the year under review to the important matter of taking over and maintaining roadside wells under section 76 of the Act along the most important thoroughfares. This is undoubtedly one of the most efficacious as well as the most simple and cheapest means of preventing the spread of contagion among, and especially by, wayfarers passing through and coming from unhealthy localities, and is particularly applicable to routes frequented by pilgrims. I am issuing a circular on the subject to the different District Boards, which I trust will meet with attention."

Efforts in this direction have the Lieutenant-Governor's full approval, since the matter is one not only of local, but, along pilgrim routes, of Imperial importance.

45. Towards the improvement of village sites and the conservancy of villages only Rs. 635 were spent, the greater part of which was in Shahabad. Doubtless the District Boards rightly consider that save in very exceptional cases expenditure on this work should be defrayed by the villagers themselves.

46. *Sanitation at fairs.*—The Birbhum Board undertook the sanitary arrangements at the Joydeb, Kenduli, and Bakreswar fairs The District Board of Dacca provides for sanitary and conservancy arrangements at the Kartick Baroni and Nagalbund fairs, and recovers the cost from the zamindars on whose lands the fairs are held. The District Board of Saran spent Rs. 3,871 on sanitary arrangements at the different fairs held in that district, of which Rs. 3,314 were expended on the arrangements for the Sonepur fair. Sanitary precautions were adopted by the District Board of Shahabad at the Barahpore fair at a cost of Rs. 66. In Patna a sum of Rs. 25 was spent by the Sadar Local Board for sanitation at the Phulwari fair. It is explained that the local zamindars in this district are accustomed to make their own arrangements for the sanitation of fairs held on their property.

47. *Stationery and Printing.*—There was an increase of expenditure under this head, amounting to Rs. 1,495. The increase was largest in the Patna Division, particularly in the districts of Muzaffarpur and Saran. The charges under this head in the Patna Division are always very high, and the attention

of the Commissioner is invited to the matter in order that steps may be taken, if necessary, to curtail in the coming year any undue expenditure in this direction.

48. *Miscellaneous.*—Miscellaneous charges rose from Rs. 40,890 to Rs. 55,390. The increase is partly due to the larger expenditure on serais and dâk bungalows. Miscellaneous refunds also rose from Rs. 4,261 in 1891-92 to Rs. 8,921. Contributions towards the Provident Fund amounted to Rs. 1,193, and were made by the District Boards of Rajshahi, Jalpaiguri, Dacca, Faridpur, Backergunge, Noakhali, Monghyr, Purnea, and Malda only. In two districts rewards were paid for the destruction of wild animals and snakes.

49. *Famine Relief.*—The largest sum expended under this head was that spent by the District Board of Darbhanga, amounting to Rs. 2,69,816. The relief works in that district were commenced in March 1892, when the distress became apparent, and were closed in the following July. They consisted of raising and repairing old village tracks, about 582 miles in length, and the excavation and reclamation of sixty-seven tanks. No new roads were undertaken in connection with the relief works, as the distress did not continue long enough to render this necessary, but eight large projects for new roads were prepared in case of emergency. The large excess of expenditure over the funds at the disposal of the Board has been met by a contribution of one lakh of rupees from the Provincial revenues and a loan of Rs. 1,80,000. In Muzaffarpur the expenditure under this head aggregated Rs. 77,854, but it has been charged to the respective service heads, and thus absorbed in the ordinary expenditure of the year. The work consisted in raising and re-aligning twenty-two roads and in reclaiming and re-excavating sixteen tanks. The District Boards of Monghyr and Bhagalpur spent Rs. 1,595 and Rs. 6,609, respectively, on gratuitous relief. In addition to this the Monghyr Board spent Rs. 8,000 and the Bhagalpur Board Rs. 77,752 on other relief works. These amounts have been shown under the head of Civil Works, the labourers not having been paid in excess of normal rates. The amount shown against Purnea, viz. Rs. 3,413, represents the excess of the cost of relief works over normal rates. In Dinajpur Rs. 20,192 were provided for affording relief to landless labourers and petty jotedars, out of which Rs. 17,841 were spent in improving roads by piece-work, and were accounted for under the head of repairs to roads. Besides these, some expenditure on relief works was incurred by the District Boards of Bogra, Gya, 24-Parganas, Jalpaiguri, Saran, Balasore, Cuttack, and Puri.

50. *Civil works.*—A very important innovation was introduced during the year under review. In consequence of the duplication of work and establishments caused by the maintenance side by side of Executive and District Engineers in certain districts, Sir Charles Elliott suggested to the Government of India that the whole of the work placed under the Executive Engineers of the Burdwan, Dacca, and Chittagong Public Works Divisions, as well as some of that under the Executive Engineer of the Darjeeling Division, might be entrusted to the District Engineers in those districts without any detriment to the efficiency of the work, and with considerable advantage as regards economy. The proposal having met with the approval of the Government of India, the maintenance and repairs of all provincial works, consisting mainly of buildings, in the districts named in the margin, which were under the Executive Engineers of the abovementioned Divisions, and also of the Imperial buildings, viz., post-offices and telegraph offices, were made over to the District Boards, and placed in charge of their District Engineers, the necessary funds for their upkeep being transferred to the Boards at the same time. As, however, it appeared desirable to introduce the scheme for a short period only in the first instance in order to test its working, the grants for the maintenance of the works in question, aggregating Rs. 1,35,468 per annum, were made for a period of four years, commencing from 1892-93. In consideration also of the fact that these transfers would throw increased work and responsibility

Burdwan.	Tippera.	Khulna.
Bankura.	Noakhali.	24-Parganas.
Birbhum.	Chittagong.	Jalpaiguri.
Hugli.	Purnea.	Rangpur.
Howrah.	Bhagalpur.	Dinajpur.
Dacca.	Malda.	Bogra.
Faridpur.	Monghyr.	Pabna.
Backergunge.	Jessore.	Rajshahi.
Mymensingh.		

on the District Engineers, a further annual grant of Rs. 10,200 was made to District Boards to meet the cost of the special allowances to be given to their District Engineers.

51. The statement below compares the expenditure under the head "Civil works" for the past two years—

Year.	Ferry establishment, contingencies and refunds.	Original works.	Repairs.	Establishment and contingencies.	Tools and plant.	Water-supply and water-works.	Drainage works.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1891-92	38,458	12,85,516	20,83,897	5,64,403	26,171	84,147	8,556	40,43,238
1892-93	43,591	1,407,845	20,99,233	5,92,197	31,259	1,03,880	10,783	42,88,747

The total expenditure shows an increase of Rs. 2,45,509, to which all the heads in the table contribute, the largest increase being under the head "Water-supply and water-works," due in great part to the expenditure of Rs. 45,037 in Bhagalpur on tanks as noticed above. The expenditure under head "Original works" was largest in Mymensingh, where it amounted to Rs. 1,24,360. A considerable portion of this sum represents expenditure of funds made over to the Board for the construction of Imperial and Provincial works under the system described above; but besides this, five important bridges and several new roads were constructed. In Patna the expenditure on original works amounted to Rs. 1,22,953. A girder bridge over the Punpun river, estimated to cost more than a lakh of rupees, was more than half completed, and Rs. 39,217 were spent on the improvement of the Fatua-Hilsa Road. The expenditure on original works in Muzaffarpur is shown to be Rs. 1,04,680, but of this Rs. 66,790 was of the nature of famine relief. The same cause, it is to be presumed, accounts for the large total in the Darbhanga district, though the fact is not definitely stated in the Commissioner's report. In Gaya the timber bridge over the Khuri river in the Nawada subdivision was completed at a cost of Rs. 53,587. In Burdwan Rs. 12,000 were spent during the year on the Victoria Bridge over the Khori river, which was nearly completed. The office buildings of the Dinajpur District Board, costing Rs. 13,115, were completed before the close of the year. There is a decrease of Rs. 70,290 in the total expenditure on communications, the figures being as in the margin. The adequate maintenance of the roads is a matter to which the attention of every District Board should always be given, since it was for this purpose that the cess was first imposed, and in no other way can the interests of the general tax-payers be better served. Under the head of repairs the largest expenditure was in the 24-Parganas, owing to the special repairs which had to be executed to the Diamond Harbour Road out of funds advanced by Government. Burdwan comes next with an expenditure of more than a lakh and-a-half of rupees. In the thirteen other districts named in the margin, the expenditure on the repairs of roads exceeded half a lakh of rupees. Under the head of establishment by far the largest expenditure was incurred in the Patna Division. It is more than double that of any other Division, and is the natural result of the expenditure on civil works being more than twice that of any other Division.

	1891-92.	1892-93.
	Rs.	Rs.
Original works ...	12,13,966	12,01,433

52. *Village Roads.*—The statement in the margin shows the outlay on village roads in each Division during the past two years, and the length of roads maintained—

	Expenditure.	
	1891-92.	1892-93.
	Rs.	Rs.
Burdwan Division	35,245	27,632
Presidency "	57,127	41,764
Rajshahi "	20,250	21,859
Dacca "	79,498	62,327
Chittagong "	53,843	37,364
Patna "	61,472	77,070
Bhagalpur "	48,445	49,339
Orissa "	24,973	16,984
Total ...	3,66,853	3,40,339

The expenditure was highest in the Patna Division, viz., Rs. 77,070, which is said to represent about 8·76 per cent. of the expenditure incurred on original and repair works on the main roads in the Division. In Saran, where the expenditure in previous years was very high, the list of village roads was carefully revised with the result that the expenditure was reduced. The Lieutenant-Governor has read with pleasure that the misunderstanding which occurred during 1891-92 between the members of the District Board of Darbhanga and some of the indigo-planters of the district was removed during the year, and that the Board received great help from these gentlemen in the supervision and maintenance of the village roads in the vicinity of their respective factories. In Saran, Malda, and Monghyr also a certain number of village roads were repaired through the agency of the resident indigo-planters and other private gentlemen. It is satisfactory to note that in the Feni subdivision (Noakhali) Rs. 756 were paid as a local contribution for the roads by the villagers interested, and the land in all instances was given free of cost, and that similarly certain villagers in the Hugli district supplemented by contributions the Board's grant for the erection of a bridge. As in the previous year, the total expenditure on village roads varied enormously in different districts, from Rs. 18,910 in Saran to Rs. 478 in Jalpaiguri. The Commissioner of the Presidency Division remarks that he grudges every pice spent on village roads. This is hardly in consonance with the Lieutenant-Governor's remarks in last year's Resolution, in which he said—"Under any circumstances an allotment of Rs. 2,500 seems insufficient for so large a district (Nadia), and the Lieutenant-Governor trusts that the District Board will take steps to see that this important branch of their duties is more carefully looked after in future." No doubt village roads are useful chiefly as feeders to the main roads, but no district is so well provided with the latter as to be able to dispense entirely with the former, and in many districts of the province, notably in Bihar, many of the so-called village roads differ little in importance from those which are accepted as the main arteries of communication of the district.

53. *Water communications.*—Expenditure under this head occurs for the most part in the eastern districts. The Telkupi *khal* in Pabna was kept navigable during the year at a cost of Rs. 443. In Backergunge Rs. 149 were expended during the year in clearing jungle from the banks of the Bokhainagar river, and of the *khal* from Berer Done to Bighai river in order to make tow-paths. In Mymensingh three *khals* in the Kishoreganj subdivision were improved and cleared of weeds and plants, with the double object of improving communications and of supplying good drinking-water to the people of the villages on their banks. Seventy-two important navigable channels in the Noakhali district have been taken over by the District Board. The Daudpur *khal* is being deepened, and a big bend near its mouth straightened. The channel from Gangapur to the Megna river is also being improved, and, when completed, will greatly facilitate boat communication. The side excavations of the road from Noakhali to Feni have been converted into navigable channels, and greatly extended in many parts; the re-excavation of the Gokarna *khal* in Tippera was also carried out during the year. The Commissioner of Dacca writes—"I am surprised that so little is done under this head in the three southern districts, where water must always be the chief means of communication." The Lieutenant-Governor concurs that in all districts where this is the case and where expenditure on roads is comparatively small, a larger outlay in improving navigable channels is in every way advisable.

54. *Steam communications.*—The District Board of Dacca still maintains a steam-ferry between Narainganj and Munshiganj, which is of great benefit to the public. In Backergunge the Board subsidized the steam service between Barisal and Khulna to the extent of Rs. 6,000, and that between Barisal and Patuakhali to the extent of Rs. 1,200 per annum. The Malda District Board contributed to the cost of the steam service between English Bazar and Rampur Boalia, the total amount paid during the year being Rs. 1,282. The District Board of Noakhali continued to pay Rs. 200 a month to the Bengal Central Flotilla Company for their steamer service from Barisal to Noakhali. The service between Sandwip and the mainland was not maintained regularly, and steamers which used to ply twice a week before ran once a week only during the winter season. In Tippera a grant of Rs. 300 was made by the District Board

to a Steamer Company for working a launch between Daudkandi and Shatnal, which commenced running from the 15th November 1892 and continued until the close of the year. One of this company's steamers now plies daily between Daudkandi and Naraingani, thus establishing through communication for passengers and goods between Daudkandi and Goalundo. Another steamer plied daily between Hajiganj and Chandpur throughout the year, and received a monthly subsidy of Rs. 250. Owing to the irregular working of this steamer, the Board determined to withdraw its grant from the 1st April 1893 until the arrangements became satisfactory. Negotiations are being carried on by the District Boards of Backergunge, Faridpur, Mymensingh and Noakhali for the further development of steam communications in those districts.

55. *Miscellaneous Public Improvements.*—In Faridpur a sum of Rs. 792 was spent under this head for collecting statistics of the traffic for the extension of the Eastern Bengal Railway from Panchooria to Govindapur and for some enamelled mile-posts for some of the important roads in the district. Some attention is reported to have been paid in almost all districts to arboriculture, and some money spent in planting and maintaining trees along the sides of roads. In Gaya the expenditure amounted to Rs. 6,330, of which Rs. 2,574 represents the cost of iron fences for young trees. In Saran no new trees were planted, but the cost of fencing and maintaining those already existing came to Rs. 4,157. In Champaran Rs. 322 was spent principally in planting 22,525 *tar* tree seeds along the sides of several district roads to demarcate the boundaries.

56. *Railway feeder roads.*—A feeder road, one mile in length, connecting the Galsi Railway Station, in the Burdwan district, with the 87th mile of the Grand Trunk Road, was under construction. The earthwork was completed during the year at a cost of Rs. 2,495, and arrangements are being made for metalling. The plan and estimate for the construction of the three miles of road from the Debipur Railway Station to village Debipur, at the expense of a local zamindar, Babu Kali Das Singha, have been prepared, but the work could not be commenced until the lands required for the purpose had been acquired. In Dacca the railway feeder road from Kudda (Kasimpur) to Simulia, which was undertaken in 1891-92, was in progress during the year under report, but was not completed, as the necessary land had not yet been taken up. Steps have been taken to secure the land and complete the work in the current year. Great improvements were also carried out to the railway feeder roads from Tangi to Kaliganj, Rajendrapur to Mirzapur, and Rajendrapur to Kapasia in the same district. In Mymensingh the earthwork and pipe culverts of the two important feeder roads from Balipara to Nandail (15 miles) and Mymensingh to Porabaria (17 miles) were completed during the year. The work in the first 6 miles of another feeder road from Gaffargaon to Guptabrindaban (20 miles in length) was taken up during the year and some progress made. A mile of the feeder road from Mymensingh to Ishwarganj was metalled, and a feeder road from Kalibazar to Bailoro (4½ miles) was surveyed during the year.

57. *Tramways.*—The record of work for the year is not large. The schemes for the construction of tramways from Burdwan to Katwa in the Burdwan district and from Lakisarai to Gaya in the Patna Division have fallen through. The proposal to construct a railway from Howrah to Bankura and the Howrah-Sheakhala and Howrah-Amta project are hanging fire. In Birbhum a proposal is under contemplation to open a tramway from Suri to Syinthia or to Ahmadpur, while in the 24-Parganas the question of constructing a light tramway from Barasat to Basirhat is still under the consideration of the Board. In Nadia the Board are still considering the question of constructing a steam tramway from Ranaghat to Krishnagar *viâ* Santipur, the total cost of which has been estimated at Rs. 6,52,720, excluding the cost of establishing and working the ferry on the Churni. The Commissioner of the Division does not think it a line likely to pay, or one which is much required except for the convenience of the inhabitants of the head-quarters station of Krishnagar.

58. *Public Works Establishment.*—The statement below compares the percentage of the cost of establishment on the total expenditure on public works in each district during the two years 1891-92 and 1892-93:—

District.	1891-92. Total outlay on Civil Works (column 85 of Statement III).	1891-92. Establishment and contingencies appertaining to Public Works (column 80 of Statement III).	1891-92. Percentage of cost of establishment.	1892-93. Total outlay on Civil Works (column 85 of Statement III).	1892-93. Establishment and contingencies appertaining to Public Works (column 80 of Statement III).	1892-93. Percentage of cost of establishment.

In four districts, viz., Cuttack, Malda, Nadia, and Saran, the percentage exceeded the limit prescribed in the second proviso of section 33 of the Act. In Malda and Saran the excess is said to be due to the fact that the expenditure on Public Works fell short of the budget allotment, and in Cuttack to the non-payment of the bills of contractors that fell due during the year: no explanation is given of the excess in Nadia. In Saran, Nadia, and Malda this provision of the law was similarly neglected in the year 1891-92: the Lieutenant-Governor trusts that early steps will be taken in these districts to curtail the expenditure under this head. It was highest in Nadia (22·2), and lowest in Dacca (8·1). As compared with the previous year, there was an increase in the cost of the establishment in 28 out of 38 districts, viz., Burdwan, Bankura, Birbhum, Hooghly, Howrah, Nadia, Jessore, Murshidabad, Rajshahi, Rangpur, Bogra, Jalpaiguri, Dacca, Faridpur, Backergunge, Mymensingh, Chittagong, Patna, Gaya, Shahabad, Muzaffarpur, Saran, Monghyr, Bhagalpur, Purnea, Malda, Cuttack, and Puri. In the remaining 10 districts, viz., Midnapore, 24-Parganas, Khulna, Dinajpur, Pabna, Tippera, Noakhali, Darbhanga, Champaran, and Balasore, there was a decrease, but in most instances it was little more than nominal. The Lieutenant-Governor agrees with

the Commissioner of the Presidency Division that "expenditure on salaries is a matter in regard to which local bodies require very strict control."

59. *Drainage.*—In Murshidabad Rs. 484 were spent in clearing and repairing two drainage channels aggregating 8½ miles in length. In Noakhali the expenditure on drainage works during the year was Rs. 3,756. The deepening and improving of two important drainage channels —the Duadpur *khal* and the drain from Gangapur to the Megna river—were begun but not completed. The drains by the sides of Begumganj-Lukhipur and some other roads were improved, and the obstructions to the passage of water removed. The Rangpur drain was maintained at a cost of Rs. 2,026 during the year; and a sum of Rs. 506 was spent in cutting a channel at Kurigram by the side of the railway. The Dinajpur District Board spent Rs. 2,502 in the improvement of drains during the year. In the district of Jalpaiguri Rs. 1,585 were expended in carrying out a drainage project at Alipur civil station. This amount was received as a contribution from the Duars Improvement Fund, which is at the disposal of the Deputy Commissioner of the district. The total expenditure under the head amounted only to Rs. 10,783. There is no doubt that very much remains to be done in this direction in many parts of the province, and it is to be hoped that the Bill now before the Bengal Legislative Council will turn the attention of District Boards to the necessity of drainage schemes and will facilitate the execution of them as soon as it passes into law.

60. *General remarks.*—The Lieutenant-Governor will conclude this review by reproducing the observations recorded by Commissioners of Divisions in their reports on the working of District and Local Boards during the year.

The Commissioner of the Burdwan Division (Mr. Power) writes:—

It seems that, while individual members render great assistance to the executive, District and Local Boards, as bodies, have not yet advanced beyond the initial stage of their existence, in which they figure as potential means of educating the public into a desire for local self-government; their poverty precludes them from exercising any very deep influence on the administration. Such needful things as can be done with the funds at their command are now done with their concurrence. The same things would formerly have been done by the executive authorities acting on less formally expressed incentive: there is no room for much difference of opinion. In the Annual General Administration Report I quoted, with approval, Mr. Duke's remarks on this subject. They will bear repetition, and are reproduced here:—

"It would be unjust and ungrateful to complain of apathy in the members, for I found them on all occasions most willing to assist me, and anxious that business should be efficiently conducted, but at the same time I think there is an underlying sense that there is very little for the members to do. The Board, in fact, is so poor, its wants are so much beyond its income, that there is never anything new or popular to be done; and I think that after a certain experience of this damping fact, members come to feel that, where the income has obviously to be spent on only the most necessary and peremptory requirements, there is very little room for discussion, and most things may be left in the hands of the executive."

The Commissioner of the Presidency Division (Mr. Westmacott) remarks:—

The District Boards have on the whole worked well as deliberative bodies. The Local Boards have a restricted scope for their activity, and have not displayed much energy. I agree with the remarks made by Mr. Beames in last year's report that, if local self-government means administration of the affairs of a locality by the principal residents thereof, elected by the rate-payers and watched by them, then we can hardly be said to have got local self-government at all yet. The principal and certainly the most active members of those Boards are for the most part pleaders who are not natives of the district, and are no better able to judge of local requirements than the Magistrates and Deputy Magistrates. Until the leading residents of a place come forward to take seats on the Board, the movement can only be said to have substituted one class of government by outsiders for another. When I took charge of the division in March last, I had had nothing to do with its administration for eighteen months, and I hesitate to give a decided opinion on the working of District Boards from what I have seen in less than five months. It appears to me, however, that, comparing the enormous funds now at the disposal of the Boards with the pittances placed at the disposal of Magistrates in the old Ferry Fund days, the roads and bridges not only do not show corresponding improvement, but are worse than they used to be.

The Commissioner of the Rajshahi Division (Mr. Nolan) observes as follows:—

I am of opinion that the work of the District Boards showed signs of improvement during the year. Its quality depends greatly on the efficiency of the District Magistrate, who is the Chairman. In Pabna the system is less successful than elsewhere, because, by delegating almost all power to Local Boards, the advantage of the Chairman's direction has been lost. I think it a mistake that Subdivisional Magistrates, whose official tours enable them to

know the country, are not appointed members of the Local Boards. For the direction of primary education it seems to me that the Boards do not form an efficient agency. They are, I think, in this respect inferior to the Education Committees they superseded, the members of which were specially selected for their interest in the department.

The Commissioner of Dacca (Mr. Luttman-Johnson) states:—

In my Annual General Administration Report I have made the following remarks:—

"Most of the members of the Dacca Board continued to take considerable interest in the questions which came before them for consideration. The Faridpur Board worked satisfactorily and smoothly. The Local Boards have no funds of their own, and are rarely allowed for expenditure more than a small percentage of the amount they contribute to the District Funds. Under these circumstances, that in Dacca members take some interest in the transaction of business is very satisfactory, while the statement that in Faridpur they are a failure can hardly cause surprise. In Backergunge the members of both District and Local Boards have taken great interest in their work, and steady progress has been the result in Sanitation, Communications, and Education. The Mymensingh District Board is far the most helpful body Mr. Earle has ever presided over. The members take the keenest interest in the Board's affairs. The Local Boards in this district carried out their vicarious duties satisfactorily."

The Commissioner of Chittagong (Mr. Oldham) says:—

The Board have not to assess revenue, and the methods of collecting it which they follow have been fully tried and are administered by officers trained to work like this on a large scale. Free as they are from these two difficult branches of public duty, the Boards have worked judiciously and efficiently, and have been careful as well as effective disbursers of the funds which they administer.

The Commissioner of the Patna Division (Mr. Forbes) records his opinion in the following words:—

The general working of the District Boards during the year continued to be satisfactory and harmonious. I noticed in my last report the unquestionable value of the District Boards as consultative bodies, and the useful part also occasionally taken in certain executive matters by the various sub-committees. Many of the members who sit on these committees take a decided interest in their duties and transact well and conscientiously a considerable amount of public business. The Local Boards with official Chairmen are again reported to have worked better than those with non-official Chairmen.

The Commissioner of Bhagalpur (Mr. Quinn) makes the following observations:—

The work of the Boards generally throughout the Division has, I think, been carried on with a very fair degree of efficiency during the past year, though the proportion of members who take a practical interest in the administration of the funds and the execution of the works is still small. The members generally, however, deserve credit for the support which they have given to the executive. The standing committees have done good service, and individual members, notably General Murray, Vice-Chairman of the Monghyr Board, and Rai Surja Narain Singh Bahadur, Vice-Chairman of the Bhagalpur Board, have rendered efficient aid to the Chairman, and have relieved him of much of the work of general management and control. As regards Local Boards, the work is for the most part left in the hands of the Chairman, and the members as a rule give little assistance, with the exception of the European planters, who render good service in superintending the repairs of village roads. In the matter of primary education, the Local Boards take little real interest, and I have always thought it a mistake to entrust them with the administration of the grant for this purpose.

The Officiating Commissioner of Orissa (Mr. Cooke) has not recorded any opinion, but has forwarded the following extracts from the reports of the District Officers:—

Mr. Cornish, the Chairman of the Balasore District Board, writes—"The general working of the Board has been most satisfactory. The attendance is as good as can be expected, considering that all the members are busy men, and some live at a considerable distance from the sadar and sub-divisional head-quarters. The various sub-committees discharged most useful functions in preparing materials for the consideration of the general meetings. There has been no friction or obstruction of any kind. Party spirit, which rages outside, never enters our committee room. Both Local Boards worked most loyally, though, as usual, the Bhadrak Board did little more than register the decisions of the Chairman and Vice-Chairman."

Mr. Walsh, the Chairman of the Puri District Board, makes the following remarks:—"I must note the same general want of interest on the part of the members as was noted in last year's report. The present Vice-Chairman, Babu Harish Chandra Ghose, who is a local pleader, takes considerable interest in the work and devotes as much time as he can spare to it, but this general interest is not felt by the other members, as is shown by the small percentage of attendance at the meetings which has been noticed above, and the entire absence of any undertaking or resolution brought forward by the members other than the Chairman. The duties of the Local Boards of Puri and Khurda have been almost nominal, but on account of the redistribution of work that has been already alluded to, they will have more to occupy them during the current year. There has been an absence of friction or obstruction of any

sort, and the meetings have passed off amicably. I cannot say that the greater part of the members show any interest in the power bestowed on them of local self-government."

61. The Lieutenant-Governor has nothing fresh to say regarding the results of the administration of local affairs by District Boards. The machinery has worked smoothly for the most part. Progress has been made in the extension of medical relief, though little or nothing is being done to touch, by drainage schemes, the seats of malarial fever. Sanitation is neglected: this, however, is a matter in respect of which only very slow and gradual improvement should be desired. The advancement of primary education still demands careful attention. There is scope for further improvement in the expenditure on communications. Better results might be obtained in most districts with a more judicious distribution of the available funds. In the Patna Division, for instance, the general tendency is to spend too much on communications, and to neglect education, while in the Burdwan, Presidency, Dacca, Rajshahi and Orissa Divisions, a reduction in the expenditure on higher education and a greater liberality in providing for medical requirements is undoubtedly necessary. In those districts in which the ordinary means of communication is by boat, far more benefit will accrue by improving the waterways than from heavy outlay on banked and bridged roads. The Lieutenant-Governor does not wish to imply that money is spent where it is not required, but when funds are limited, it is necessary to consider not only whether expenditure on a particular object is in itself beneficial, but also whether there is not some other work calling more urgently for execution. No great achievement has marked the past twelve months and no new policy has been inaugurated, but His Honour is gratified to think that the year has been one of that uneventful progress which leads to the goal of order and good government.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Govt. of Bengal.

FORM No. I(*a*).

Statement showing the Constitution of the District Boards in Bengal during the year ending 31st March 1893.

APPOINTMENT OF A COMMITTEE TO CONSIDER THE QUESTIONS OF RECRUITMEMT, TRAINING, POSITION, PAY AND PROSPECTS OF CIVIL HOSPITAL ASSISTANTS IN BENGAL.

MUNICIPAL DEPARTMENT—MEDICAL.

Calcutta, the 19th December 1893.

RESOLUTION—No. 4046Med.

Read the following correspondence—

Letter to the Government of India, Home Department, No. 314T.—M., dated 23rd October 1891.

Letter from the Government of India, Home Department, No. 191, dated 26th March 1892.

Letter to the Government of India, Home Department, No. 619T.—M, dated 20th September 1892.

Letter from the Government of India, No. 5—229Med., of the 10th May 1893.

Letter to the Government of India, Home Department, No. 322T.—M, of the 30th June 1893.

Read also—

Letters from the Inspector-General of Civil Hospitals, Nos. 71D., dated 22nd May 1893, and 110D., dated 6th June 1893.

Several questions of importance referring to the recruitment, training, position, pay and prospects of the Subordinate Medical Service in Bengal have lately been under the consideration of Government, and in the Lieutenant-Governor's opinion the time has come for a decision to be passed upon them.

2. In the first place, considerable difficulties have been experienced in making adequate arrangements for medico-legal work at the head-quarters of subdivisions. It was considered by this Government that the difficulty might be met by the creation of a grade of Sub-Assistant Surgeons, composed of officers possessing higher professional qualifications than Civil Hospital Assistants, while inferior in this respect to Assistant Surgeons. This proposal did not, however, commend itself to the Supreme Government, who have suggested the formation of a senior grade of Civil Hospital Assistants, to be filled by the best qualified of the men already in the service; but it has been represented to the Lieutenant-Governor that the chief need of the Civil Hospital Assistant class in Bengal is not so much the formation of a higher grade as the improvement of the pay and prospects of the lower grades, in order to attract better material into the service, and to enable Government to insist on higher qualifications in the candidates for employment as Civil Hospital Assistants. In this connection it has been stated that Government, in spite of its liberality in the matter of vernacular medical education, does not succeed in enlisting the best of the students in its service when they have passed out of the schools. In the second place, it has been urged that inequalities exist in the conditions of the vernacular medical schools in these provinces at Calcutta, Patna, Dacca, and Cuttack as regards not only the quality of the education afforded, but also the cost, the equipment, and the establishment in these institutions. Thirdly, it seems doubtful whether efficient arrangements are made at all the schools for the attendance of female students, so as to provide for their separation from the male students when coming to or leaving the schools, and when receiving instruction in the lecture rooms and dissecting halls.

3. All these are questions which demand the careful attention of the most experienced officers available, and the Lieutenant-Governor has decided to appoint for this purpose a Committee consisting of the officers named in the margin, upon whose mature judgment and intimate acquaintance with the requirements of Bengal he can confidently rely.

1. Surgeon-Colonel R. Harvey, Inspector-General of Civil Hospitals, President.
2. Sir A. W. Croft, C.I.E., Director of Public Instruction.
3. Surgeon-Major G. Bomford, Principal of the Medical College, Calcutta.

4. It will be the duty of the Committee to consider in the first place the present position of the Civil Hospital Assistant class, and to report whether the conditions under which they serve are such as to attract a sufficiently good type of students and to keep them contented: if reform is found to be advisable, they will state what direction it should take. They should consider whether better pay and improved prospects should not be made contingent upon the introduction of a higher standard of attainments, and these enquiries will lead the Committee to the second part of their labours, viz., an examination of the existing system of vernacular medical education. In the course of this investigation special attention should be given to the condition and the requirements of the different schools in the province, including the proposal to abolish that at Cuttack, and the possibility of introducing some approach to equality in the cost of each, and some uniformity in the equipment and the teaching staff. Connected with this point is the suggestion that some change should be effected in the duties or the emoluments of the Superintendent of the Campbell Medical School, Calcutta, who, it has been said, at present holds too many appointments to be able to devote adequate attention to all of them. Enquiry should be made into the conditions under which students are admitted into the schools, the extent to which, they are assisted by public funds during the period of tuition, the extent to which, after obtaining their certificates, they enter Government service, and the reasons which militate against their entering it, including among them the comparative attractions of other fields of employment open to them. The opportunity should also be taken of considering whether the Inspector-General of Civil Hospitals should not be associated to some extent with the Director of Public Instruction in the superintendence of medical education both in the college and the schools. Lastly, the Committee should draw up detailed recommendations for the training of female medical students, who may possibly at no distant date form an important element in the student class. Some materials for a conclusion on each of these questions will be found in the papers quoted above, but the Committee are empowered to make such further enquiries as they may think proper either personally or by letter in Calcutta or elsewhere. Finally, the Lieutenant-Governor hopes that they will commence their labours as soon as possible, and submit their report in time to allow him to give it full consideration and to introduce any reforms that may be required from the commencement of the next financial year.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Inspector-General of Civil Hospitals, to the Director of Public Instruction, and to the Principal of the Medical College, for information.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 16th December, 1893.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.

* Means for 6 days. | † Means for 5 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period

The *humidity* of the atmosphere is expressed as percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10

rainfal the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station

district, i.e. from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 16th of December 1893.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 16th October 1893. Mean for district.	Normal mean.	Variation.	District.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least ·10 inch of rain has fallen.

CALCUTTA, *the 19th December* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY THE 16TH OF DECEMBER 1893.

THE meteorological conditions during the week again call for no detailed review, for fine settled weather of ordinary north-east monsoon character has prevailed throughout the period. At the commencement of the week pressure was unusually high, being above the normal in most districts by from 0·08″ to 0·1″. The excess pressure in the south of the Bay was only equal to about 0·06″, so that the differences of pressure were somewhat larger than usual, and hence the north-east monsoon current blowing was rather strong. Temperature also on the 10th, or the first day of the week, was in small to moderate defect in all except the extreme western districts and in Orissa, where slight excess temperatures were still registered. On the 11th the barometric changes were extremely small, while temperature had fallen, and had become in defect at all stations, the defect in the mean temperature ranging up to about 5° at some of the north-eastern stations. On the 12th, 13th, 14th, and 15th the changes both of temperature and pressure were small and unimportant, though on the whole temperature was increasing slowly, and on the 16th, or the last day of the week, while pressure was still in excess by about 0·08″ to 0·1″, the mean temperature had become slightly above the normal over a large part of the western half of the province, while only small defects, generally between 1° and 2°, were registered over the remainder. At the same time the excess pressure in the south of the Bay only equalled about 0·03″, so that again baric gradients were decidedly steep—considerable steeper than usual, and hence a fairly strong northerly wind current was blowing over Bengal and over the whole Bay. Throughout the whole week, therefore, fine weather with almost cloudless skies has prevailed, and there has been absolutely no rainfall except for a few light showers in the Darjeeling district, which were reported on the 16th.

Pressure.—The mean pressure for the week has hence been in very considerable excess in all districts, the usual excess varying from 0·09″ to 0·07″, and this excess has generally been largest in the north-eastern districts and smallest at the southern stations. The excess, however, seems to have been comparatively small in the upper strata of the atmosphere, where Darjeeling reports an excess of only 0·02″.

Temperature.—The mean temperature of the whole province for the week has been below the normal by 2·1°, and the defect has been largest in South-West and North Bengal, where it has averaged about 3°.

The actual temperatures registered during the week and their variations from the usual temperature for the present season are most clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations it will be seen have been large in both the night and day temperatures, which have been considerably below the normal, the usual defect at the nine stations averaging 1·8° in the case of the day, or maximum temperature, and 2·4° in the minimum, or night temperature.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 16th of December 1893.

	Normal mean maximum temperature for the week ending 15th December.	Actual mean maximum temperature for the week ending 16th December 1893.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 15th December.	Actual mean minimum temperature for the week ending 16th December 1893.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 16th December.	Actual mean daily temperature for the week ending 16th December 1893.	Variation of actual mean from the normal.

Rainfall.—Except for two or three light showers in the Darjeeling district, which were reported on the 16th, the whole province has been rainless throughout the week.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 16th of December 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th Oct. 1893.

	Inches.
The total fall of rain from 10th to 16th December 1893	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·04
The total fall from 1st January to 16th December 1893	85·23
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·23

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

△, dew; ≡, fog.

RESOLUTION ON THE ANNUAL AGRICULTURAL REPORT FOR 1892-93.

REVENUE DEPARTMENT—AGRICULTURE.

Calcutta, the 26th December 1893.

RESOLUTION No. 6309Agri.

READ—

Letter No. 977A., dated the 14th September 1893, from the Board of Revenue, submitting the Annual Agricultural Report of the Director of the Department of Land Records and Agriculture for the year ending 31st March 1893.

THIS is the first separate report on Agriculture which Government has received, and the Lieutenant-Governor is pleased to record his satisfaction with the care and completeness with which the report has been drawn up. The first chapter contains a brief account of the harvests of the year, together with a list of the Agricultural Statistics which, under existing orders, the Director furnishes to Government. The Director's estimate of the outturn of the various harvests is on the whole favourable, and the Lieutenant-Governor fully accepts the view that, except in a few districts, the production of food-grains during the year was not less than the average. The statistics furnished comprise periodical forecasts and reports relating to the different crops and were submitted with commendable punctuality during the year, together with certain annual statements, of which the most important form the set of statistics known as the "Agricultural Statistics" for 1891-92. The latter were received

long after the date on which they were due; but it is known that their compilation entails considerable labour. Similar statistics for 1892-93 are now overdue, and have not yet reached Government.

2. The number of emigrants from Bihar to Burma increased from 77 in 1891-92 to 313 during the year under report; nearly all of them were from the neighbourhood of Arrah. Mr. Macpherson quotes some interesting remarks on the subject by Mr. J. L. Mackay, C.I.E., from which the following extract is taken:—

Emigration to Burma.

"Several men of the first batches of emigrants have been back to their homes for their families and friends, thus doing recruiter's work in its most satisfactory form.

"It has been found by experience that Biharis are not suited to compete successfully with the Madrassi coolies employed in factories, &c., in Rangoon and the towns, but they do better as agriculturists. The men who returned to their friends are all of this latter class, and they speak well of the country and their prospects when questioned.

"The requirements and conditions of the journey and voyage are becoming much better known, and the emigrants now show scarcely any of the fear and hesitation that appeared at first, though there are still occasional desertions at the last moment before sailing."

3. No tree-planting operations on a large scale were carried on during the year. The Board of Revenue suggest that the cultivation of pear, apple and other fruit trees should be tried experimentally on the large plateau called the "Main Pat" in Sirguja, or other elevated tracts in the Tributary States of Chota Nagpur, but such experiments must be left to private enterprise, unless as suggested the Chiefs will take an interest in the matter.

Tree-planting.

In this connection, it may be remarked that a report written in 1883 by the late Mr. Worsley, regarding the system of planting trees along the sides of roads followed by him when he was in charge of the district of Muzaffarpur was, with some additions, circulated to all Commissioners of Divisions during the year, with an expression of the Lieutenant-Governor's opinion that Mr. Worsley's system might be adopted with advantage by all District Officers and District Boards in Bengal. Under this system young trees are raised in nurseries from seed sown in pots, and when five or six feet high they are planted out at the commencement of the rainy season along the sides of roads. A list of trees was drawn up whose planting was recommended where the soil is suitable, care being taken not to plant large and small fruit-bearing and timber trees indiscriminately together.

4. In connection with the enquiry into the diseases of silkworms on which Mr. Nitya Gopal Mukherji has been employed since 1886, the Lieutenant-Governor recognizes the useful work done by that officer in promoting the distribution and use of healthy seed. The rearing stations of Kalimpong, Pokhuria and Khulna were kept up during the year, and new stations were opened at Babukhali in Jessore and Kagachira in Malda. The growing popularity among native rearers of seed selected on the system adopted by Mr. Mukherji is an encouraging proof of the progress which has been made. His Honour has also read with interest the account contained in the Director's Report of the experiments recently conducted at Alipore by Messrs. J. A. Anderson and R. A. Lyall. These gentlemen are to be congratulated on the success with which they obtained healthy seed by the simple device of subjecting the worms to healthy conditions of life, including constant and sufficient food. Their success, indeed, has been such as to suggest a doubt in regard to the existence in India of the diseases known as pebrine and muscardine, which, being due to specific causes, cannot, it is said, be eradicated by merely providing the worms with good food and fresh air. This surmise, however, which can only be regarded as tentative, is at variance with the view hitherto accepted; and in order to set all doubts at rest, Mr. Mukherji has been requested to take steps to bring the matter to a practical issue. The experiments will be undertaken as soon as the necessary appliances are available, and their result is awaited by Government with interest.

Pebrine.

5. A large part of the report is taken up with an account of the agricultural experiments conducted in these Provinces during the year. The Lieutenant-Governor, while admitting the interesting nature of those experiments, concurs in the remark made by the

Agricultural experiments.

Board that their history is not of great general value on account of the absence of sufficient information as to the soils experimented on.

6. At the Burdwan farm experiments were conducted by the Director's Assistant, Mr. Nagendra Nath Banerji, with sugarcane, fodder-grasses, jute, paddy, maize, potatoes, wheat, barley, gram and oats. They showed, among other things, that a mixture of bonemeal and saltpetre proves a profitable manure for the winter paddy crop. The best plot on the farm yielded $55\frac{1}{2}$ maunds of grain, and 61 maunds 35 seers of straw per acre, a result obtained by the application of 3 maunds of bonemeal and 30 seers of saltpetre, costing Rs. [illegible]-6 per acre. After deducting the cost of manure and of cultivation, the net profit per acre in the plot amounted to Rs. 99-10-3.

Burdwan experimental farm.

The gross expenditure of the farm during the year was Rs. 1,5[illegible]5-9, against Rs. 1,565-14-4 of the preceding year, the increase being due to the addition of new land to the farm. The actual cost of cultivation was Rs. 1,193-6, while the income was Rs. 1,167-7 as against Rs. 1,162-3 in the previous year.

7. The crops under experiment in the Dumraon Farm were winter paddy, sugarcane and wheat; in the Bhojpur Farm potatoes, and in the Sibpur Farm jute, *aus* paddy, fodder grasses, wheat, oats, barley, potatoes, sugarcane, cotton, tobacco, and cabbage. One of the results brought out by the experiments was to confirm the experience of previous years that a plough which inverts the soil gives a larger outturn of wheat and paddy than the country plough which breaks the soil, but does not invert it. It is reported that a plot on which a plough of the former description had been used gave 2 maunds 10 seers of wheat, and a nett profit of Rs. 6-6 over and above the outturn and nett profit of a plot on which the country plough had been used.

Dumraon, Bhojpur and Sibpur Farms.

The total expenditure at Dumraon and Bhojpur on the experimental farms and Economic Museum amounted to Rs. 1,856-5-11, the actual cost of cultivation being only Rs. 483-8.

8. The cultivation of tobacco was undertaken for the first time in the Sibpur Farm. Three country varieties, viz. (1) Rangpur, (2) Matihar, (3) Hingli, and the American variety known as *Havana* were planted on one-third of an acre of land, and it is reported that they gave a good outturn. The leaves were cured in the shade, and Government will be glad to be informed of the further progress of the experiment, when the opinion of an expert has been obtained on the results achieved.

Experimental cultivation of tobacco.

The total actual cost of cultivation in the Sibpur Farm amounted to Rs. 1,522-8-1, while the income was Rs. 1,225-5-6.

9. The manufacture of bonemeal was continued during the year at the Jalpaiguri and Darjeeling Jails, and was also introduced into the Saran Jail. The bone-crushing operations at the Jalpaiguri Jail were transferred in July 1892 to the exclusive supervision of the Jail Department. The total outturn of bonemeal in the Jalpaiguri Jail amounted to 77 maunds 25 seers, which were sold chiefly to European tea planters, for Rs. 110-8. Two hundred maunds of bonemeal were manufactured at the Saran Jail, and sold to an European indigo planter at Re. 1-8 per maund, the cost of manufacture being a little under Re. 1. The Director gives in his 40th paragraph an interesting summary of the results of the action taken by his Department since 1890 in the utilization of bones for manure. It is to be regretted that native cultivators have not hitherto appreciated the advantages of bonemeal manure to a greater extent.

Bones as a manure.

10. The Bengal Veterinary Institution, located at Belgachia on the Belgachia-Dum-Dum road, about five miles from Government House, is now practically ready. The Institution owes its origin mainly to the munificence of Babu Sheo Baksh Bogla of Calcutta, who contributed Rs. 30,000 and $3\frac{1}{4}$ bighas of land, and of Sir Dinshaw Manukji Petit of Bombay, who gave a further donation of Rs. 25,000. The total cost of the buildings will be Rs. 82,799 according to the estimate, and the balance required will be provided from Provincial revenues. The Institu-

Veterinary Institution.

tion, which has been constructed on plans approved by the Committee of Management and the Inspector-General of the Civil Veterinary Department, includes a lecture-room, museum, pharmacy, library, reading-room, four horse wards and four cattle wards, *post-mortem* room, forge and stables for isolated cases, besides offices for the Superintendent and Assistant Superintendent, and a residence for the latter. Veterinary Captain W. D. Gunn was appointed during the year to be Superintendent of the Civil Veterinary Department, Bengal, and of the Bengal Veterinary Institution, and all District Boards were informed that he would be available for consultation by them and other local authorities on any matters connected with horse and cattle-breeding, or diseases of horses and cattle. In connection with the Veterinary School to be attached to the Institution 30 stipends of Rs. 5 each to be held by papils are to be offered, besides a scholarship of Rs 10 a month founded by Dr. Kenneth McLeod, late of Calcutta. Mr. E. Burke, Veterinary Overseer, Civil Veterinary Department, has been appointed on Veterinary Colonel Hallen's nomination to be Assistant Superintendent. Rules for the admission of students and animals to the Institution have been drawn up and are now under the consideration of Government. Full clinical and other facilities for the instruction of veterinary students will be afforded, and while designed specially for Bengal, the Institution is open to students from all parts of India.

11. The Director has appended to his present Report Veterinary Captain Gunn's account of the work which he has done since his appointment as Superintendent of the Civil Veterinary Department, Bengal, on the 31st May 1892. The Lieutenant-Governor admits that at the commencement of a new undertaking too much must not be expected, but for the future he looks to the Superintendent to suggest and carry out a systematic scheme for the collection of information on subjects within the scope of the Veterinary Department. It is desirable that Veterinary Captain Gunn should acquire experience of the conditions of animal life in this Province, and devote as much of his time as he can spare from his duties in connection with the Bengal Veterinary Institution to thorough investigation in the districts with the object of acquiring and placing on record a stock of useful information which may eventuate hereafter in practical measures being undertaken to the great advantage of the country. Instructions have recently been received from the Government of India for the supply by Provincial Veterinary Officers to the Assistant to the Inspector-General, Civil Veterinary Department, of information regarding animal diseases and cattle breeds in India. In connection with the latter subject, the Superintendent's Report shows that he has suggested to the District Boards which he has visited the importation of Burman bulls as a means of improving the breed of cattle in their districts. It is stated that the District Boards of Mymensingh and Tippera have indented for two Burman bulls. The attention of the Superintendent should be drawn to the results reported in paragraph 52 of the Director's Report, which were obtained by the use of the Hissar, English and Bachour bulls for the purpose of breeding; and he should compare them with the results obtained by the use of Burman bulls.

Cattle-breeding.

Mule-breeding.

12. It was at one time proposed that experiments on mule-breeding should be conducted by the Political Agent of Sikkim at the cost of the State, but the proposal was abandoned on the ground that the finances of the State did not justify such expenditure. Since this decision was come to, a circular calling attention to the importance of the subject, and suggesting certain action, has been received from the Government of India; and the Lieutenant-Governor awaits a report from the Director. Veterinary Captain Gunn is mistaken in thinking that any indent has been made by this Government for donkeys for use in Kalimpong and Sikkim.

Horse and Cattle fairs.

13. The Superintendent is wrong in supposing that there is only one cattle fair of any importance in the Province, as he will doubtless discover for himself when he has been longer in the Province. With reference to his remarks on the Sonepur fair, it may be stated that there are difficulties in the way of effecting the improvements he suggests, as the land on which the fair is held is not under the control

of the District Board, but belongs to private landowners. The local officers will, however, do all they can to improve the arrangements. The Lieutenant-Governor will bring to the notice of the Government of India the remarks made by Veterinary Captain Gunn in connection with the Kalimpong mêla.

Cattle disease.

14. Cattle disease was present in other parts of the province as well as in Darjeeling, though no virulent outbreaks were reported, except from Kalimpong. Veterinary Captain Gunn visited the latter place thrice during the progress of the disease, and his action appears to have been energetic and useful; his services at such times will no doubt be more frequently applied for in the future when the benefits of his presence and advice become better known.

Officers.

15. The thanks of the Lieutenant-Governor are due to Mr. Macpherson for his efficient supervision of the Department during the year under report. The remarks of the Director regarding his three Assistants, Mr. Nitya Gopal Mukerji, Mr. Bhupal Chandra Basu, and Mr. Nagendra Nath Banerji, all of whom, especially Mr. Basu, rendered good service, will be communicated to the Appointment Department.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette*. Ordered also that a copy of the Resolution be submitted to the Government of India, in the Revenue and Agricultural Department, for information, and that a copy be forwarded to the Board of Revenue for information and guidance.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 23rd December, 1893.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
BURDWAN DIVN.	1	Burdwan Dec. 23, '93 Kalna ... Katwa ... Raniganj ...	Nil Nil Nil Nil	Weather—seasonable. Harvesting of *aman* continues. *Rabi* doing well. Water and fodder sufficient. Prices of common rice: Srs. Burdwan ... ... 13 to 15½ Kalna ... ... 10 to 15 Katwa .. .. 16 Raniganj ... ... 16 } per rupee.
	2	Birbhum „ 23, '93 Rampur Hát ...	Nil Nil	Weather—seasonable. Spring crops look well. Price of common rice stationary at 15 to 20 seers per rupee.
	3	Bankura „ 23, '93	Nil	Weather—seasonably cold. Harvesting of *aman* all but completed. *Rabi* excellent. Fodder and water sufficient. Common rice selling at— Srs. Sadar ... . 17 Vishnupur ... ... 17¼ } per rupee.
	4	Midnapore „ 23, '93	Nil	Weather cold always with some clouds, but no appearance of rain. Reaping of rice crop is almost finished. Sowing of *rabi* crops over; prospects good. Prices of common rice Srs. Sadar ... ... 16 Contai ... ... 15 to 21 Tamluk . .. ... 11 to 16 Ghatal ... . 15 to 16 } per rupee.
	5	Hooghly „ 23, '93 Serampore .. Jahanabad ..	Nil Nil Nil	Weather—seasonable. Harvesting of *aman* progressing briskly. Prospects of *rabi* good. Fodder and water-supply sufficient. Prices of common rice:— Srs. Sadar ... ... 12 to 13 Serampore ... ... 10 to 14 Jahanabad ... ... 11 to 14 } per rupee.
	6	Howrah „ 23, '93 Ulubaria ...	Nil Nil	Weather—seasonable. Harvesting of winter rice continues. Sugarcane and spring crops doing well. Condition of cattle good. Fodder and water-supply sufficient. Price of rice 10 to 14 seers per rupee.
PRESIDENCY DIVN.	7	24-Parganas .	...	Report not received.
	8	Nadia „ 23, '93 Kushtia Meherpur ... Chuadanga . Ranaghat ..	Nil Nil Nil Nil Nil	Weather—cool. Harvesting of *aman* going on. Prospects of *rabi* crops good. Price of common rice slightly fallen. Fodder and water sufficient.
	9	Murshidabad „ 23, '93	Nil	Weather—getting cold. Harvesting of *aman* paddy still going on. Sowing of *rabi* crops finished. Prospects of crops good. Fodder sufficient. Common rice sells at 13 seers per rupee.
	10	Jessore „ 23, '93 Jhenida .. Magura .. Narail .. Bangaon .	Nil Nil Nil Nil Nil	Weather—seasonable. Harvesting of *aman* still going on; outturn short. Prospects of winter crops fair. No cattle-disease reported. Fodder and water sufficient. Price of rice stationary.
	11	Khulna „ 23, '93 Bagerhat ... Satkhira ...	Nil Nil Nil	Weather—seasonable. Harvesting of *aman* is vigorously going on. Prospects of winter crops good. Common rice selling at about 12 seers per rupee. Fodder and water sufficient.

Division	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*					
RAJSHAHI DIVN.	12	Rajshahi Nator Naugaon	Dec. 23, '93	Nil Nil Nil	Weather—seasonable and cold. Crops are in a very satisfactory condition. Fodder and water-supply ample. No cattle-disease. Rice selling from 12 to 18 seers per rupee.
	13	Dinajpur Thakurgaon	„ 23, '93 ...	Nil Nil	Weather—cold. Rice is being harvested; the crop has [illegible] a bumper one. Potatoes coming out. Condition of cattle good. Fo[illegible]d drinking water ample.
	14	Jalpaiguri	„ 23, '93	Nil	Weather—fine and cool. *Haimanti*-paddy is still being harvested. Potato doing well. Common rice sells from 13 to 14 seers per rupee. Fodder and water-supply sufficient.
	15	Darjeeling Siliguri	„ 23, '93 ...	Nil Nil	Weather—bright and cool. *In the hills:—Marua, phaphur* and *aghani* rice being harvested. *Toree* and barley progressing favourably. Prospects good. *In the Terai:* Harvesting of winter rice in full swing. Other crops doing well. Mustard in flower. Prices of coarse rice:— Srs. Hills ... ... 8 to 12 } per rupee. Terai ... ... 12 to 13 }
	16	Rangpur Gaibanda Kurigaon Nilphamari	„ 23, '93	Nil Nil Nil Nil	Weather—fine and cool Prospects of crops continue good. Harvesting of *aman* and sowing of *rabi* crops nearly finished. Fodder sufficient. Price of rice stationary.
	17	Bogra	„ 23, '93	Nil	Weather—seasonable. *Rabi* crops doing well Cutting of *aman* almost finished. Rice selling at 15 seers per rupee. Fodder and water sufficient.
	18	Pabna	„ 23, '93	Nil	Weather—seasonable. *Aman* paddy is being harvested. Price of common rice in the Sirajganj subdivision Rs. 3-4 per maund and 11 seers per rupee in the Sadar subdivision. Fodder and water-supply sufficient.
DACCA DIVN.	19	Dacca	„ 23, '93	Nil	Weather—seasonable. Harvesting of *aman* paddy going on. Prospects fair. Mustard, *mug* and *kalai* doing well. Common rice selling from 8 to 11 seers per rupee. Fodder available. No cattle-disease.
	20	Mymensingh	„ 23, '93	Nil	Weather—seasonable. Prospects of standing crops good. Harvesting of *aman* paddy going on. Common rice is selling from 8 to 12 seers per rupee. Supply of fodder sufficient.
	21	Faridpur Goalundo Madaripur	„ 23, '93	Nil Nil Nil	Weather—seasonable. *Aman* harvest finished except in the south. *Rabi* crops doing well. Common rice sells from 11 to 13 seers per rupee. No cattle-disease. Fodder plentiful.
	22	Backergunge	„ 23, '93	Nil	Weather—seasonable. State and prospects of crops fair. Common new rice sells from 11 to 13 seers per rupee. Fodder and water sufficient.
CHITTAGONG DIVN.	23	Chittagong	„ 23, '93	Nil	Weather—seasonable, though sometimes cloudy. *Aman* being harvested. Sowing and transplantation of cold weather crops continue. Prospects fair. Prices steady. Water and fodder sufficient.
	24	Noakhali	„ 23, '93	Nil	Weather—seasonable. State and prospects of standing crops good. No cattle-disease. Fodder and water sufficient. Price of common rice going down.
	25	Tippera	„ 23, '93	Nil	Weather—seasonable. *Aman* being reaped; full 10-anna outturn expected. Prospects of *boro* paddy good. No cattle-disease. Fodder deficient in north of district. Rice selling from 10 to 12 seers per rupee.
	26	Chittagong Hill Tracts.	„ 22, '93	Nil	Weather—seasonable. Harvesting of late plough-paddy going on. Vegetables selling in the bazar. Condition of cattle generally good. Common rice sells at 9½ seers per rupee.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.			
PATNA DIVISION.			
27	Patna Dec. 23, '93	Nil	Weather—clear and cold. Harvesting of paddy continues. Prospects of *rabi* and poppy so far favourable. Prices of common rice.— Srs. Sadar ... ... 21 } per rupee. Bihar ... ... 21 }
28	Gaya „ 23, '93 Jahanabad ... Aurangabad ... Nawada ..	Nil Nil Nil Nil	Weather—cold and clear. Harvesting of paddy and pressing of sugarcane going on. Prospects of *rabi* good. Fodder and water-supply for cattle sufficient. Prices of food-grains stationary.
29	Shahabad „ 23, '93	Nil	Weather—seasonable. Prospects favourable. Harvesting of winter rice continues.
30	Saran „ 23, '93 Siwan .. Gopalganj ..	Nil Nil Nil	Weather—seasonable. Prospects of all crops, including poppy, good. Sugarcane pressing going on. Water and fodder plentiful. Prices of common rice:— Srs. Chapra ... ... 16 } Siwan ... ... 19 } per rupee. Gopalganj ... ... 19 }
31	Champaran „ 23, '93	Nil	Weather—fine and seasonable. Harvesting of paddy in progress. *Rabi* sowings going on in the area affected by floods. Poppy doing well both at Sadar and Bettiah. Prospects favourable. Fodder and water sufficient for cattle. Prices stationary.
32	Muzaffarpur „ 23, '93	Nil	Weather—cold and fair. Standing crops promising well. Sowing of *rabi* completed. Harvesting of paddy continues in places. New rice coming into the market. Cattle disease to some extent reported from Bela outpost in Sitamarhi subdivision. Fodder and water sufficient.
33	Darbhanga „ 23, '93	Nil	Weather—fair and seasonable. Harvesting of rice nearly finished. Prospects of *rabi*, *rahar* and tobacco continue favourable. Poppy doing well. There is a sufficiency of fodder and water-supply. Ordinary rice sells from 16 to 17 seers per rupee.
BHAGALPUR DIVISION.			
34	Monghyr „ 23, '93 Begusarai ... Jamui ...	Nil Nil Nil	Weather—very cold. *Rabi* sowings nearly completed. Winter rice is being harvested; outturn estimated to be about 16 annas. All standing crops doing well. Prospects of indigo good. Fodder and water sufficient. Prices of common rice (new):— Srs. Sadar ... ... 15 to 20 } Begusarai ... ... 20 } per rupee. Jamui ... ... 19½ }
35	Bhagalpur „ 23, '93 Banka ... Madhipura ... Supaul ..	Nil Nil Nil Nil	Weather—normal. The *kharif* has now been harvested; results above the average all round. *Rabi* crops are thriving; but rain would benefit the young wheat and barley. Prices falling. Common rice 18 seers 15 chittacks per rupee.
36	Purnea „ 23, '93 Kishanganj ... Araria ...	Nil Nil Nil	Weather—seasonable. *Aghani* being cut and threshed. Pressing of sugarcane going on. *Rabi* crops promise well. No cattle disease. Fodder and water sufficient. New rice is selling at 15 seers per rupee.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*				
BHAGALPUR DIVN.—*concld.*	37	**Malda** Dec. 23, '93	Nil	Weather—cold and clear. Harvesting of winter rice still going on. *Kalai* coming to maturity. Prospects of *rabi* crops favourable. Common rice sells from 13 to 21 seers per rupee. Fodder and water ample.
	88	Sonthal Parganas ,, 23, '93 Deoghur ... Godda ... Jamtara ... Pakur ... Rajmahal ...	Nil Nil Nil Nil Nil Nil	Weather—seasonable. Harvesting of paddy continues. Standing crops doing well. Price of common rice (new) 15 to 20 seers per rupee. Fodder and water sufficient.
ORISSA.				
ORISSA DIVN.	39	Cuttack ,, 23, '93	Nil	Weather—seasonable. *Sarad* harvest in progress. *Mug* doing well. Prices of common rice:— Srs. c. Srs. c. Sadar ... .. 10 8 to 16 0 Jajpur ... ... 13 2 to 18 6 Kendrapara ... ... 15 0 to 21 0 Banki ... ... 21 0 } per rupee.
	40	Puri ...		Report not received
	41	**Balasore** ,, 23, '93	Nil	Weather—seasonable. Harvesting of winter rice continues. Prices stationary. Fodder and water sufficient.
CHOTA NAGPUR. *South-West Frontier Agency.*				
CHOTA NAGPUR DIVN.	42	Hazaribagh Dec. 23, '93 Giridi ...	Nil Nil	Weather—seasonable. Harvesting of paddy completed; outturn excellent everywhere. Sowing of poppy practically completed, and the crop is very promising. Fodder and water sufficient. Common rice selling from 14 to 20 seers per rupee.
	43	Lohardaga ,, 23, '93	Nil	Weather—seasonable. Harvesting of winter rice finished. Common rice selling at 18 seers per rupee. Fodder and water sufficient.
	44	Palamau ,, 22, '93	Nil	Weather—seasonable. Paddy harvesting nearly at an end. *Rabi* sowing finished. *Arhar* and mustard promising. Sugarcane pressing commenced. Prices stationary. Fodder sufficient.
	45	Singhbhum ,, 23, '93	Nil	Weather—clear and cold. Harvesting of paddy continues with full outturn. *Rahar* pulse also being harvested with 16 annas outturn. Cotton 8 to 10 annas outturn. Price of rice from 16 to 24 seers per rupee.
	46	Manbhum ,, 23, '93 Gobindpur ...	Nil Nil	Weather—bright and cold. Prospects of crops very good. Harvesting of rice nearly finished. Rice selling from 15 to 20 seers per rupee. Fodder and water sufficient.

Published for general information.

* Means of 6 days.

Explanation.—*Summary*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period. The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station district, ... om total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 23rd of December 1893.

					DISTRICT OBSERVATIONS.										
					Of week.				Rainfall.						
									Since 1st of month.			Since 16th October 1893.			
Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Mean for district.	Normal mean.	Variation.	Mean for district.	Normal mean.	Variation.	District.

for the last ten years. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater. The numbers denoting cloud amount represents the part of the sky covered the whole sky being denoted by 10. Under the head District observations of for the period in question during the past ten years. The means of the district are the numerical average of the rainfall returned received in the which at least a tenth of an inch fell.

Statement of Rainfall in Bengal for the week ending Saturday (8 a.m.), the 23rd of December 1893.

Meteorological Division.	District.	Station.	Rainfall. Sunday, 17th.	Monday, 18th.	Tuesday, 19th.	Wednesday, 20th.	Thursday, 21st.	Friday, 22nd.	Saturday, 23rd.	Total number of rainy days.	Rainfall of week.	Average rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 16th Oct. 1893.	Average rainfall from 16th Oct. to date.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when it less 1·0 inch of rain has fallen.

CALCUTTA, *the 26th December* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY THE 23RD OF DECEMBER 1893.

The meteorology of the week under review has again been of little importance, and calls for no detailed review, for conditions have been of fine settled north-east monsoon character throughout the period. On the 17th of December, or the first day of the week, pressure was decidedly high, and was above the normal by amounts ranging from 0·04 inch at the southern and south eastern stations to 0·06 inch and 0·07 inch in the north and west of the province. The differences of pressure were hence a little larger than usual, and the northerly winds which were blowing were fairly strong. The mean temperature was in defect of the normal at almost all stations in the province, the usual defect falling from 1° to 2°. Skies were almost cloudless throughout the province, and no rain was reported. The changes of temperature and pressure from day to day during the week have been small, and their general effect has been to make temperature somewhat higher and pressure somewhat lower than at its commencement. Indeed, on the 22nd and 23rd, the mean temperature had become in slight excess of the normal, while on the 23rd pressure was almost normal over the province. Throughout the whole week, however, a steady northerly wind current has been blowing, skies have been almost cloudless, and no rain has been reported from any station in the province.

Pressure.—The mean pressure for the week has hence been in small excess, and this excess has been largest at the northern and western stations, and smallest at the southern and south-eastern stations. Thus excess pressures of about 0·05 inch and 0·06 inch have been registered at many stations in North Bengal and at some in Bihar, while at Calcutta the excess has equalled 0·028 inch, at Gopalpur 0·024 inch, and at Chittagong 0·033 inch. The general excess for the whole province has equalled about 0·04 inch.

Temperature—Was in small defect for all except the last few days of the week, when slight excess amounts were recorded. The variation of the mean temperature of the week from the normal has therefore been small, and for the whole province the average defect only equals about a fifth of a degree, while the main defect has been confined to South-West and North Bengal, where the defect has been more than half a degree. On the other hand, slight excess average temperatures for the week have been recorded in South Bihar and East Bengal.

The actual temperatures registered during the week and their variations from the usual temperature for the present season are most clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations it will be seen have been small in both the night and day temperatures.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 23rd of December 1893.

	Normal mean maximum temperature for the week ending 23rd December.	Actual mean maximum temperature for the week ending 23rd December 1893.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 23rd December.	Actual mean minimum temperature for the week ending 23rd December 1893.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 23rd December.	Actual mean daily temperature for the week ending 23rd December 1893.	Variation of actual mean from the normal.

	Inches.
The total fall of rain from 17th to 23rd December 1893	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	Nil
The total fall from 1st January to 23rd December 1893	85·23
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·23

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

[dew], dew; =, fog.

H. STUART,
Examiner of Accounts.

CALCUTTA, *the 20th December* 1893.

Statement of principal commodities carried on the Eastern Bengal State Railway during the month of September 1893.

INCREASES.

	Tons.
Coal and coke	21,819
Due to large despatches of coal for the public to Shamnagar, Kamkinara, Damookdia-ghat, Goalundo, Kooshtea, Jalpaiguri and stations on the Bengal Central Railway.	
Cotton, manufactured	2,872
Due to despatches from Calcutta for the poojah sales. Shamnagar shows a small increase in despatches of bales of cotton-yarn.	
Grain and pulses	17,583
The increase is chiefly in despatches from Armenian-ghat, Chitpur, Ruthtolla and stations on the Northern section to the eastern districts. The crops in these districts suffered from flood.	
Gunny-bags and cloth	7,366
Jalpaiguri shows increases under this head.	
Oils	2,619
Partly due to prohibition of carriage by boat of kerosine-oil within certain limits of the port of Calcutta and partly to extension of bulk oil traffic.	

DECREASES.

	Tons.
Jute, raw	12,591
Atrai, Kooshtea, Pangsa and Goalundo show large decreases under this head.	
Railway plant and rolling-stock	8,468
Due to completion of works on the Barsoe-Kissengunge branch and the C. B. S. Railway.	

P. D. BARCLAY,
Traffic Superintendent.

The 19th December 1893.
